Mr. Avery has traced thoughtless depositors into every state in the Union, and to Europe, South America and Hawaii. He keeps a close eye on obituary columns of his newspapers and uses every clue to let depositors know they have money in the bank. But even so, his records show one deposit unclaimed since 1893. By a law effective last July, New York State will shortly get that account and any others over 22 years old, if the owners fail to show up after a due amount of advertising.

Hudson's Bay Explorer Ship Back In Port

Halifax, Sept. 29 — The eastern Arctic patrol, fresh from its 10, 912-mile tour of the Arctic archipelago, Hudson Bay and Hudson Strait, returned today on the R.M.S. Nascopie and Major D. L. McKeand, patrol commander said he was delighted with the health and general condition of the almost 6000 Eskimos with whom he came more or less directly in contact during the cruise.

"One of the chief functions of the patrol's annual tour is to contact the Eskimos at the ports of call and as the natives converge on these ports to meet the ship we obtain a good idea of how all of them are faring.

"Everywhere they were found to be in good health and generally well provided with seal and other foods which form their natural diet. Trapping of fur-bearing animals, chiefly the white fox has improved.

"The Dominion government is most desirous that the Eskimos keep off relief and therefore they are encouraged to stay where the fishing and hunting are best and only come to the trading posts when they have something to trade. We believe the self-reliance, so natural to Eskimos, should be carefully preserved and it would be soon lost if they spent too much time around the posts and drawing supplies.

"We have definite information, including vital statistics, to show Canada's Eskimo population is decidedly on the increase. Everywhere we went among them the happy-faced, vigorous children formed a considerable portion of the population.

Captain T. F. Smellie remarked his ship had encountered less ice and had more fair weather than on any previous voyage into the Canadian far north.

"We had plenty of ice in 1934," the veteran Arctic navigator said, "but since then the amount of ice has been less each year. The weather this year was exceptionally warm; we experienced little trouble with the ice in August. On our first visit to Burwell in July the harbor was full of ice but there was none when we returned in September."

For 20 years, with the exception of four years in which he was superintendent of transport on the Mackenzie river, Capt. Smellie has been in command of the Nascopie.

"We extended our voyage this season to establish Fort Ross on the southeast corner of Somerset Island. We went through some ice fields in Prince Regent Inlet on our way there and anchored 15 miles off Possession Point on the north end of Brentford Bay on Sept. 1

Manslaughter Charge Taken From Jurors

Holding there was insufficient evidence to sustain a conviction, Mr. Justice Tweedie in supreme court Monday withdrew from a jury a charge of manslaughter against Ivan McLeod, Edmonton youth.

"Evidence on which the Crown seeks a conviction is contradictory, much of it mere guess work. I would not convict on it, stated Mr. Justice Tweedie in dismissing the accused, charged with causing the death of John Williams, Edmonton war veteran in an automobile accident on the morning of August 15 last.

The accident took place on Jasper avenue between 99 and 100 streets.

Evidence was adduced that the accused had been drinking but all witnesses agreed he was not intoxicated. Police evidence was to the effect that when the accused reported the accident, liquor was smelt on his breath.

There was considerable conflict of evidence between witnesses as to parked cars on the north side of Jasper avenue at the time of the accident. Two witnesses driving a car immediately behind the accused, swore there was only one parked from the scene of the accident to the Jasper and 100 street corner. A witness stated that he heard a bump, went to the scene of the accident. He saw many cars parked on the north side of the avenue. In fact the accused could not find a parking space till he came to 100 street. This witness did not see the deceased until he was lying on the ground, although looking in the direction of the approaching automobiles.

Accused statement to the police was that the deceased came out from between parked cars, giving him no possible chance to avoid the accident.

In withdrawing the case from the jury, Mr. Justice Tweedie said "it is remarkable that nobody saw the deceased get in front of the car. The accused and his companions did not see him, nor did the two men in the car following. It is reasonable to assume he must have appeared suddenly from between parked cars. That cars were parked along the north side has been established. It is a common practice for pedestrians to come from between parked cars."

Lt-Governor Withhold Assent to Three Important Measures

Reserving his assent to three contentious bills passed at the special session of the legislature and given third reading in the House on Monday night, His Honor Lieutenant Governor J. C. Bowen threw a bombshell into ranks of all parties in the legislature on Tuesday afternoon. His unprecedented action was totally unexpected by members of the cabinet from Premier Aberhart down, and for a time held up prorogation of the special session which had opened on September 24 last. Finally, after the Social Credit members of the government had gone into hurried caucus the legislature reassembled in an atmosphere tense and charged with excitement, His Honor gave assent to eight of the eleven bills passed at the session and the house was prorogued.

Man Near Death Result of Accident

Vegreville, October 7—Struck by a car as he stood on the highway near Ranfurly about 9 p.m. Wednesday, after stepping off the bus to view another accident, Johnny Burkholder of St. Paul is in Vegreville hospital today in critical conditionn.

Burkholder was a passenger on the Lloydminister to Edmonton bus which stopped to assist a driver whose car had gone in the ditch. As he stood in the road, Burkholder was struck down by a car driven by a man named Dorward of Ranfurly which came over the hill about 100 yards away at high speed.

Another young man, named Duffy was grazed by the car and received minor hurts to his face.

Burkholder, taken to hospital in Vegreville was unconscious all night and though he partly recovered consciousness Thursday his chances of recovery are still in doubt. He is attended by Dr. Yak and Dr. W. A. Shandro.

He received a fracture of the skull, cerebral hemorrhage and sever body bruises. He was described by a hospital attendant as "badly battered."

• LOCAL & PERSONAL •

Mr. and Mrs. Frederick Stockdill of Victoria, B.C., are the guests of Mr. and Mrs. W.C. Swift for a short time before leaving for Toronto, where they will spend the winter. Mr. and Mrs. Stockdill are Mrs. Swift's parents.

Mr. and Mrs. Griswold left on Tuesday morning for their new home near Portland, Oregon. Residents of Tofield for quite a few years, they were well liked and their departure was regretted. Nevertheless their many friends wish them health and happiness in their new home.

Miss V. Berns, teacher at the Weslake school spent last week end visiting at the Werton home.

Mr. and Mrs. G. W. Green visited at the Harold Green home on Sunday.

Miss Muriel Malcolm spent Friday and Saturday in Edmonton.

"Dad" Harris, Mrs. Robertson and Dan Espelle of Sedgewick visited in Tofield on Sunday.

Mrs. Law, Mrs. Beirnes, Mrs. Taylor, Mrs. Hammond and Mrs. Abbott spent Tuesday in Edmonton.

Barney Kendall returned Thursday evening from Onoway where he has been relieving at the creamery there.

Mrs. A. Pollard returned on Friday to her home in Edmonton after a two week's visit at Tofield. She was accompanied by her daughter, Mrs. Crawford Baptist.

Mr. Wright, late of Wainwright, now of Camrose, was in town on Thursday, making his initial reading of the electric light meters. Mr. Stewart, who formerly did this work, has been promoted and transferred to Magrath.

Max Rogers spent the week end in Tofield visiting his parents.

Hallowe'en Dance

The Melody Makers orchestra, under the leadership of Bill Griffiths, will hold a Masquerade dance at the Variety Theatre on Friday, October 29th. This orchestra has been making headway for several months past and promise all attending a good time. Masquerade costumes are optional but it is expected a large number will appear in fancy dress.

Good Response To Appeal For Vegetables

The appeal for vegetables to be shipped to the drouth stricken areas of the south met with good response by the people of this district.

Under the direction of Mr. John Morton, a railway car was loaded on Monday and went on its way the same day.

BARDO

Katharean Johanson left last week for Peace River town where she has obtained a position.

Olive Johanson has gone to Holden where she is going to work.

Monrad Finseth is tearing down his barn and is rebuilding it, B. Bjornson is doing the job. Bennie Finseth is building an addition to his house.

Ivan Foshaug brought down eight geese out of one flock last Wednesday morning. Nice going, Ivan.

Mr. and Mrs. Selmer Olsenberg had their daughter christened on Sunday. Her name is Marlene Faye, Rev. Haverstein officiating. Sponsors were Mr. and Mrs. W. Simonson, Mrs. Selma Cinnamon and Bill Simonson.

Mrs. Sam Johnson of Tofield entertained the Bardo Ladies' Aid last Thursday.

Mrs. Bennie Anderson entertained the Young People's Social on Saturday night.

Mr. A. Moen returned to New Westminster, B.C., last Sunday.

Mr and Mrs. John Ness are holding a sale on Wednesday, October 6. Mr. and Mrs. M. Erickson are renting their farm.

The boys are starting to work on the rink this week and are putting in a dam. The rink will be near the school. The following players are expected to line-up with the Bardo hockey team this winter: Art Moen, L. Foshaug, G. Moen, L. Stauffer, B. Steen, A. Steen, E. Steen, D. Lohman and Phil Anderson. How about a hockey league this winter? Dodds, Ryley, Round-Hill and Bardo.

Mr. and Mrs. Fulkerd are the proud owners of a new radio.

The Y.P.S. held their third meeting on Sunday evening.

Bennie Finseth and B. Bjornson spent a few days in the city last week.

Tom Rorem has a new G.M.C. light delivery truck.

The Bardo Male Chorus have started practising for the season.

Talbert Foshaug and Gordon Hendrickson are riding new bikes.

Wedding

Mr. and Mrs. A. P. Moen announce the marriage of their eldest daughter, Mary Thoresa, to Mr. Herbert Weir McAdoo, the youngest son of Mrs. S. G. McAdoo and the late Mr. McAdoo, of Maryfield, Saskatchewan.

The wedding took place Friday evening, October 1st, at 9 o'clock, Rev. D. K. Allan officiating. The young couple will make their home on the groom's farm at Maryfield, Sask.

Farewell Party

Mr. and Mrs. Henry McGinitie gave a delightful party at their home Saturday evening, in honor of Mr. and Mrs. Herbert McAdoo who left for Maryfield, Saskatchewan, Sunday evening. The evening was spent in music and dancing after which a delicious lunch was served. Mr. and Mrs. Alfred Jevne and Mr. Henry Quale assisted in furnishing music for the occasion. Among those present were: Mr. and Mrs. Alfred Jevne, Miss Bernice and Mr. Norman Jevne, Mr. Eddie Bergen all of Wetaskiwin. Mr. and Mrs. Sam Freeman of Camrose, Alberta, Mr. Henry Quale of Round Hill, Mr. and Mrs. John Moen of Gwynne, Misses Mildred and Mabel and Mr. Herbert Johnson of Gwynne Alberta.

U.F.W.A. Notes

Mrs. McConnel entertained the U.F.W.A. at her pleasant new home for the September meeting.

While the attendance was not as large as usual owing to threshing activities, those present spent a jolly afternoon and one new member enrolled.

A most interesting paper on "Canadian Imports and Exports" was given by Mrs. M. Seale.

At this meeting the reports of the three finance committees were handed in, disclosing that the north group was far and away ahead, with their earnings. The east group came second and the central section last, therefore having to pay the penalty of entertaining the others with the October Birthday party.

This affair will be held at the home of Mrs. Donnelly Warner on Thursday, October 14th at 2:30 p.m. (Threshing permitting.)

FOR SALE—30 pigs, six weeks old, also registered Tamworth boar, 2 year-old. Apply Art Young, Tofield

Tofield C.C.F. Asks Premier to Debate in Edmonton

At a recent meeting of the Tofield C.C.F. a resolution was passed whereby letters were forwarded to Premier Aberhart and Mr Irvine asking that they agree to debate at at an early date in Edmonton. The subject to be connected with the economic theories each of them hold.

Mr. Irvine signified his willingness to debate, but at time of writing no word had been received from the Premier.

Anglican Church News

October 10—Harvest Thanksgiving Services will be held in Holy Trinity. Choral Communion at 11:00 a.m. Festal Evensong at 7:30 p.m. Special music at all services. Thanksgiving Service at Lindbrook at 2:30 p.m.

Library Notes

Outstanding new books in the local library are— "With the West in Her Eyes" by Kathleen Redmond Strange, "Green Light" by Lloyd C. Douglas, "Life Begins at Forty" by Walter B. Pitkin, "It Can't Happen Here," by Sinclair Lewis, "Gone With the Wind" by Margaret Mitchell.

The Annual Harvest Supper will be held as usual. Look out for the announcement.

A "Mission" will be held in Holy Trinity for three days, commencing next Tuesday, October 12, 13, 14. Rev. F. Berson of Bracebridge, Ont. will conduct the "Mission". All are invited to hear these "talks". Services will be 4:30 each day for children and 8 p.m. for adults.

Meats Of Quality

To be really satisfactory, meat must have tenderness according to the cut. We realize this and choose our stock accordingly, picking the best.

HEALTH

A HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION AND LIFE INSURANCE COMPANIES IN CANADA

Bad Breath

A bad breath is altogether undesirable and, for that reason, consideration should be given by everyone to the causes of the condition in order to avoid its occurrence.

The fermentation of food particles in the mouth will almost certainly cause bad breath. This commonly occurs when food is held in a decaying tooth. The proper care of the teeth by brushing them regularly after meals and at the important time of all, at bedtime, in order to get rid of food particles and by the securing of regular dental care will prevent bad breath from a source that is now common.

When there is actual disease of the mouth, such as pyorrhoea, or of the adjoining parts, bad breath may result either from the condition itself or from the fermentation of food particles which the condition favours. A healthy throat and mouth kept clean by regular use of the tooth-brush are the first considerations in preserving an inoffensive breath.

In addition to the local conditions, which act as a cause of bad breath, there are general conditions which bring it about. We think, first, of the digestive tract because in our minds a bad taste in the mouth is frequently associated with digestive upsets. Bad breath does occur quite often among those who are constipated or whose elimination is faulty. The bad breath, in such cases, is really a symptom of an abnormal condition of the digestive tract and is regarded as such by the [illegible].

Under such conditions, the remedy lies in altering the mode of living. A proper diet, avoidance of over-eating or of over-indulgence in one or more articles of diet, regular elimination, increased intake of water and exercise are the points which should first be dealt with.

The correction of any unpleasant odour should always be thought of along the lines of the removal of the cause. It is much preferable to overcome body odours by regular bathing than by attempting to overpower them by using perfumes. In the same way the logical manner of dealing with bad breath is to remove its cause.

A treatment of symptoms is necessary, but their cure and the prevention of their recurrence depend upon the treatment of the cause, the root of the condition. It never pays to temporize; it is always satisfactory to get to grips with the cause.

Questions concerning Health, addressed to the Canadian Medical Association, 184 College Street, Toronto, will be answered personally by letter.

Wages Increased: Strike Called Off

Montreal, Sept. 28.—Agreement for a general increase in wages of 15 to 25 per cent was reached today by heads of three shipping companies and representatives of the Canadian Seamen's Union which threatened to call a strike which they claimed would disrupt all Canadian shipping on the Great Lakes.

New Zealanders Refuse To Handle Cargoes For Japan

Wellington, N.Z., Sept. 28—The Auckland branch of the New Zealand Federation of Labor has ordered its longshoremen to refuse to handle Japanese goods and war materials destined to the Japanese government. The move results from the Japanese bombardment of civilian centres in China.

At Dunedin yesterday longshoremen decided to refuse to load shipments of scrap iron for Japan.

One set harness with breeching at	$47.00

RIFLES AND SHELLS

Model sixty-seven Winchester single shot .22 rifle	$8.00
Model sixty-eight Winchester single shot with peep sights @	$9.00
Model 69 Winchester repeater, peep sights	$15.25
WHIZ BANG Twenty-two shorts, two boxes	45c
SUPER CLEAN Twenty-two Long rifle, two boxes	65c

MEN!

HERE IS AN OPPORTUNITY TO GET A POCKET KNIFE AT A REAL PRICE. WE HAVE THE FINEST ASSORTMENT OF KNIVES IN TOWN.

Two blades and leather punch, a genuine Boker knife at	85c
Stag Handle Stock Knife at	65c
BOYS' KNIFE at	22c

Dishes, Tea Sets, and Dinnerware sets at Bargain Prices

Ninety-Six piece set Semi-porcelain dinner set at	$13.50
Three piece set cream, sugar and tea pot at	90c
Twenty-three piece tea sets	$1.35
Eight cup Medalta Tea Pots	35c
Six cup Medalta Tea Pots	30c
Covered Vegetable Dishes	45c & 55c
Gold Band dinner plates, each	15c
Table Mats in sets of three	35c

Savings in Kitchen Ware that you cannot afford to miss!

Butcher Knives, up from	35c
Utility Dishpan in Blue and green Enamel, each	39c
Aluminum Coffee Percolators, ea.	75c
Aluminum Dishpans at	$1.15
Aluminum Double boilers, each	75c
Aluminum Potato pots, each	80c
Large size Pure copper Tea Kettles, each	$2.50
TWO COAT IVORY ENAMEL WARE	
Percolators at	$1.35
Tea Pots at	$1.35
Double Boilers, two pint	$1.25
Three pint	$1.40

Eveready Batteries

Heavy Duty Layerbilt at	$3.95
Heavy Duty round cell construction at	$2.95

RADIOS!

We have a few second hand sets, fully overhauled that we are offering at prices from $3.00 per set up. If you cannot afford a new set, look these over—they will give you month's of enjoyment at a minimum of cost.

COLEMAN LAMPS AND LANTERNS

Gasoline Lamps up from	$5.45
Coal Oil model	$6.50
Lanterns in both coal oil and gas	$7.90

During this sale we will allow you $1.00 for your old lamp on the purchase of one of the new models. We carry a complete stock of Mantles and Coleman parts.

LUMBER SPECIALS

¼ inch 3 ply FIR VENEER in sheets 48x96, per sheet	$1.95
Plain building paper in rolls of 400 sq. feet, per roll	90c
Tar Paper, a good grade, per roll	$1.30
10x12 3 light sash, each	95c
9x10-6 light sash, each	$1.50
8x10-4 light sash, each	95c
8x10-6 light sash, each	$1.40
20x24-2 light windows, each	$1.95
10x20-4 light windows, each	$1.95
16x24-2 light windows, each	$1.75
2x4 and 2x6 off grade dimension, per 1000 BF	$17.00
7 Foot TAMARAC posts, each	15c
1x6 SHIPLAP, good dry stock, per 1000 BF	$27.00
2x4 and 2x6 dimension, 100 BF	$27.00

Prest-o-Lite Car and Radio Batteries

1 only 13 plate battery, 21 month guarantee	$11.50
1 only 13 plate battery 12 month guarantee	$8.00

MURESCO

COMPLETE STOCK OF ALL COLORS Package	65c

Crown Lumber Company, Tofield

Minimum Wage Established

Recognizing that the place of labour in industry is of paramount importance to the welfare and future development of our province, Alberta has taken the lead in putting into force regulations which should ameliorate to a very great extent the lot of industrial employees.

The Board of Industrial Relations has established a scale on Minimum Wages and regulation of working hours which will come into effect on October 1st. This rate is applicable to all workers in industry in the province with the exception of farm workers and domestic servants, who are specifically exempted under the Male Minimum Wage act. Workers in some casual jobs such as shovelling snow, gardens, etc., of temporary duration and also those whose wages are governed by an Industrial Standards agreement brought into effect by mutual arrangement between employers and employees. This is the first basic minimum wage rate applicable to industry and employment generally to be established in Canada.

It will be universally recognized as a long forward step in the interest of all employees, and particularly those workers who are not in the classes of highly skilled and specialized labor, and whose wages have thus been in the lower brackets and some times maintained at levels on which it has been most difficult to maintain reasonable living conditions.

The new rates are applicable to men only and will not disturb the rates for women established under longer receive a minimum of 33 1-3 cents an hour at a minimum of 48 hours work a week would mean $16 per week.

Experienced workers are defined in the order as those who have been engaged for 12 months in the work in which they are employed or similar employment.

For the first six months these

(Continued on back page)

Europe Hoarding Food

Vivid memories of food scarcity in bread lines during the Great War and the impending fear of a new war in Europe has resulted in the development of food storing policies in a number of European countries.

The British government is developing such a plan but not a great deal is being said about it at the present time. Certainly the storage of vast supplies of food in safe places is considered a vital necessity by many in Great Britain.

Sweden has allocated a fund of $65 million to build up reserves of food stuffs and raw materials.

France has devised a system for storage of supplies of at least 12 million bushels of wheat to be used as a reserve.

Italy is planning on building up a reserve of over a million tons of wheat and hopes to increase this to two million tons by the end of 1938.

In Germany very strict regulations are in force regarding the disposal of all grains. This country has striven desperately to become self-supporting as regards wheat. Bad crops last year and this have worked against this progress but the objective has not been changed.

It is the fear of war and not the dread of famine that has caused all this food hoarding. Europe's attitude to war is a fatalistic one. There has always been war and always will be they say. Consequently the best thing to do is to provide against its occurrence.—Wheat Pool Budget.

So Sudden

Officer: "You've been doing sixty miles an hour. Don't you care anything about the law?"

Lady: "Why officer, how can I tell? I've only just met you." Camp and Mill News.

Bumper Crop Grapes Now Selling Cheaply

A bumper crop of grapes is being picked this year in the Niagara Peninsula, Ontario, where nearly all the commercial crop of this fruit is grown in Canada. This year's crop is more than twice that of 1936 when 24,104,000 pounds were harvested, of which Ontario accounted for 21,640,000 pounds and British Columbia 2,464,000 pounds.

During the next two or three weeks fresh grapes will be available in 6-quart baskets at reasonable prices. The fruit is healthful, wholesome and nutritious and is excellent to eat fresh. It is also incomparably good for jam, jelly and as a beverage, for grape juice is a refreshing and delectable drink.

History discloses that the grape was cultivated by the Ancients over five thousand years ago and so important was it in national health and national economy that its introduction was ascribed to a god. With the Romans this god was Bacchus, with the Greeks, Dionysus; with the Egyptians it was Osiris; while the Hebrews ascribed its introduction to Noah.

When the Norsemen first visited the North American continent over 1000 years ago, they found the grape growing wild in "Vineland" the territory now known as New England. Grape culture in Canada dates from 1857. In 1890 there were only 400 acres under cultivation to grapes, now there are about 15,000 acres.

Christmas and New Year's Cruises to Isle of Romance

Christmas and New Year's Day at sea! There is a thrill and a novelty about it for the landlubber that is seldom forgotten. In the "good old days" the spirit of Christmas seemed to exude a magnetizing influence which brought members of families from far corners to join the old folks at home. In these more modern days, however, while that same spirit is undiminished, there is an understandable urge for travel during this festive season. Routes have been opened up to islands of sunshine and health, and modern liners ply between them and our mainland, so that the Christmas and New Year holiday week is becoming more and more a popular time to take a trip, according to Victor E. Ehe, Passenger Traffic Manager of the Canadian National Steamships.

First of all there is the liner Lady Rodney sailing from Boston on Christmas morning, providing a convenient 6-day sea trip to Bermuda, with arrival back in Boston on the liner Lady Somers on December 30, allowing New Year's Day to be spent at home.

On the same steamer—the Christmas Day sailing of the Lady Rodney—the holiday traveller can make the popular Jamaica trip—the "Round Voyage" of 19 days duration, with calls at Bermuda and Nassau both ways, spending also New Year's Day at sea arriving back to Boston January 13.

The New Year's sailings will be the liner Lady Nelson from Boston on the morning of January first, which will include a 16-day cruise to the Leeward Islands or a 30-day cruise to Barbados with 12 days ashore; a 30-day cruise to Trinidad with 7 days ashore; or a 30-day cruise to British Guiana with 2 days ashore. During these periods on land at Barbados, Trinidad or British Guiana, hotel expenses with meals, are included in the round trip cruise fare.

The Facts About Banking in Canada

Reproduced from the Fourth Broadcast in a Series by Vernon Knowles for the Chartered Banks of Canada and Delivered Over a Province-Wide Network of Alberta Stations on Tuesday Evening, September 28th, from 8:30 to 8:45, and Wednesday, September 29th, from 12:00 noon to 12:15.

Loans Made to 57,634 Albertans This Year . . . . Sixty Per Cent to Individuals . . . . How a Bank is Formed . . . . Shareholders Face "Double Liability" . . . . Banks Regulated by Canadian People Through Parliament . . . . Deals With Bank Services . . . . 49,000 Shareholders Own Canada's Chartered Banks . . . No Concentration of Power . . . Tells About Alberta's Bank Depositors and Shareholders.

THIS year, between the first day of January and the last day of August, Canada's Chartered Banks have made loans to no fewer than 57,634 Alberta customers. Who got these loans? 20,662 of them went direct to farmers and ranchers. Other individuals obtained 13,050 loans. 1,701 home-owners got Home Improvement Loans—so that Canada's Chartered Banks this year have extended new loans to 35,363 individuals—farmers, ranchers, home-owners and other private borrowers. Commercial loans numbering 12,936 have been made to other than individuals in the same period; municipalities and school districts also obtained many new loans.

Out of 57,634 new loans made this year in Alberta, more than 60 per cent of them went to individuals. Don't let anyone tell you we've stopped lending in Alberta.

Now, I return to the question, "What is a bank?" As I said in an earlier broadcast: "Above all things a bank is a place where you or your children can deposit money with absolute assurance that any time you demand it you can get it back in full, intact and with interest."

A bank is formed by a group of responsible people who believe that they can offer a service which a community needs and is willing to pay for, at a rate which will yield a reasonable profit. These are the motives of any business.

Those desiring to form the bank name five Provisional Directors, who then must petition the Dominion Parliament for an Act of Incorporation. The Bank Act demands that the Provisional Directors must themselves be subscribers to shares in the bank. The Bank Act is a Dominion law—without such law the business of accepting the people's deposits and making loans would be wholly without safeguard.

After Parliament has acted, the Provisional Directors are authorized to invite public subscriptions for the shares. Before any person buys any share the statute requires that there be placed before him, in large type, Section 125 of the Bank Act, which informs him that if the bank becomes insolvent, the shareholder will be liable to pay once more an amount equal to the par value of his shares. This is what is known as "double liability." Since the Bank of Canada was opened the double liability has been slightly modified and, as this central bank under Government control, assumes more and more the right of note issue, the double liability of chartered bank shareholders will be further adjusted.

You will see that the law puts a serious responsibility upon the shareholders and deliberately forces it upon his attention, in order that those who are going to handle other people's money must realize their responsibility to the full. The people are thus safeguarded against fly-by-night promoters.

When Half a Million Dollars worth of stock in the new bank has been subscribed and half of that amount paid up, this $250,000 must be placed in the hands of the Minister of Finance. When the Minister is satisfied that the public interest is safeguarded, he returns the $250,000 to the bank and issues a certificate permitting the bank to open for business. The Bank Act then becomes its charter. Any idea that this bank has to put money into Government Bonds to obtain currency is wholly without foundation.

Canada's Chartered Banks do not enjoy a monopoly of the right to print money. They never did enjoy any such monopoly. You often hear it said that Canada's Chartered Banks alone can "make money" and that we can print our own notes and circulate them in unlimited amounts—such statements are absolutely false. Up to 1934 each Chartered Bank had the right to issue notes—not in unlimited amounts—but only up to the amount of the capital actually paid up. There were two exceptions to this rule—the first was that we were permitted to make a fifteen per cent increase in note issue, for a limited period only, for crop moving purposes. The second exception was that over our paid-up capital we could issue dollar for dollar against gold or Dominion notes, deposited in the central gold reserves. These exceptions are no longer in force.

With the Bank of Canada established, and controlled by the Dominion Government, we can now issue our own notes only up to ninety per cent of the amount of our paid-up capital. Every year there is to be a further reduction. The Bank of Canada issues notes and as the note issue right of the Chartered Banks is progressively cut down the Bank of Canada's note issue will take its place. In other words, the right to issue our own notes is being steadily taken from us and vested in the Bank of Canada, which, I would remind you, is the Government's central bank, not a chartered bank.

I pointed out, in an earlier broadcast, that no business is subject to such complete control and such Parliamentary scrutiny as are the Chartered Banks. Can you name another business in Canada in which every company charter automatically expires at one time and can only be renewed after Parliamentary investigation?

Although the Bank Act can be amended at any time by Parliament every ten years bank charters expire and the Act is thrown open for what is known as the "decennial revision"—which is a most sweeping and searching inquiry, conducted by the Banking and Commerce Committee of the House of Commons. Mr. Norman Jaques, M.P. for Wetaskiwin; Mr. J. C. Landeryou, M.P. for Calgary East, and Mr. Victor Quelch, M.P. for Acadia, are the Alberta Members of the Banking and Commerce Committee. It is a large Committee with every Province and every political party represented, so you can see that the people do not lack in any sense, for the most penetrating examination of the business of banking. Who regulates the banks? None other than the Canadian people, through their elected representatives.

Into the Bank Act, by reason of the work of the Committee from year to year, have been built all of the safeguards arising from the lessons of the past.

Now I would like to deal with the services that a bank performs. These are many and varied. The bank accepts and safeguards your deposits and extends the credit based upon them to responsible people.

Alberta folk will easily follow the illustration of bank credit I'm now going to give you. This is harvest-time and in the fortunate parts of the Province the farmer is starting to haul his grain to the elevator. When he delivers his wagon-load there, he gets a grain ticket.

He takes the ticket into the bank and the bank gives him cash for it.

What does the bank do with the grain ticket then?

At the end of the day the bank lists separately all of the grain tickets issued by each elevator company. It sends them to Calgary or Winnipeg, to be collected from the Head Office of the Elevator Company which issued the tickets.

How does the Elevator Company redeem the tickets? During the movement of a heavy crop, such a company is not likely to have sufficient funds of its own to purchase all of the grain handled from day to day.

So the bank advances the sum required against the security of the grain, until the buyer in Liverpool pays for it. The bank collects from him. The proceeds go to the grain company which pays off the money the bank advanced.

What happens is this:

The farmer gets his cash on delivery of the grain to the elevator, without any waiting. And the bank provides credit from that moment on, until the grain is paid for, probably months later.

Let me point out that the "tickets" were anchored to something—in this case they were anchored to the finest form of real wealth—new wealth—grain, newly produced from the soil. You know no ship can be anchored safely unless the anchor is firmly embedded in something.

We extend bank credit to people who can, with some certainty, be expected to repay. We can only lend to responsible people because we ourselves are responsible to the depositors.

The banks provide the machinery for carrying out dozens of widely-varied, day-to-day transactions; simplifying business and facilitating the exchange of goods and services. The bank provides a place for you to leave in safe custody valuable documents or other papers; your title deeds; your life and fire insurance policies; valuables such as jewelery; and stocks and bonds. The bank collects your commercial bills, either at home or abroad. It transfers money from one part of the country to another, as you may require; and it takes care of shipment and safeguarding of securities. These are only examples of the services a Chartered Bank performs.

No doubt many of our listeners have been told that banks simply swap cheques. There seems to be an idea that there is never any settlement between banks. Here is another homely illustration: Tom Smith, in Calgary, runs a clothing store and Jim McGregor goes in to buy a suit of clothes. He gives Tom Smith his cheque for, say $37.50. The cheque is drawn on Jim's bank—let's call it Bank A. On the other hand Tom does business with Bank B so Tom deposits Jim's cheque in Bank B and immediately gets credit for the face amount.

But then what happens? Does Bank B simply send the cheque to Bank A, and does Bank A simply cancel that cheque and destroy it, after deducting the $37.50 from Jim's account?

No—what does happen is this—Before Jim McGregor's cheque gets back to Jim's bank it has to go through the Clearing House. The Clearing House is part of a national system, under which settlements are effected through the Bank of Canada. Daily each bank gathers together and totals the cheques deposited with it which are drawn upon each of the other banks. Every morning these are taken to the Clearing House. Where it is found that one bank has a balance due to it from any other bank, the difference is settled daily, through the Bank of Canada, by the payment of cash—not chartered bank bills—cash. This ultimate settlement through the Clearing House system is altogether ignored, or is too little understood, by many of those who criticize the Banks.

It is not difficult to understand when reduced to its simplest terms. We point out to you that, if Jim McGregor's cheque was the only cheque issued that day, Jim's Bank, Bank A, would have had to pay to Tom's Bank, Bank B, the sum of $37.50 in cash—bills of the Bank of Canada.

Every balance between banks is ultimately settled in cash.

Now who owns the banks? There are more than 49,000 shareholders in Canada's Chartered Banks, more than 500 of them in Alberta. Most of the shareholdings are small—the average is less than 50 shares. Many of the shareholders are women to whom bank shares have been *willed* or Trustees who hold the shares for Estates of persons who have died. Many others are individuals who, after a lifetime of toil have sold their farms, or other holdings, and invested their money in bank shares as a source of income. These are examples to show the kind of people who own Canada's Banks. These are the people who are accused of being a part of the fabled "International Ring." They are mostly Canadians, your fellow-citizens, and most of the business that is done by their banks is Canadian business. Some of you may have been given a word-picture of a small group of men, owning all the banks, sitting around a table and conspiring daily to use all of everybody else's money for their own profit. Let us examine it—There is no concentration of power in the hands of any small group. The shareholders annually elect, of their own free choice, 167 Directors of known and proven business ability. Their work is to safeguard the interests of the shareholders, note-holders and depositors, in co-operation with the salaried executives—every one of whom started out as a junior in some small branch. These Directors own less than four per cent of the shares issued.

Banks each month have to report to the Government sworn particulars of the loans made to Bank Directors and to firms in which they are partners and loans for which they are guarantors. The most recent return shows that these advances are only a 100th part of the total bank loans.

No Director of a bank may vote, nor may he even be present at a meeting of the Board, when loans to himself, or any business concern in which he is a partner or director, are under consideration.

About 60% of Canada's people have savings deposits. Applying the same percentage to the population of Alberta it would appear that roughly 340,000 Albertans are savings depositors. A bank deposit is a loan to the bank. It is a debt owing by the bank. If there is a tyranny in lending are the banks tyrannized by the depositors? When a friend borrows from another is the lender a tyrant? We leave the answer to our listeners.

Parliament in its wisdom, acting upon recommendations of the Banking and Commerce Committee from time to time, has legislated to prevent the banks from doing certain things.

A bank may not lend money on mortgages, for loans must be of short term and quickly realizable. A bank is forbidden to engage in trade. It cannot buy, or lend, against its own shares or those of any other bank.

There are provisions that restrict a bank in lending to any Director. It cannot let its name appear on certain prospectuses. It cannot let its staff represent insurance companies and there are heavy penalties laid down for violation of these and other provisions of the Bank Act.

Canada's Chartered Banks are not your masters; they are not tyrannical; they are your *servants*—The Canadian People, through their Parliament, have so legislated as to keep them that way.

Just before my time is up, I would like to say that I have before me a poster which an organization in Edmonton is sending out over the Province. It says, "Tax the Banks—It Costs Them Nothing."

The poster to which I have referred presumes to quote from the Encyclopaedia Britannica, but I assure you that the extracts are divorced from their context and are so used as to convey a meaning exactly opposite from the meaning intended by the author, Mr. R. G. Hawtrey, an officer of the British Treasury.

You all know that when you pay taxes it costs you something. A bank is no different, in that respect, from any of you. Would your own municipality say that when the bank pays its taxes, the municipality gets nothing? However, we do not plan to waste time on absurdities, but let me say just this: That we showed you last week, that 100 bank branches in Alberta were operated at a loss in 1935, and that new and added taxes had since been imposed.

We showed you the alternative — either pass the added charges on to our customers, or close branches to the point where ends can be made to meet. If it costs us nothing to pay taxes, we would have no such alternative to worry about.

WORLD OF WHEAT

By H. G. L. Strange
Director "Crop Testing Plan."

The World's millers are now paying a price for the top grades of Canadian wheat that is unusually high when compared with the prices they are offering for other sorts.

Why should this be, when wheats are arriving daily from Australia, Argentina, Roumania, Russia, India, the United States and other countries?

The reason, it appears, is as follows:—

The wheats arriving in Europe from Canada's competitors are not, as yet, up to their usual fair quality. Millers, therefore, find it necessary to use a small percentage of high grade "Manitoba's" to bring their flour "mix" up to average quality.

But Canada has only a small quantity of these high grades available hence millers are bidding keenly for them.

Canada will have, I calculate, about 90 million bushels for export, but 21 million of this is Durum and 19 million Garnet, leaving something less than 50 million only of our best grades for overseas sale, or less than a million bushels a week.

How long [illegible] the high prices for "Manitobas" [illegible]? It depends mainly upon whether the quality of the wheats from Canada's competitors improves, or whether millers find a way to make good flour with the lower quality sorts!

Following factors have tended to raise price—Holland will import Roumanian wheat — Continued wet weather hinders Italian corn gathering and wheat sowing—Belgium has obtained poor wheat crop —"Carry over" stocks in Europeans importing countries greatly diminished — [illegible] affecting South African wheat crop—Austria negotiating for Russian wheat and rye.

Following factors have tended to lower price —Expect Italy will soon order corn meal to be mixed with bread flour—Lack of available ocean tonnage— European importing countries may import 40 million less than in 1936-37—General improvement after rains in Argentina—Conditions favor large Danubian wheat acreage —Record export citrous fruit from Palestine—Limited gold supplies in importing countries.

Vast Northern Mine Camps Are Envisaged

At the present rate of mining development in the north, Goldfields and Yellowknife will soon become huge camps like Red Lake in Ontario, in the opinion of G. A. Thompson, Winnipeg, general manager of Canadian Airways, who arrived in the city Monday.

His vision for the Athabasca and Great Slave lake mineral fields was of real magnitude when he explained that at Red Lake there are now about 50 arrivals and departures of airplanes daily, serving a population of some 6000.

To handle the huge volume of air transport traffic that has developed from Goldfields into Dirty, Tazin and other small lakes and from Yellowknife to Gordon Lake, Canadian Airways after freeze-up will bring in its huge Junkers freighter CF-ARM.

Known generally as "the flying box-car" this Junkers machine is the largest single-engined freighter in the world and has a pay load of three tons on skis. It is powered by a 1350 h.p. Rolls Royce motor. It will first be used for freighting at Goldfields and then moved to Yellowknife to carry freight into Gordon Lake.

The variety of cargoes this plane has carried seem incongruous when considered as aircraft loads. Huge mine boilers, all sorts of machine parts, horses, cattle, baled hay and any number of odd cargoes. The plane is loaded like a ship and the cargo lowered by a crane through a hatch in the roof of the cabin.

The "box-car" which is just completing a 300-ton freight contract at Argosy Gold Mines in Ontario, will be flown directly overland to Lake Athabasca and will not come to Edmonton. It will be piloted by Stewart McRorie.

Mr. Thompson spent Monday in conference with Capt. W. R. "Wop" May, O.B.E., superintendent for the Mackenzie River district of Canadian Airways. He will shortly go north to Goldfields, returning here on his way east.

A new Norseman plane will be added to the company's Edmonton fleet after freeze-up, the general manager said, and three of the present planes will be fitted with new H-type Wasp 550 H.P. motors.

"This has been the best year in the history of the company, all across Canada," said Mr. Thompson. "We have handled more traffic than ever before and we have to add to our fleets of aircraft."

The airways executive is a flier of high reputation throughout Canada. He served with the Royal Air Force during the Great War with the rank of Squadron Leader and in 1920 spent eight months with the Royal Canadian Air Force at Camp Borden.

In 1924 he entered the Ontario provincial air service when it was formed, joining Western Canada Airways, now Canadian Airways, in 1928, as superintendent at The Pas, Manitoba. In November 1930, he became assistant general manager in charge of operations at Winnipeg, attaining his present post as general manager two years ago.

Junior Wheat Clubs

The maintenance of quality in wheat production in Alberta is a matter of vital importance to the province. Probably the most successful plan yet devised to encourage the use of good seed is the development of the Junior Wheat Clubs. This undertaking is carried on under the supervision and direction of the Field Crops Branch, Department of Agriculture, Edmonton, together with the Alberta Wheat Pool in co-operation with the dominion government's National Council of Boys' and Girls' Clubwork.

The boys engaged in this Junior Wheat Club work are at the age when impressions sink deeply. They are being impressed with the value of good seed in a very practical way. The lessons should stay with them during their lives. This year some 800 boys have participated in this work.

The boys produce the seed themselves, and, being scattered the length and breadth of the arable section of the province, a considerable volume of excellent seed is provided over an extensive area each year. In addition, adult farmers become interested and in most districts where clubs operate the general tendency is for an increasingly higher standard of seed sown.

The Alberta Wheat Pool takes an extensive part in this work in the firm belief that through the Junior Wheat Clubs a real service is being rendered to agriculture in Alberta.

Canadian Rockies Have Rainbow Canyon

JASPER, Alta, October 4— How many rainbows have you seen at one time? Rainbow Canyon, a few miles west of here on the main line of the Canadian National Railways through the Rockies, boasts them by the half-dozen at a single sitting. At one point where the rock walls are sheerest, the trail hiker can stand between two waterfalls, the upper 50 feet and the lower 20 feet in height. Mist and spray fill the gorge. On a bright, sunny day as many as six [illegible] bows have been seen playing hide and seek in the swirl of vapor. Rainbow Canyon, however does not get its name from this phenomenon but from the Rainbow Range in which it is situated. Mightiest massif in this upthrust is Mount Robson (12,972 ft) highest peak in the Canadian Rockies now reserved as a provincial park and possessed of a charming bunga-

Statement Re. Grading of Wheat

By
The Board of Grain Commissioners.

Much of the wheat being marketed this year in Alberta exhibits characteristics not usually found in grain grown in this area. The result of this condition is that both farmers and elevator operators are often disappointed in the grades received. In grading wheat, The Canada Grain Act defines the minimum requirements for each of the statutory or higher grades. These specifications can be changed only by the Parliament of Canada. The last amendment to the grades was made in June 1934 when provision was made for the Garnet grades. There has been no major change in the Red Spring wheat or Amber Durum grades since the Act was rewritten in 1930. Therefore, the standard requirements of these grades have not been changed during the last seven years. The Grain Inspectors employed by the Board of Grain Commissioners have no option but to grade according to these standards. The characteristics of the grain can and does vary from year to year, but the standards remain constant and the grading uniform.

The minimum requirements for the statutory grades are defined in Schedule 1 of the Act under the following headings:—Weight per Bushel, Variety, Hard Vitreous Kernels, Standard of Quality and Maximum Limits of Foreign Material and Wheats of Other Classes. Thus, No. 1 Northern must weight 60 pounds per measured bushel, be composed of Marquis or a variety equal to Marquis, contain 65 per cent hard vitreous kernels, be well matured and practically free from damaged kernels, be free of foreign matter other than cereal grains and practically free of cereal grains and durum wheat, containing under 1 per cent of total impurities.

In grading a higher standard than required under any one heading will not affect a [illegible] under any other heading; for example, wheat weighing 65 pounds per bushel, but immature or containing damaged kernels cannot be graded No. 1 Northern.

Red Spring Wheats

This year the red spring wheats are peculiar in that the grain is plump but contains improperly ripened kernels, green kernels, bronzy kernels and with many of the kernels infected with black point, also wood stain.

Improperly Ripened Kernels

Wheat composed of improperly ripened grain is usually quite plump, weighing 60 pounds to 66 pounds per measured bushel. It is characterized by having a dull brownish color instead of the usual clear reddish color. Some producers and elevator operators are of the opinion that the color would improve by leaving the grain in storage for a month or two. Previous experience with "off colored" wheat from other areas would indicate this is not the case.

This type of wheat produces a flour having a greyish color which the bakers dislike. It is, therefore, degraded into No. 2 Northern or lower depending upon the extent of the discoloration of the grain.

On many of the "Advices of Inspection" sent to farmers by the elevator companies this condition is indicated by the term "immature". Since this grain usually is plump the term is confusing to the average person. The term "improperly ripened" might be used.

Bronzy Colored Grain

In the more northerly sections of the province some of the wheat has developed a bronzy color. This color is difficult to determine. To see it properly one must look at the grain in daylight and preferably by a north window.

Grain with this characteristic produces a flour with an inferior color and is degraded into the lower grades according to the intensity of the bronze color on the grain.

Green Kernels

Another grain characteristic in this area is the presence of green kernels intermingled with the improperly ripened kernels, bronzy green grain, or even normally ripened wheat. These kernels range in color from a pea-green to a greenish-brown. When present, even in normally ripened wheat, they introduce serious milling difficulties and produce a flour that is decidedly "off color." Grain containing these defective kernels is degraded into No. 2 Northern or lower depending upon the quantity present.

This condition is indicated on the "Advices of Inspection" by the term "green". Since these kernels are easily detected it causes much less comment and criticism than the improperly ripened or bronzy colored grain.

Black-Point

"Black-point" or "smudge" is the common name given to a black or brownish coloration of the seed coat. In some instances the discoloration is confined solely to the germ end and varies from a very slight infection at the top to a light smoky color of this portion of the kernel. In other instances the damage is more extensive and may vary from a dark discoloration along or inside the crease to a complete discoloration of the entire seed coat with consequent damage in color to the endosperm and the resulting flour. For this reason wheat with this defect is degraded depending upon the number of infected kernels and the amount of the infection on the kernel. This condition is indicated by the term "black-point" on the "Advices of Inspection." It is quite easily detected in grain and therefore causes a very little criticism in the red spring wheats, which can carry a fair amount of damaged kernels before it is degraded.

Wood Stain

Another damage prevalent this year is the discoloration of the wheat by wood stain. This damage is mostly caused by the wheat coming into contact with moist wood seeds after cutting and during threshing. The result is sometimes deep inky discoloration of the wheat which necessitates the lowering of the grade.

Plan for Unification of United Grain Growers and Man. Pool Elevators

A strong plea for unification of United Grain Growers Limited and the Manitoba Pool Elevators was made by the United Farmers of Manitoba before the Royal Grain Inquiry Commission when under Mr. Justice Turgeon sittings were resumed in Winnipeg, October 1st. The U.F.M. brief presented by J. S. Wood, president, pointed out that the Association had helped to start both these farmer-owned companies and that the competition which had now developed between them was a matter of regret.

"The unfortunate cleavage" the brief said "has impaired the effectiveness and prestige of the farmers' movement as a coherent and united enterprise." But "from many quarters," Mr. Wood declared, "there is reiterated expression of impatience with conditions as they are and of increasing hope that these two great bodies of farmer-producers may be led to combine their activities and march undivided towards the progress of the future."

Pipeless Organ at CN Ex. Bandshell

AT THIS year's Canadian National Exhibition one of the outstanding attractions was the daily public concert from the new Bandshell in the centre of the grounds where the Northern-Hammond Organ, an entirely new kind of organ using electrical impulses with no pipes or reeds, was featured; thus proving the organ now has other fields than churches and auditoriums or the home. This new instrument which is not affected by heat, cold or dampness, is the latest product of the Northern Electric Company's plant in Montreal.

The "Big Interests" in Life Insurance

Are the Policyholders and Beneficiaries

IN Life Insurance, the "Big Interests" are the millions of Canadian policyholders and beneficiaries—men, women and children who share in the protection made possible by individual thrift and foresight.

The concern of those who act on behalf of these policyholders and beneficiaries is to safeguard their interests. Their accumulated savings, amounting to more than two billion dollars, must be invested wisely to obtain the greatest yield consistent with safety. Every promise made in Life Insurance policies must be fulfilled completely and promptly.

Canadian policyholders may feel justly proud of the wise and careful administration of their trust funds. Even in the darkest days of the depression, their companies met every obligation promptly and fully—bringing financial security to thousands of Canadian homes.

There is added satisfaction in the fact that the investment of Life Insurance funds has helped to build Canadian homes, schools and hospitals—and develop agriculture, industries and public utilities. Thus, the whole Dominion benefits from Life Insurance.

In the future, as in the past, Canadian policyholders and beneficiaries must always be the "Big Interests" of Life Insurance.

THE PRESS BILL PASSED—

DESPITE THE most vigorous protests by the opposition and independent members, the Bill known as the "Press Bill" was passed in the legislature this week. Later the Bill, one of three, was referred to the Governor-General at Ottawa, the Lieutenant-Governor at Edmonton witholding signature. It will take several days for full reports to reach Ottawa and a communication referring to them returned to Edmonton, and in the meantime the Bill is simply held in abeyance. The same will apply to the Bill taxing banks.

Naturally the press of the province—and for that matter the dominion—were very much up in arms against the measure, and presented a lengthy brief counselling the dropping of the bill, to a sitting of the Agricultural Committee. The brief failed in its purpose, the government being determined to pass the measure. Naturally the first sting of legislation like Bank Taxation Bill and the Press Bill is felt by the banks and newspapers, but while one could elaborate on the short comings of the measures in this respect, the most important thing is the effect of the Bills on the general public. As regards the banks, it is simply a question as to how much they can pay; if taxation is imposed greater than their ability to pay, they are simply forced out of business. There is no other alternative. It is not a question whether one is friendly or unfriendly towards them. Amid all the intricacies of the banking business the principle of profit and loss stands and excessive losses means closure. Banks render a service to the public and no matter what degree of excellence, or near-excellence they reach, a service is rendered, a service which if withheld, would cause considerable disruption in ordinary every-day business channels. A number of bank employees would suffer direct hardship—but in the aggregate the greatest amount of hurt would be felt by the general public.

When one mentions the press, it must be recognized that there is a vast difference between newspapers. Some cater to millions of people, using machines of mammoth size and terrific speed. Others cater to a mere few hundred using elementary equipment. Prefacing printing of large newspapers are editors with trained corps of writers. Prefacing the printing of the smallest sheets is often found an individual whose education in no small degree has come by weighing the vanities, generosities and peculiarities of the men and women round about him. But no matter whether the paper is large or small, numerically important or unimportant, each publisher desires it to be a public servant. That there are exceptions, goes without saying, but we believe, generally speaking, the above is true. Even so, it must be understood, a newspaper is not a philanthropic institution, it must have revenue derived from advertising and sale of its editions. Much of the criticism levelled at the press—and may honest criticism continue—come from incomplete knowledge of its workings. While advertising and sale of its editions is necessary to every newspaper, no really good newspaper desires to become a mere advertising sheet. Advertising to a newspaper, can be likened unto wine, only so much can be carried unless an adequate amount of journalistic bread goes with it. And in the choosing of this bread, the publisher desires to be free. Any well informed publisher knows that no newspaper can subsist on misrepresentation, calumny, trickery and lies, but on the contrary, values above all else, for his paper, public good-will. In the daily field especially, there is keen competition, not only in selling their product but in the procuring of the product to sell—news. Large newspapers do not like to see important news carried by rivals unless published themselves—they are jealous of their service to the public, realising the better they serve, the more they profit.

Government control or even government interference, outside of the ordinary laws of libel etc., curtails the service to the public the newspaper can give. While at first a degree of government control would be irksome to the newspapers, the greatest force of its effect would be felt upon the general public. The newspapers, being something in the nature of machines, would adjust themselves to circumstances, the full and permanent effect of any degree of press control would undoubtedly be felt by the public. This is the important feature of both the above mentioned Bills. With both Bills held for the Governor-General's signification, neither endorsation or condemnation need be given here, but each citizen should reason both problems out using as a base for his or her thinking, the ultimate welfare of all Alberta citizens.

Fowl Play

An Englishman, visiting China for the first time, timidly ventured into a restaurant. Enjoying the dinner very much, and wishing to inform his smiling host that he recognized a tasty ingredient, he pointed to his near empty plate and smilingly queried, "Quack, quack?"

The Chinese waiter shook his head and answered, "Caw, caw!"

Prohibits Burning of Straw South of Township 70

In view of the feed shortage in various parts of the province, the Minister of Agriculture wishes to draw particular attention to the following regulations governing conservation of feed supplies:

Re: Chapter 83—1935,
An Act for the Conservation of Straw for Fodder Purposes

This Act provides that all that portion of the Province south of Township 70 is an area in which the destruction of straw is forbidden without permission from the Field Crops Commissioner.

The intent and purpose of the Act is to prohibit the destruction of straw when same is required in the drought sections of the Province and in areas requiring agricultural relief.

Representations have been received from the Province of Saskatchewan that no straw be destroyed, as the demand for roughage for relief purposes in that Province is very acute. It would therefore, be most unfortunate if farmers in this Province should destroy straw that is marketable and which may be required in Alberta or Saskatchewan for relief purposes.

We believe this matter should be given wide-spread publicity throughout the Province, preferably under the name of the Minister of Agriculture.

Russia Ready to Wage War on Japanese

Tokyo, Oct. 5 —Domei (Japanese) News Agency said today many Nanking observers confidently believe the Soviet union will declare war on Japan next month. Chinese public opinion expects fruitful results from Soviet Ambassador Dmitri Bogomoloff's flying trip to Moscow, according to Domei.

It is reported that before Bogomoloff left by plane for Moscow, he talked with General Chiang [illegible] and Foreign Minister Wang Chung-Hui and exchanged frank views on the Sino-Japanese conflict.

Among questions discussed were said to be prospects for a Soviet loan to China, for supplying Soviet planes and aviators to China and for transporting through Russian territories munitions purchased abroad by China.

Shanghai, Oct. 5— Japanese claimed to have wiped China's war planes from the air today, an army spokesman asserting that some 300 Chinese fighting craft had been destroyed in the three months of fighting.

Foreign observers were inclined to credit the Japanese claims of mastery of the air. For some time only one Chinese plane has been observed in the Shanghai area and there have been only occasional reports of aerial combat elsewhere.

Chinese spokesmen have not made any claims of aerial activity now for more than a week. Foreign military experts estimate that China's fighting planes numbered only 200 at the beginning and believe that the Japanese may have inflicted heavy blows.

In the contest for the Chapei and North Station on the northern fringes of the International settlement, however, the Japanese admitted they were balked by the Chinese resistance on land.

Exports to Japanese Alberta Votes to Ban

Two resolutions proposed by S. A. G. Barnes (S.C. Edmonton) and seconded by A. L. Blue, (S.C. Ribstone) both non-caucus members, were carried last night in the legislature.

The first urged the legislature to petition the Dominion government to stop at once export of "all those different things which are destined to aid Japan in its ruthless attack upon the innocent, peaceloving Chinese, and to all nations stirring up war activities." It was carried 44 to 8.

The other, requesting the assembly to ask the federal government for "an immediate public examination" of the reported action of the Canadian representative to the League of Nations voting against seating of the "legitimate" government of Spain on the League council, was passed 31 to 20.

Navigation Halted by Car

Montreal, Oct. 5 — Excerpt from Lachine canal records: "Traffic disrupted four hours Saturday, Oct. 2, reason, motor car in way." More than a dozen vessels were delayed when a car belonging to G. Swindler rolled down McGill street and plunged into the channel. A crane brought it ashore.

A small boy, out walking with his mother, was seen to take off his hat to a stranger.

On his mother's inquiry as to the identity of the gentleman, the small boy replied, "Oh, he's a friend I don't know."

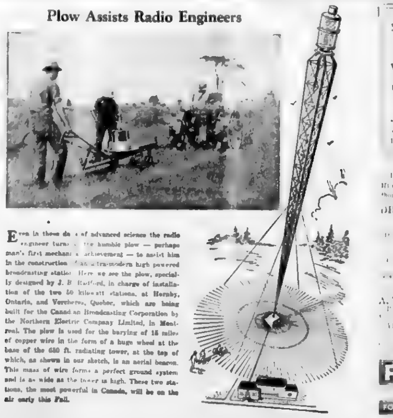
Plow Assists Radio Engineers



Even in these days of advanced science the radio engineer turns to the humble plow — perhaps man's first mechanical achievement — to assist him in the construction of an ultra-modern high powered broadcasting station. Here we see the plow, specially designed by J. B. Radford, in charge of installation of the two 50 kilowatt stations, at Hornby, Ontario, and Vercheres, Quebec, which are being built for the Canadian Broadcasting Corporation by the Northern Electric Company Limited, in Montreal. The plow is used for the burying of 15 miles of copper wire in the form of a huge wheel at the base of the 650 ft. radiating tower, at the top of which, as shown in our sketch, is an aerial beacon. This mass of wire forms a perfect ground system and is as wide as the tower is high. These two stations, the most powerful in Canada, will be on the air early this Fall.

United Church News

The Sunday School Institute held in the United Church on Thursday, October 7th, was well attended. Workers among the young came from Viking, Holden, Ryley, Kinsella, and Lakeshore. The Rev. J. W. Smith of Edmonton gave a most thoughtful address on the qualification of a Sunday School teacher.

Dr. Stanley Scott of Viking, who presided then conducted a discussion class. This was taken part in by quite a number and proved very enlightening.

Dr. Scott as a preliminary to the meeting, threw quite a number of pictures on the screen representing scenes at the Boys and Girls camp.

A lunch was served by the Tofield Sunday School officers and teachers at the close.

Sunday, October 31st is the date set for the Anniversary Services of the United Church in Kinsella, Lakeshore and Tofield.

The Services will be held in Tofield at 11 a.m., 7:30 p.m. A combined Sunday School rally will be held at 2:30 p.m.

The Annual banquet will be held on Monday, November 1st.

This is always a popular event—everybody is satisfied and a good social time is assured. Keep these dates in mind. Sunday Oct. 31st, Monday, November 1st.

Tragedy of a Blind Moose

By H. E. How, Dorchester, N. B. in "Forest & Outdoors"

"Why in blazes did she walk into that pothole?"

"Dunno," I replied, as mystified as was he. "Let's get her out of it, and then see what happens."

But there, as Kipling was wont to say 'I am ahead of my story.'

One day, late in March, my friend Bob H. and I were travelling down the frozen Quiddy River, in Southern New Brunswick. We were examining the river brows, which were soon to be broken and stream-driven. We had covered approximately a mile, inspected three brows and were nearing the fourth when suddenly my companion stopped.

"Look," he said, pointing in the direction of an alder clump which we were about to pass.

"I don't see anything," I replied.

"Look through the alders. See that moose?"

I looked again, and there behind the snow-covered bushes (it had snowed the previous night) stood a cow moose, motionless, staring in our

(Continued on back page)

LINDBROOK

The weather for harvesting and threshing work seems to be as "uncertain" as it can be just now, first you have it and then you haven't and so it goes. Its to be hoped that the winter snow holds off for there's a lot of threshing to be done yet.

Lindbrook lost one of its old landmarks last week when a C.N.R. B and B gang uprooted the tool house at the station and landed it on a flatcar which took it to some unknown destination.

A car of vegetables was landed here last week for the dried out areas. The landing was supervised and arranged for by Mr. Chas. Morden of Lindbrook.

The siding here has been a busy place this last week with 6 or 8 carloads of horses, cattle, machinery and settlers' effects being unloaded, all chiefly from the dried out area. The owners of the above goods are establishing themselves in this vicinity.

The Anglican Church held a Harvest Festival Service here last Sunday afternoon at the school. The interior was very tastefully and prettily decorated with fruit, flowers, grains and vegetables. The decorations were the work of the ladies of the district to whom thanks are due. The service was choral and was conducted by Rev. A. Wallis of Tofield. Quite a few turned out for the Service, although we suspect some were absent "still gathering in the sheaves" owing to the unsettled weather conditions which necessitates such action.

The Social Study Group held a meeting at the School one evening last week. It was well attended by the members.

The teachers of both Lindbrook and Wealake schools, Miss Y. Phipps and Miss Burns, respectively, attended the Lamont Inspectorate Convention in Edmonton this week.

L.C.C. News

Members of the L.C.C. unite together in offering their deepest sympathy to Mrs. A. Smith in her recent sad bereavement.

Meeting of the L.C.C. for the month of September was held at the home of Mrs. Glenn and Mrs. Trainor. Nineteen members and seven guests were present. The guests were Mrs. Thomas, Mrs. E. Rogers, Mrs. A. Pockrant, Mrs. B. Cookson, Misses Phipps, Kortzman and Hoover.

Our president being absent through the death of her father, our vice-president, Mrs. Evans took charge.

Mrs. Thomas gave a short talk on First Aid, taking into consideration everyday burns, fractures, dislocations, and ills. This talk was greatly enjoyed by all present.

Next meeting to be held at the home of Lillie Morden. Mrs. Evans and Mrs. Hooper to entertain.

Mrs. Glenn and Mrs. Trainor served a lovely lunch which finished up a very enjoyable day.

LOCAL & PERSONAL

Mrs. Bertha Seale, Mrs. Stan. Yakabuski motored to Edmonton on Friday.

* * * * * * * *

Mr. and Mrs. D. E. Ball and children visited at the Gaugleis home on Sunday.

* * * * * * * *

Visitors at the Allan home on Sunday were: Mr. and Mrs. Provost and son of Edmonton, Miss Margaret Allan of Barrhead, Miss Elspeth Allan of Westlock and Aileen and Graham.

* * * * * * * *

Miss Eva Trepanier of Edmonton spent the week end visiting in Tofield.

* * * * * * * *

Mr. and Mrs. Gordon Jobb of Daysland and Mr. and Mrs. R. Whyte of Wetaskiwin spent the holiday week-end at the Jobb home.

* * * * * * * *

Miss L. Ross, Mrs. Bethel, Hubert and Melville spent Sunday in Edmonton.

* * * * * * * *

Miss Marjory Stewart spent the week end at her home in Edmonton. While there she attended her brother's wedding which was held on Saturday.

* * * * * * * *

Blake Clutterham from Edmonton spent the week end at his home here.

* * * * * * * *

Stewart Harrison, Max Rogers and John Swift, all of whom are attending the U. of A. spent the holidays at their homes here.

* * * * * * * *

"Dad" Harris of Sedgewick visited Tofield on Wednesday.

* * * * * * * *

Jean Baptist returned home after a holiday spent in Montreal.

* * * * * * * *

Mr. and Mrs. Paul and Ronnie, and Edythe Barden from Edmonton visited at the Barden home on Sunday.

* * * * * * * *

Miss Ella Taylor spent Sunday at her home here.

* * * * * * * *

Mr. R. Wilson and Lola spent the week end in Edmonton, returning on Monday morning.

* * * * * * * *

Born: To Mr. and Mrs. Harold Green on Tuesday, October 12th, a son.

* * * * * * * *

Born: To Mr. and Mrs. Ray Coutts on Wednesday, October 13th, a daughter.

* * * * * * * *

Isabel Robinson, teacher at Woodlawn School attended the Teacher's Convention in Edmonton last week, and visited friends over the week-end, returning Sunday evening.

* * * * * * * *

Mrs. J. W. Robinson, accompanied by Mr. and Mrs. Jacques and family of Ardrossan, visited old-time friends and former pupils at Leduc and surrounding district over the week-end, returning Tuesday. This proved to be a very interesting and enjoyable visit as it was over twenty years since she had seen many of them and naturally there had been great changes. It was pleasing to know that the sons of the pioneer trustees were ably carrying on the good work their fathers had begun.

AMISK CREEK

The Ladies' Aid will hold their regular monthly meeting at the home of Mrs. C. Erickson on Tuesday of this week.

Nearly every home from this district was represented at the J. Ness Sale held in Bardo last week.

Mr. and Mrs. Heimdahl, Mr. J. Haugsett and daughter Juliett visited at the J. Annebo, H. Hillerud, R. O. Berg and P. O. Flaaten homes last week.

Mr. and Mrs. A. Patterson and son Norman attended the Service held in Ryley on Sunday. Norman was confirmed in Ryley three weeks ago, and the service was communion service conducted by Rev Hovrerstein, and was held for those who were confirmed.

Nearly everybody from this district attended the Sons of Norway-Leif Erickson's Festival held in Ryley last Saturday night.

Gladys Olson who is attending C. L.C. in Camrose this year, spent Thanksgiving at her parents home here.

Hilmar Moen spent Sunday at his home here. He returned to Phillips by bus Sunday evening.

Ruby and Lilly Berg from Edmonton spent Sunday and Monday at their parent's home here. They returned Monday evening by motor.

Mrs. S. Haugland from Grand Prairie was a visitor at the P. O. Flaaten home over the week end.

Miss Alice Christie from Edmonton and A. Lefend from Viking were Thanksgiving guests at the R. O. Berg home.

Mr. and Mrs. J. Jac[illegible] from north of Tofield were visitors at the E. A. Moen home last Sunday. [illegible] Moen is assisting Mrs. Jac[illegible] with the work during harvest and threshing.

Mrs. P. O. Flaaten and Arnold Berg motored to the city one day last week. Arnold assisted his sister Ruby move while Mrs. Flaaten visited with her sister-in-law who is very ill at the Royal Alexander Hospital.

Are The Drought Years At An End?

A distinguished American scientist a short time ago, announced that he believed the drought years were at an end for the reason he stated, that his investigations led him to believe that weather cycles occurred with rhythms of 2[illegible] and 4[illegible] year respectively, being influenced and governed in turn by solar radiation cycles. The present drought, which started in 192[illegible], he considered formed the greater part in [illegible] droughts which start[illegible] ed 23 and [illegible] years ago.

Investigators of [illegible] announce they seem to [illegible] that the theory is correct.

If great droughts occurred [illegible] 23 years ago, they should [illegible] by Western Canadian [illegible] The Research Department of the Searle [illegible] examined these long-time records and finds as follows:

The average yearly rainfall and growing season [illegible] winter snowfall not included for [illegible] years for a period starting [illegible] years ago

Soviet Airmen Search Will Be Taken Up Soon

Montreal, Oct. 7—Search for Soviet airmen lost in Arctic zone since Aug. 13 will be resumed as soon as a new plane can be equipped with skis for the winter flying, Herbert Hollick-Kenyon, veteran Canadian northland flier, said here today.

The Toronto pilot, who returned from an unsuccessful search two weeks ago, sought skis for the plane here today. Sir Hubert Wilkins awaits him in New York.

"The new plane has been chosen but has not yet been purchased," Hollick-Kenyon said today. "Our departure for the north depends on how soon we can get skis to fit it."

If the milliner says it's a hat, her guess is probably as good as a customer's.—Detroit News.

Seeds Treated Chemically Will Aid Agriculture

Chicago, Oct. 7—A revolutionary change in agricultural practices through use of chemically treated seeds was forecast today by Howard D. Salins, Chicago, after harvesting of test fields of fibre flax and corn in Illinois and Wisconsin.

Salins, inventor of the process, said it is applicable to all forms of plant life.

Results of this year's tests proved to his satisfaction, Salin said, that fibre flax of quality equal to that of the best grown in Europe can be produced in North America from treated seed and that it afforded a highly profitable return to farmers. Little or no Domestic fibre flax is grown now, although there is considerable seed flax.

Yields of corn from treated seed, he said, were 25 per cent greater than yields from various kinds of untreated seed planted in adjacent fields this year. North of Merril, Wis. where frosts limit the season to less than 90 days and corn is cut green for silage, a number of farmers, Salin said, grew corn to maturity from treated seed.

Reaction of the seed germ to the chemical, Salins said, gives the soil opportunity to facilitate fecundity. At the same time the treatment promotes growth of certain bacteria which replenishes the soil with those elements used as food by the growing plant, he said. Consequently, he added use of fertiliser is unnecessary.

In addition to soil fertilization and increased yields, treated seed, he said, produces plants resistant to disease, pests, and variable unseasonable weather and which show marked ability to reach maturity in a shorter growing season.

In areas where yields of grain could be increased 25 per cent through use of treated seed, Salins said grain acreage could be cut down and fibre flax substituted as a rotation cash crop.

Indigestion

Indigestion is a much-abused term and has no definite meaning. It is a word in general use to describe any uncomfortable feeling which the sufferer attributes to the stomach or some other part of the digestive system. The true condition may be an ulcer of the stomach, inflammation of the gall-bladder, chronic constipation, chronic appendicitis or some one or other of the many conditions which cause is popularly known as indigestion.

Unfortunately because indigestion is a common complaint it is very often treated lightly, and the general tendency is for the sufferer to dose himself with laxatives or to try one of the many types of diet which his well-meaning, but medically ignorant friends will offer as a cure. Soda is often taken in large amounts, regularly or frequently, by numbers of persons with the idea that their trouble lies in the presence of too much acid in their stomachs. If digestion is to take place in the stomach, acid must be present, and large doses of soda merely interfere with normal digestion.

In certain cases, bran and roughage in the diet are desirable in order to overcome constipation. If the digestive organs are irritable, it is most likely that a smooth, soft diet is what is required.

These points are mentioned in order to make clear that the proper treatment of indigestion depends, first of all, upon finding out the cause. If this is not done, actual harm results, and the condition tends to become chronic and increasingly difficult to treat.

The whole trouble may be due to bad habits of eating. Eating too quickly, washing down food with fluid instead of chewing it properly, swallowing of air as a result of gulping of food. In such cases, the trouble will be corrected by establishing proper eating habits. If there is inflammation or ulceration of some part of the digestive system this, of course, requires suitable treatment, and constipation is dealt with by regulation of diet and habits, not by drugs.

Questions concerning Health, addressed to the Canadian Medical Association, 184 College Street, Toronto, will be answered personally by letter.

The Facts About Banking in Canada

Reproduced from the Fifth Broadcast in a Series by Vernon Knowles for the Chartered Banks of Canada and Delivered Over a Province-Wide Network of Alberta Stations on Tuesday Evening, October 5th, from 8:30 to 8:45.

Shows That Banks Have Increased Credit by $227,000,000 Since 1929 . . . Alberta's True Wealth More Than Offsets Albertans' Debt. . . . Deals With Money, What it Is, Where it Comes From and How it Works . . . Canada's Currency and Credit Controlled by the Dominion Government Through the Bank of Canada . . . Points Out Question of Who Owes and Who Owns.

YOU have heard that ordinary banking business is one thing, and credit something else. The idea seems to be that the ordinary business of banking can go right along without hitch, while banks can be forced at the same time, to grant extraordinary credit without limit regardless of assets or values.

Not only is that impossible, but actually it could have but one end—the ruination of the banks and of the country as well.

You hear that when banks have to pay anything, they merely issue their own cheques and it costs them nothing. It is not true. It just can't be done. Like you, a bank can only pay what it owes with money which has to be earned — in the last analysis real cash. I shall tell you more about cash in the course of this broadcast.

Now I shall answer two more absolutely false impressions which I find rampant throughout Alberta. The first is that, since 1929, Canada's Chartered Banks have reduced the total volume of credit by $766,000,000. The second is that Alberta has only twenty cents on the dollar to meet her debts.

Regarding the $766,000,000 it is even suggested that the Chartered Banks deliberately and wilfully reduced the money in circulation to that extent in order to gain some selfish end. If you were told that the bakers refused to sell bread, it would be about as sensible as the story that bankers refuse to make loans to responsible borrowers. Banks derive their chief revenue from loans and to say that they wilfully withdraw credit by the Hundreds of Millions is equal to saying that they are in the habit of cutting off their nose to spite their face.

Our critics have fallen into an error that is quite understandable. They have looked at one column of figures in the statistics published by the Bank of Canada, without looking at another column where they would have found their answer. It is quite true that the total of commercial loans shows a large reduction, but it is also true that investments in bonds show a large increase.

What is the explanation? Simply that, with much reduced business activity and lower prices, our customers use less money. For example, when wheat is worth say $1.50 a bushel it takes $150,000 to buy one hundred thousand bushels. But, if wheat were at fifty cents a bushel, it would take only $50,000 to buy the same amount of grain. Owing to the difference in price the same amount of business can be done with $100,000 less money.

On top of that is the uncertainty that comes with depression and the hesitancy of people in business to commit themselves with their usual confidence. They go on a hand-to-mouth basis. They do not want loans in anything like the amounts they want in normal times. Banks, however, cannot afford to have their funds lying idle and earning nothing, therefore, they are driven to invest much more heavily in bonds.

The earnings a bank gets out of a bond are much lower than come from an ordinary loan. Wouldn't you, if you were a banker, prefer to make loans rather than put your money into bonds?

What are the facts?

The total of loans outstanding and money invested in securities by the Chartered Banks, at the end of July this year, was $227,000,000 greater than in July of the boom year 1929. Money invested in Government and other bonds is a loan to a Government or a Corporation just as much as an advance to a farmer, merchant or manufacturer is a loan to him.

Since 1929 Canada's Chartered Banks have actually increased credit by $227,000,000. This completely breaks down the absurd claim that we have decreased credit by $766,000,000.

Now as to that second false impression! The general proposition that Albertans have $80,000,000 in the bank and that they owe $400,000,000 is just one of those things that sound plausible but present a clear misrepresentation. Even assuming that the figures are correct, the $80,000,000 is not all that Albertans possess.

To that figure you must add their individual possessions and the wealth and potential wealth of resources which stand behind your provincial borrowings. Consider, for instance, the true value and the potential productive worth of Alberta's coal mines, oil fields, tar sands, farms and forests.

If you add to your $80,000,000 in deposits the true value of the assets which stand behind the $400,000,000 you will find a very substantial balance in your favour.

It is said that because there is $80,000,000 on deposit in Alberta and debts total $400,000,000, there is only twenty cents to meet every dollar of debt. Let us ask: "Who owns the twenty cents and who owes the Dollar?" If you have $200 in the bank and if I owe somebody $1,000, then you have twenty cents for every dollar I owe. Can I take any part of your two hundred to pay off any part of my thousand? But the critic says: "Oh, there is too wide a disparity between debts and deposits and that gap should be closed."

All right, let's close it — Now, we'll say that I still owe the $1,000 but you have $1,000 in the bank. The disparity has been wiped out. You now have a dollar for every dollar I owe but still what right have I to take the thousand you have to pay to somebody else the thousand I owe?

If Albertans have $80,000,000 in bank deposits in this Province it is money belonging to individuals. It is their own. Debtors, whether they be individuals, a Province or a municipality, or whoever they may be, cannot expect to use your money to pay their debts. If you have money in the bank the very next time anybody tells you that there is only twenty cents in money in the banks in Alberta to meet every dollar of debt, just ask the man who tells you that whose debt he thinks your money is going to pay.

We promised to tell you a few things about money and to explain away some of the strange misapprehensions about it.

We shall try to tell you in a practical way, what money is, where it comes from and how it works. There is a fairly widespread idea that there are not enough bank notes or "tickets" around — and that, if there were more, we would all be better off.

If I say that I would like some more of these bills, I am really demanding a larger share of the bills that now exist, perhaps some of those that you have, for you can have in circulation at any one time only as many bills as the volume of business calls for. The moment you issue bills faster than that, you get inflation.

After our first broadcast I received a letter from an Alberta woman who lived in Germany through the inflation. I would like to read to you what she says: "Why not tell Alberta people about conditions in Germany during the inflation — this talking about money being printed to meet the needs of the people is getting somewhat on my nerves. I lived through the entire trying times of 1923 and I could quote you some startling examples created through unorthodox banking. At one time I bought an overcoat for the staggering sum of Thirty-two Billion Marks. I have heard farmers speaking in the lobby of a bank, having sold their produce for One Thousand Marks at one o'clock and, about an hour later, finding that the very same produce required twice, often three times the amount of money to repurchase it."

In Germany at times during the inflation it took an armful of paper Marks to buy a loaf of bread. This German lady, speaking of paper money inflation, goes on to say: "It brings nothing but chaos, with the greatest loss to those who can least afford to lose."

There speaks the voice of experience. No greater outrage has ever been perpetrated on a people than that of wild inflation. It destroys their assets. If you are in the twilight of life or incapacitated but, during the years you were able to work, had put aside a little for the rainy day, you lose. Perhaps you bought some bonds and the income from them is all you have to live on, perhaps $25 or $50 a month. Then one day, as in Germany, "tickets" are issued in large quantities, without any basis in value, and without regard to the volume of business.

Your $25 or $50 a month, though the huge increase in prices caused by inflation will buy only a fraction of what it bought before. If you are a person with a small fixed income you cannot buy enough to live upon.

Particularly does this apply to a family whose breadwinner has died, leaving only the proceeds of an insurance policy. They seem to have at least some material protection — then inflation comes. Their money becomes almost worthless. That is what happens, that is all that can happen when money is issued altogether out of step with production.

When you hear the fable of the people who couldn't travel on a railway train because there were not enough "tickets" printed, remember that the financial system, in exactly the same way as a railway, lives by selling a service; anyone will realise that there will be no hesitation to provide all the "tickets" necessary so long as something of equal value is received in exchange. As a matter of fact in July this year, there were $18,000,000 more "tickets" in the hands of the public — bank notes of all kinds — than there were in July of the boom year, 1929. And since July the "tickets" in the hands of the public have increased.

The story that, for their own selfish purposes, banks monetize the credit of the people, is a completely false conception of bank operations. A bank does extend credit to an individual — or if you like it, monetizes his credit for him — not for itself. That is, the bank makes a loan to him on the strength of things which are his own and which he intends to sell later on and so repay the loan.

No one borrows from a bank unless he believes he will make a profit for himself over and above the bank charges. The bank does, of course, collect interest or rental on the money loaned but the borrower's credit has been monetized entirely for his own use and benefit, subject only to a small fee for the bank's services.

Money merely facilitates indirect barter. If you have hogs and your neighbour has honey maybe you don't want to take honey in exchange for your hogs. Perhaps you want coal or clothing and you cannot buy them at the store by giving honey for them. So your neighbour gives you money for your hogs—"tickets" — and with those "tickets" you buy the coal or the clothing you require as the case may be.

Now what is money?

You and I have been brought up to look upon nickles, dimes, quarters and dollar bills as money — and they are for all practical purposes. Actually these things are really tokens — they are not wealth in themselves. They are merely the title to goods. They are worth only what goods and services you and I can get in exchange for them. That is why it is so important that nothing be done to destroy the confidence of the people in them. That is why there must be no manipulation of the issue of these things if their value is not to disappear.

To be a little more expert, as it were, it would be quite right to say that there is far more money in existence than the small change and bills we see around. Your deposit in the bank — for all practical purposes — is money, good, useable money. You hold the bank's promise to pay you that money when you want it; and banks are careful to keep their financial house in such order as will enable them to do just that—pay you when you want your deposit.

The bank holds your deposit, your neighbour's and mine and, because it does, it is able to make loans — the proceeds of which go into the production of new wealth. The borrower makes a profit on the deal, he has more to spend than he had before. This stimulates business and by giving rise to increased employment, distributes purchasing power more and more widely among the people.

Where does money come from?

You often hear that the Chartered Banks alone make it and that they alone have the power to make it — all of which is quite wrong. Last week I told you about the limited power that Canada's Chartered Banks have to issue currency — now up to only ninety per cent of their paid-up capital and let me tell you they pay sweetly for that concession. They have to pay one per cent tax to the Dominion Government on their note circulation and they have to stand all the cost of printing and express and insurance in shipping it around wherever it is needed. Let me tell you that all this, added together, makes the privilege of note issue anything but a gold mine.

The Dominion Government formerly issued notes. When the Bank of Canada was opened the Dominion Government turned over its right of note issue to that institution. It gave the Bank of Canada all its gold holdings, plus Dominion Government bonds, to offset the liability assumed for the notes outstanding.

Then the Chartered Banks were required to turn over all of their gold to the Bank of Canada and to-day the Bank of Canada has, by Dominion Government regulation, power within certain limits to issue notes. These notes of the Bank of Canada together with all deposits in that bank, are backed by more than 60% of their face value in gold, other bullion and foreign exchange.

I told you in my earlier broadcasts that I would tell you about "cash." Bills of the Bank of Canada are cash — amply backed, as we have shown. Cash in Canada really means bills of, or deposits in, the Bank of Canada — the Government's central bank. Bank of Canada bills, by law, are legal tender. Legal tender is the money in which all debts must be settled if either the debtor or the creditor insists. All other notes in Canada must, on demand, be redeemed by the bank concerned — in cash.

I told you a moment or two ago about the other kind of money — your deposits. They come from your savings, your labour, your production. They also are redeemable in cash. To say that money can be made out of nothing is surely a statement which Albertans will meet with unbelief.

The Bank of Canada was formed for the purpose of securing to Parliament the control of currency and credit. That control was strengthened when, in accordance with prior pledges, ownership of the majority of the capital was vested in the Government. Under the law, no banker, no bank director and no member of any bank staff is allowed to own so much as a single share in this Government central bank.

Let me close on this final note — currency and credit in Canada are not controlled by Canada's Chartered Banks, which are commercial banks — but, with due and proper regard to the value of the money you now have, by the Bank of Canada, which in turn is controlled by the Government of the Dominion.

W. Werton, Publisher

THANKSGIVING—

THERE IS NOTHING so very original about writing a Thanksgiving editorial. Everyone knows it is Thanksgiving time, the time of decorated churches, large pumpkins, choice fruit, nutritious vegetables and grain. Moreover, if an editor did not wish to write a Thanksgiving article, he could purchase one, having a choice between several. But Thanksgiving, like the Spirit of Christmas is a personal thing. You cannot leave it to another person to be thankful for you, any more than having another person celebrate Christmas for you. It is a personal matter. And that is why these few lines are written, so that this paper may express publicly and perhaps observe privately, some form of Thanksgiving.

Originally associated with the agriculturalists' harvest, Thanksgiving can easily be spread over all forms of endeavor. It is true that the earth's bounty is a very definite providential gift, yet so very few of us are "masters of our own destiny," that even a monthly pay cheque, deserves thanks. To most of us life is a whirl of pools and eddies, amid the unfathomable motion of which some attain greatness among the lesser great. To those whom the various currents of life have cast in secure places, it is comparitively easy to be thankful. To those who own or control fields fat with the bounties of nature, barns and cellars overflowing with good things for man and beast, being thankful comes easy. The evidence of providential generosity is on hand to see, and lustily genuine are the songs of praise that flows easily from the lips.

But Thanksgiving Day is of dominion wide observance. From the Atlantic to the Pacific, across woodlands, plains, mountains and valleys, people everywhere in Canada, last week were "Plowing fields" and "Bringing in the Sheaves," vocally and mentally, with a number of course, doing these things physically. But great distances, not only mean a variety of agricultural practices, but also varying degrees of fruitfulness. And while extreme eastern and western provinces had heavily laden orchards, and all those things that accompany them, and Manitoba and parts of Alberta had good yields of grain, parts of Saskatchewan were left bare and had no crops at all. It is estimated by some relief authorities that every third farmer will be compelled to solicit relief this coming winter. If it is easy to sing "Bringing in the Sheaves," when there are plenty visible, it certainly is not easy to sing it with spirit when nothing but seasonal barren fields meet the eye. Yet people in such circumstances do sing it, perhaps a little subdued, but they sing nevertheless. Why? Surely the enthusiasm produced by a bonutiful harvest could not have entered their hearts, when all they can see for a year's labor is parched and wind drifted fields. Not only one year, two years, three years, but up to six or seven years. Perhaps they are glad of the assistance sent from parts where nature has been more generous; perhaps they are sustained by hope of better things in years to come, perhaps they are glad to be alive. And why not? It sounds terrible to even suggest that in this age and generation people should be glad simply to be alive and perhaps in Canada at least, the illustration is an extreme one, but what of other countries? To the residents of Madrid; to the Ethiopians; to the residents of Chinese cities; to those caught within the political grindstones of Russian policy, and to many other people in the world to-day, it MUST be pleasant just to be alive. With death falling from the skies, from the snipers bullet; as a result of an unguarded political statement, death is on hand so often, and in evidence so much, that to just merely escape it is an achievement—and something to be thankful for.

Those of us living in Canada, far from the risk of invasion, free from political intrigue that carries death in its wake, and strangers to foreign armies on our soil, have something to be thankful for in these things alone. They are priceless as life itself is priceless.

A VOICE FROM THE PAST—

IN THE British House of Lords just two hundred years ago, Lord Chesterfield spoke as follows:

> Let us consider, my Lords, that arbitrary power has seldom or never been introduced into any country at once. It must be introduced by slow degrees, and, as it were, step by step, lest the people should perceive its approach. The barriers and fences of the people's liberty must be plucked up one by one, and some plausible pretenses must be found for removing or hoodwinking, one after another, those sentries who are posted by the Constitution of a free country, for warning the people of their danger. When these preparatory steps are once made, the people may, then, indeed, with regret see slavery and arbitrary power making long strides over their land, but it will then be too late to think of preventing or avoiding the impending ruin.

These words are quite as pertinent now as when they were uttered, and still more pertinent to America than to the country where they were uttered.
—CINCINNATI TIMES STAR, OHIO.

"Five Minute Bird Studies"

By Kerry Wood in the "Forest and Outdoors."

Labelled by scientists: Branta canadensis. Nicknamed by the rest of us: "The Honker."

Best loved and best known of all waterfowl, yet despite that the Canada Goose is habitually confused with the four subspecies: Western Goose, Lesser Canada Goose, Richardson's Goose, and Cackling Goose. The markings on all five birds are approximately the same, but the true Canada is the largest. Weight 12 to 16 pounds. Length: 28 to 39 inches.

Knows a gun from a buggy whip every time and gives the lie to anybody who thinks a goose is silly.

Flies in the well-known "V" formation to reduce wind shock. The same bird does not lead throughout migrating flights, for the wind buffeting at the apex of the V is so severe that the hardship must be shared. The leader holds position not much more than an hour at a time. Speed of flight, 50 to 60 miles an hour, 60 to 65 with the wind. Not 90, as popularly believed.

Voice: a rich, sonorous honking. When birds are on migration flights, the honking seems evenly spaced and rhythmical, one bird honking at one time and rarely the flock in chorus. When feeding the birds "gossip" as surely as do old women and barber shop customers.

The Canada Goose is the symbol of wild freedom. Yet they take readily to barnyard life when a clutch of their eggs is illegally robbed and raised with the domestic flock. But each bird retains its inherent independence and native dignity despite clipped wings, chained legs, or food briberies.

Conservative: Let one bird return to the flock different in plumage or behavior from the accepted standard of goosedom and the others will at once attack it, viciously and sometimes fatally.

Unlike Garbo, they hate to be alone. When deprived of the company of its own kind, a giant Canada will often try to fly with a flock of lesser birds, such as Cackling Geese (a very small variety of the Canadas) or with the Snow Geese or Waveys. Even at times will try to fly with the Mallards, to the indignant annoyance of the ducks. A lone goose is very vocal, uttering loud and plaintive honkings as though soliciting companionship. Regardless of the racial variness of the species, a lone bird will come readily to the cheapest of make-shift decoys, its habitual caution forgotten in the excitement of anticipated reunion with its kind.

Flies north in March and April to breed across Canada, common on the Prairies and in B.C. Flies south in October and November, wintering in Louisanna marshes and coastal waters.

So secretive during the breeding season that a pair can have a nest on a slough or river within a mile of a town of 2000 inhabitants and no humans will know of the existence of the birds. Does not fly often during the nesting season, apparently aware that it is a large object in the air and it will be wisest to keep to the ground during that interval.

Ma and Pa Goose look alike in plumage at all times of the year, contrary to most waterfowl characteristics. After Ma lays the eggs, two to six in number, Pa takes his turn at incubating and is as patient as Old Biddy.

The nest is located on grassy hummocks, on marshy islands, on mossy muskrat houses, on hay mounds, and in deserted hawk's nests thirty and forty feet up from the ground. When young are born in a tree nest, Ma Goose boosts them over the edge within an hour or so of the hatching time. The youngsters try to break the fall by flapping the unformed downy wings, but nevertheless they hit earth with a resounding wallop and bounce. Then they get up and run in the direction of the nearest food.

It is against goose law for Ma and Pa to feed the children, except for an occasional titbit. Every goose, young or old, is expected to rustle for him—or her-self. They eat all kinds of aquatic plant life, being especially partial to tender roots which they duck for — they do not dive. They like grain, and usually do their stubble feeding in the late evenings and very early mornings, often by moonlight and sometimes in the dark.

Mates stay together until death. Surviving birds do not soon forget the old love, and may never mate again, or in any case will mourn a partner's loss a long, long time.

The Intelligence Quotient is extremely high. Canadas might even lay claim to being the brainiest birds native to the continent. At least they share first rank honors with the Sandhill Crane and the ubiquitous Crow.

Pa and Ma Goose will defend their young against all comers. The presence of a man does not daunt them when the young need protecting. And mankind had better look out too, for it is possible for an adult goose to break a man's arm with one blow of the strong wings. Wings are their offensive weapons, not the hissing, deceptive bills. Canadas have been known to kill weasels, skunks, foxes, cats and even dogs.

Danger time: the moulting season, between first and third weeks of August. Usually the big birds lose so many feathers that they cannot fly, and at such times, when hiding is impossible, they are particularly belligerent.

Enemies include every creature that knows goose makes good eating. Man is the worst enemy of all: not so much because of his shotguns, which they can generally outwit if used fairly, but because of his continual and increasing curiosity once a pair's nest has been discovered.

Despite all the odds against the Goose, including the large handicap of his own proud size, it is the one North American game bird that is most likely to hold its own against civilization's relentless march.

THE WORLD OF WHEAT

By H. G. L. Strange, Director "Crop Testing Plan".

"Where can I get some first generation Red Bobs seed?" requested a farmer.

"There is no such thing as first generation Red Bobs," was the answer, "because only Registered varieties have generations, and there is no Registered seed of Red Bobs yet. You can, however, obtain Certified Red Bobs which is quite high class material."

Registered seed has a pedigree continued year by year, and each multiplication becomes a lower generation than the previous one.

Certified seed does not have a recorded pedigree, although it is field inspected and guaranteed to be true-to-variety just the same as Registered, but Certified seed is of a somewhat lower standard. It will be remembered that with Registered seed one off-type in 10,000 is permitted in the fields. With Certified seed one off-type in 1000 is allowed.

The standards for germination, content of weed seeds and of other grains, and appearance, are only slightly lower for Certified seed than the standards for Registered seed.

Red Bobs, Reward, Garnet and Thatcher, Apex and Renown are as yet only Certified varieties. Some day they will be Registered varieties. Certified seed, however, sealed in the sack, is the next best to Registered, and can be purchased with the utmost confidence.

Following factors have tended to raise price: Sharp demands for higher quality wheats for immediate delivery—Good rain urgently needed in Australia—French Cabinet rejects foreign exchange control —Germany must import considerable grain—U.S. private and government spring wheat estimates slightly reduced — Expect reduction Manchurian wheat estimate—French Moroccan olive crop suffers from adverse weather.

Following factors have tended to lower price: Rainfall deters deterioration in Argentina crops— Good bread-grain harvest in Finland — Roumania increases wheat export premium— Large Canadian fruit crops—Expect better sesame production than last year in Palestine—Coffee crops in Haiti promise good yields.

Millet Apple Tree In Bloom October 3

Believe it or not but its Apple Blossom Time in Alberta in October, and to prove it J. C. Wagner, Box 28, of Millet, Alberta sends an apple blossom to The Bulletin which was plucked from an apple tree in his yard on October 3.

"The tree is a three year old tree which blossomed in the regular way this spring. There were only two apples on the tree and they were blown off by the wind. Then late in September the tree blossomed out again and I am sending you a blossom I picked from it this morning, October 3," said Mr. Wagner.

It's one for the book in the opinion of University of Alberta agricultural experts.

Even the old home town has changed a lot. You don't see the women bringing in the wood and water as they did in the good old days.—Milwaukee Journal.

ARE THE DROUGHT YEARS AT AN END?

(Continued from front page.)

for 10 points within the prairie semi-arid area or inside the Palliser line — averaged 11.41 inches, whereas the longtime average for the same points is 12.86 inches and the average for the last 2 drought years alone being 8.67 inches.

For [illegible] points outside of the Palliser line in what is termed the prairie wooded area, the similar annual 5 year average 10 years ago, was 10.67 with the longtime average being 12.89 with the average for the last two years 11 [illegible] inches.

Taking the period 23 years ago for the semi-arid area, the first five years for 32 points show an average rainfall of 11.9 inches, the longtime average being 12.24 with the last two years 9.60 inches. For the semi-arid area, 26 points for the first five years 23 years ago show an annual average of 12 [illegible] with the longtime average for the same points of 12.70 and for the last two years 11.09 inches.

Apparently then while the average annual rainfall for five years for points 16 years ago and 23 years ago was slightly less rainfall than the longtime annual average, the difference is neither significant nor [illegible] particularly when [illegible] with the much lower rainfall of the last two drought years.

It is noted also that there were no [illegible] years together, either 46 years [illegible] 21 years ago, when the rainfall was anything like as low for both years as it has been during these last two years of 1936-37; but there was, in the year 1886, for the 10 points in the semi-arid area one bad drought year, with only 8.60 inches, and a bad drought for the same year with the nine points in the wooded area showing an average of only 8.02 inches.

Also to be noted is the fact that 27 years ago for 32 points, in the semi-arid area there was one year, 1910, which averaged only 8.09 inches and for 26 points, in the wooded area for the same year, 1910, an average of only 8.27 inches.

About 46 years ago, therefore, while there was not a series of drought years such as we have recently experienced, there was one year, 1886, which was somewhat worse than any that has occurred during this recent drought and about 27 years ago there was also a very bad drought year in 1910.

All of which, it seems, illustrates the extraordinary mentality of a certain group of people who seem concerned with an almost uncontrollable [illegible] the activities, lives and [illegible] of all the people, producers [illegible] consumers alike.

There are many who would extend exactly this same form of "planned" control to wheat producers and to the marketing of wheat and other products; and then to the "planned" control of our entire economic and social life.—Searle Grain Co. Ltd.

TRAGEDY OF A BLIND MOOSE

(Continued from front page)

direction.

"Give me the camera," I said. "This is my chance to get a real picture."

"You won't if you go barging through those alders," said Bob. "Let me have the camera, and you circle around behind the bushes and drive the moose out onto the river. That's our best chance for a picture."

Realizing that Bob was right, I surrendered the camera, and started for the river bank. Now, had the moose acted as we had planned it should, we would probably have taken a picture, and then gone on our way. True, as I approached her she turned slowly in my direction, then wheeled and started through the alders toward the river. However, just as she was about to cross the stream, Bob shifted his position in order to obtain a better view. Hearing him, the moose once more turned about, and increasing her pace, headed for the steep bank. Up the ice-covered slope she raced—for a few yards, only to come sliding down. Once more she tried, but in vain.

By this time we were but a few yards from the struggling animal. Sensing our presence, she turned from the icy bank and headed for the river. Crossing it, the moose finally came to a stop on a small flat. Turning about to face in our direction, for several minutes she stood stock still, waiting for us to make the next move.

We played her game: we didn't budge. Minutes passed. Finally the moose turned, slowly, first in one direction, then in another pricking up her ears, endeavoring to locate us. This, owing to the fact that the wind was in our favor, she could not do. However, she seemed to know that danger lurked near at hand. Suddenly te moose started to circle, at first barely pivoting on her hind legs. Gradually she enlarged the circle's circumference, all the while striking out with her forward legs, goose-step manner.

"Well, I'll be damned," said Bob, "I never saw a moose act that way before."

"Why's she doing it?" I asked.

"She may be making sort of a bed," Bob replied, "though that's not natural. No. She's acting that way to protect herself. There's certainly something wrong with her. Look ..."

I turned, just in time to see the moose goose-step fair into a long, narrow opening in the ice. As her forward legs plunged downward, the moose, thrown off balance, literally tumbled into the opening. Floundering about in the frigid water, she finally rited herself; then stood, motionless, staring upstream.

As we approached, the moose did not offer to move. As a matter of fact, it took several minutes of prodding and shouting on our part to dislodge her. Once out of the water, she turned in our direction. However, again the wind was in our favour, although we were not twenty paces distant, she could not locate us. For several minutes the moose pricked up her ears and sniffed the air in various directions. Then suddenly she wheeled, pivoted, then circled, striking out with her forward hoofs, and ever enlarging the circle, until finally she once again tumbled into the pothole.

"Poor devil," muttered Bob, as the animal endeavoured to gain her feet, "she's not right, that's sure."

"Did you notice her eyes?" I asked.

"I couldn't help but notice them," said Bob. "They seem to be covered with a sky-blue film."

"Hadn't we better try to drive her up the bank?"

"Can't be done."

"We can try," I insisted.

"All right, let's see what we can do."

As the moose was by now exhausted, it took some time to persuade her to leave the water and then to tackle the ice-covered slope. Shouting, and prodding, we urged her on. Gamely the tired animal started to climb.

Up ten paces only to come sliding down, her hooves carving deep gashes in the ice. After another futile attempt, she gave up, wheeled about in our direction, flattened her ears, and stood as though defying us to approach.

"Well," said Bob, "that's that."

As he spoke, the moose turned about and started downstream. Across her path lay a birch windfall; and, to our amazement, she charged fair into it. Retreating a few paces, she shifted her course slightly, then advanced. Again she struck the birch. This time she nosed the obstacle, and so felt her way around it.

"Now I'm sure," said Bob.

"Sure of what?"

"I'm positive that that moose is as blind as a bat."

"Blind!" I scoffed. "Whoever heard of a blind moose?"

"Maybe your right," said my companion. Let's follow her and see what happens next."

As we were about to start downstream, we heard behind us the crunch of approaching footsteps. Turning, we saw the district game warden, a 32 Special slung over his shoulder.

"Where's the war, boys?" he asked, grinning. "You lads have been making enough noise to wake the dead." Then, as he spotted the moose, his expression changed.

"What have you fellows been up to?"

After Bob had explained, the warden at first laughed at our theory of blindness. However, after he had seen the moose tumble into a pothole, crash into several trees, and finally stand, staring in our general direction, but not directly at us, he was as mystified as we were.

"She's blind, all right," said the warden.

"And trapped," added Bob.

"Yes, I'm afraid so." Then, after a brief pause, the warden continued, "There's nothing more we can do. I'll have to do away with her."

In less than a minute it was all over; the moose suffered no more.

"Too bad," said the warden, "she was in good shape."

"Ever heard of a blind moose before?" I asked.

"Yes," he replied, "once. But I swallowed the story with a grain of salt."

"But why should she go blind?" asked Bob.

"Might be caused by a dose of buckshot. Or possibly she hurt one of her eyes, it became infected and then frozen. Though, mind," the warden added, "I'm only guessing. But no matter what the cause, we've just witnessed one of the tragedies of the wilderness.

How come a radio speaker sees "that his time is up," and quits while an after-dinner speaker, like Tennyson's brook, "goes on forever?"

First of New Planes Is Received at Vancouver by Trans-Canada Air Lines

Vancouver, B.C., October 8—The first of the fleet of new planes for the Trans-Canada Air Lines was received in Vancouver today. Alderman Hal Wilson, Chairman, Civic Airport Committee and W. A. Rundle, Transportation Secretary, Vancouver Board of Trade, were on hand with members of the air line staff to meet the ship, which was flown by factory representatives from Burbank, Cal. The ship was completely checked over and put through its paces by Pilot Bill Wells before acceptance by the company.

Before the end of the month it is expected that two additional planes will arrive here for the Trans-Canada service, to be followed during the next few months by four larger planes.

The plane received today is a Lockheed model 10A and will carry ten passengers as well as a pilot and co-pilot. It will be put into immediate use for the training of pilots in instrument flying.

The Lockheed 10A's are powered with two Pratt and Whitney Junior Wasp engines which give them a maximum speed of 205 miles per hr., with a cruising speed of 183 miles per hour. They have a fuel capacity of 207 gallons with a cruising range of 720 miles. Their wing span is 55 feet with an overall length of 38 feet 7 inches. They weigh 10,500 pounds with full load.

The other two planes to be delivered before the end of the month will be identical to the one received today, while the four other planes of the fleet of seven will be 14-place Lockheeds. They will be the largest and speediest type ever used in regular scheduled air line service in Canada. They, as well as the ten-passenger Lockheeds have twin engines, two-way radio communication apparatus and all of the latest devices for ensuring the comfort of passengers and safety of flying.

The Lockheed 14-place airliners are powered by two Pratt and Whitney Hornet engines which will carry the big machines through the air at a maximum speed of 247 miles per hour when flying at a height of 6,900 feet, with a cruising speed varying from 200 to 230 miles per hour, according to the height at which they are flown.

They have a fuel capacity of 600 gallons and a cruising range up to 2,125 miles. They weigh, fully loaded, 17,500 pounds. They have a wing span of 65 feet six inches with a wing area of 551 square feet and an overall length of 44 feet 4 inches.

Town Council Meeting

The regular meeting of the town council was held on Monday evening, October 18th with Mayor Swift, councillors Lovell, Bruce, Hammond and Dr. Law present.

The minutes of the meeting and a large amount of routine business was disposed of.

Applications for operating the skating rink were dealt with, and the rink was leased to Alastair Swinton for the coming season on similar terms to the previous year.

The health committee reported that arrangements had been made to clean up the nuisance grounds and that most westerly two acres would be used for that purpose, a new grade having been built to a dumping spot well removed from the highway.

It was decided that the annual tax sale under the provisions of the Tax Recovery Act would be held on Saturday, December 4th, in the afternoon. The matter of fixing reserve bids will be taken up at the next meeting.

The usual statement of receipts and expenditures for the previous month was read and ordered put in the minutes.

The Secretary was instructed to interview the Board of Public Utility Commissioners when in Edmonton to ascertain if any progress had been made in refunding the debenture debt of the town.

LOCAL & PERSONAL

Mr. Henry Thompson of Grimshaw, Alberta, visited with Mr. and Mrs. M. C. Wood last week.

On Thursday evening last, a number of friends pleasantly surprised Mary Nahrebecki at the home of Mrs. Norman Scott. The occasion was Mary's birthday and a lovely gift as well as many good wishes was presented to the guest of honour. A delicious lunch was served and all departed for their homes after a very enjoyable evening.

Mr. Ben Hobson of Edmonton spent the week end at the Bethel home.

Mr. and Mrs. Bill Clark of Edmonton spent Sunday in Tofield.

Miss Muriel Malcolm spent Monday and Tuesday visiting in Edmonton.

Messrs. Jack Kelly and N. Warning spent Saturday at the Glover home.

KETCHAMOOT

Threshing started up again on Monday after a prolonged seige of wet weather. Many anxious farmers are wishing for a week or two of dry weather as most of the oats and barley is yet to be threshed.

Dr. Law and his assistant nurse vaccinated a large number of children at the school house two weeks ago.

Mr. and Mrs. A. F. Thompson, Miss Lois and Mr. Harland of Leduc were Sunday guests of the Sears family.

Miss Edith Davison entertained the Social Hour club at her home Thursday afternoon of last week. A pleasant afternoon was spent by the members and visitors present.

Mr. and Mrs. G. P. Thomas and family of Tofield visited at the home of Mr. and Mrs. Schultz.

Mrs. J. Younie, daughter Mabel, Misses Edith and Isobel Dawe and James Younie, all of Edmonton, were guests of Mr. and Mrs. W. A. Mitchell Thanksgiving Sunday.

Mr. and Mrs. Simerson and son, Mr. and Mrs. Weir and family of Edmonton were guests of the Nomeland family Sunday of last week.

Mr. and Mrs. Appleby and sons, Miss Margaret and Billie Mitchell, Mr. and Mrs. Sears, Miss Hazel and Albert spent Thursday in Edmonton last week.

Mrs. W. A. Mitchell entertained the Ladies' Aid at her home September 6. The Thanksgiving tea and sale was postponed until after threshing.

Mr. and Mrs. George Lawson and son Martin, Mr. and Mrs. Herman Lawson motored to Edmonton Tuesday, returning home in the evening.

A crew of men are building a new loading platform on the Bardo siding.

Bears—Beavers To Go On Trip

Jasper, Alta. October 18—Preparations are being made for the shipment to Dudley, Yorkshire, England of two cub bears and two beavers, which are to be placed in a zoo in the English city as specimens of Canadian and particularly Jasper National Park animal life.

"Jasper" and "Alberta" the bears, have both settled down philosophically to the experiences of civilized bear life and are accepting calmly the conditions imposed upon them for their journey overseas. With plenty of their favorite chopped carrots and apples, they don't seem to mind the restrictions of stout-wired cages.

As for "Janie" and "Johnny Canuck" the beavers, nothing bothers them. So long as there are nice poplar sticks for them to chew, they are happy, and a move to England has no terrors for them.

CARD OF THANKS

The Vestry of Holy Trinity wish to thank all those who made the Harvest Home supper a success by donations and attendance.

LINDBROOK

Threshing is being done in fits and starts here, that is, 'tween showers. It seems as if the stooks have taken heed to the words of the old drinking song, "Another little drink wouldn't do us any harm." Still eventually we suppose the last of them will get dry enough to thresh. There's one consolation, the date being past mid-October and some years at that date we've been snowed up and froze up for the winter, so take it as it comes, you can't do anything about it anyway and worry kills.

Messrs. S. Sullivan, A. C. Scott, O. Lundgren and E. W. Hooper went up to the city this week to attend the annual sale at the Exhibition grounds of pure bred sheep and swine. These gentlemen went up to purchase pure bred rams to head their flocks and brought back some very fine rams.

A surprise party was sprung on Mr. George Weatherill at his home in Tofield last Friday, the occasion being his birthday. All his old friends and neighbors of this district were present, those who were here in "ye goode olde dayes" before the depression. Whist was the order of the evening, five tables being in play. The winners were: Ladies first, Mrs. Frank Gould, Ladies' consolation, Mrs. J. H. Brown, Gents first, Mr. P. Holland, Gent's consolation, Mr. Norman Ellis. After the game and awards, the party sat down to the "wedding" pardon me! "birthday breakfast" it being morning. George performed splendidly with his birthday cake, blowing all the candles out at one puff, but his carving of the cake shows that he needs a few more birthdays yet to practise in. Everyone present enjoyed the party, and by the way, whose birthday is next?

A Bingo Party and Dance will be held at the school here next Friday, October 22nd in aid of the Xmas tree for the children, so make it a point to be there and have a good time for a good cause.

Mr. and Mrs. Stevens of Edmonton are at present on a visit to Mr. and Mrs. Geo. Wealake at Hastings Lake.

Local U.F.W.A. Party

Responding to novel personal invitations mailed, a large number of members of the local U.F.W.A. held a most enjoyable birthday anniversary party at the Donnelly Warner home, Thursday, October 14th. Mrs. Morton, displaying silver star, acted as constable, collecting admission of two cents at entrance and fining all not wearing suitable attire. Binder twine shoe laces were much in vogue. Perhaps the most unique makeup present was Mrs. Baptist, in gunny sack skirt and Ogilvie blouse, Warfield hose and corsage of wheat, oats and onion tops, while Mrs. Burchard as the "flapper of the gay ninetys" was the envy of all.

Prizes were awarded the following Mrs. Harold Weatherall, costumed attractively in flour sack ensemble, Mrs. Jacobson as the "wee" child with her doll from Sunshine Alley, Mrs. Elgin Seale, modern farmerette.

Entertainment was not lacking. Original guessing games and others bordering on hilarity were provided. Mrs. Sam Johnson received prize in name guessing contest and winners in paper bag race were presented with "porkers" cleverly fashioned from potatoes.

After first serving bread crusts and passing the water bucket with its community cup, a most delicious and sumptuous luncheon followed, including the beautiful birthday cake with its candles and many mysteries.

Everyone present agreed this party the best yet. Hearty thanks was extended to the group for their royal entertainment and to Audrey for the hospitality of her spacious and delightful kitchen which all were reluctant to leave.

Pathe movie cameras were in evidence, thus assuring Tofield community they will see and hear more from the local U.F.W.A. The next meeting will be held on Friday, Nov. 12th, the place to be announced later.

Community Sale
SATURDAY, OCTOBER 30

The Community sale advertised for October 23rd, has been advanced one week and will be held on Saturday, October 30th, commencing at one o'clock. If you have articles to list in this sale, list them with J. E. Stinson, Tofield.

There's a rumor that the next issue of "Who's Who in Russia" will be published in loose-leaf form.

KINGMAN

Mr. T. Rognesс, the mail carrier, has a new radio in his home

Mr. Alex Asp, Mr. Andrew Johnson and Mr Grahn were Edmonton visitors last Wednesday.

Mr. and Mrs. Alvin Lehman and little daughter were supper guests at the N. Wideman home last Sunday

Mr. and Mrs. Fenwick have gone to Stereo for the winter and Mr Pete Ferragen is on their farm

Mr. Harold Boetger is in an Edmonton hospital for a goitre operation. We hope he will soon recover

There was a party held in the Hall last Friday evening in honor of Mrs. Eric Erickson, who is leaving for Sweden this week. She expects to be gone about a year.

Mr. Harold Johnson of Grand Prairie is visiting his parents, Mr. and Mrs. Andrew Johnson

The Ladies' Aid are busy making quilts for the sale which will be held sometime in November

The threshing machines are busy again and expect to be finished up this week.

Mr Skalin and Mr. Grahn have sold a car load of coal in the community and are planning to get another car

The Baptist people are busy digging out a basement for their church

Quite a number of people from here attended the funeral of Rev Erickson last Saturday

Mrs. E. Wuetherick and small daughter are holidaying at St. Paul.

Police Check-Ups On Car Drivers

Should the R.C.M.P. be more strict in their enforcement of motor traffic laws in this province?

That question has arisen through check-ups showing the number of cars operating on the highways in violation of the provincial laws.

Every day there are hundreds of cars being operated on the highways of this province with only one headlight, commonly known as "one-eyed" cars. Numerous other cars will be seen without proper tail-lights, often with no tail light at all.

Reports of a road patrol appointed by the Edmonton branch of the Alberta Motor Association contain some alarming disclosures as to traffic law violations. In all likelihood this will be a subject for discussion at the annual meeting of the Alberta Motor Association to be held next month.

In New Brunswick the mounted police have received definite instructions from the government to make a concerted drive for stricter enforcement of the traffic laws.

The system being put into operation in that province provides for an offender being forced to take his car off the road for one month at least, after he has received three warnings for minor offences.

Violators of traffic regulations are a menace to all who use the highways, whether travelling in motor or horsedrawn vehicles. To curb the accident toll, a stricter check-up of traffic violations appears essential.

Scarlet Fever

Scarlet fever is a disease common to children, and is caused by a virus (living organism) finding its way into the body. It occurs most frequently in the autumn and is usually epidemic in character because it is highly communicable.

As a rule the period of [illegible] is sharp and acute lasting from twelve to twenty-four hours. The patient complains of feeling sick all over, with headache, sore throat, vomiting and a burning up feeling due to a temperature which may range from 103 degrees to 105 degrees Farenheit. On the second or third day of illness red spots appear first on the neck and chest and then spread rapidly over the body. The chin and an area round the mouth and scalp usually escape. The skin may be swollen and tender to such an extent that it makes the movements of joints painful. The tongue is covered at first with a whitish fur but this disappears on or about the fourth day revealing a bright red tongue dotted with bright red spots popularly called the strawberry tongue.

During the period that the red spots are coming out the throat remains sore, there is pain in swallowing, the voice is altered, and unremoved tonsils are markedly prominent, generally covered by yellowish membrane.

The temperature remains high — from 103 to 105 degrees Farenheit until the rash begins to fade, which it does in three to ten days.

Then comes the stage of convalescence. As the rash disappears the skin begins to shed itself (desquamation the scientists call it) beginning on the face, neck and chest and this lasts from one to three weeks, sometimes longer.

As desquamation is probably the period of greatest infection, great care should be exercised then as throughout the disease to protect other persons from contagion.

The patient should be kept in bed for two to three weeks depending upon the severity of the case and isolated for five to six weeks until all danger of infecting others has passed.

It should be emphasized that scarlet fever is one disease that is frequently associated with complications involving other parts and organs of the body. It is most important therefore, that proper treatment be commenced at the onset of the disease.

And a word to mothers. If your child complains of feeling unwell and shows symptoms in whole or in part as described in this article, immediately put him to bed, away from other children and call your doctor. Scarlet fever like other infections requires to be treated intelligently. And the earlier the treatment and management is begun the less likely are complications to follow.

Questions concerning Health, addressed to the Canadian Medical Association, 184 College Street, Toronto will be answered personally by letter.

British People Going In For Drinking Milk

Winnipeg, Man. October 13—Over 700,000,000 gallons of milk are consumed in Great Britain each year. Approximately 22,000,000 gallons are consumed by school children under the plan whereby milk is supplied to schools at a low price. The growing popularity of milk bars is also increasing the consumption of milk, there being no fewer than 681 milk bars now doing business in Britain. There is a total production of some 1,200 million gallons, according to the Agricultural Department of the Canadian National Railways. About 2,500 million gallons are imported in the form of dairy produce.

The Facts About Banking in Canada

Reproduced from the Sixth Broadcast in a Series by Vernon Knowles for the Chartered Banks of Canada and Delivered Over a Province-Wide Network of Alberta Stations on Tuesday Evening, October 12th, from 8:30 to 8:45, and Wednesday, October 13th, from 12:00 noon to 12:15.

Outlines Loan Process by Which Banks Convert Credit of Borrower into Spendable Money . . . Shows Position of Bank Shareholders . . . Deals Further with Limited Power of Banks To Issue Own Notes . . . Cites from Letters Received Actual Cases Where Bank Loans Enabled Borrowers To Turn Substantial Profit.

IN this broadcast on behalf of Canada's Chartered Banks I want to get back to that utterly mistaken idea that banks make money out of nothing. Critics of the banks will tell you that banks lend by creating credit and that they create the means of payment out of nothing, that when they build a building it costs them nothing and that when they pay taxes it costs them nothing. These statements are absolutely untrue.

When a bank makes a loan just exactly what is it that the bank does?

Here is the answer — it takes the note of the farmer or manufacturer or the bond of the Government, and places an equivalent amount to the credit of the said farmer, manufacturer or Government, allowing of course for a rental on the money.

In other words the bank assumes an obligation to pay that amount to the farmer, the manufacturer or the Government.

[illegible] that obligation is one that must be met — and in actual practice is met — it is a very real thing.

The transaction creates a credit on the books of the bank but the means of payment which the banks are charged with creating out of nothing consists of resources of the bank — in the last analysis, cash.

Moreover, it should be borne in mind that in all lending transactions by a bank it is the borrower who starts the process — he goes to the bank and asks for a loan, generally for a specific purpose, out of which he expects or intends to make a profit for himself over and above the bank charges. The bank does not go to him — he goes to the bank.

What the bank really does, in effect, is to convert the credit of the borrower himself into spendable money, which he can use for the purposes of his business, paying wages, paying his debts at the country store and meeting other obligations. If a man owns cattle he cannot spend cattle. He cannot pay his debts at the country store with cattle. His ownership of the cattle and his expectation of selling them at a profit to himself are the basis of his credit. When he borrows from a bank on the security of cattle what happens is that the bank converts a form of wealth, which he cannot spend, into something which he can spend and which anybody else will accept.

There is no magic about it and those who contend that a bank can create money or the means of payment out of nothing — are entirely wrong. The function that the bank performs, as we have stated, is to convert the credit of the borrower into a form in which he can spend it.

Without a bank the farmer possibly could buy seed in the spring, hire help through the growing season and harvesting, and purchase supplies for his family in the meantime on credit — paying these debts from the sale of his crop in the fall. However, common sense tells us that the seed merchant, the farm labourer or the country store keeper could not get very far on this basis, for they could not pass on to the people, from whom they in turn buy goods or services, the obligations which they have received from the farmer.

Why is this so?

For the reason that, be the farmer's credit ever so good, how could scores of people look into his integrity and his financial worth as they would require to do before taking his promise to pay. Instead the bank looks into the farmer's affairs, accepts the risk, lends him the money and enables him to pay cash.

If it were otherwise and if banks created the means of payment out of nothing, why has it been necessary through the centuries to find people, called shareholders, ready to put their money into the banking business in exchange for a fair return? If no basis is required for what the bank does, the business of banking should be an amazingly profitable business — but it is not. The fact that it is not an amazingly profitable business is a simple matter of record, as we have shown in our broadcasts.

Some of our listeners have asked that I say more about note circulation — that is, about the powers of a bank to issue notes. The request has been prompted by the utterly fantastic idea that a bank can, say, erect an expensive branch office building for nothing by issuing its own notes. A bank simply cannot, as has been suggested, issue a bunch of specially numbered bills, pay them out to contractors and others and then cancel them when they come back.

Let me say to you again that no such thing can possibly happen, for the bank must give the holder face value for its notes when he presents them. Moreover, I have shown you that there are very definite legal limits upon the amount of notes that a bank can issue. A bank's notes are a debt owed by the bank to the person who holds them — a debt redeemable in cash on demand.

As a matter of fact, a bank's notes are the very first charge upon its assets — that is to say in case of trouble a bank's notes have to be paid off before a single cent can be paid on any deposits or on any other debts owed by a bank. To make doubly sure of this there is a fund in the hands of the Dominion Minister of Finance, known as "The Bank Circulation Redemption Fund."

This is money paid in by each of the banks to the Minister of Finance at Ottawa, amounting to five per cent on the average amount to Chartered bank notes outstanding. This money is in the nature of a pool and would all be used, in case of need, towards paying off the notes of any bank. Surely all of this should finally squelch the idea that a bank has unlimited power in the matter of issuing its bills.

In any case, as I have told you before, the right of issuing notes is being steadily, year by year, taken away from the Chartered Banks and vested in the Bank of Canada. In order to obtain Bank of Canada notes or bills for use as currency the Chartered Banks have to buy them. Every dollar in notes and every dollar of other bank obligations must always have behind it a dollar of assets. Let me stress, once more, that every obligation of a Chartered Bank is payable in cash.

Some supposedly great authority is quoted as having said that if all bank loans were paid all deposits would disappear and there would be no money in existence. I don't think that many Alberta people are stampeded by such statements.

It is equivalent to saying that if every sea were drained dry there would be no ocean liners. If every bank went out of existence to-morrow there would still be wealth but the job of marketing that wealth would take us back to the dim, distant days of barter. Nothing is gained at any time by such extreme statements.

You have been told that when a bank makes a loan and takes security, the bank then uses that security as if it were its own. Such a statement is 100 per cent false. The security lodged with the bank remains the property of the borrower and all the records of the bank prove that fact. He can call for his security to be produced and shown to him at any time. Such security does not appear in the bank's balance sheets at all and when the loan is repaid the security is handed back to the borrower intact.

Some of our critics plunge into very deep water when they draw conclusions from the statement that every dollar that comes into circulation represents a debt on which somebody must pay interest. That statement is used to convey to you a sinister impression, an entirely false idea of what money really is and does.

To illustrate in the plainest of everyday terms let us start from the beginning:

I go into the bank and I borrow $1,000 on which, naturally, I have to pay rent, or if you prefer, interest.

The bank gives me, in exchange for my note, $1,000 in bills. I have got $1,000 of money, on which interest has to be paid because the bank is giving me a service.

Why do I borrow the money?

I was going to use it in a deal, expecting to make a profit for myself; or I wouldn't have borrowed the money at all.

Very well; I carry out the deal successfully. I repay the bank the $1,000 I borrowed, and I have a profit, say, of $100, which I put to my credit in the bank.

You will see by the use of this borrowed money on which I paid rent, I have increased my own resources by $100, and the bank has received back its $1,000.

When you multiply that thousand-dollar borrowing of mine, my use of the money and my profit, time after time, you see what is happening continuously throughout the year in the business world and you see that the interest is not any strangling charge as has been represented to you. You pay rent, and you make a profit out of it — whatever the nature of your business may be.

It is a continuous, revolving process — in which the dollar you use is not dead-weight debt at all, but productive money. There are times, however, when some of it may become temporarily dead-weight debt. To illustrate such a case, let us say that through drought or misfortune I suffer a loss for a season — say my deal has not been successful—and I lose a part of my borrowed $1,000.

In these cases, what I have lost does for the time being become dead-weight debt. But with a better season and better prices and better business I have a chance to recover my losses and repay. By far the greater part of the dollars that are issued are not dead-weight debt as you have been so often told; there is nothing sinister in the manner nor in the purpose of their issue, nor in the work that they do; they are, in fact, productive money, constantly adding to goods and services and increasing the world's store of new wealth.

That is all there is to bank money. Bank loans are really constructive and productive; and the deep, dark hocus pocus with which critics seek to surround it is recognized, by folks of practical experience, as simply transparent nonsense.

Since we started broadcasting on behalf of Canada's Chartered Banks I have received many letters from Alberta people: I have before me one of them, which gives an instance of a large-scale farmer who had occasion to borrow $8,000 to purchase feeder cattle.

This farmer says: "When I borrow money I estimate my prospective profit very carefully and, if I do not see where I am going to make interest charges and a substantially higher profit for myself I do not borrow the money. Without a bank loan I could not possibly have financed the purchase of the cattle and, further, I feel that the bank's profit is small and mine proportionately large. I consider that I should assume all the risk of loss for the sake of this higher prospective profit. My borrowing is intelligent borrowing from a purely individual and selfish standpoint. I had a similar loan, on which the interest charges amounted to about $100 some time ago. On this loan I realized a net profit of more than $2,000 because I was able to feed all of my coarse grain and to realize in the neighbourhood of ninety cents a bushel when prices were in the neighbourhood of twenty to thirty cents a bushel."

I have another Alberta letter, in which a farmer tells us that he had twenty hogs and, being short of feed, wanted to sell them. He was offered $300 for the twenty hogs and did not want to let them go at that price, so he went to the bank and borrowed $50 only. This enabled him to hold the hogs and feed them a while longer, with the result that he eventually sold them for $380 instead of the $300 he had been offered. In other words he borrowed $50 from the bank, the bank made a gross revenue of about $1.75 but the farmer made a straight profit of $80.

I have a letter before me also which appeared in the Calgary Herald from a [illegible] Producers' Association in the vicinity of Calgary. It reads in part: "We are hearing a good deal about banks these days. I do not profess to know much about banks or the banking business but I do know that, if it had not been for the banks last fall, I, along with many others, would have been forced out of business." These are but a few examples taken at random from a large quantity of our mail.

In earlier broadcasts I have told you that deposits in the banks are the basis upon which banks can make loans. Let us demonstrate its truth.

Suppose a bank started business with $10,000 in cash and lent that amount to various borrowers. Then suppose each borrower drew out the amount lent to him, in cash, and each person to whom he paid this money put it in a sock, kept it under his mattress or hid it behind the clock, so that none of it came back to the bank in the form of deposits. As the bank has no cash in its vault the bank does not make another loan because it could give no cash to the new borrower.

We can go on converting borrowers' assets into spendable form, i.e., making loans, only if the depositing public are willing to entrust their funds to us. It is the confidence of the people in banks and their willingness to leave their money on deposit that enables a bank to lend money and serve the community.

How, therefore, can it be said that we have usurped the right to monetize credit? As we have shown, it is the individual who in the first place possesses the credit; he asks the bank to convert that credit into money he can spend. The bank only does it on his request.

Now I have an announcement to make. This is the last of our broadcasts, at least for the time being. In one of our broadcasts we said that some of your Alberta branch bank Managers might be heard in this series. Instead, I incorporated in my talks with you, much material which came to me direct from them.

We told you in starting our talks that we would be non-political and non-controversial and would state to you nothing but the unvarnished facts about Canada's Chartered Banks and the work they do. This is exactly what we have done. There is no mystery about Canadian banking, other than the mystery created by critics who are not well informed.

We are doing an honest business and have nothing whatever to fear from the fullest disclosure. Four million depositors have confidence in Canada's Chartered Banks. Were it not for that confidence in the honour and integrity of Canada's Chartered Banks no loans could be made at all.

We wish to thank our listening audience for the many encouraging letters and messages they have sent in. Our talks have all been put into pamphlet form, and if you wish to have them, any branch bank Manager will be glad to give them to you and to talk over with you any of the matters with which we have dealt.

Theorists never run out of theories — but facts are stubborn things. Our story stands for your fair-minded consideration. We leave it to you with confidence.

GOVERNMENT—

TO THE INDIVIDUAL born into this present age and generation, and raised under British or American rule, a democratic form of government must seem a fixed and permanent institution. To never have known any other governmental system, to have always enjoyed the privileges of free speech, free and open discussion on any subjects pertaining to political affairs, just naturally bring about a sense of security and a feeling that these things are here for all time. The very fact that each generation believes itself to be further advanced technically, mechanically and socially, than the preceding one is a sufficient mental sedative to take things as they are and to be lulled into a false sense of security. That this is essentially true lies in the oft repeated sentence and the title of a book by a well known American author "It Can't Happen Here." Those of us who have known no other form of government cannot realize the extent of the long drawn out and bitter battles that apparently were necessary before freedom of political thought, speech and action were an assured reality. In every age and in every clime nature has endowed certain individuals with a craving for power and the ability under certain sets of circumstances to obtain it, just the same as nature has endowed throughout the ages, certain individuals with the craving and ability to amass wealth. Therefore if the peoples of those countries with democratic ideals desire to retain the freedom of political thought and action that democracy provides, they must be ever on the alert to see that piece by piece, this freedom is not taken from them. It is not correct to say "It Can't Happen Here," because if the people are willing, through a false sense of security or through any cause whatsoever, to allow it to happen—it certainly will happen.

When most speakers or writers mention democracy, they invariably try to give it a sanctified sound. In a sense they are justified, but after all, democracy is simply a form of government, it is not the only form as everybody knows, neither is it a perfect form. The most that can be said for democracy by those favoring it is that it is the best form of government. Literally the word democracy means, "power of the people."

Some thirty, forty, or fifty years ago the human race, judging from current literature of the time, was divided into a number of major religions, Christian, Mohammedanism, Brahmanism, and others. One reads or hears little of this to-day, but rather, steadily and persistently there is emerging three distinct schools of thought as regards political government, viz: communism, democracy, and dictatorship. How well these three great political movements will get along in a world criss-crossed by numerous lines of communication and travel remains to be seen. Strangely enough, while dictatorship and communism are supposed to be diametrically opposed, in actual practice they have many features in common. The most notable perhaps of these, is the worship of state, the stifling of all criticism concerning government affairs, and the immense power wielded by one individual. To say that communism is all bad is foolish; to say that dictatorship is all bad is foolish also; to say that democracy is all good is just foolishness multiplied by two. The truth is that there are good and bad features contained in all three, but out of the three we believe a democracy exercised by an intelligent and well informed electorate is the best system of the three.

Mankind NEEDS three primary things, food, clothing and shelter, but such is the nature of mankind, that in addition to needs, he reaches out for WANTS. Among the most potent wants of mankind is freedom of speech and action relating to government matters, within the confines of truth and justice. And so potent is this want that it is impossible among a large number of people to permanently subdue it. At some point in the political structure, despite all the precautions taken, some group somewhere, breaks out with action ranging all the way from sabotage to assassination. It was in no small measure for this reason that democracy, as we understand it to-day, was evolved. It should not be necessary for citizens of any country who consider themselves patriots, to be executed simply because they are in the minority and because they express political views different to those held by the governing body. And extreme dictatorship means just this. Not that every opposing voice is permanently silenced, there are no doubt varying degrees of punishment for varying degrees of offense, but the fact remains that despite the apparently overwhelming support accorded a dictator, he maintains his power more by the suppression of opposing views rather than through the merit of his own.

Democracy is woefully inefficient and imperfect. The continual parade of the great and near great across the political horizon becomes almost monotonous at times. Money—the result of mental and physical labor—collected by taxation, often is spent in numerous needless ways. Here in Canada we are very much overgoverned. Hundreds of thousands of dollars are annually collected from the people merely to be spent in keeping up a huge political machine with as many twists to it as there are hairs on a dog's back. But even so, money can even

(Continued on back page)

Canadian Youth Training
(ALBERTA PROGRAM)

Under the Dominion-Provincial Training scheme a widely representative committee of people in educational, agricultural, industrial and municipal fields was set up and called together by the chairman, Dr. G. Fred McNally, Deputy Minister of Education for the purpose of discussing the various projects which might be undertaken under the grant. This committee, composed of some twenty persons representative of all parts of the province, met on Monday, October 4th, in the office of the Deputy Minister of Education, Parliament Buildings, Edmonton.

In order to publicize the work of the committee and thus allow the youth of the province to know what is being done it was agreed to prepare posters outlining the five projects to be undertaken. These posters are being mailed Saturday, October 16th, to all Post offices, Town and Municipal offices and other public places. The posters are being placed also in the employment bureaus in the six larger centres—Calgary, Edmonton, Medicine Hat, Lethbridge, Red Deer and Drumheller. Application blanks will accompany these posters and the youth interested should fill these out at once and send to J. H. Ross, Director of Youth training, Telephone building, Calgary, not later than October 25th. Applicants should indicate on their application their 2nd and 3rd choices of vocational training in case the quota for their first choice is already filled.

All youth interested should listen in to Radio stations C.K.U.A. and C.F.C.N. for further particulars as they develop. Times specified as follows: 1:30 to 1:40 p.m., Friday, Oct. 15th; 1:30 to 1:40 p.m. Monday, Oct. 18th; 1:15 to 1:30 p.m. Tuesday, Oct. 19th; and 6:00 to 6:30 p.m. Friday, October 22nd.

The monies to be expended were allocated under five specific headings known as Schedule A, B, C D and E and a supervisor for each project appointed. The projects are as follows:

Project A—Under the direction of the Department of Extension, University of Alberta, in co-operation with the Department of Agriculture. This project will call for the setting up of between 20 and 30 schools and short courses, for young men and young women between 18 and 30 years of age, in strategic rural centres throughout the province. The courses offered will consist of practical agriculture, including field crops, animal husbandry, soils, poultry, farm mechanics, dairying, horticulture and small fruit raising. Courses for young women will include household economics covering foods, nutrition, health, clothing, home beautification and poultry, gardening, and fruit culture and practical handicrafts. Courses will be from a minimum of ten days to ten weeks duration and the majority of them running for approximately four weeks. In addition to the practical courses outlined above there will be also health, recreation, etc.

Project "B"—This Forestry project which has been set up to train sixty young men who will live in an out of town camp under the direction and supervision of provincial foresters, is already under way. Any applicants for Forestry who failed through late registration or otherwise to be provided for by this project are advised to put in an application for registration in any other course in which they may be interested.

Project "C"—This project is divided into two divisions: (a) the provision of a 3 months course in all phases of household work to 40 young women at one time, at an approximate cost of $40 per student. This branch of the project will include a follow-up service to provide personal contact with graduates of the school and their employers. (b) The establishment of a bureau of specialized services under qualified personnel to give vocational guidance to unemployed young women and provide for their instruction and placement in any specialized service. In addition there will be a course for reconditioning of unemployed young women by health instruction, group activities and recreation. Under the guidance of local committees in Calgary and Edmonton this project is already under way.

Project "D"—is a project for the occupational and vocational training of unemployed young men and women between the ages of 18 and 30, and also provides for reconditioning and refresher courses. A survey is being made through the mail at the present time, addressed to all employers of labor requesting assistance by answers to a questionnaire regarding present requirements, future requirements, possible opportunities, etc., for placing students as apprentices. According to plans now under way, the youth will be given a preliminary "try-out" period of from 4 to 6 weeks in which to find themselves. This preliminary training will give them the opportunity to select, with the assistance of the Supervisor, the particular vocation in which they are interested. This project provides for 400 youth, and provision is also made whereby a contribution will be made towards the maintenance of non-residents during this preliminary period, where such assistance is necessary. Further arrangements will be made to offer about 5000 weeks of instruction in industry for students who show the greatest aptitude for specific trades.

Schedule "E"—A project under the direction of the Department of Agriculture for the training of young men as follows:

1. The placing of 140 youths on farms under the supervision of district agriculturists.

2. The placing of 15 youths on fur farms under the supervision of the game commissioner of the province.

3. The placing of 10 youths on poultry farms under the supervision of the Provincial Poultry Commissioner.

4. The placing of 5 youths in creameries to act as helpers.

In each of the above plans the student as trainee will be allowed $10.00 per month and the farmer, as employer to whom they are apprenticed will receive $10.00 per month.

5. The placing of 40 youths in the schools of agriculture to take a course especially arranged for such students. The above five projects are for urban (town) youth.

6. The placing of 30 rural youth, to be selected from the drouth area, for training at Olds and Vermilion Schools of Agriculture. These students will enter regular classes and are allowed $20.00 per month for fees and maintenance.

The supervisors in charge of the several projects are as follows:

Project "A" Donald Cameron, Acting Director, Dept. of Extension, University of Alberta.

Project "B" J. A. Hutchison, Forestry Branch, Department of Lands and Mines, Provincial Government.

Project "C"—Dr. W. C. Carpenter, Principal, Institute of Technology and Art, Calgary, Alberta.

Project "D"—Joe H Ross, Principal, Western High School, Calgary.

Project "E"—H. A. Craig, Deputy Minister of Agriculture, Provincial Government.

* * *

THE WORLD OF WHEAT

By H. G. L. Strange, Director "Crop Testing Plan".

"What causes the occasional wide fluctuations with wheat prices? Is it supply or demand, or money, or is it the speculators with their buying and selling?" a friend recently asked.

All these things, of course, have some effect upon price. Speculation in itself, however, has the smallest effect of any—an effect certainly very much less than most people believe.

The real villian that brings about the great price fluctuations, as for instance from $1.12 to $2.90 that occurred with wheat at Liverpool from 1914 to 1921 and from $2.90 in 1921 to 71 cents in 1931 is WAR!

In the past 300 years there have been only three great World Wars—The Thirty Years War in Germany from 1618 to 1648, the Napoleonic Wars from 1796 to 1815 and the recent Great War from 1914 to 1918.

The price of wheat during each of these Wars rose to a peak of three times its pre-war point, and then fell in post-war years to a figure much lower than that pre-war point.

It has always been the same, and no doubt ever will be, but only when War occurs. The only way to stop it all is to do away with WAR itself.

Following factors have tended to raise price: Brazil buys U.S. wheat—Rain badly needed in Argentina—Crop deterioration in New South Wales and Victoria—England buys U.S. spring wheat—Spain again buys wheat on the Continent—Argentina wheat production indicated around only 220 million—Sugar cane condition below normal in South Africa.

Following factors have tended to lower price: Rains benefit new seed beds in France—Good rye crop in Latvia—Coffee plants excellent in New Caledonia—Greece reports condition of vineyards good—Favorable reports of rice crops in Tanganyika—Increased offerings of Russian wheat—Continued slow demand from importing deficit areas.

An Unplanned Rescue Demonstration

An unplanned but successful "demonstration" at a district Boy Scout field day at McLean's ranch on Swift Current creek, Saskatchewan, was the rescue from drowning of a small boy who got out of his depth in the stream. The rescuer was Scout James Falconer of the Gull Lake Troop.

Sensitive

A dog can hear higher pitched sounds than a human.

Warn Drivers of Deadly Gas

Alberta motorists are being warned of the dangers of carbon monoxide with the approach of colder weather.

Last season there were a surprising number of deaths in this province due to carbon monoxide gas poisoning.

The toll can be cut down if due care is taken. This is a menace which should be given the close attention of all car drivers.

This motoring peril is something that should be given widespread publicity. Insurance companies, motor vehicle bureaus, health bureaus, automobile clubs, and other organizations are sounding the warning of monoxide poisoning.

One feature to which special attention is being drawn is the number of deaths from carbon monoxide in private garages, according to officials of the Alberta Motor Association.

During recent years there has been a steady increase in the number of private garages, with the trend to install steam heating. In many cases results have been fatal.

As is customary with many motorists, they enter the garage, windows closed and well heated, warm up the engine and the carbon monoxide pours out of the exhaust pipe. While the motorist's idea is to keep warm himself and have his machine all ready to go when the door is opened, the deadly carbon monoxide is forgotten and it is tasteless odorless and invisible.

It has also been revealed that the deadly gas will make its way into the interior of cars on the road and endanger occupants by its effect on drivers.

To combat this peril, motorists are urged to make sure a window of the car is always open and to keep the motor in accurate adjustment so that a minimum of harmful gas will be generated.

An International "Swap" of Campers

An international exchange of Boy Scout campers—four Canadian Scouts for four American Scouts—was one of the summer's camp novelties. Four Montreal Scouts at Camp Tamaracouta were selected and sent to a Brooklyn camp in New York state for a two weeks' period, and four Brooklyn Scouts took the Montreal Scouts' places at Tamaracouta.

Still Going

The earth's highest mountains, the Himalayas, are still rising.

Trans-Canada Air Lines Making Rapid Progress

Montreal, Que., October 18—Flown from Vancouver, where it was delivered recently, the second of the fleet of new planes for the Trans-Canada Air Lines arrived in Winnipeg a few days ago. Like the first, which remains at the coast, it is being used for training pilots. A third plane, expected from the builders any day now, will also be taken to Winnipeg, according to Phillip G. Johnson, vice-president in charge of operations.

The planes are Lockheed Electra 10A's capable of carrying ten passengers, a pilot and a co-pilot. They have a wing span of 55 feet and an overall length of 38 feet. The gross weight 10,500 pounds fully loaded. Maximum speed is [illegible] miles an hour with cruising speed of 185. Fuel capacity is 250 gallons.

Installation of three ground radio stations at Winnipeg, Regina and Lethbridge is proceeding, Mr. Johnson stated. They will be equipped with ten channel sets [illegible]-watt transmitters. Two-way voice communication will keep the pilots in touch with the ground and enable them to receive weather reports and special directions.

GOVERNMENT—

CONTINUED FROM PAGE THREE

be spent unwisely and still do the recipients good, and after all as a nation, it is simply taking it from one set of pockets and putting it in another set of pockets. Despite its many failings and faults, and despite its apparent inefficiency and wastefulness (and not at itself is apparently wasteful) democracy does provide for discussion of all matters pertaining to government. The whirling wheels of democracy weave a cloth, bizarre as to pattern perhaps, but a cloth that shelters a nation from the destructful blasts of political passion broken loose.

It is said truthfully that old heads cannot be put on young shoulders. It is equally true that experience and knowledge will always have an advantage over inexperience, which leads us on to say that one of the greatest needs of modern times is to know how to vote. We remember our first vote, we voted for Joe because Joe was a good fellow and somebody requested us to, and we imagine a lot of other people did likewise. We do not expect all voters and particularly young voters to exhibit sage like wisdom when casting their ballot, but we do believe that a study of government systems of the past and the present together with a definite opinioin as to what the government can and should do would be valuable to those about to exercise their franchise.

Minimum Wage Act Now In Effect

The Board of Industrial Relations has established a scale of Minimum Wages and regulation of working hours which will come into effect on October 1st. This rate is applicable to all workers in industry in the province with the exception of farm workers and domestic servants, who are specifically exempted under the Male Minimum Wage Act. Workers at some casual jobs such as shovelling snow, gardens, etc., of temporary duration and also those whose wages are governed by an Industrial Standards agreement brought into effect by mutual arrangement between employers and employees. This is the first basic minimum wage rate applicable to industry and employment generally to be established in Canada.

It will be universally recognized as a long forward step in the interests of all employees, and particularly those workers who are not in the classes of highly skilled and specialized labor, and whose wages have thus been in the lower brackets and some times maintained at levels on which it has been most difficult to maintain reasonable living conditions.

The new rates are applicable to men only and will not disturb the rates for women established under the Female Minimum Wage Act or rates for men established under effective Industrial Standards Agreements in the Province.

Persons employed for a week or longer receive a minimum of 33 1-3 cents an hour, which at a minimum of 42 hours work a week would mean $14.00 per week.

Experienced workers are defined in the order as those who have been engaged for 12 months in the work in which they are employed or similar employment.

For the first six months these workers will get 25c an hour, for the second six months they will receive 30c an hour and then will be raised to the 33 1-3 cents minimum. Workers hired for less than a week, the order provides for 40 cents and employees must be paid at least for 4 hours work. The order does not apply to employees in saw mills, box factories, woodworking plants and others such as tie camps in rural districts or towns where the population is less than 500, a special rate will be set for these. Such a course was made necessary because this industry must compete with similar industries in Saskatchewan and Manitoba, where no minimum wage schedule is applicable.

The Board of Industrial Relations, however, has opened discussion with the labour Departments of Saskatchewan and Manitoba with a view to arriving at a uniform rate for the lumbering industry in all three provinces then placing the industry on a competitive basis enabling the employees to receive a higher scale of wages and better living conditions.

Results of Standing Crop Competition Junior Grain Clubs

The results of the standing crop competition for Junior grain clubs are now announced by the Provincial Department of Agriculture. This year eighty clubs were in operation with a total of 1454 members. The standing crops of all these members were scored by fieldmen of the Alberta Dept. of Agriculture. Results indicate that three members were tied for the highest individual score with 96 points. These are L. G. Haney of the Lethbridge Wheat Club, Arnold Hilman of the Red Deer Barley Club and Andrew Kovich of the Lethbridge Potato Club.

The next highest score, being 96.5 was obtained by Wm. Stetsko of the Northern Valley Wheat Club, while John Hewko of Vegreville scored 96 points for third place.

The Dept. of Agriculture Championship Trophy for the club securing the highest average field score was captured by the Rochfort Bridge Wheat Club. Last year this trophy was held by the Spirit River Club.

The Vegreville Club was highest of the oat clubs, winning the Silver Trophy held last year by Grande Prairie.

Red Deer, with the largest club membership in the province, won the highest average score among the barley clubs. Radway held this position last year.

Competition was exceedingly keen in this contest, often only a fraction of a point determining the relative standing of the clubs. The lower scores were mainly due to drought or hail and not to indifference of club members. These competitions were established in 1930. During the seven years these clubs have been in existence club members have been the means of introducing, multiplying and distributing millions of bushels of improved seed of suitable varieties throughout the various districts served.

With the assistance of certain commercial organizations, viz., The Alberta Wheat Pool, United Grain Growers, Canada Malting Company, and The Alberta Linseed Oil Company, club members obtain sufficient registered seed to plant three or four acres. These plots are seeded, rogued and threshed separately from other crops under the supervision and instruction of the Alberta Department of Agriculture. In the fall local seed fairs are held where each member exhibits a well prepared sample of his products. Many members have benefited so much from this training that they have succeeded in winning many leading prizes at the larger seed shows.

In the Junior wheat club competition, with 43 entries we note Tofield came 9th with Clifford Appleby being high scorer; Ryley club came 10th, H. Magnusson being high scorer; Vegreville came 11th, John Hewko being high scorer.

In the Junior oat club competition with 17 entries we note Tofield came 7th, John Warner being high scorer; Ryley came 6th, Max Zook being high scorer; Vegreville 1st, Clarence Knies being high scorer.

Y.P. Unions Hold Rally at Viking

The Wainwright Presbytery of the Young People of the United church met at Viking on Friday evening last for their annual rally, representatives being present from Edmonton, Holden Viking, Irma and Wainwright.

Following a delicious buffet lunch served by members of the Viking Union, the meeting got under way with the president, Mr. Kenn Tory in the chair. Speakers for the evening included Miss Dorothy Banks and Miss Audrey Freeze of Edmonton, who gave reports on the Alberta Conference and the Kasota Beach camp, as well as discussing some of the outstanding problems of Young People's Unions. Mr. Ted Miller of Edmonton, also gave a short talk. The messages that these Young People brought proved both helpful and interesting.

Officers elected for the year were: Hon. Pres., Dr. S. Scott, Viking; pres., Olaf Larson, Irma; past pres. Kenn Tory, Wainwright; sec-treas., Aletha Knutson, Irma; conveners, Arthur Small, Viking, Marjorie Stewart, Tofield, Ian Hunter, Bruce, Hunter Branchflower, Wainwright; reporter, Elsie Wright, Wainwright.

Canadian Scouts Made Good Impression

The international gathering of Scouts in Holland Mr. Stewart reported as a splendid, happy gathering that offered an unforgettable example of international youth friendliness, in contrast to the strain and turmoil that characterize so much of the adult world today. Some 28,000 boys were present from 32 different countries and only the happiest fraternizing characterized their two weeks of camping together.

The Canadian Scouts made an excellent impression, and very creditably represented the Dominion in the various reviews. In the great opening march past before Her Majesty Queen Wilhelmina of Holland and Lord Baden-Powell, Canada had the honour of leading the British Empire section of 8000 boys, the largest division of the review. The next largest visiting contingent was the French, whose 2000 Scouts made a splendid appearance.

Trailer advocate says there are you make after competing with two more than 600,000 rolling homes into them in traffic.—Philadelphia Bulletin now. That's about the estimate, latin.

Municipal District of Cornhill Hold Regular Meeting

Seventh regular meeting of Council of Municipal District of Cornhill held at the Municipal District office, Tofield, Friday, October 15th, 1937.

Councillors present: Reeve Glenn in the chair, councillors, Benson, McSporan, Holmberg.

Moved by councillor McSporan, reeve and secretary be appointed and authorised to complete, if possible, transaction with Mr. Otto Lindgren, re final settlement for the N.W. 19-51-20. Mr. Lindgren to have first opportunity of leasing hay meadows on north side of gravel highway by June 1st every year, providing said highways were leased to Mr. Lindgren the previous year.

A lot in Kingman was sold to Mr. J. A. Anderson, oil [illegible]

Mrs. Evelin Suffoett of Hay Lakes was recommended for old age pension, also Mrs. Mary Waldum of Kingman.

A grant of $20.00 was allowed Mr. McKernon for 1937 maintenance on road leading from gravel highway to Lakeview pavillion.

The secretary was requested to write to Mr. Andrew Ferguson, Tofield, drawing Mr. Ferguson's attention to the fact that authority for closing or fencing across or around road allowance between sections 13 and 24-51-21 W4M and section 18 and 19-51-20 W4M has never been granted by council and public are entitled to access of said road allowance, as if and when they so desire.

It was decided that district offer Mrs. E. M. Dow the sum of $60.00 for road division south of railroad and in section 33-51-20 W4M less judgement of $25.00, latter in favor of district. Total sum if accepted to be applied on taxes.

Councillor Holmberg and secretary were appointed as delegates to represent the district at the forthcoming Alberta Municipal District Convention, November 17, 18, 19 at the McDonald Hotel, Edmonton.

Mr. La Chasseur, representing the General Hospital, Edmonton, interviewed the Council at some length re old outstanding accounts from June 1933 to January 1936. After careful perusal it was found that the District owed a balance og $962.50 on the old contract.

A number of relief cases were considered and dealt with according to the views of the council.

Corn In Egypt---A Flower in the Desert

Unannounced and a complete stranger, a man walked into the Mercury Office last Friday. He came, he said, to see about some printing. "You know, I can get this in the city, but I don't believe in going to the city. I am a store-keeper in —— and the wholesalers I deal with tell us not to bother with the local newspaper, but get printing through them. But I don't believe this is right. We local merchants grumble at people going to the city for their groceries and clothing, but merchants that want local trade should support the local printer. There is no local paper in my town so I came here."

We could add more to this if we wished, but we doubt whether we could improve its forcefulness. Coming from a man we had never seen before, it caused us to feel that there may still be "Corn in Egypt," certainly that the man was a "Flower in the Desert."

The City of Edmonton vs The M.D. of Cornhill

In a recent action brought by the city of Edmonton against the Municipal District of Cornhill for the price of board and lodging supplied —— Kushnerrick. It was shown that Kushnerrick was on relief list of the Municipality until December 1935, and was then refused further relief by it. The reason for so doing was that Kushnerrick refused to do certain work for the district when called upon to do so, on the ground that he was not physically fit. The Medical Health officer made an examination of Kushnerrick and reported that he was not physically able to do heavy work but was able to do light work. The district asked him to do some light brushing for it and he refused and it therefore refused him further relief. In April 1936, he went to Edmonton and went on city relief for over a year, amounting in all to $127.00 which the city of Edmonton sought to recover from the Municipal District of Cornhill.

Judge Crawford ruled that the City of Edmonton was not entitled to recover this amount. In the Judge's view the city should not without proper investigation, have decided that the applicant was entitled to relief, despite the repudiation of the Municipal District of any liability for such as contained in the letter of the 1st June, 1936, in which the city was notified as well of the dispute between the District and the applicant. On the contrary, the city should have, in the opinion of the Judge, supplied him with only his urgent necessities and have sent him back to the District and let the parties take their dispute to the Courts as provided by the Act.

The action was dismissed with costs.

Public Meeting to Consider New Educational Set Up

A public meeting to consider the new educational set up as concerning enlarged school districts will be held at the W.I. Rooms on Monday, Nov. 1st. This meeting is being held for residents of Deville, Ministik Lake, and Hastings Lake who are in the Clover Bar Division and for residents of Spilsted, Woodlawn, Ketchamoot, Lindbrook, Weslake, Lakeshore, McKenzie, Ingram, who are in the proposed Viking—Tofield Division.

WEDDINGS

Miss Hazel V. Stirrett, daughter of Mr. and Mrs. Robert Stirrett, of Kingman was united in marriage to Mr. Ernest Lougheed, son of Mr. and Mrs. Alfred Lougheed, Woodlawn, in the Manse on Wednesday, October 27.

The bride carried a beautiful bouquet fo ophelia roses and was attended by her sister, Sarah.

Mr. Wilfred Schroeder assisted the bridegroom.

The Rev. D. K. Allan officiated.

The young couple will reside on the farm at Woodlawn.

****

A wedding of local interest took place at the McDougal Church manse, Edmonton, on Saturday, October 23, when Mary Ellen Bradbury, eldest daughter of Mr. and Mrs. Wm. Thompson, and Earl Moore, son of Mr. J. M. Moore and the late Mrs. Moore of Jarrow, were united in marriage. The Rev. A. K. McMinn officiating. After the ceremony the happy couple left for a short visit o Vancouver.

FOR SALE: Fordson Tractor in good running condition. Price $150. Apply to Northwest Utilities, Tofield.

FOR SALE: Two Pure Bred Yorkshire boars, April Farrow. Extra good. Also some good horses for sale. Apply E. R. Kallal, Tofield. Phone 1015.

LINDBROOK

Threshing is about completed in this district now, quite a lot being done in this last spell of fine weather.

The Bingo party and Dance put on at the school last Friday evening by Miss Y Phipps, the teacher, was well attended and was both a social and we hope a financial success. The returns are to be used for the kiddies' Xmas tree and party. The orchestra for the dance was composed of Mrs. A. Smith and Messrs. S. Smith, R. Kortzman and C. Lindgren. We understand that in the near future a whist drive or dance is to be held in aid of this same object, there being upwards of 40 pupils to provide presents and goodies for and this takes quite a bit of cash, so when this next party is announced it is to be hoped that all will endeavor to get there and help.

Many Happy Returns of the day, 31st of October, to one of our oldest settlers in the district, Mr. Geo. Weslake, who was amongst the first to settle in this district. When we say "oldest settler" we do not mean "oldest inhabitant" as Mr. Weslake is a youth compared to them, so again Many Happy Returns of the Day, George from your friends and neighbors of this district.

Messrs J Bracegirdle and F Evans spent a night last week carrying some of Mr. Bracegirdle's brother Masons by car to Edmonton, when their own transport broke down near here. They had been attending a Masonic gathering at Viking.

Picture Show

An all talking production "Sons of Steel" will be shown at the Variety Theatre on Tuesday, November 2nd. This picture is rated highly in the film world and stars Charley Starrett, Polly Ann Young and Aileen Pringle. All the features of a good picture are included in this feature, love drama, heroism, with enough comedy to make it a balanced production. Remember the date, time and place Tuesday, at 8:30 at the Variety Theatre, Tofield.

Build Strength With Meat

A proportion of meat in the daily diet adds strength to adults and growth to junior. It is wise, however to choose meats carefully and nowhere will you find a better choice than at

The Renfrew Kitchen Range
MODERN—COMPACT—DISTINCTIVE

A Kitchen Range is perhaps the most important piece of furniture in the modern home today and it is not something that is bought very often—perhaps once or twice in a lifetime—but no other piece of equipment is expected to give longer or harder service.

A smart appearing quality range of modern design not only brightens up the kitchen but inspires greater interest in the everyday necessity of preparing well cooked meals.

See the models on our floor. Priced to suit all purses.

Young Virginian Awarded $500 Prize as 'Star Farmer'

KANSAS CITY, Mo., Oct. 19—Robert Lee Bristow, courageous young farmer from Saluda, Va., who took over a debt-ridden farm and is making it pay won the title "Star Farmer of America" today. The award is given annually to the outstanding member of the Future Farmers of America. It carries a $500 cash prize.

Announcement and presentation of the award sponsored by the Kansas City Star, was made from the Arena at the American Royalty Livestock Show. At the same time five other state and regional winners who were given $100 each were announced. They included Eugene Warren, Calico Rock Ark., star farmer for Arkansas, and William Stiers, Alexandria, Ohio, star farmer for the north Atlantic region.

Mr. Bristow, whose parents passed on shortly after he graduated from high school, took over the home farm of 80 acres two years ago. It carried $2451 in mortgages, its soil was depleted and there was little equipment. Today he is making it pay, is paying off the indebtedness and is building up the soil. These efforts won him the award.

The first year he cleared $600 on his chickens and hogs and $125 on a grist mill he powered by a tractor motor which he made from an old model automobile. Now he has 465 chickens, 700 chicks, 60 acres under cultivation, 2 mules, three cows, 3 sows and 22 pigs. He has sold 13 pigs and 135 pullets.

A brother and sister live with the young farmer.— Christian Science Monitor.

Coughing

Coughing is almost invariably a reflex act. It may occasionally be a neurotic or wilful act. In the vast majority of cases the stimulus which originates the cough is situated in some region of the respiratory passages between the vocal chords and the tiny little terminal air cells in the lungs which are found at the end of the branches coming off the windpipe. This is called the bronchial tree.

The cause of the irritation in the respiratory passages is in the majority of cases either an inflamed or congested condition of the mucous membrane lining the passage or an excessive quantity of mucous secretion brought about by invading enemies called germs. Less frequent causes are haemorrhage in the lungs, inflamation in the larynx, pressure upon the windpipe by an enlarged thyroid gland situated like a horse shoe around the air passage in the neck, or foreign bodies in the throat or windpipe such as dust or particles of food.

The character of the cough varies with the cause and to some extent with the general state of health. The most obvious distinction in the quality of the cough is that between the moist or loose cough and the dry or hard cough. The loose cough indicates the successful removal of mucous from the air passages which in adults results in expectoration. Children usually swallow secretions which they cough up. The dry cough indicates the presence of an irritant which the cough is unable to remove from the air passages. The hard cough of the early stages of bronchial catarrh is usually followed by a loose cough consequent upon the production of mucous which is secreted by the inflamed membrane. It is most important that persons suffering from a dry hard cough be kept warm and free from chills or exposure in order that the inflammation which is present may not be permitted to progress to the point of invading the lung tissue and thus produce pneumonia.

A short, weak, frequently repeated dry cough is known as a hacking cough. It is due to a mild irritation in the upper air passages, a condition which if untreated may become chronic.

Inflammation of the larynx and vocal chords causes a barking cough which is usually unaffectual in removing any mucous.

Coughing is more prevalent in winter than in summer because disease germs which are so frequently present in the mouth and nose flourish when the body is subjected to lower temperatures. It is, therefore, most important that in winter every effort be made to keep the body free from undue exposure to cold and wet. When a cough does develop stay indoors if at all possible until all danger of developing a serious infection has passed. A neglected cough or cold accounts for a great many serious illnesses and a great many deaths. It doesn't pay to ignore a troublesome cough.

Questions concerning Health, addressed to the Canadian Medical Association, 184 College Street, Toronto will be answered personally by letter.

The Unhappy Lot Of Japanese Farmers

Agriculture in Japan carries an insuperable burden. Excessive taxes, the huge total of farm debts, exhorbitant interest rates and unfavourable disparity between prices of industrial and agricultural products, have crushed the Japanese farmers to an unbelievable degree.

Nearly 50 per cent of the cultivated area of Japan is worked by tenant farmers and almost 70 per cent of the total number of Japanese farm households are tenants or part tenants, paying a farm rent in kind of some 50 to 60 per cent of the crop. A survey of Japanese agriculture made by the United States department of agriculture mentions that during the past two decades the spread of tenancy has been accompanied by serious conflicts between landlords and tenants, expressing themselves in demonstrations, strikes, injunctions, arrests and growth of farm tenant unions through which an organized struggle against landlords is carried on.

Japan is not a rich agricultural country. The topography of the land is mountainous and the soil is none too fertile. Only about 15 million acres, or about 16 per cent of the estimated total Japanese area of 94 million acres is cultivated. It is interesting to compare this with Alberta, the total area of which is 160 million acres, 60 million being classed as capable of agricultural development and about 15 million acres is actually under cultivation. Alberta's population is around 800,000; that of Japan is 70 million. This over-populated condition of Japan has resulted in very small farms, the average farmhold being 2-3-5 acres. The farm population is 27 million, representing 5,600,000 households. The production capacity of agriculture has been increasing steadily but not sufficiently to keep pace with the expansion in rural population and the maintenance of a higher standard of living. The rapid progress of industrialization in Japan has absorbed many people from the rural districts but not in sufficient numbers to relieve the pressure against the land, a factor which forms one of the basic causes of Japan's agricultural ills.

Japan's industrialization has pressed hard against Japan's agriculture because upon the farmers has been set the hard task of increasing self-sufficiency in food, cost what it may. The result is that 40 per cent of the population still live on farms and domestic agriculture still furnishes 80 per cent of the country's food requirements (rice), the remainder being supplied by chosen Taiwan. The net value of the agricultural output is slightly larger than that of manufacturing industries. Notwithstanding the proverbial progress of Japanese industrialization, capital invested in agriculture is nearly 1½ times as large as that invested in manufacturing industries and commerce. Moreover it is agriculture that has been facilitating Japan's phenomenal industrial expansion through state subsidies paid out of heavy land taxes and through an almost unlimited supply of cheap labor furnished by the villages.

An estimate of total farm indebtedness in Japan in August, 1936, totalled $1,740,000,000 or slightly over $290 per household. A large proportion of this debt was caused by the purchase of land by farmers at highly inflated prices. Between 1918 and 1924 land values rose to $390 an acre. Interest rates run very high, the average rate being around 12 per cent which makes a yearly charge of $200,000,000 or 38 per cent of the average net farm income during the years 1931-35.

Taxation on farmers is very heavy in Japan. Most of the cost of industrialization is laid upon the farmers' backs. A survey made in 1934 by the Imperial Agricultural Society showed that landlords and land owners paid from 51 to 58 per cent of their total income in taxation, peasant proprietors from 20 to 25 per cent, while merchants in the cities paid only from 12½ to 18 per cent of their annual income in taxation and manufacturers from 1½ to 21 1-2 per cent.

The Japanese government has followed a policy towards farming calculated to make the country self-sufficient agriculturally. When prices fell after 1930 the main objective of the government's policy was to subsidize and control prices of agricultural products.

Rents from tenants are very high, being 7 times that of England, 3½ times that of Germany, 4 times that of Italy and 3 times that of Denmark and the Netherlands. The pressure of a rapidly growing agricultural population against a limited agricultural land area is the all important factor that keeps rents so high. Tenant farmers are compelled to compete for leases in a market where the demand is usually larger than the supply. The minimum rental for a one crop field constitutes about 55 per cent of the crop and for a two crop field 60 per cent. When the large expenditures for fertilizer are added to the rent the proportion of the total crop going to the tenant is very small. Frequently he gets only 30 per cent of the crop as his net share.

The miserable condition of the tenant farmers has resulted in increased trouble between landlords and tenants with both sides forming protective organizations. The government drafted a bill guaranteeing tenants leases of a minimum term of five years, the right to any short term improvements made and the privilege of having the lease renewed or at least a year's notice before vacating. The landlords were given the right to terminate tenants' leases when no rent had been paid for a year, or when a sum amounting to a year's rent had not been paid in two years or when any portion of the rent had not been paid in three years. As a matter of fact this legislation was never passed due to the opposition of the landlords.

The importance of relieving agricultural distress is fully realized by the country's leading statesmen. General Araki stated in 1932, "If we should succeed in solving the agrarian problem it would be easier to solve the remaining serious social problems. The agricultural population constitutes Japan's first line of defence." No one has presented a solution to this terrific problem, and so the farmers are still struggling in over-populated villages with a tremendous debt burden, high interest rates, heavy taxes, poor credit facilities and unfavourable price relationships.—Wheat Pool Bulletin.

An English lecturer in this country says Americans don't know how to use their leisure. He makes the mistake of judging all Americans by those who attend his lectures.

Find Baby "Sea Serpent" In Tummy of B.C. Whale

British Columbia's mysterious "Caddy" had better warn her family, tell them "the whale goblins will git you ef you don't watch out."

One of the whales captured this summer off the Queen Charlotte Islands, British Columbia, was found to have in its stomach a strange creature of reptilian appearance, which, on reduced scale, tallied more or less with reputed descriptions of "Caddy," that startling marine dweller which gets into the news in the Pacific province every once in a while as having supposedly bobbed up off the coast and has been said to have a head like an animal and a trailing body of thirty feet or more in length. There may be people who are a bit puzzled by the "Caddy" story but, at all events, the creature found in the whale's stomach was a reality. The baby sea serpent—if there are such things as sea serpents and if this was one of the family—was described in a report to the Dominion Department of Fisheries by the Naden Harbour whaling station as being "about ten feet long, having a head similar to a large dog, animal-like vertebrae and having a tail resembling a single blade of gill bone as found in whale's jaws." Presumably it was by chance that the whale gobbled up this unusual piece of food in the course of the day's foraging. Ordinarily the food taken off the Queen Charlottes consists largely of squid and octopus and, in some cases shrimps.

It is only off British Columbia that whales are taken in Canadian waters and last year 370 of them were captured. They were used in making whale oil, whale meal and whale fertilizer and the marketed value of the output of these products was a little more than $172,000, with the oil, 762-740 gallons of it, having a value of $144,750. The quantity of meal produced was 332 tons and of fertilizer 687 tons. Most of the whales taken by British Columbia whalers are Sperms, but other species which are captured include Fins, Sulphurs, Humpbacks, and the occasional Sei, Right and Bottlenose.

Many Accidents Occur At Night

Warning of the dangers of night driving and the need of using every precaution in the interests of safety is fitting at this season.

It has been estimated that nearly 60 per cent of all motor fatalities occur at night.

It is a well known fact that the night accidents are the serious ones. As a matter of fact, official studies have revealed that one accident in 20 which occurs at night is fatal, compared with a ratio of one in 40 for daylight accidents.

At this time it is well to have headlights and other car equipment thoroughly tested, according to officials of the Alberta Motor Association.

Taking of proper precautions at this time may well mean the avoidance of troubles later on.

YOUR LITTLE SAVINGS... FINANCE MORTGAGE LOANS

TENS of thousands of Canadian farms and homes benefit from first mortgage loans made possible by the accumulated savings of Life Insurance policyholders.

For every borrower, there are six thrifty people who supply the necessary funds.

This fact affords a striking illustration of the "double duty" performed by Life Insurance dollars. Not only do they ensure financial security for the men, women and children of Canada, but they also help to build and finance their farms and homes.

Life Insurance companies exercise the greatest care in the selection of properties upon which mortgage loans are made. To safeguard the savings of policyholders, security of principal and interest is and must always be the first consideration.

PERMANENCY—

AGRICULTURE PERHAPS is not the most favored of vocations. Frost and drought, excessive wet and extreme heat, to-gether with a number of other things all go towards making this business of farming a precarious one. Even so farming is one of the most ancient of industries and a really good farming district goes on with the aid of man's labor, producing year after year. This is in sharp contrast to some lumbering and mining centres. The following interesting story of a village in the Ottawa valley should increase the confidence residents of good farming communities have in their districts.

A TOWN IN THE SHADOWS—

By John S. Watt in "Forest & Outdoors"

THERE LAY the Ottawa winding its way through green fields bordered by their quaint old cedar rail fences. The Ottawa has not changed a bit in the last few years, but oh! what changes have come about in the towns along its wooded shore.

We had just entered the quiet little French village of Rockland, Ontario, a village that had at one time throbbed to the frenzied pulse of a thriving industry. I gazed around me; no objects gave me any hint of the village's thriving past; then something caught my eye. Down near the shore of the Ottawa, a red brick chimney etched itself against the blue sky. This was not an ordinary chimney, for it reached some one hundred and eighty feet above the ground. At once I was curious and I set off to visit the chimney without further ado. As I made my way down the rotting board sidewalk toward the chimney, I thought to myself: How strange that this little town should have a sidewalk away out here near the river. Well, to get on with the story, I visited the place where the chimney was standing. From some small French boys I learned that this was the site of a lumber mill. Now I am getting somewhere, I thought, as I carefully explored every nook and cranny of the mill that were still intact. Where once the chimney had given off its gray fumes the pigeons had made a lofty nest and the cement dry kilns once used for seasoning the lumber were visible in the deep growth of weeds and shrubs. At the entrance to the mill had been a road which had been paved and now, where the gray pavement had cracked from disrepair, was growing a vivid assortment of wild flowers setting out a design which would quicken the heart-beat of any rock-garden admirer.

The mill was on the edge of the Ottawa, and about a hundred yards from it lay the ruins of some gigantic wharves. The platforms were gone and only the stone piles and a few twisted bits of rusted machinery were left. To some of the piles were tied some small homemade row boats. I looked into the murky water and guessed its depth at nine feet. Thinking better, I asked a fellow who was fishing nearby how deep the water was. In an unconcerned manner he told me that the water was twenty feet deep where I had pointed. Hum! Big river boats, I thought to myself as I turned and started down the road back to the car. My friend, Bill, was visiting with his grandfather, and so I went up and sat down on the steps with the rest of our party under the boughs of some big cedar trees. Still anxious to know more about the mill, I asked my friend's grandfather about it. At once his eyes lit up with interest. "Why", he said, "at one time hundreds of men tramped to work down that wooden sidewalk, and where you see that open space there used to be millions of feet of cut lumber piled to season. That was good Ontario white pine, too, let me tell you." Then pointing towards the river, he said, "That's where the log booms were anchored, 'and those wharves are where the great river boats, the Peerless, Empress and Victoria, used to stop with provisions."

What mockery, I thought, those tiny homemade row boats tied where once three boats, the pride of the Ottawa, used to dock, dazzling white from fresh paint and with brass fittings polished to mirror finish. Continuing, he told me of the days when there were thirty-room boarding houses for the men. All these are gone now and no longer does the mill whistle blow its welcome note. Gone are the noisy nights in the village after pay day. Gone the gay excursions down to Montreal on the river boats.

I visioned those rotting wharves standing in the shadow of the old mills that made those excursions possible, sturdy and strong again and crowded with mill hands, young and old, carefree and happy, never dreaming that the mill would ever cease its song, or that in a few years the big log booms of pine would vanish from the river.

Rockland white pine had a name that only the old timers recall to-day, and no more does it go out to compete in the markets of the world. Gone is the sound of hurrying feet of workers down the sidewalk to the mill, and Bill's grandfather told me that the mill machinery has gone to the wreckers.

Rockland has slipped back into obscurity and now is just another little village between here and somewhere else. The Ottawa, unchanged, goes rolling by unheedful of the drama of life that has been staged in this small Ontario village.

THE WORLD OF WHEAT

By H. G. L. Strange, Director "Crop Testing Plan".

As I was writing this "World of Wheat" column last evening—something about Thatcher wheat, I think it was—the news came to me that Samuel Larcombe, one of the West's greatest Englishmen and pioneers in prairie agriculture, had died, aged 86. I found that I could think of nothing but him, and of his splendid life-long service to western agriculture.

"This country needs a rust-resistant wheat" he told me in 1922. "I've made some crosses and I've got good results. In a few years I may have something. Come up to Birtle with me now and see the plots, won't you?"

I went to Birtle.

In his sitting room, which was also his seed laboratory and workshop, I saw a splendid array of cups, diplomas, certificates and medals, testifying to 50 years of successful work.

"Tell me about your awards" I said. "Never mind those things" he exclaimed, "they're nothing"— then, in a heightened tone, "look at this new wheat!"

That was Samuel Larcombe. He was then 71 years old, and still fired with enthusiasm to do better and better work; hoping that his efforts might benefit his adopted country, and be helpful to his fellow men.

The following factors have tended to raise price: Only about half of the Canadian spring wheat crop grading 1 and 2 Northern—Spain again buys foreign wheat—Some moisture deficiency in Kansas — Excessive rains interrupt Italian seeding — Spain buys U.S. winter wheat at Montreal— Turkey reports active foreign demand for barley—Reduction in Belgium pig population—Corn loan proposed in the U.S.

The following factors have tended to lower price: Seeding will be well under way in Russia—General rains improve crops in Southern Hemisphere—Official Italian crop estimate much larger than in 1936— Last year's Australian crops or "carry-over" under-estimated —Good rains give Germany satisfactory soil condition—Manchurian wheat crop larger than last year.

Baden-Powell At Home

Stories of Lord Baden-Powell as a host at his Hampshire home, Pax Hill, picture the World Chief Scout as still full of the play spirit of boyhood. "At dinner one night" related a recent Canadian visitor, "he gave up his idea of a Caledonia market—a jumble of people, shacks, booths and noise; and wound up with a lively portrayal of a coster selling "Bermaiade."

A story told with great zest described a military reception when B.-P. was a young officer in India. As a prank, he and another youngster carefully disguised themselves, and went as newspaper correspondents, the one "for a French paper," and the other "for a London daily." Chuckling as though the affair had happened but yesterday, B.-P. recounted the chats he had with various people present, including one elderly lady who was pleased to recall having met him in London the previous season.—when he was in India.

The Chief Scout was described as remarkably active, and "at 81 as fine a specimen of a well preserved elderly man as one would find anywhere He sleeps in a corner room which has no walls on two sides—practically in the open air; rises regularly at 6 a.m. and goes for a walk with his dogs. On his return he goes through his mountain of mail and has it ready for his secretary before breakfast.

The visitor marvelled at the amount of work done by the entire family. "Sometimes there were three typewriters going—Lady B.-P. at her machine on Guide affairs, the Hon. Heater B.-P. on news matter for the press, and the Chief's secretary on his correspondence. A regular workshop!"

Preventing a Fire

A man was running very fast up the street when a policeman prevented him from crossing the road as vehicles approached. "What's the hurry? said the constable. "Going to a fire?"

"Well, not exactly," was the reply "I was going to prevent one; the boss said that's what he'd do if I was late again, and I was hurrying to the office in time?"—Montreal Star.

What Kind?

Overheard: A man in an elevator telling a companion he feared Japan was just trying to make a puppy state out of China the way Mussolini has Ethiopia.—June Provines in Chicago Tribune.

"By the way, precious, what are we having for dinner tonight?"

"Spongecake, darling. I sponged the eggs from Mrs. Jones, the flour from Mrs. Brown and the milk from Mrs. Smith.

Finishing Cockrels For Market

(Experimental Farms Note)

Cockrels intended for market should be carefully fattened. The above statement is based upon two very important considerations: first, that cockrels put on weight more rapidly and economically during fattening than when left on range, and second, that fattened cockrels have a greater market value because of their improved quality.

Two methods of finishing are commonly used: pen fattening and crate fattening. Provided crate feeding is properly done, better results will be obtained by this method than can be expected with pen feeding. In the latter method the cockrels are penned to a limited floor space and trough fed with fattening mash as is done in crate fattening. Birds thus treated should be decidedly superior to those killed from range without fattening. In crate fattening, the cockrels are placed in feeding crates, usually four birds to a compartment, and soft fed. As the the chief merit of the fattening process comes from two conditions—confinement to a small space so as to reduce exercise, and the use of soft mixed fattening feeds—control of activity and the proper type of fattening ration are considerations of prime importance. In view of the fact that treatment is similar for both pen and crate fattening the detail of the latter only will be given.

Only lice-free birds should be crated, and they should first be dosed with epsom salts at the rate of one pound per 100 birds so as to clean out the digestive tract. After a period of starvation, usually twenty-four hours, they are given their first feed. Under most conditions, two feedings daily spaced as far apart during the day as possible will be found to be satisfactory. The feed should not be left before the birds longer than half an hour, the residue being removed and disposed of otherwise. The feeding period varies usually from two to three weeks. It should be emphasized, however, that when the birds cease to gain well, or show signs of impaired appetite, fattening should be discontinued regardless of the length of time which has elapsed.

Fattening feeds are always given wet, mixed with milk in some form as the mixer. It has been shown by work at the Central Experimental Farm that the dry mixture and skim-milk to drink, both always before the birds, was much less efficient than the same mixture mixed with milk. Skim-milk or buttermilk are most satisfactory and are generally used.

Of various cereals used experimentally at this Division ground yellow corn has been found to be outstanding in efficiency of production of gain. Ground wheat has been proved to produce as much gain as corn but to require appreciably more of the grain per pound than does corn. A mixture of two parts of oats to one of barley was not as satisfactory as either of the grains previously mentioned. The use of corn, therefore, is to be highly recommended as the whole or a large part of the cereal fattening ration. When white flesh is desired, white corn will probably be equally efficient, if available. Wheat also normally will be an important ingredient of the fattening mixture

Potatoes raw or cooked added in equal measure to the cereal ration were found to be only a fair supplementary fattening feed, but they may be used to advantage when culls or very cheap potatoes are available. Ten per cent of meat meal added to the cereal mixture improved the gains by approximately 15 per cent. The addition of 5 per cent ground oyster shell to the cereal ration increased feed consumption and gains by approximately 10 per cent. Among the supplements experimented with, however, 5 per cent of mutton fat, melted and incorporated in the ration gave the most satisfactory results, the gain being increased by 18 per cent, the efficiency of use of feed by 27 per cent, the amount of fat in the carcass by 16 per cent and the grading of the birds by 17 per cent.

In view of the information just quoted, therefore, the poultryman should be able to determine what feeds and supplements, or combinations of them, he can use to best advantage, knowing their fattening ability, their availability and cost in his neighborhood.

Two additional and final duties should be stressed as a climax to successful fattening: at least twelve hours of starvation should elapse before killing so as to avoid unsightly crops which degrade the birds; and the greatest possible care should be taken to keep the birds as cool as possible (not frozen) until they are marketed so that the quality and bloom so painstakingly acquired through the fattening process will not be diminished when they are examined by the buyer.

A school at Ellison Bay, Wis., will dispense entirely with books. Sometimes we wonder if the U.S. Treasury wouldn't be happier that way.

Tested Recipes

There are three main classes of home-made pickles: (1) sweet fruit or vegetable pickle; (2) sour pickles which include mustard pickles; and (3) the large variety of pickles in which the material is chopped finely. The following recipes contain examples of several kinds.

Cabbage Pickle

1 large cabbage finely chopped
½ cup sugar
1 tablespoon cornstarch
¼ pound butter
1 tablespoon mustard seed
1 pint vinegar
Yolk of 2 eggs

Melt butter, add starch, then vinegar and well-beaten egg yolks, sugar and seasonings. When slightly thickened, add cabbage. Boil ten minutes, stirring to prevent sticking. Pour into sterilized jars and seal.

Red Cabbage Pickle

1 quart vinegar
2 tablespoons whole black pepper
2 tablespoons whole crushed ginger
2 cups sugar

First remove outside leaves and stalk, cut across in very thin slices. Spread on a flat dish, sprinkle with salt and let stand 24 hours. Turn into a colander and drain thoroughly Place in jars or a crock and pour the above mixture over it while very hot. Cover and let stand a week before use. Spices may be varied.

Celery Sauce

6 heads celery
1 cup sugar
2 ounces mustard seed
1 teaspoon tumeric
4 large onions
2 quarts vinegar
½ pound mustard
3 tablespoons salt

Blend tumeric and mustard with a little vinegar. Mix all ingredients and simmer slowly 2 hours. Bottle while hot.

Pepper Relish

12 large onions
12 large green peppers
12 large red peppers
12 large yellow peppers

Chop exceedingly fine, cover with boiling water slightly salted. Let stand 10 minutes then drain. Do this three times, the last time pressing in a cloth. Add 1 quart of vinegar, 3 cups of sugar and cook slowly for one hour.

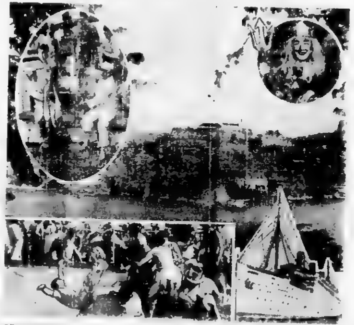
King Neptune Awaits Cruise Passengers



K[illegible] of buccaneers will have their first opportunity to subject [illegible] West Indies cruise [illegible] to the traditional rite [illegible] "Court" when the Empress of Australia, in the course of one of the Canadian Pacific's [illegible] West Indies cruises this winter, crosses the equator on her way to Rio de Janeiro.

For the first time in West Indies cruising the glamorous Brazilian city, with the "most beautiful harbor in the world" and unrivalled mountain scenery almost within its city limits, has been included in a Caribbean itinerary and the Empress will cross the equator and be boarded by King Neptune en route there. St. George's, Grenada, one of the lovely Windward Islands and [illegible] another attraction of the 32 day cruise starting from New York on January 15. Five days will be spent at Rio, time enough for a thorough exploration of the glamorous Latin city and its surrounding beauties and one evening will be devoted to a special round of the exotic night life of the metropolis. At Grenada lovely St. George's guarded by ancient Fort St. George, has peculiar charm among Caribbean towns. During the day spent there a special excursion will go to Grand Etang a volcanic lake set high in the mountains overlooking the town.

The Empress of Britain, world cruising flagship of the Canadian Pacific, will lead off the West Indies season with a 12 day Christmas and New Year trip to Jamaica, the Panama Canal Zone and Cuba. The Empress of Australia follows with seven voyages from New York: January [illegible], March 11 and March 22, for nine days each voyage, to the Bahamas, Cuba and Bermuda. January 15, for 32 days to Barbados, Rio de Janeiro, Grenada, Venezuela and Jamaica. February 19 for 19 days, to Martinique, Barbados, Trinidad, Curacao, the Panama Canal Zone, Jamaica and Cuba. April 12, for 12 days, to Jamaica, Cuba and the Bahamas and finally April 14, an Easter Holiday Cruise, for ten days, to Jamaica and Cuba.

Picture layout shows a glimpse of beautiful Grenada, the Empress of Australia and happy scenes from the colorful ceremonies which highlight King Neptune's visit.

Mrs. Will Abernethy Passes On

The death occurred at the family residence on Thursday, October 28, of Laura Abernethy, beloved wife of Will Abernethy, at the age of 72 years.

Laura Abernethy was born at Mendola, Ill., U.S.A. Jan 31, 1865. With her parents she moved to Nebraska in 1870. She joined the church in early womanhood and in 1892 was united in marriage to Will Abernethy. She leaves to mourn her loss, a loving husband; three children, George, at home; Mrs. J. D. Patch, Frandale, Wash.; Mrs. F. L. Sherlock, Nanaimo, B.C.; eight grandchildren and two sisters.

The funeral was held on Saturday, service being held at the family residence, conducted by officials of the Salvation Army of Edmonton. Interment took place at the Tofield cemetery.

Floral offerings were numerous and beautiful, testifying to the esteem in which the departed lady was held.

Floral Offerings

Mr. and Mrs. Owen Eaton; Mr. and Mrs. Alvin Steen; Mr. and Mrs. C. R. Burchard; Ronald Walker, Melvin Walker, Oscar Ackley, Wesley Weeks; Mr. and Mrs. John Wood, Mr. and Mrs. Mel Wood, Maggie and Lloyd; R. C. Phillips and family; Walter Bellamy; (Tofield U.F.W.A., Tofield U.F.A., Lakeshore Ladies' Aid, Logan Charity Club, Tofield C.C.F. Club, Neighbors and friends;) Mr. and Mrs. T. D. Ferguson and family; Mr. and Mrs. T. R. Murray and family; Mr. and Mrs. Lester Noland and Alice; Mr. and Mrs. Tom Schultz and Walter; Mr. and Mrs. Lionel Ferguson and family; Mr. and Mrs. John Warner and family; Mr. and Mrs. Russel Ferguson; Mrs. Moos, Matie, Verlin and Ollie; Mr. and Mrs. W. P. Riley and Melvin; Mrs. Bertha Seals and Miriam; Mr. and Mrs. W. A. Webb and family; Mr. and Mrs. T. W. Ferguson and family; Mr. and Mrs. L. H. Graham and family.

In addition to the floral offerings a monetary tribute, in memory of Laura Abernethy, was forwarded to the Salvation Army, Edmonton, to be used for their home for aged women. The following were the donors:

Tofield U.F.W.A., per Mrs. Irene Murray, president; Tofield U.F.A. per I. C. Olson; Lakeshore Ladies' Aid, per Mrs. A. N. Booth; Logan Charity club, per Mrs. Eaglesham; Tofield C.C.F. Club, per A. J. Harrison; Lakeshore Social Credit Club, per Mrs. Laura E. Francis.

Neighbors and friends: T. D. Ferguson; A. H. Harrison; R. Coutts; Guy Walker and family; I. C. Olson; C. Baptist; W. H. Anderson; A. Haukedahl; O. P. Thomas; J. H. Ingram; Frank Ball and family; A. C. Dodds; Mrs. Tom Jones.

CARD OF THANKS

We wish to express our heart felt appreciation and thanks for the great amount of help and sympathy given to us by friends and neighbors during the late sickness in our home, and our bereavement.

Will Abernethy, George Abernethy.

Mrs. McBratney Passes Suddenly

With dramatic and heart rending suddenness, Mrs. McBratney, wife of T. McBratney, passed away at the family home on Sunday in the late afternoon. Mrs. McBratney had felt unwell since Friday, but not sufficiently serious to enlist medical aid. Sunday noon, however, Dr. Law was called and prescribed medicine for her. During the afternoon she felt better but about six o'clock suffered an attack, passing away quite quickly. The cause of death was heart trouble. The news of Mrs. McBratney's passing came as a great shock to residents of the town, very few of whom knew she was unwell.

The departed lady was 49 years of age and leaves to mourn her loss, a loving husband, four sons, and one daughter, Thomas, Percy, Stewart, Keith and Euphemie; also five brothers and one sister, Percy of Maymont, Sask; Edward of Richard, Saskatchewan; Stephen of Richard, Saskatchewan; Stewart of Saskatoon, Saskatchewan; Alec of Battleford, Saskatchewan; Margaret of Richard, Saskatchewan.

The funeral was held on Tuesday service being held at the Anglican church, Rev. A. Wallis officiating. Interment took place at Tofield cemetery.

CARD OF THANKS

We desire to express our sincere thanks for the kindly help and many expressions of sympathy during our recent sad bereavement.

T. McBRATNEY and Family.

Meeting To Explain New Educational Set-Up

A meeting was held at the Institute rooms on Monday night of this week, some fifty interested persons from various school districts being in attendance.

Mr. Robinson, inspector of schools addressed the meeting, explaining the new enlarged area plan. The explanation was much along the lines of that given at Holden recently by the Deputy Minister of Education, except that the request then made had been granted and the districts have been altered to conform with the existing lines of rail and highway travel.

LOCAL & PERSONAL

The C.W.L. will hold their Annual Bazaar and Chicken Supper on Saturday, November 13th, at St. Francis' Hall, Tofield. Supper starts 5:30, 35c Everybody welcome.

* * *

Miss Mary Hill from Violet Grove, spent several days in Tofield visiting relatives and old-time friends.

* * *

Miss Myrtle Bethel of Sedgewick spent the week end at her home here.

* * *

Mrs. Bertha Seale and Miriam, Mrs. Stan Yakabuski, Miss L. Ross and Gordon Ferguson spent the week end visiting at Donalda.

* * *

Mrs. Bedner and daughter of Ponoka are visiting with Mrs. Kendall.

* * *

Mrs. Frank Dunn returned after having a lengthy and enjoyable holiday.

* * *

Misses Annie Johnson and Jessie Munro spent Friday and Saturday in Edmonton.

* * *

Mr. and Mrs. R. Spangler and family left on Monday for Peace River, where they intend making their home.

* * *

Mrs. W. E. Seale is spending a few days in Edmonton.

* * *

We regret to report that Mr. A. Hummel was taken to an Edmonton hospital Wednesday morning. Adam had not been well for several days and was taken to the hospital for observation.

* * *

Mrs. J. W. Robinson attended the Quarterly Meeting of the Edmonton Diocesan Board of the Womens' Auxiliary which was held at Christ Church and Parish Hall on Friday, October 29th.

* * *

Mr. Louis Glean left for Pawnee, on Tuesday morning. He will visit among friends and relatives there during the winter, returning to Tofield in hte Spring.

L.C.C. NEWS

The meeting of the L.C.C. for the month of October was held at the home of Miss Lillie Morden.

Fifteen members and three guests were present: the guests being: Mrs. Burnett from Edmonton, Mrs. Geo. Mackenzie and Miss Ethel Conklin.

Mrs. F. Evans entertained for the day being in the form of guessing games, greatly enjoyed by all. Prizes being taken by Mrs. Hooper, Mrs. Bailey, Mrs. Glenn and Mrs. Bracegirdle.

A basket social will be put on by the members at the Lindbrook school on November 12th. The best basket takes a prize. Everybody welcome and ladies, don't forget your baskets.

The essays written by four of the girls in the history of Lindbrook were read at the meeting. Alice Bailey taking first prize on this subject and Pansy Bracegirdle second, while Thelma Kortzman and Star Bracegirdle also deserve credit on their good work.

The next meeting will be held at the home of Mrs. B. E. Wilson. Roll call to be answered by Xmas suggestions. Visitors always welcome.

Editor's Note: The essay "The History of Lindbrook" will be published next week. We are unable to publish same this week due to lack of space.

C. Gallinger Exhibiting Purebred Shorthorns At Toronto

Now enroute to Toronto are five pure-bred bulls and one pure-bred heifer from the Shorthorn herd of C. Gallinger of Tofield. They will be shown in competition with the best in the land at the big livestock exhibition.

Masquerade Dance A Real Success

The Hallowe'en Masquerade dance held at the Variety Theatre on Friday of last week was a genuine success. A splendid crowd attended and enjoyed dancing to the music of Joe's Melody Makers. Costumes were of great variety, the judges (three out-of-town gentlemen) awarded ladies' 1st to Mary Burnett as a pirate; gent's first to Kenneth Baptist as a ghost. A special prize given by the judges themselves was awarded to Lois Thompson as Mickey Mouse and Winnie Worton as Minnie Mouse.

Good Attendance at Picture

The Variety Theatre was comfortably filled Tuesday night when "Sons of Steel" an all talking production, together with educational features were shown.

Efforts are being made to bring in further shows, but before this is done, alterations have to be made to the projection room. How soon these alterations will be made it is not possible at present to say.

Thos. G. Dark, Eyesight Specialist and Licensed Optometrist will be at the Tofield Hotel, Saturday, November 13th, from 2:30 to 4:30

HEALTH

A HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION AND LIFE INSURANCE COMPANIES IN CANADA

Reaction Time

Persons wishing to be aviators are subjected to a most thorough medical examination, and rightly so, as flying requires both physical fitness and mental alertness of a high order. One of the main tests to which the candidate is subjected is called the "reaction time" to determine fitness for the exacting responsibility of controlling an aeroplane.

Scientific instruments are used to measure accurately just how long it takes the individual under test to do certain things under varying conditions. In other words these instruments indicate clearly to what degree mental alertness and physical action are in harmony. In any group of persons so tested it is observed that some are slow, others are jumpy while others again are on the hair trigger of precision and accuracy of control.

Normal reaction time, like normal pulse or normal temperature is desirable.

But unfortunately there are a great many persons whose reaction time is not normal. And in this fast moving age of motor traffic when split second decisions are often called for, serious accidents occur because at least one of the individuals concerned was not capable of responding quickly enough to the demands. His reaction time was too slow.

To all motorists, mechanics and to everybody who handles movable objects which if out of control can injure or destroy life we would issue a word of caution.

Take stock of your reaction time: Try and be perfectly honest about it, too. By doing a little thinking on the subject you can likely determine whether or not your reaction time is normal. Then when you are faced with the responsibility of putting your reaction time to the test—play safe—by leaving yourself a wide margin beyond your normal.

This year in Canada, 20,000 people will be injured in automobile accidents many of which will be due to the fact that drivers were not equal to the exigencies of the moment. They couldn't do the right thing quickly enough. Their reaction time was faulty. Put an honest rating upon your own reaction time and play safe.

Questions concerning Health, addressed to the Canadian Medical Association, 184 College Street, Toronto, will be answered personally by letter.

Pickled Onions

1 quart small pickling onions peeled
1 quart good white vinegar
1 teaspoon table salt
2 teaspoons whole pepper corns

Bring vinegar and seasoning to boiling point, remove any scum, put in onions simmer for three minutes, or until onions are transparent. Pour into sterilized jars and seal.

New Radio Program

It was announced today that the radio series "Canada 1937" which scored such success last season is to be renewed starting November 5. This season, this most spectacular of Canadian broadcasts will be heard Friday evenings at 10:00 P.M., E.S. Time.

Outstanding commentators under the guidance of Vernon Bartlett will again speak from Europe — an interviewer in Canada probing for answers to questions of the "man in the street."

Lionel Shapiro, Canadian correspondent in New York, will speak from N.B.C. Studios, relaying such latest happenings of the Gay White Way as are of interest to Canadian listeners.

A new technique will be introduced in the talks on Canada to make the very pulse of the nation audible to listeners throughout the country. Mr. Walter Bowles will broadcast from a different locality each week, telling of that district's contribution to Canada's progress and interviewing "nation builders" who make that progress possible.

Yet another outstanding feature of the program will be the music—every selection will be specially arranged for the large orchestra and choir that is now in rehearsal.

In sponsoring these broadcasts—to be again produced by Victor George—Imperial Tobacco Company of Canada, Limited, is bringing a new experience to Canadian listeners. These Friday evening programs are live demonstrations of the fact that the Canadian broadcasting is equal to the challenge for something new and spectacular.

New & Improved Chevrolet

The new Chevrolets for 1938 are announced today from Oshawa in three series—The Master, The Master Special, and the Master DeLuxe. An advance description of these popular sixes reveals many pleasing changes in appearance and performance. Principal interest centres in mechanical improvements, said to be more numerous this year than in any year heretofore. Chief of these is a marvellous new clutch, a radical departure from previous years, which will mean safer and more comfortable driving. Second only to the clutch in importance is the new starter mechanism, embodying new ease and certainty of starting in any weather. The Master and Master Special Chevrolets for 1938 come out with a new system of spring suspension which tremendously improves roadability, riding comfort and handling. The Master DeLuxe continues the fully-enclosed knee-action which has proved so successful.

Production on all series is now well under way at General Motors factories in Oshawa and Regina, it is announced, and the new models will shortly be in dealers' showrooms across Canada.

At a preview of the 1938 Chevrolets in Oshawa recently, there was unanimous agreement among automotive writers and engineers that the new "Tiptoe-Matic" clutch must be considered a major contribution to the year's new developments. Among its many advantages over the previous clutch are lighter pedal pressure, which decreases during the stroke; softer engagement; and smoother operation. It is far more simple in construction, weighs less, is more durable and never has to be lubricated.

This type of clutch spring has been used before, chiefly in heavy duty mechanisms such as long-range artillery, hydraulic presses and railcar couplings, but its use was limited because of the lack of technical data. However, Chevrolet engineers investigated the possibilities of this type of spring, determined it to be readily adaptable to clutch operation, modified and improved its basic design and applied it, for the first time in any automobile, to the 1938 Chevrolet clutch.

Bodies, both interiors and exteriors and chassis units reveal systematic refinement of features which already have been proved by Chevrolet owners. The public is already familiar with the 85-horsepower high-compression, valve-in-head, six cylinder engine. Widely acclaimed for its power, smoothness, economy and freedom from service interruptions, this power plant is to be found in both series.

Again offered on all the new models are features which have contributed to Chevrolet's sales leadership in the low-price field such as perfected hydraulic brakes, all-silent all steel Turret Top bodies by Fisher and the trouble-free hypoid rear axle introduced in 1937.

Advanced styling, which enhances the exterior appearance of the new cars, is emphasized at the front end. Sweeping forward from the cowl in a graceful curve, the top of the hood meets an almost vertical, flat-topped radiator and grille. The latter, which is an arresting departure from last year's design, consists of chromium-plated horizontal bars, flowing back from the centre line of the grille to blend into the radiator shell. The attractiveness of these lines is accentuated by the fact that every fifth bar is of double width and pin-striped down the centre with vermilion enamel. Introduced in 1937, the speedline which imparts a racy dash to the style is again featured this year. The combined effect of these many refinements is one of greater length, and racier, more graceful lines.

In the case of the engine, advances are principally in the nature of refinements. Engineers point out, however, that a new and lighter flywheel in conjunction with the new clutch, affords greater flexibility and quicker response to the controls, and valve-springs, valves and certain portions of the cooling system have been redesigned rather than simply refined. There is a faster transfer of heat from the combustion chambers, especially in the vicinity of the valves.

Departures related to units in the electrical system include the new starting mechanism, similar to that featured on costlier General Motors Cars. It has an over-running clutch and automatic throttle advance, assuring easy, positive starts. There is also a new weather-tight, and accessible battery mounting.

Widening of the rear tread from 57 9-16 inches to a full 59 inches has provided more body space and increased stability on the road. Quieter operation over any type of road has been achieved by an innovation in the method of attaching the rear springs to the rear axle housing. Bushings and washers of resilient rubber in conjunction with a new bracket welded to the front of the housing on each side provide complete insulation between the springs and the housing. Engineers have also given attention to the elimination of metal-to-metal contacts and the transfer of road noises to the interiors of the car. Thus, there is no longer any necessity for adjustment, lubrication or service of any kind at this point.

The motoring public will note with interest the convenience and utility of the trunk models, providing greatly increased luggage space. Removal of the flat shelf under which the spare wheel formerly rested horizontally gives 6 7-8 inches greater height while the compartment floor has been re-designed to include a well in which the spare wheel can be placed in an almost vertical position. A rubber mat covers an entirely flat floor and the top, sides and rear are insulated against heat and cold. Just inside the rear edge of the trunk is a convenient tool compartment.

The woman driver in particular will be interested in the more attractive instrument panel which is also easier to read. Refinements here include an illuminated ignition lock, sure-grip control knobs, flush-type locking knob on the glove compartment and firmer grip steering wheel, which can be adjusted to the spoke-position preferred by the driver.

An entirely new design in the backs of the front seats of five-passenger models in all three series marks an advance in both safety and convenience. In this connection, engineers state that the hard portion of the backs of front seats terminates several inches lower than on previous models, and the portion above it is softly-cushioned, minimizing the possibility of injury to passengers in case of sudden stops. Greater ease of ingress and egress has been achieved also by this change.

Upholstery and trim are of finest material and craftsmanship. Grey mohair velvet is used in the Master series, with grey cloth or blue grey mohair velvet in the Master Special series. Taupe cloth upholstery is supplied in the Master de Luxe Body interiors with taupe plush available as an option.

Body styles are as numerous as usual. The Master and Master Special lines include all the Master de Luxe styles except the Sport Coupe, and again offer cabriolet, sedan delivery and 7-passenger sedan, which the Master De Luxe alone does not.

"My wife and I are trying to get up a list of magazines. By taking three you get a discount."

"How are you making out?"

"We can get one that I don't want and one that she doesn't want and one that neither wants for $2.25.

Dominion of Canada 1937 Refunding Loan

The Bank of Canada is authorized by the Minister of Finance to Receive Subscriptions for this Loan, to be issued as follows:

One and One-Half Year 1% Bonds, due June 1, 1939
Issue price: 99.125% and accrued interest,
Yielding approximately 1.59% to maturity

AND

Seven Year 2½% Bonds, due November 15, 1944
Issue price: 98.50% and accrued interest,
Yielding approximately 2.74% to maturity

AND

Fourteen Year 3¼% Bonds, due November 15, 1951
Callable on or after November 15, 1948
Issue price: 99.00% and accrued interest,
Yielding approximately 3.34% to maturity

The 1% Bonds will be dated December 1, 1937. The 2½% Bonds and the 3¼% Bonds will be dated November 15, 1937. Principal and interest will be payable in lawful money of Canada. Interest will be payable without charge, semi-annually, at any branch in Canada of any Chartered Bank.

Denominations:
1% Bonds $1,000
2½% Bonds $1,000
3¼% Bonds, $100, $500 and $1,000

Proceeds of this loan will be used for refunding, in part, the outstanding total of $122,799,800 on converted Dominion of Canada 5½% Victory Loan Bonds maturing December 1, 1937. The additional cash required for this purpose will be provided from the Treasury.

Payment is to be made in full against delivery of interim certificates on or about November 15, 1937, in the case of the 2½% Bonds and the 3¼% Bonds, and on or about December 1, 1937, in the case of the 1% Bonds.

5½% VICTORY LOAN BONDS DUE DECEMBER 1, 1937 (WITH FINAL COUPON DETACHED)
will be accepted at par up to the amount required for payment of allotments of the new bonds. Resultant cash adjustments, where necessary, will be made at the time of delivery.

Subscriptions may be made to the Head Office of the Bank of Canada, through any branch in Canada of any Chartered Bank or through any recognized dealer, from whom copies of the Official Prospectus containing complete details of the loan may be obtained. The Minister of Finance reserves the right to allot subscriptions in full or in part.

The subscription lists will open November 3, 1937, and will close as to any or all of the maturities, with or without notice, at the discretion of the Minister of Finance.

THE POPPY—EMBLEM OF REMEMBRANCE DAY—

THE SYMBOLISM of the poppy, the sorrowful appropriateness of its blood-red bloom, takes on a deeper significance with each succeeding year. The Great War is passing almost into legend; a generation is bequeathed the duty of carrying into the years that have yet to come, the work and the ideals of those whom the Poppy commemorates.

Canada, along with the whole Empire, has adopted the Poppy as a symbol of Remembrance Day, because of the 60,000 graves in France and Belgium in which lie the dead of the preceding generation; because of the 170,000 Canadians to whom the conflict brought disablement of one kind or another. The crosses in the cemeteries of Flanders are garlanded with Poppies—the dolorous emblems of a Nation's youth consumed in the "Wrath-red forge of war."

On Poppy Day this Dominion pauses in its normal activities to recall the sacrifices of its young men, to pay tribute to their heroism, their hardihood and the uncomplaining fortitude with which they bore their privations and sufferings. At the same time, Canada strives to liquidate in some small measure, an obligation to those disabled men employed in the Vetcraft Industries of the Country, whose only means of livelihood is the making of these simple emblems.

The Dominion-wide ramifications of the great Canadian Legion, with its tens of thousands of workers on Poppy Day, take care of the distribution of those Poppies throughout Canada. There is thus ensured to their disabled Comrades in these Vetcraft Shops a loyal performance of a sorrowful yet prideful task. All Canadians of every age and degree should wear a symbol on Poppy Day. For that is surely a day of reconsecration and of rededication to the work on hand, of continuing the structure of civilization where the workers of a previous generation left off.

MACHINE-GUN LULLABY—

THERE WAS a time when parents considered it good policy, in order to make their children behave, to threaten them with all kinds of dire things. A sort of "the goblins will get you if you don't watch out," idea. Later child specialists came into being and told the parents, this is all wrong, young children should not be unduly frightened or excited. Today, parents are more or less helpless as regards exciting the children if not actually frightening them, for from the magic box we know as a radio there come at all too frequent intervals blood-curdling dramas, that make the horror stories of the Victorian era, tame in contrast. With all the effectiveness that sound expertly produced can attain, shootings, murders, holdups, together with underworld dialogue, pour into the homes of citizens and are eagerly listened to by youngsters eager to miss nothing of life's great drama. Perhaps the sponsors of such programs consider the lesson attached to the programs justifies their production, but at best it is a double-edged sword they are using. The blood-curdling drama absorbed by young minds, is often re-enacted in that time just before sleep, causing anything but a natural outlook upon life. Coming from the great outside, of which they know little, to the very centre of their world, the impact upon young intellects must be terrific and anything but beneficial. The dime novel and gangster moving picture have almost passed into oblivion but rushing into a million homes is something very similar but exceeding either one in horror.

IT'S A GOOD PRICE TO SOMEBODY—

WHAT ONE country calls a farm problem looks like an opportunity to another. This is not a matter of taking advantage of another's misfortune; it is a product of different levels in living costs labor costs, land costs and so forth.

A pertinent example exists in the Brazilian production of cotton, considerably discussed of late in connection with North American crop control legislation. Eight to ten cents a pound for cotton seeman an unbearably low price to planters in the southern United States. Yet in Brazil the coffee market had gone so much flatter than that of cotton that even this price looked attractive. Hence a new potential competitor in the world cotton market.

Now inside the United States the story promises to be repeated. Southern farmers looking about for something with which to employ unoccupied former cotton acres, awake to the prospect that they might produce more of the South's own meat and dairy supplies. This potentially affects stock raisers, and milk, butter and cheese producers of the North. They had not thought they were doing too well, but returns in this field look good to the South. Northern ingenuity will be put to it to find or expand markets in other directions.

Eternal adaptability is the price of agricultural success.—Christian Science Monitor.

THE WORLD OF WHEAT

By H. G. L. Strange, Director "Crop Testing Plan".

"What is the reason No. 3 Northern is at such a discount in price compared with No. 1 and No. 2?" friends ask me.

"There is a misunderstanding here," I answered. "No. 3 Northern, far from being at a discount, is actually selling at quite a premium on world's markets, as compared with wheats of equal quality."

On the Liverpool market, No. 3 Northern is commanding 5½ cents over Australia, 11 cents over Indian, 16 cents over American Hard Red Winters and 16 cents over Argentine wheats; demonstrating that No. 3 Northern is definitely at a premium.

We are confused, however, by the much higher premiums that are bid on World's markets for No. 1 and No. 2 Northern, the reason being that No. 1 and No. 2 are much more scarce than No. 3.

Actually, therefore, we see in front of us a revealing moving-picture of the law of supply and demand in action through the medium of the open "futures" market. We see three scarce articles with eager bidding for them by Canadian and British millers, all resulting in a benefit to our producers.

The different premiums for 1, 2 and 3 Northern paid on world markets are reflected straight back to our Canadian producers in the prices offered at country elevators.

The following factors have tended to raise price: Rate of world shipments in excess of Broomhall's estimate—Germany and England actively buy Argentine corn—Conflict in East becomes more serious—Japanese rice crop smaller than last year—Signs of black rust in Argentina—Flooding causes crop deterioration in Italy.

The following factors have tended to lower price: Austrian wheat crop larger than last year—Competition from cheap Danubian wheat—Canada importing South African corn—Business reversal in U.S.A.—German potato crop largest on record—Manchurian soy bean crop above last year—Rains improve Argentine crop prospects.

Example of Canadian Art as Birthday Gift to Soviet Union

In November the people of the Soviet Union will celebrate the 20th anniversary of its existence. To mark this occasion the Friends of the Soviet Union, through Louis Kon in Montreal, have conceived the idea of presenting a typical example of painting or sculpture by a Canadian artist. The funds available are modest, but it is felt that the successful contestant can be justifiably proud of having his or her handiwork hanging in a Russian gallery.

Unavoidable delays have made the time rather short, and there is much to be done—granted that the movement can gain the interest of Canadian artists—in the matter of securing a jury of selection and drafting the competition stipulations. It is hoped that the invitation will meet with response.

Many other countries are recognizing the Soviet birthday, many sending gifts of value and interest.

Red Rain an Omen From The Sky

The red rain which fell in Melbourne during the weekend was one of the few evidences the city man has of the terrible effects of wind erosion. Following the severe dust storms over a large part of the continent a light shower of rain in Melbourne brought down a red pall from the sky which bespattered city buildings and streets.

It was a striking omen, but few who complained about the necessity for cleaning motor cars or household windows stopped to consider the dire implication of that red rain.

It told of the slow but sure advance of erosion to the farm lands of the north-west of Victoria and the west of New South Wales.

It told of the advance of the inland desert areas towards the once fertile grazing areas.

In fact, it told the nation that erosion was not merely a popular catch-cry but a serious national problem which must be treated as such.

Discussing with "The Land" this week the serious dust storms in many parts of Australia, E. S. Clayton, who is in charge of the recently created Soil Conservation Service in this state, drew attention to the above aspect of the red rain.

He pointed out that it was only the mountains to the west of the city which prevented Sydney from being frequently bespattered with the red rain.

He explained that wind erosion was increasing in its intensity each year in Australia. The effects of continuous over-grazing were now being clearly seen.

"It is important to note," added Mr. Clayton, "that this red dust which comes down with a light shower in Melbourne and Adelaide is not, as is generally thought, from the interior of the continent. Those areas have long since lost their top soil and are now merely desert.

"The red soil comes from those outback grazing areas from which the vegetative cover has been removed, leaving the top soil an easy prey to a 60-mile-an-hour gale, such as was experienced last week end.

Mr. Clayton said that many years ago red rain was a phenomenon in Melbourne. It might be seen only once or twice in a lifetime. In recent years, however, these falls of red rain have become quite common, indicating clearly the startling increase in the eroded areas to the west and north-west.—"The Land" Melbourne, Australia.

Hockey Broadcasts To Be Renewed

"Hello Canada—and hockey fans in Newfoundland and the United States!

" Once more, on Saturday, November 6th, Foster Hewitt's familiar greeting will sweep over a chain of stations from Coast to Coast. Fans in Canada—the United States—and even in more distant countries—will rally round their radios to hear the opening Imperial Oil Hockey Broadcast of the game between Toronto Maple Leafs and New York Americans, at Maple Leaf Gardens.

That this program is the world's biggest and most popular weekly sports broadcast, is borne out by a letter received from an enthusiastic woman hockey fan, formerly of Nova Scotia, but who writes to say she is going to "listen in" from her far-away new home in Cristobal, Canal Zone, where, she claims, reception is crystal clear.

The Imperial Oil Hockey Broadcasts will expand this coming Winter, practically "blanketing" every province in Canada with the broadcasts of games played either in Toronto or in Montreal.

Last Winter, broadcasting of Montreal games was not permitted during the regular season schedule leaving province of Quebec listeners without hockey until the play-offs. This Winter, however, Imperial Oil Limited has secured a franchise for all Saturday night games in Montreal.

With the province of Quebec thus provided for, the hockey network will now cover the entire Dominion with games played either in Toronto or in Montreal, and Saturday night will very definitely become HOCKEY NIGHT IN CANADA.

Imperial Oil's Montreal staff of English announcers is already familiar to listeners throughout Canada, due to its handling of the Montreal play-off games last Winter. But, in addition to the English broadcasts of games at the Forum, there will be a companion broadcast, entirely in French and featuring Roland Beaudry as the play announcer. This will go out over a Quebec provincial network of five stations—believed to be the largest French-language network ever used on a weekly sports feature.

Thus the Imperial Oil Hockey Broadcasts during the coming Winter will actually consist of three separate and distinct broadcasts every Saturday night. One of these will be the regular broadcast of the Maple Leaf home games from the Maple Leaf Gardens in Toronto. A second will be the English broadcast of either the Maroons or Canadiens home games at the Forum in Montreal—which may occasionally be heard over the national network, particularly during the play-offs. The third will be the all-French broadcast of the Montreal games, sent out over a Quebec provincial network.

It is believed that this dual broadcast from Montreal is the only weekly two-language feature of its sort in the entire world!

Working as usual on our 120th Birthday

One hundred and twenty years ago there were only seven of us working on the staff of the Bank—a cashier, an accountant, a paying teller, a second teller, a discount clerk, a second bookkeeper, and a porter—that was the entire staff. To-day we are more than 6000, in more than 500 Branches, all working to render modern, experienced banking service.

Our Bank's career has been inseparably woven into the career of the nation and every part of it. Founded in 1817, the Bank at once became a financial pathfinder for Canada's pioneers. Through all the intervening, eventful, growing years of Canadian life, our Bank has kept strong and efficient—by pursuing a policy of safety for depositors and by keeping our services always abreast of modern conditions.

In times of expansion and depression, in the best and the worst of economic conditions, through peace and wars, panics and political upheavals, Canadians have learned to rely upon the unwavering safety and banking assistance of the Bank of Montreal. Older than the Dominion itself, yet young as the latest sound business enterprise of Canada, we are working as usual on our 120th Birthday.

BANK OF MONTREAL

"a bank where small accounts are welcome"

Modern, Experienced Banking Service . . . The Outcome of 120 Years' Successful Operation

LINDBROOK

Lindbrook "enjoyed" its first snowfall early Sunday morning. But it turned from rain to a wet snow and turned everywhere into a sea of mud, making it very much harder for the "ghosts and goblins" of Hallowe'en night to do their dirty work, so it may have done some good after all.

It is the custom of the school here to observe Hallowe'en with a children's party at the school. This year, whilst Miss Ph[illegible] and her pupils were thus engaged a [illegible] drove into the yard [illegible] being a surprise attack by the [illegible] L.C.C., who came [illegible] and [illegible] help entertain and lastly but not least, feed the party. Games were played and [illegible] the reason that [illegible] there was the [illegible] they offered a prize for the best essay on the "[illegible]" These essays were judged by some gentlemen of Tofield and the result: 1st prize, Alice [illegible]; 2nd, Pansy Bracegirdle. [illegible] prizes were also awarded [illegible] other contestants. It is said that the essays were very good and also very interesting.

Mrs. Barnett jr. of Edmonton is at present the guest of Miss L. and Mr. Chas. [illegible] at their home here.

The sympathy of the district is extended to Mr. Abernethy and family in the death of their wife and mother, Mrs. Abernethy, sr. who passed away last week. Deceased was well known, liked and respected by all and will be sadly missed in many ways by many people.

A birthday party was held at the home of Mr. and Mrs. Jas. Bracegirdle here in honor of their daughter Pansy's 12th birthday. Miss Pansy entertained a number of her school friends to tea and afterwards taffy pulling and games were indulged in.

AMISK CREEK

The Ladies' Aid of Amisk Creek will hold their annual Lutefisk and chicken dinner and sale of fancy work on November 11th, Armistice day. Serving of dinner will start at 12 o'clock noon. Everybody welcome.

Mr. and Mrs. E. A. Moen, Mr. A. Patterson, Mr. and Mrs. R. O. Berg, and family, Mr. J. Annebo and Magda, and Mrs. P. O. Flaaten attended the funeral of the late Mrs. Nils Sand, who passed away in an Edmonton hospital Tuesday morning of last week. The funeral was held in Viking. Mrs. N. Sand was a sister-in-law of Mrs. R. O. Berg, and Mrs. P. O. Flaaten.

Mr. J. Annebo and R. O. Berg motored to Camrose last Friday returning the same evening.

Mr. and Mrs. H. Strawmer and little daughter who have been staying at R. Olson's since last spring, moved to Mrs. Strawmer's parents last Monday.

Mrs. I. C. Olson, Mrs. C. Ward, Miss M. Annebo, Miss A. Berg, Miss S. Swanson and Mrs. P. O. Flaaten met at Mrs. Erickson's home one night recently to make articles for the Ladies' Aid.

Astrid Molaw who is nursing in Walla-Walla, Wash. U.S.A. made a brief visit to her parent's home here recently.

Mr. and Mrs. I. C. Olson and Glen, Arthur Patterson and Marvin Moen motored to Edmonton and took in the big Hockey game Thursday of last week.

Mr. and Mrs. E. A. Moen, Mr. A. Patterson, Miss S. Swanson and Mrs. P. O. Flaaten, stopped to call on Hilmar Moen, who is a elevator man in

Many Happy Returns of the Day, Pansy, and may you have many of them.

Twenty Years Ago

Twenty years ago two farmers' grain companies serving Alberta Farmers were amalgamated to form United Grain Growers Limited.

The twenty years that have passed have increased the confidence of farmers in this farmer-owned institution. Satisfactory experience in the handling of their grain is the basis of that confidence.

United Church News

The Anniversary Services of the United Church held last Sunday were well attended, notwithstanding the inclemency of the weather. The Rev. Alex Stewart delivered interesting, helpful and inspiring addresses. The Sunday School Rally was enjoyed by the scholars.

The Annual Supper on Monday was very successful. The concert to wind up the Anniversary celebrations was greatly enjoyed by the large audience.

The Board of Stewards wishes to thank all those who helped in any way to make these gatherings so successful.

On Sunday evening, November 7, the Rev. John Kitchen of Chengtu, China, will speak in the United Church. Everybody wants to know more about China and the present situation—come and hear this excellent speaker.

On Sunday, November 14, "Communion" will be observed after the evening service. The session sincerely requests that the members try and be present on this occasion.

Remember the dates! November 19 and 20th. You sir, the play, "Here Comes Charlie" is to be in town.

Alberta Butter Scores Heavily

When Albertans demand a Made-in-Alberta product they can rest assured that so far as Alberta butter is concerned they will receive a commodity which has taken premier honors in open competition at expositions all over the Dominion. A total of 907 prizes, awarded to Alberta butter at the 9 largest exhibitions in Canada represents 50.2 per cent of the total awards. No other province approached the Alberta record, and although 3 of the largest shows were held in Ontario, it is interesting to note that Alberta's chief competitor was the Province of Manitoba, with 700 awards. British Columbia exhibits won 62 prizes; Saskatchewan 44; Ontario 26; Quebec 9. Alberta buttermakers have captured 45.7 per cent of the First Group prizes, 51.3 of Seconds and 57 per cent of Thirds. This summary of the awards should encourage Alberta butter-makers in the preparation of Alberta exhibits for the Royal Show, which will be held in Toronto, November 16-24. The Government will again duplicate the prize money won by exhibitors of dairy products at the Royal, and this year's exhibit from Alberta will probably be the largest yet.

AND NOW FOR THE STEAK

To find mushrooms on Hallowe'en and in your own back yard, just about constitutes the last word in service. Anyway, Rev. Wallis picked ten on Saturday and nine on Sunday, and of all handy places! right in his own yard. It is hard to beat this.

Phillips, while on their way to Viking.

Mr. A. Erickson celebrated his 79th birthday on the 29th of October.

Stella Swanson from Viking is assisting Mrs. Flaaten with the work.

Benny Moen from Bardo was a visitor at the Flaaten home last Saturday night.

Mr. George Bruce from near Round Hill was a visitor at the Ericksons and Flaaten home Sunday and Monday.

History and Origin of Lindbrook

BY ALICE BAILEY

Lindbrook is a mixed farming district situated on the C.N.R. railway, forty miles east of Edmonton and eight miles west of Tofield. The origin of Lindbrook began when Mr. Surbrook and Mr. Lindberg settled in this part of the country. The name was derived from taking "Lind" from Lindberg and "brook" from Surbrook. Thus, in this way, Lindbrook was named.

Some of the other first settlers in Lindbrook were Mr. Rogers, Mr. Stine, Mr. Blake, the late Mr. Glenn and Mr. Wellington Glenn.

At this time there was no highway as we have today. There was an old trail to Tofield coming from Hastings Lake and winding around on sections 12, 7, 6, 5 and 4. It finally came out on Hunt's bridge, which is now Appleby's bridge, then the winding road continued to Tofield. The trails became very bad so the present road was built in 1911. T. J. Glenn was contractor on the road for eleven miles west of Hunt's bridge. The telephone poles were put up in 1909.

Hastings Lake had a great deal of water in it then. In the spring jackfish and suckers came down by the hundreds. The men went out at night, with pitchforks and spears. They speared the fish as they swam by in the lantern light.

The railway was completed in 1909. On June 30, 1910, the first passenger train travelled from Edmonton.

On A. T. Anderson's homestead there was a log building which was used for a school-house from May until December. This building is now used as a grainary on the place now owned by Mr. Hooper. Mrs. Fielding was the first teacher. She was a young married woman who came out from England.

The first trustees were Mr. Lindberg, Mr. Surbrook and Mr. Rogers. Mr. Blake was secretary-treasurer. A permanent school house was built where it now stands, in 1910. It was constructed by Mr. Rogers who is still residing in this district. Mrs. Virge was the teacher for a short time. Later, Mr. McCall became teacher, now he is Dr. McCall of Alberta College.

The station was constructed in the fall of 1914. The stock yards were built shortly after.

In the year 1919 the store was built on the corner north of the present site. The owner being Mr. Leahy. Since then, there has been many other store keepers.

The highway which passes through Lindbrook was gravelled in 1930 which was a great improvement.

The elevator was built in 1923 by the P.H. Company.

At the present time Lindbrook has a daily bus service, a rural mail delivery and a post office. Lindbrook today is a prosperous district.

Send a Gainer's Superior Ham to Your Friends in The Old Land

Simply state SUPERIOR HAM or BACON, the name and address of your friend in England, Scotland or Wales. The prices quoted cover all costs to your friend's home.

Shower Held For Bride of Next Week

On Monday of this week Mrs. A. P. Moen, Alice and Miss Lois Wilson held a shower in honor of Miss Blanche Everitt. The afternoon was pleasantly spent playing games and group singing. Little Donald Stinson, dressed as a sailor lad brought in a large boat which contained the gifts for the bride-to-be. While this was being brought in, the music of "When my Dream Boat comes Home" was played. Aileen Allen and Gwen Firth assisted Blanche in unwrapping her gifts. Many lovely gifts were found in the boat and Blanche thanked all her friends very much inviting all of them to visit her in her new home at Round Hill. A delicious lunch was served by the hostesses and all departed for their homes.

Miss Leda Baptist who has been visiting friends in the city for the past two weeks returned home on Saturday. She was accompanied by Miss Jennie Wilkinson who spent the week end at the Baptist home at Tofield.

Thos. G. Dark, Eyesight Specialist and Licensed Optometrist will be at the Tofield Hotel, Saturday, November 13th, from 2:30 to 4:30.

LAKESHORE

On Friday evening last a dance was held at the Community hall in honor of Miss Jean Englesham. The occasion being her birthday. There was a large crowd present and everyone reported an enjoyable evening.

Mrs. D. Bendikson and small daughter are visiting with Mrs. L. Noland.

Miss Grace MacKinnon spent Tuesday evening with Mrs. Bertha Seale.

The Lakeshore Ladies' Aid have decided to hold their Amateur hour at the Community Hall, instead of at the school as first planned.

Gordon Ferguson, James Secord and Neil Phillips are planning to leave for a hunting trip on the 15th.

Despite the rather stormy weather the J. Brown auction sale held on Wednesday was well attended and prices were good. The day brought the first snow of the season with lowering temperatures. J. J. Hannan cried the sale. Two farm sales and a community sale is also listed in this issue, the farm sales to be cried by D. E. Ball and the community sale by C. A. Everitt. More farm auction sales is a definite sign of better times.

Gravelled Road To Jasper Park

Growing in popularity, Jasper national park attracted 2600 motor tourist parties in this season, according to official figures issued recently.

One reason and doubtless the primary one which governed the traffic increase was the improved condition of the Jasper highway.

Gravelling of 52 miles of this highway [illegible] which was replaced [illegible] was undertaken this [illegible] the Provincial Public Works [illegible]. This program has been [illegible] completed.

[illegible] the [illegible] highway to Jasper [illegible]

[illegible] the [illegible] commence the first [illegible] hard surfacing of this [illegible]

[illegible] the Alberta Motor [illegible] branches [illegible] urging the need [illegible] highway to Jasper [illegible] give their [illegible] that the way [illegible] this route in [illegible]

Department of Extension, University of Alberta Study Circle Program

For some years the Department of Extension has been receiving requests from people in rural and small town communities for assistance with study groups of various kinds. It is therefore quite apparent that there is need of some medium through which such groups may obtain material as well as advice regarding subject and method of study. With this in mind, the Department of Extension is undertaking to provide, in a systematic way, a program for study groups of congenial people who may want to spend some of their leisure hours in the stimulating atmosphere of a study circle.

It should be mentioned that study groups usually fall into three classifications:

(1) The social group, that is a group of people who come together regularly to discuss matters of more or less general interest but who do not take the subject matter seriously and do not add greatly to their knowledge.

(2) The propaganda group. This group is very common and under certain [illegible] serves a useful purpose. There is a tendency on the part of many of these groups however to use each meeting for the purpose of [illegible] preconceived prejudices and beliefs rather than for [illegible] the [illegible] concerning a particular topic.

(3) The third group is the real study group which definitely sets out to study and analyse all of the facts of a given situation and arrive at conclusions on the basis of sound [illegible]. Obviously this is the group to which such a program as the Department offers will make its greatest appeal.

[illegible] the plan we are suggesting [illegible] That groups of eight or ten [illegible] who can meet regularly [illegible] a week or every two weeks as the case may be, should form themselves [illegible] Extension Study [illegible] a leader and a secretary who can keep in touch with the Department. [illegible] containing study [illegible] sent to the secretary each [illegible] or every two weeks as [illegible] The secretary in turn will [illegible] the material for the next [illegible] of each study [illegible] in order that each member [illegible] time to read and [illegible] lesson before [illegible] the study circle [illegible] the [illegible] material.

[illegible] may be obtained on [illegible] Economics, Political Science, [illegible] Planning, Co-operation.

[illegible] for material [illegible] for [illegible]

Each member of the group [illegible] sign a registration form which [illegible] obtainable on application to the Department. A fee of $1.00 per [illegible] will consist of from 12 to 15 [illegible] but one folder may contain [illegible] material for one to three [illegible]

The material obtained [illegible] authoritative and [illegible] points in order that the [illegible] be encouraged to consider all [illegible]

[illegible]

The [illegible] broadcast over CKUA [illegible] day evening from 8:00 to 8:30 for the purpose of dealing with [illegible] questions that may be raised [illegible] members of the study groups. In [illegible] way some valuable guidance may be given to outlying groups in a very effective way.

All enquiries should be addressed to the Director, Department of Extension, University of Alberta, Edmonton, Alta.

THE WORLD OF WHEAT

By R. G L. Strange, Director "Crop Testing Plan"

"Can Thatcher, the new rust-resistant wheat, be used as an early variety to replace Garnet?"

Many farmers in northern Alberta and Saskatchewan are asking that question; knowing of course, that Thatcher is eligible to go into the grades No. 1 and No. 2 Northern, from which Garnet is excluded.

The results of thousands of tests made by hundreds of "Crop Testing Plan" Elevator Agents, in co-operation with many farmers and with Governmental Institutions, reveal definitely that Thatcher not only is the highest yielder of all spring wheats, but that in addition it is about three days earlier than Marquis.

Because of this earliness, Thatcher certainly will escape damage from some early fall frosts which might harm Marquis. Garnet, however, being ten days earlier than Marquis is still seven days earlier than Thatcher.

[illegible] strongly advise farmers, who have decided to replace Garnet with Thatcher, to treat their Thatcher seed against smut and root rot diseases with a mercurial dust—either Ceresan or Leytosan—and particularly to use fertilizer, either ammonium phosphate or triple superphosphate. These treatments will cause Thatcher to mature at least a week earlier than Marquis, making it about as early as Red Bobs or Reward and then not more than two or three days later than Garnet.

Following factors have tended to raise price: Frost in Argentina—Unsatisfactory condition parts of U.S. winter wheat belt. Much Russian wheat of inferior quality. – Rumour [illegible] may again raise gold value— Wet weather interferes with seeding in Italy and Spain– Dry weather hinders South African corn growth.

Following factors have tended to lower price: Russia makes large wheat shipments. Argentine acreage estimate of wheat, oats, flax and [illegible] increase– Chilean grain acreage increased slightly– Harvesting commences in Australia– Export [illegible] Roumania [illegible] exports– [illegible] German apple production [illegible] than expected—International Institute indicate 132 million wheat surplus.

A cell block in Sing Sing prison, investigators report, is "unfit for cows." We trust that this will convince all cows that honesty is the best policy.—South Bend Tribune

HEALTH

A HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION AND LIFE INSURANCE COMPANIES IN CANADA

Headache

Pain means that some injury is being done the body. The body may suffer from certain forms of injury without experiencing pain. The severity of the pain may have no relationship to the severity of the injury. For all practical purposes we may take it as a safe guide that pain is a reliable sign of danger in that it indicates harm or injury to the body.

One form of pain with which most people are familiar is headache. Headaches, like other pains, mean that something is wrong inside the body. There are many varieties of headache described as sharp or dull, frontal or occipital (front or back of head), morning or evening.

Headache is the most common symptom we experience. There is practically no illness which may not give rise to headache. It is often the first evidence of the onset of disease. Even more often it is the result of indiscretions in eating or drinking, lack of exercise, constipation or neglect of some other health need of the body.

If a headache is severe or annoying, it is quite natural that relief should be sought. In many ways, the public are informed as to how relief from pain may be secured by the use of this or that drug. Drugs, however, are of value only when properly used, that is when prescribed by someone who knows the condition of the patient and the action of the drugs.

The person of headache who knows that his headache has resulted from obvious causes from eyes use experience has no reason to seek medical aid. If it is exercise or fresh air he needs, then he knows where to get these, he can look after his diet and elimination if they are at fault.

There is another group of persons who in spite of taking reasonable care of their health suffer from persistent, severe or repeated headaches. Such a person is very foolish to rely upon self-medication. These forms of headache are so often a symptom of abnormal states inside the body that he should seek the cause rather than merely treat the headache.

One of the most common causes of headache is eye-strain, which can be relieved by properly-fitted glasses and in no other way. It is obvious that if a particular headache is a symptom of anaemia or nephritis, or if it is due to emotional causes, if the treatment is to be successful it must be directed towards the responsible cause.

Do not overlook the possible seriousness of headache. Attend to it promptly and properly and save yourself trouble.

Questions concerning Health, addressed to the Canadian Medical Association, 184 College Street, Toronto, will be answered personally by letter.

New Air-Conditioned Day Coaches to be Used By Canadian National

Winnipeg, Man., November 6—First of fifty new air-conditioned day coaches which will soon go into regular service on Canadian National Railways trains is now on exhibition in Western Canada. These new cars will soon be in daily service on the Continental Limited.

"The purpose of this new equipment is to extend the comfort and luxury of the most modern car design to the passengers at the 'head-end' of the train," said R. Creelman, passenger traffic manager of the Canadian National Railways, in discussing the coaches from the point of view of the travelling public. "It is in keeping with our policy to remain abreast of the times and give the passengers the advantages of the latest improvements. The cars are made of light alloy steels and are air conditioned; the seats, built to rotate and to be adjusted in three positions are cushioned in Dunlopillow, the new latex material which moulds itself to the body, and, in lighting and other appointments, the coaches are designed for both comfort and smart appearance."

The wide, clear windows, sealed tight to keep out dust, noise and draughts, and trimmed with aluminum, the "turtle-back" roofs, and the light green color give the coaches a strikingly new appearance as compared with the older style of passenger car. The interiors are also noticeably modern in comfort and smart appointments. The 61 seats—45 in the main part of the cars and 16 in the smoking compartment—are of the latest type. The smoking compartment, not enclosed as formerly, is divided from the rest of the coach by a glass partition. A new feature, Mr. Creelman said, is the ladies' lounge, equipped with a leather-covered sofa and wing mirror.

Cordell Hull Enjoys Winnipeg Gold Eyes

Montreal, Que. Nov. 6—There was a surprise for Hon. Cordell Hull, United States Secretary of State, when he boarded the Canadian National train which took him from Montreal to Ottawa recently. Buttered Seraphim for breakfast!

In commonplace language, they are called "Lake Winnipeg Gold Eyes," but ever since Irvin Cobb expressed his appreciation in the dining room of the Fort Garry Hotel, Winnipeg, they have taken on a new glamor. "These are not fish," said Cobb, who is almost as well known for his palate as for his stories, "they are of the genus Seraphim."

Seraphim or Gold Eye, their fame has spread as far as diplomatic circles in Washington and wheels were put in motion to make sure that Mr. Hull should have the pleasure of a real Canadian delicacy soon after he crossed the border.

A National Institution

Spread out over the vast area from the Atlantic ocean to the Pacific ocean there are about seven hundred weekly newspapers. Some are old, going back to Confederation, some are comparitively new born, having been rolled from their presses for only a few years. But all of them, no matter where published are intensely loyal to their seat of publication. To them, they are located in the best district, in the best province, among the best people in Canada. That is their creed, a creed to which they invariably render something more than mere lip service.

They solicit the support of the people of the district in which they are published, certainly, but in doing so they are asking the people to not only help the newspaper, but to help themselves. A country's greatness can be equally judged by the virility of its villages as by the importance of its metropolitan centres. A country weekly newspaper may be, and frequently is, a paper of Mr. and Mrs.', but the phrase Mr. and Mrs. represent the true structure of the nation.

The Tofield Mercury solicits your subscription and the subscription of your friends and neighbors. For nineteen years we have published for mutual benefit, and hope and expect to publish for some number of years more. Renew or subscribe NOW.

MODERN LUXURY FOR "HEAD-END" PASSENGERS

MEMBERS of the Board of Directors and officers of the Canadian National Railways are seen in the above photograph, sampling the comfort of the first of fifty new air-conditioned coaches soon to go in service on regular trains. At the front on the left side of the aisle is R. C. Vaughan, Vice-President in charge of Purchases, Stores and Steamships. Behind him sit W. A. Kingsland, Toronto, Vice-President, Central Region; R. J. Moffat, Bradwell, Sask., Director, and F. L. C. Bond, Toronto, General Manager, Central Region. On the right, according to rows, are Wilfrid Gagnon, Director, Montreal; John Roberts, Chief of Motive Power and Car Equipment; C. W. Johnston, General Passenger Traffic Manager, and Arthur D. Neale, Vice-President, Canadian Car and Foundry Company Limited, builders of the new coaches.

Extending the latest improvements in modern railway practice to the "head-end" of the train, the fifty coaches are equipped with air-conditioning, and the 64 seats with resilient Dunlopillo cushioning, are on swivels and adjustable to three positions. Aluminum parcel racks and individual shadowless and glareless lights give the cars a smart interior appearance and add to the sense of luxury.

November 11th

'Twas nineteen years ago today,
When guns of war were bidden "Cease"
In gratitude we celebrate
This anniversary of Peace.

Oh heroes of the boundless deep,
Soldiers of Flanders' Field, sleep on;
Our love enshrined in memory
Burns high, is ever burning on.

Ye men who wield the nation's power,
God grant that you may always heed,
That covenant,—"If ye break faith,
We shall not sleep, in Flanders Field."

They died for Honor, Freedom, Peace,
But their flaming 'Torch' must never die,
They fling it back in trust to you;
With pride, 'Be yours to hold it high.'

God, guard the Souls of those who died
Ease, Thou, the yearning, sad despair,
Of lonely hearts, of those who mourn;
We ask of Thee, Oh God, in prayer.

M. Josephine Turner.

Twenty Years Ago

Twenty years ago two farmers' grain companies serving Alberta Farmers were amalgamated to form United Grain Growers Limited.

The twenty years that have passed have increased the confidence of farmers in this farmer-owned institution. Satisfactory experience in the handling of their grain is the basis of that confidence.

"Grain Facts"

Today at the Board of Trade offices in London, England, are kept the standards of the measurement of quantity used throughout the British Commonwealth.

There, for example, is housed the original yardstick which sets the standard of measurement of length.

Certainty of measurement is most necessary for the transaction of business.

In olden times the vessels or instruments fixing to measures of volume or length or weight were considered sacred objects and were kept in the temples by the priesthood.

Measurement of quality or grade is a comparatively modern development.

Modern agricultural marketing is considered efficient just insofar as it measures and maintains quality, whether the product be bacon from Denmark, eggs from the Irish Free State or apples from the Okanagan.

Any standard measurement, whether of quantity or quality if it is to be effective and useful, should be accurate, stable and uniform.

No country has shown such advancement in measurement of quality as Canada has in connection with her grain.

Standards offer a double protection. They protect the farmer-seller and the consumer-purchaser.

The standards of quality or grades of western grain are determined either by the Board of Grain Commissioners or under their control and supervision.

The samples themselves which determine the standards are in their custody or control.

The grades of Western grain are usually divided into statutory commercial and off-grades.

The Statutory export grade samples are fixed by the Grain Commissioners.

The Standard samples are determined by the Committee of Western Standards which consists of a number of Government officials, one miller and thirteen representatives of Western producers.

This Committee also fixes the standards of commercial grades which are usually called "Special."

Off-grades are generally those of grain which have been affected by moisture or frost.

The producer is afforded the double protection of strict regulation and tense competition.

Education, experience, vigilance and competition ensure the highest possible grades for grain directly purchased in the country.

For grain sold subject to grade or dockage or consigned, a farmer has the services of the various grade experts employed by grain handling organizations and the right of inspection, reinspection and appeal.

The Board of Grain Commissioners has 347 trained employees engaged in inspection.

Every sample of grain inspected by them is dealt with on its merits. The identity of the shipper and the locality of the farm that grew the crop are both unknown to the inspecting Government official.

In the year 1936 there were 178,011 inspections. 37,288 cars were reinspected by the Chief Inspector; 7875 had the grade raised; 243 had the grade lowered; 290 had the dockage raised and 11 had the dockage lowered.

In most cases of reinspection and appeal the farmers' claim was given expert assistance by an elevator organization.

This record of labour and care is a tribute to the Government grading system and to the officials who impartially perform their public duty.

C.N.R. President Looks For Trade Expansion

London, England, Nov. 6—"Everywhere I went I found strongly expressed sentiments for goodwill among the nations of Europe and a desire for the expansion of international trade," S. J. Hungerford, Chairman and President of the Canadian National Railways, said on his return to London from a visit to his company's offices and agencies in France, Germany, the Netherlands and Belgium.

In all these countries, he said, he found evidences of general prosperity and inspection of harbor operations at Hamburg, Bremen, Rotterdam and Antwerp, with the provisions being made for expansion, impressed him with prospects for the continuance of the present satisfactory business conditions, industrially and in the shipping field. Mr. Hungerford was impressed too, with the widespread housing developments designed to improve living conditions of industrial workers in the large centres of population.

On his return to London he addressed passenger executives of railways, steamships and airlines when he was the honor guest of the Travel Luncheon Club in the Cafe Royal. "I have never sold a ticket in my life" he admitted. "All my activities have been devoted to providing transportation. It's your duty to sell it."

Fertilization is Key To Gardening

In the spring a young man's fancy turned to gardening. To tell the truth he was not altogether following his fancy when he decided to turn his spacious back yard into a truck farm. Rather, he was coerced into it by his two next-door neighbours, one a Scot, the other a Sassenach but both ardent gardeners who chewed the rag and the produce of their gardens all winter and cooled their heels while waiting impatiently for the time when they could dig and plant again. Both bestowed much attention and advice on the young man who had come to dwell between them and reminded him that a garden may be made to reflect the character of its owner.

In "The Spell of London" H. V. Morton says, "It seems a rule in certain crowded streets that the front of a house must be as glum as the face of a poker player. You must never be able to tell from the front of a house what is going on inside. But the back of the same house casts off all restraint. The back windows and the back gardens are allowed to tell you almost as much as an old matron who has had two children will tell you over her third glass of gin."

If he was to dwell between his two gardener neighbours in amity and retain his self respect, the young man, who may be named Legg for short, resolved to have a garden. Some time before the frost was out of the ground the two veterans sowed seeds of lettuce, cabbage and tomatoes in the starting boxes indoors, the Scot not forgetting to plant some kale and in the art of this preliminary process Legg was duly instructed. Later on he learned how to transfer the seedlings to the hot-bed and finally, to the cold frame for hardening before they were placed in the garden beds. By this time spring had definitely arrived and work in the three gardens proceeded apace. Unfortunately, said Legg, as he related his experience to H. Leslie Emslie, the advice of the two experts was conflicting and confusing, the Scot telling him that he was watering too liberally and cultivating too deeply, the Englishman that he was erring in the other direction.

His methods being approved by and anxious to avoid the rebukes flung across the fence, Legg tended his garden furtively, or after his neighbors had retired to sleep off the effects of their toil. Soon he ceased to cultivate his garden at all, as the demands of business left little time for his new hobby.

Spring turned to summer, and Legg's garden stuff flourished to the wonder of the experts who gazed across it at each other, with sweat bedimmed eyes, and perhaps with wild surmise. The Leggs had enjoyed crisp lettuce and radishes of the choicest and peas of the earliest and sweetest. Now as summer merged into Autumn table corn, tomatoes and cucumbers graced their board. Legg had no cause to avoid his neighbours now. "How is it," asked one "that we seldom saw you working in your garden and yet your stuff beats ours? I've never seen better tomatoes or bigger ears of sweet corn than yours. How do you explain it?" Recognizing the debt he owed these men for having forced him into gardening, Legg did not longer conceal the secret from them. "I have proved" said he, "that cultivation during the season of growth can be overdone; but the chief reason for my success as a gardener is that one night in spring, while you fellows were asleep, I applied fertilizer."

Supply & Demand in Action

Many farmers and other good people are wondering why No. 3 Northern stands at such a discount in price compared with No. 1 and No. 2. Some feel that it is caused by the fact that there is a high admixture of Garnet in No. 3 and that millers are reluctant to buy either Garnet or grades which contain much Garnet.

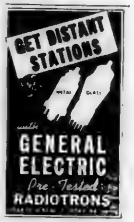
We suggest that there is a definite misunderstanding here, for while 3 Northern certainly is at a discount under No. 1 and No. 2 Northern actually, however, in comparison with the prices of competing wheats of equal quality on world's markets, No. 3 far from being at a discount is at a premium.

Liverpool quotations show that No. 3 Northern is commanding 5½ cents over Australian, 6¼ cents over Indian, 15 cents over American Hard Red Winters and 16 cents over Argentine wheats; demonstrating that No. 3 Northern is definitely at a premium over these sorts. (It is usually considered that 3 Northern is of about the same quality and so should command the same price as the competing wheats mentioned.)

Some are confused, however, by the much higher premiums that are bid on world's markets for No. 1 and No. 2 Northern, the reason being that No. 1 and No. 2 are much more scarce than No. 3 Northern.

To those who are students of international marketing, and of the price of wheat, the present situation is interesting for it is a splendid example of the workings of the laws of supply and demand upon price; in fact, in front of us we really see a moving picture of these laws at work. We see three articles, i.e. No. 1 Northern, No. 2 Northern and No. 3 Northern, all of them scarce but No. 1 more scarce than No. 2 and both No. 1 and No. 2 more scarce than No. 3. We see eager demands for each of these grades in accordance with the relative scarcity and just as the laws of supply and demand teach us to expect, we see prices bid by buyers in accordance with the relative scarcity, that is the highest premium for No. 1 the next highest premium for No. 2 and the lowest for No. 3.

It is interesting to note, by the way, that this premium for No. 3, the much higher premium for No. 2 and the very much higher premium for No. 1 are all reflected straight back to the farmers in the country in the price offered for their wheat at country elevators.— Searle Grain Company, Limited



Commercial Printing

The Mercury Office has plant and equipment to turn out almost every kind of commercial printing. Whether it be a simple envelope corner or pieces more elaborate, we solicit your enquiries. Among the requirements of the average merchant are:

Loose Leaf Forms
Letterheads
Envelopes

We are agents for a complete line of Counter Check Books. Prices are the same as if you ordered from an outside source.

The Tofield Mercury

Editor's Vision To Be Realized on World Cruise

The above picture showing the Empress of Britain and Sydney's great harbor bridge represents the dream of an Australian editor, who in making the composite picture from separate photographs at the time the bridge was opened could not have known that the Empress would ever visit the port "down under". Captioned "Splendid Empire Achievements" the picture showed the greatest single-span bridge ever built within the Empire and the ocean liner which, launched a year previously was, at the time, the largest ship built in the Empire since the war.

Now comes the announcement that the Empress of Britain will visit Sydney during her 1937 Round-the-World Cruise, and with it the realization that, when the ship is there next April, at least one editor's dream will have come true.

Not only Sydney will be visited while the big white liner is in the Antipodes; she will also take her cruise members to Melbourne and to the New Zealand ports of Wellington and Auckland. Her cruise starts from New York January 8 and will end there on May 16. Until heading for Australia she will follow the usual world cruise course,—Madeira, Gibraltar, Algiers, Naples, Athens, Palestine, Egypt, India, Ceylon, the Straits Settlements, Siam and Hong Kong. Leaving New Zealand she will go to the Fiji Islands, also new territory for her World Cruise, Honolulu, San Francisco, Los Angeles and the Panama Canal Zone.

United Church News

The Rev. John Kitchen, Chengtu, China, missionary of the United Church, delivered a masterly address on China in the United Church on Sunday evening.

There was a splendid congregation to hear his indictment of Japan and the reason why the great powers are impotent and indifferent to China's need of help.

He gave a splendid word picture of the great progress China has made within the last ten years in unifying the nation. The Missionaries and white people hold General Chiang Kai-shek and his wife in highest respect and esteem. They are both sincere, earnest and active Christians. Had China not been interfered with and terribly disrupted by the invasion of Japan as a nation it would have taken a real place among the democracies of the world.

His description of the Christian work going on was a revelation to all his hearers. The gospel of Jesus is for the whole of life and this was illustrated by Mr. Kitchen in [illegible] of work our missionaries [illegible] doing in China.

The cast in "Here Comes Charlie" are practising hard these nights. It is a well constructed story. Keeps you guessing and has barrels of fun in it.

It will be staged on Friday and Saturday, 19th and 20th of November.

On Sunday, November 14th, Communion will be observed after the evening service. It is expected there will be a good turn out of the members on this occasion.

Grain Club Seed Fair Held Tuesday

The Annual Grain Club seed fair was held in the Tofield Curling rink on Tuesday, November 9th at 1 p.m.

Most of the boys brought in exhibits which will raise the Tofield grain club in points.

Mr. Goodall and Mr. Graham were the judges.

Mr. Nomormandan, who represented the Alberta Wheat Pool was present. He gave the boys an excellent talk on the need of Boy's grain clubs and the Alberta Wheat Pool.

Mr. Anderson of Ryley, talked to the boys on the advantage of the Grain clubs to the district.

Clifford Appleby won first prize as the best wheat plot of standing grain. The second prize was won by Allan Harrison. John Warner jr. won first prize in the oat plot of standing grain.

Those winning prizes for the samples shown on Tuesday were:

WHEAT—1 Allan Harrison; 2 John Warner; 3 Jim McAllister; 4 Chas. Kallal; 5 Joe Kallal.

OATS: 1 Bill Davison; 2 Chas. Kallal; 3 Allan Harrison; 4 John Warner; 5 Phillip Anderson.

As the president and secretary were both away at Vermilion it was necessary to elect new officers.

Allan Harrison, President; John Warner, vice-president; Harold McClymont, Secretary-treasurer.

New Enlarged School Area

The Department of Education has decided to go ahead with the formation of an enlarged school division along the C.N.R. where transport facilities, by rail, bus and gravelled highway extend from end to end of the area, instead of as first suggested running north and south.

The set-up consists of 78 rural schools extending from Lindbrook in the west to Kinsella in the east, and north and south of the line between these two points.

The following are the sub-divisions in the Holden School Division No. 17.

Sub-Division 1

Prague
Cromer
Lakeford
Ribstone Hill
Coburg
Badger
Glenora
Quinte
Phillips
Alice Hill
Kinsella
Overleigh
Diamond Willow
Lake Vernon
Woodham

Sub-Division 2

Mehlal
Salt Lake
Palmer
Lakemeen
Fairview
Gladstone
Willow
Iron Creek
Rich
Polska
Scona
Unity
Hayden
Sandstrom
Crocus Hill
Reward

Sub-Division 3

Lake Thomas
Clover Lodge
Lornedale
Woodside
Nestor
Lake Alic
Poplar Hill
[illegible]
Woodville
Rutherglen
Mooresville
Glenlea
East Bruce
Maple Lodge

Sub-Division 4

Long Ridge
Adams
Vermilion Valley
Thule
Talbot

Lakeshore
Shaw
Ketchamoot
Lindbrook
Standard
Woodlawn
Bathgate
Westlake
Ustan
Spilstead

The first meeting of delegates in each sub-division of the said division shall be held as follows:

In sub-division 1, at Phillips, on Tuesday, Nov. 30, 1937, 2 p.m.

In sub-division 2, at Polska, Monday, November 29, 1937, 2 p.m.

In sub-division 3, at Mooresville, on Monday, November 29, 1937, 2 p.m.

In sub-division 4, at Longridge, on Tuesday, November 30th, 1937, 2 p.m.

In sub-division 5, at Tofield, Tuesday, November 30th, 1937, at 2 p.m.

That the board of the said school division shall hold an organization meeting on January 11, 1938.

C. G. Purvis, of Viking, shall be the secretary for the time being of the said division.

Vaugelas, a French grammarian, was one of the first members of the Academy and took a prominent part in the compilation of the dictionary. Cardinal Richelieu raised his salary at one time and, in relaying the good news said, "You will not forget the word 'pension' in the new dictionary?"

"No, monseigneur," replied the scholar, "But I shall still less forget the word 'gratitude.'"

LAKESHORE

Mr. and Mrs. R. H. Phillips returned home from a hunting trip in the Barrhead district. They had to leave their car until the river is frozen over.

Mr. John Warner and Mr. Donnelly Warner are hunting in the Obed district.

Mr. James Secord, sr. had the misfortune to injure his hand last week.

The Lakeshore Ladies' Aid held their Amateur Hour at the Community Hall on Tuesday evening. The Rev. Mr. Allan put the amateurs through their paces. The first prize was won by Miriam Seale and George Ferguson for their interpretation of an Irish dance. Oscar Ackley, playing the Hawiian guitar, and Marvin Seale, who recited, were tied for the second prize so they divided second and third prize money. There was a very good crowd in attendance despite the bad weather.

CARD OF THANKS

The C.W.L. wish to thank all those who so kindly helped to make their supper such a success.

Residents of Singapore Visit Tofield

Mr. and Mrs. R. Cherry of Singapore, Straits Settlements, visited at the Malcolm home on Friday and Saturday. Mr. Cherry is connected with the rubber industry there and is returning via Vancouver after a year's holiday touring Europe. They will sail from Victoria November 27. This was Mrs. Cherry's first trip to Canada and she was much interested in the snow fall of Saturday, snow of course, being unknown at Singapore. In honor of their visit Mrs. Malcolm entertained a few friends Friday evening.

ADVANCE NOTICE

The A.B.C. "Behind the Hog" experts to go into action shortly. The same old line—Tut, Tut, fancy making jokes on curlers, I wonder what wetls Sam-on next.

A meeting of the Anglican W.A. will be held at the home of Mrs. Sinclair on Thursday, November 25th at 2:30 p.m.

Mr. A. Hommel returned Monday morning after undergoing an operation in the Royal Alex hospital.

LOCAL & PERSONAL

Mr. Dorsey Letourneau from Calgary spent the week end at his home here.

Miss Helen McCauley, nurse at the Ponoka hospital and Miss Joy Irvin spent the week end at the McCauley home.

Lee Burnett spent the week end at his home here.

Miss Helen Cookson, who has been at Paradise Valley returned home last week.

Mr. George Chesser has left for Vancouver Island where he will work this winter.

Mr. R. Coutts, Ralph Whyte, V. Moss and Mr. Jacobson are leaving for Windsor, Ont., travelling by motor.

Mr. and Mrs. W. C. McIntosh of Ponoka spent the week end at the M. C. Wood home.

Mr. and Mrs. Eldred and family visited friends in Tofield last week.

Mr. and Mrs. Jacobs and Ida spent the week end visiting Mr. and Mrs. McLaughlin in Wetaskiwin.

Mr. and Mrs. A. R. Thompson, Harland and Betty from Leduc, motored over to visit Miss Lois Thompson on Sunday last.

Thos. G. Dark, Eyesight Specialist and Licensed Optometrist will be at the Tofield Hotel, Saturday, December 4th from 2:30 to 4:30.

The Misses Isobel and Edith Robinson visited Edmonton over the week end.

The Annual Canvas in the interests of the British and Foreign Bible Association has been undertaken this past week. The canvassers Mesdames Robinson and Swift wish to thank all those who have so willingly contributed to this worthy cause and if there are any who are still anxious to help would they kindly leave their contributions at the office of Mr. McCauley, secretary-treasurer, during the coming week.

Chicken Supper a Success

The chicken supper held under the auspices of the C.W.L. on Saturday last was very well attended. The ladies had prepared and served a repast, the excellence of which drew forth many compliments. After supper Bingo was played to the enjoyment of quite a number and also the draw for prizes was made. Three young girls drew the tickets out, the results being as follows: 1st, Mr. McDevitt of Cadomin, $10 cash; 2 Mel Myers, quilt; 3 Harold Snell, Carving set; 4 Mrs. Schmaltz, pyrex skillet; 5 Kathleen Smith of Delbourne, Alta., framed picture.

Weddings

MULLEN—EVERITT

On Wednesday evening a very pretty wedding was solemnized in the banquet room of the Royal George Hotel, Edmonton, when Blanche Everitt, youngest daughter of Mr. Charles Everitt and the late Mrs. Everitt of Tofield, was united in marriage to Joseph Mullen of Round Hill, son of Mr. and Mrs. Mullen of Leduc.

The bride, charmingly gowned in white satin, fashioned on princess lines, entered the room on the arm of her father to the strains of Lohengrin's Wedding March, played by Mrs. Stinson of Tofield. The bridesmaid, Miss Nadine Everitt of Athabaska, sister of the bride, wore a gown of pink net over taffeta and carried a bouquet of baby mums and carnations. Mr Leroy Becket of Edmonton attended the groom.

Rev. D. K. Allan of Tofield read the marriage lines. During the signing of the register, Miss Lois Wilson of Tofield sang "I Love You Truly."

Following the ceremony a reception was held for about thirty-five guests.

Mrs. Mullen, mother of the bridegroom chose a gown of navy blue crepe trimmed with sand.

Rev. D. K. Allan proposed the toast to the bride which was responded to by the bridegroom. Mr. L. P. Kilkenny of Athabasca proposed the toast to the bridesmaid. Mr. Leroy Becket responded.

After a short honeymoon spent in Calgary, the happy couple will reside at Round Hill. For travelling the bride chose a dress of Marina blue satin with contrasting accessories.

FERGUSON —ROBERTS

Wedding of local interest took place in Edmonton on November 8, when Ella Mae Roberts, eldest daughter of Mr. and Mrs. W. T. Roberts of Edgerton and George Howard Ferguson, youngest son of Mr. and Mrs. T. W. Ferguson were united in marriage.

They were married in the All Saints Church, Rev. Tonge officiating. After spending a short honeymoon in Edmonton, they motored to the bride's parents in Edgerton where they spent a few days. They returned to Tofield where they will reside on a farm north of Tofield.

Town Council Meeting

A regular meeting of the town council was held in the Town Hall on Monday, November 15th. Besides Mayor Swift, there were present councillors Bellamy, Lovell, Hammond and Brent. Considerable time was taken up discussing a new association which has been formed by a number of towns and villages who are users of electricity, the object being to use collective action in securing reductions in the light and power rates. The Secretary was instructed to get in touch with other towns along this line in an attempt to find out their attitude toward this association. Some enquiries had been received regarding prices on vacant lots, and the council set selling prices on the lots in question. The Secretary, together with the property committee was instructed to secure an estimate of the cost of constructing a new projecting room in the local theatre that will pass inspection by the provincial authorities so that moving pictures may be shown here. The present projecting room has been condemned by the Theatres Inspector. A statement of receipts and expenditures for the month of October was read and ordered put in the minutes of the meeting. Some routine correspondence and a number of minor accounts were dealt with.

LINDBROOK

Sunday's snowstorm looks as if winter is on us at last, and we sincerely hope it has caught no one bending.

Mr. Ralph Kortzman, son of Mr. and Mrs. Frank Kortzman of this district was rushed up to the hospital in Edmonton last week suffering from appendicitis. He was operated on practically at once, and we are glad to announce that it was entirely successful and Ralph is now on the road to recovery.

Mr. and Mrs. F. Kortzman also motored to Edmonton this week to attend the weddings of their nieces, the Misses Ina, and Pearl Kortzman, daughters of Mr. and Mrs. Chas. Kortzman, formerly residents here, now residing in Saskatchewan. Best wishes from all at Lindbrook to the

(continued on back page)

Curlers Re-Organize For 1937-38 Season

Local curling enthusiasts held their general meeting in the rink on Tuesday evening, November 16th. Officers and committees were elected for the coming season as follows: President, Mr. O. P. Thomas; Vice-president, Mr. F. G. Imler; Secretary, J. W Chapman, re-elected; Executive committee, Mr. Glen Wood, Mr. S. J. Burke, Mr. C. R. Currie and Mr. Wes Taylor. Mr. J. W. Morton kindly consented to look after the schedules of games and competitions, and was thereupon appointed as a one man draw committee. Mr. Imler and the president were appointed as the ice committee, and the executive committee as a whole will look after the social and entertainment side of affairs.

It was decided that as an opening event of the curling season, that a bridge and whist drive should be held in the waiting room on Wednesday evening, November 24th at 8:30 p.m. The admission charge will be thirty-five cents and it is hoped that there will be a big attendance of non-curlers as well as members of the curling fraternity.

Hockey Notes

With a good covering of snow on the ground at the present time and with the promise of colder weather in the future the hockey boys are getting pepped up for the coming season. The rink is being put in shape for flooding and the waiting rooms are being made more comfortable. It is quite probable that the Senior team will enter in the League again this winter, so with these games and exhibition games with Edmonton teams the Hockey Menu should be very tempting this winter.

By the way, how many of you saw the local Midget team play last season? We have an up and coming team of young players here and what few games they played last winter was a credit to any town. At present they are putting on a drive for funds in order to operate this winter and in order to raise these funds they are raffling off a Walnut covered Cedar Chest. The price of the tickets are 25 cents each and the drawing takes place on Xmas Eve. So when one of the boys approaches you for a ticket help the cause along and take two or more.

Mrs. Jack Johnson Entertains at Bridge

Mrs. Jack Johnson was hostess at a bridge party at her home Thursday afternoon. There were three tables of contract players and the prize for high score was awarded Mrs. Mel Wood, second, Mrs. John Wood and consolation, Mrs. George Francis. At the close of an enjoyable afternoon, Mrs. Art Radway assisted her mother in serving a delicious three course luncheon.

BARDO

Wedding
FOSHAUG—HAUGEN

A very pretty wedding took place at the home of Mr and Mrs. A Haugen of Amisk Creek district when their third daughter, Olive, was united in marriage to Ivan Foshaug, eldest son of Mrs. Alma Foshaug and the late L. G. Foshaug of Bardo. The ceremony took place at 5 p.m., Rev Haverstein officiating. The bride looked lovely in a white crepe dress made with a lace tunic, veil and white slippers. Her bouquet was roses and baby mums. She was attended by her sister, Clara, who wore light green crepe. The groom's attendant was his brother, Leif Foshaug. Mrs. Ingmar Olson played the wedding march and a duet was rendered by Lily Haugen and Evelyn Rudd. The house was beautiful in candlelight. Thirty-five guests sat down to a sumptuous supper after the ceremony. Gifts were numerous and lovely. The happy couple spent a few day's honeymoon in Edmonton and will be at home on the groom's farm in this district. A host of friends wish them a happy and prosperous married life.

The Ladies' Aid was fortunate in having a nice day on November 6th, and there was a good turn out to their Lutefisk dinner and sale. They realized one hundred and thirty-five dollars on the dinner and sale. The ladies wish to thank all those who helped to make the dinner a success.

Tom Rorem, Geo. Hendrickson and Hans Hillerud are at Edson hunting moose.

Mr. and Mrs. Geo Hendrickson, Mr. and Mrs. N. Falkeid and Milton Jevening made a trip to Clover Bar and visited Mr. and Mrs. Inge Johnson who are employed at a dairy farm. Milton stayed as he secured a job there.

Mr. and Mrs. Ingval Ness accompanied by Mrs. M. B. Ness spent a week at Calgary visiting Mr. and Mrs. H. K. Williams.

Mrs. Martha Hagen is confined to her bed with an infected foot.

Miss Edna Steen has a position in Edmonton as sales lady for Ex-Cel-Sis Beauty products.

A wedding of interest to this community took place at New Westminster, B.C. on November 6th, when Gudrun Lorraine Moen, daughter of A. Moen, former resident of this district was married to Ralph Berg of Annieville, B.C. Thelma and Bennie Moen, who lately left for New Westminster, attended the wedding.

Arnold Steen has gone to Gunn, Alberta, where he has a job as blacksmith and engineer in a saw-mill.

A large number from here were at the Lutefisk dinner at Amisk Creek, Armistice Day.

About six inches of the beautiful white snow has fallen in this district and it is still falling.

Mr. and Mrs. Alvin Steen spent the week end at the Walker home at Lakeshore.

Miss Agnes Johanson has received a $20.00 prize from a man in Grande Prairie for a song she has composed

E. W. ROGERS

Trees Available For Farmers

With reference to the very important function of tree planting in Alberta, it was learned in an interview given [illegible] by the Honourable N. E. Tanner, Minister of Lands and Mines, that [illegible] of trees are available [illegible] for transplanting [illegible] and the extension [illegible]. These trees may be [illegible] to the Forestry Division of the Department.

The principal [illegible] in view, Mr. Tanner stated, [illegible] to provide transplants [illegible] suitable species for [illegible] bluffs, shelter belts [illegible]. A number of [illegible] now found in existing [illegible] as durable as [illegible] of exotic [illegible] desired longer [illegible]. Necessary protection [illegible] to the existing [illegible] shade that enables [illegible] permanent [illegible].

The Minister stated that there is [illegible] in the spring [illegible] of [illegible] for and a [illegible] of white spruce [illegible] moderate [illegible] available [illegible]. The [illegible] has [illegible] with these two [illegible] years, and [illegible] they can be [illegible] Alberta. [illegible] Forestry, [illegible] Lands and Mines, Ed[illegible] portion. These forms should be properly filled out as to quantity and [illegible] desired and should be returned to the Department not later than the end of the present year for trees for planting [illegible] the spring of [illegible].

Soup When It's Chilly

It's cold outdoors. The children romp in from school. The men come from work. All are hungry. Serve soup rich and hot. It is warming, nourishing and healthful. Some soups are almost whole meals in themselves. Those containing potatoes, milk and dried Lima beans are both economical and this season [illegible] today. Try the following recipes if you wish to [illegible].

Lima and Tomato Soup

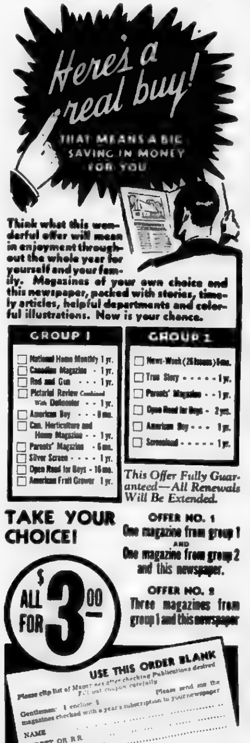
- [illegible] cooked [illegible]
- [illegible]
- 1 tablespoon chopped green pepper
- 1½ cups cooked, strained tomatoes
- [illegible] pepper
- [illegible] salt
- 2 tablespoons butter
- 2 tablespoons flour
- [illegible] water
- 2 [illegible]

Put the Limas, water, onion and celery in a saucepan, simmer 30 minutes, then rub through a coarse sieve. Melt the butter, add flour, stir until smooth, add tomatoes and stir until hot, then add Lima mixture, green pepper and seasoning. Serve with crisp crackers.

Savory Lima Soup

- 2 cans cooked, dried Limas
- 4 cups or 1 quart milk
- 2 tablespoons chopped carrot
- [illegible] chopped parsley
- 2 [illegible]
- 2 tablespoons butter or bacon fat
- 1 teaspoon salt
- ⅛ teaspoon pepper

Put Limas through food chopper. Heat milk in double boiler, add Limas. Heat fat in frying pan; add onion and carrot and cook 5 minutes. Add to hot mixture, cook 10 minutes, then strain. Add salt, pepper and parsley.



Here's a real buy!

THE WORLD OF WHEAT

By H. G. L. Strange, Director Research Department, Searle Grain Co.

"By selfish and short-sighted husbandry prairie farmers have mined their land and ruined their soil."

"Great Britain, therefore can no longer rely upon Western Canada to supply her with foodstuffs; consequently, by means of tariffs and quotas, British farmers must be protected and encouraged to increase their home production of wheat and other foods."

These are studied statements that have been made recently over and over again by Mr. A. G. Street, former Manitoba homesteader, noted English farmer and distinguished writer of novels on agricultural subjects.

Mr. Street's articles appeared in the "Financial Post" of Toronto, and in the "London Daily Telegraph;" they were broadcast by radio over Great Britain and then published in the "Listener," the British Broadcasting Corporation's journal.

I for one regard Mr. Street's statements as a definite libel on Western Canada, and on our prairie farmers. The statements are simply untrue.

Our farmers are not soil miners—they are not ruining the land—they are good husbandmen.

Careful investigations made into rainfall and yields by the Research Department of the Searle Grain Company indicate clearly that whenever the prairies enjoy good rains, then the fields once again become fertile and yield up bountiful crops.

The following factors have tended to raise price: Wet weather threatens early Australian harvest—U.S. makes corn loans. Ecuador authorizes wheat imports. Moisture reserve very deficient in much of Kansas. Spain obtains Italian wheat—Oklahoma pecan crop badly damaged by worms.

The following factors have tended to lower price.—Harvest commences in Argentina—Tentative Australian wheat estimate 163 million—Rains benefit growing crops in Argentina—U.S. winter wheat acreage practically the same as last year's large acreage. Critical industrial situation in the United States. Australian shipments continue on a liberal scale—Almond crop for 1937 largest ever produced in California.

Wilkins Advance Party Goes North

Winnipeg, Man., November 15.—Al. Cheesman, the "Flying Alderman" of Port Arthur, who will act as co-pilot of the Sir Hubert Wilkins Lockheed-Electra plane in the search for the missing Russian aviators, left this week over Canadian National lines for Edmonton. He was accompanied by Bill Wilson, radio engineer with the party.

Immediately on arrival at Edmonton, they will set up a radio station to be used for test purposes when the plane leaves Winnipeg. When the plane hops off, it will be piloted by the famous aviator, H. Hollick-Kenyon and with him will be Sir Hubert Wilkins and Al. Dymes of Winnipeg, as engineer.

Shortly after the flight starts from Winnipeg, the plane crew will test their equipment with the radio station at Edmonton, a distance of 800 miles from here, and they will keep in communication with Edmonton throughout the trip.

It is proposed later to fly to Aklavik, as soon as ice conditions are reported good. At Edmonton the party will be joined by a second plane flown by "Wop" May, which will act as a communications and supply plane between Edmonton and the Far North.

When the Wilkins plane leaves Winnipeg it will have on board the steel skis loaned to Sir Hubert by the Trans-Canada Airlines, which will be used in their search flying.

Wheat Glut In The Offing?

Indications are that the United States wheat farmers will seed another record breaking acreage this crop year, at least equal to, if not larger, than the all-time high mark of 81 million acres seeded in the season 1936-37. If this happens the bureau of agricultural economics U.S.D.A. calculates a billion bushels may be produced. As the average United States domestic requirements are only 660 million bushels a year the result would be a very substantial surplus. For this reason the bureau remarks: "Unless world production in 1938 is again small, or demand by importing countries increases beyond present indications, prices of wheat and income to United States wheat growers from the 1938 crop may be expected to be materially lower than during the current marketing season."

The enormous world surplus of around 1,100 millions bushels which developed in 1933 was the result of indiscriminate production by wheat exporting countries and the development of nationalistic policies by most of the large wheat importing countries. A series of drouths in North America, culminating in the present disastrous year in Western Canada, and one very bad drouth in Argentina combined to cut down the surplus. Experts cannot conceive of a continuation of serious drouths in North America or an early repitition of the 1935 low crop in Argentina. If good production years return there are bound to be enormous quantities of unsaleable wheat in the world.

The close adjustment of world supplies to requirements has not been due to any significant reduction in acreage. If average yields per acre are obtained in 1938 world production will be considerably in excess of requirements.

"The present world wheat acreage is so large" the United States department of agriculture states "that over a period of years average yields per acre would again result in large world surpluses."

There has been a relaxation of import restrictions in a few countries, the purpose being to neutralize the high level of world prices and prevent increases in bread costs. Most countries now have wheat monopolies and boards that control the domestic and foreign trade in wheat, and the likelihood is that they will again be continued. Government policy in European countries seems likely to continue to favour a fully maintained acreage, particularly in view of the tense international situation, the low level of reserve stocks, and the strained financial condition of many European countries.

Edmonton Man Taken in Chase Over Rural Roads

Drumheller, Alta. Nov. 13— Two men wanted for an attempted general store robbery at Sheerness, 40 miles east of here, were captured last night by Royal Canadian Mounted Police as they rode along a snow covered rural road aboard a single horse.

Oren Switzer, 35 of Edmonton, and Guy Hilts, 30, were captured by members of the Drumheller R.C.M.P. detachment near Rumsey, northwest of here and nearly 100 miles from the fugitive's starting place, after a 12-hour search.

Tired and hungry, they offered no resistance when cornered. They were lodged in jail here.

The chase started when the Hanna detachment was informed by M. Schram, Sheerness storekeeper, that two men were trying to break into his store. He saw the pair leave, heading northwest.

Near Rumsey their car was found in a ditch, slightly damaged and with a tire blown. The police also had to abandon their car because of the heavy going.

Footprints in the new-fallen snow, leading into a field made the tracking easy. At a farm theft of two horses was discovered. The constables S. L. Mott and S. Martin also secured mounts and resumed the chase. One horse stolen by the pair went lame and was abandoned. They continued on the other.

Meanwhile, another detail had set out from Rumsey. The police closed in on the pair just east of the town.

HEALTH

A HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION AND LIFE INSURANCE COMPANIES IN CANADA

Clean Hands

To keep the hands clean by regular washing, and not to touch foods without having given the hands a good washing with plenty of soap and warm water and using a nailbrush is one of the most practical means whereby we may protect ourselves and others against communicable disease.

The whole purpose of hand-washing is often defeated by the wash-basin. The only sanitary way to wash is in running water. Most wash-basins, however, are constructed with two taps—hot and cold—each with a separate spout. This makes it practically impossible to wash in running water as the water which comes out of the taps is either very hot or very cold.

Strange to say, most baths are equipped with a common spout, so that, by adjusting the flow of the two taps the right temperature is secured. It is, however, rather awkward to use the bath when washing the hands. Why put the type of equipment on the bath which is really needed on the basin, not on the bath?

Wash-basins are provided with stoppers in order that hot and cold water may be mixed. The objection to this is that you not only wash in the dirt which comes off your hands, but also in what may have been left by previous washers. It is quite possible that your hands, after such washing, may not be as free from germs as they were before you started.

The mouth, from the point of view of disease germs, is the dirtiest and most dangerous part of the body. The wash-basin which receives the rinsings from the mouths of the family as they clean their teeth, is more than likely to be badly soiled with any and all of the germs present in the mouths of each member of the family. The wash-basin that is used for teeth cleaning is not safe to wash in until it has been disinfected.

Bad as the wash-basin may be in the home, the public wash-basin is infinitely worse because it is used by greater numbers of persons. Also, many public washbasins, in order to save water and over-flowing have spring-taps that resist any effort the individual may make to wash or rinse his hands in running water. Trains, at least, do provide a separate basin for brushing the teeth.

The dirt we can see is, generally speaking, not dangerous. The real danger lies in the invisible dirt—secretions of the body—which carries with it the germs of disease; for example, the saliva deposited on the common drinking cup. It would seem reasonable from all we know, to say that hands should be washed in running water—the way the surgeon prepares his hands before an operation—and that all wash basins should be equipped to make this possible.

Questions concerning Health, addressed to the Canadian Medical Association, 184 College Street, Toronto, will be answered personally by letter.

Shipments of Wheat From Russia

Early in the crop year Mr. Broomhall, the British statistician, calculated that Russia would supply 30 million bushels of wheat this year. Already shipments have exceeded 20 million and substantial quantities still appear to be available for export. Last week's clearances totalled 3,600,000 bushels, while Balkan countries contributed 584,000 making a total of 4,184,000 bushels from the Black Sea.

Unquestionably Russia's crop this year was of substantial volume, but with the period of open water likely to close within another month it seems hardly likely that the Broomhall figure of 30 million bushels exports will be greatly exceeded. The Russian's do not seem to be pressing their wheat on world markets regardless of price as they did when they shipped 14 million bushels which action brought down prices to ruinous levels.

Canada is the major source of supply of canned vegetables to the British West Indies. During the past few years general imports have shown a steady increase until in 1936 the three main markets of Trinidad, Barbadoes, and British Guiana received imports to the value of $43,560, of which Canada supplied 24.6 per cent; the United States 18.5 per cent; the United Kingdom 18.2 per cent; and Portugal, because of heavy shipments of tomato paste to British Guiana, 10.9 per cent.

British Farmer Buys Herd Canadian Cattle

When the SS. Doreiian left Montreal for Liverpool on November 4, 1937 she carried 200 head of Canadian Holstein Freisian cattle, the largest single shipment ever exported under one ownership from Canada to the United Kingdom. The dairy cattle were bought and personally selected by the Baron von Trutzschler, a prominent dairy farmer of Chester, England, from farms in Eastern and Western Canada. He has had a wide experience with Canadian dairy cattle and is particularly well satisfied with his purchases in the Dominion.

The Baron, last summer, lost his entire herd of 240 dairy cattle on his farm in England as a result of a Foot and Mouth disease and, having been so favourably impressed with the dairy cattle from Canada, he had in his herd, decided to come to the Dominion in person and purchase the material for the rapid rebuilding of an entirely new herd, consisting exclusively of Canadian Holstein Freisians. He spent six weeks in the Dominion making his selections.

When Hon. James G. Gardiner, Dominion Minister of Agriculture, was in England in 1936, he visited Baron von Trutzschler's farm and was impressed with the milking herd he saw there. Mr. Gardiner has stated that in view of the careful selection made by the Baron in connection with the 200 head of cattle just shipped, he feels confident they will not only be acceptable to the British Ministry of Agriculture, but will do a great deal to enhance the reputation of Canadian dairy cattle in the United Kingdom, for the shipment has a clean bill of health, being free from any disease.

Wheat production in England for 1937 has been estimated at 48,832,000 bushels, which is about 2,000,000 bushels less than in 1936.

TIME FOR REFLECTION—

THE NINETEENTH anniversary of Armistice day having passed into history with all solemn respect due its passing, it would seem that this is a good time for nations to take time out and reflect upon the likely consequences of the course upon which most of them have already taken. Life is never very simple and quite often the sublime and ridiculous are so closely matched as to be almost indistinguishable. For instance, the man that broke into the solemn silence of Remembrance Day ceremonies in London, in the presence of the King with the words, "Stop all this hypocrisy; you are deliberately preparing for war," voiced a thought, untimely of course, that must have been in the minds of thousands of people assembled there that day. At another ceremony, a man shouted, "The dead are all right, you cannot do anything for them. What about me, I haven't had any breakfast." Both men would be considered deranged persons, and in view of the time and method they chose to express their thoughts, this judgement would be justified. The two minutes silence in memory of those who paid the supreme sacrifice in the great war is a genuine emotional contribution and not a mere ceremonial observance. Thousands upon thousands have a keen personal interest touched with anguish in the observance of these two minutes and for problems, great and important as they are, to be forced on to the attention at this time is neither fitting or proper. By the time chosen to express their thoughts, these men must be judged deranged, even though the subject matter of their thoughts may be sound enough.

It is a sad commentary upon human affairs that after nineteen years of retrospection upon the greatest war of all time, a war that "was to end wars," and a war that was "to make the world safe for democracy," the nations are furiously outbidding each other in an armament race, that, should it end as other armament races have ended, promises a result too horrible to contemplate. Is there any solution to the problem? Is it true, as so many people believe that war between nations is inevitable? That human nature is so constituted as to preclude lasting peace. Certainly there is plenty of evidence to support this belief. Recorded history is simply a list of wars great and small, of battles on land and sea, lost and won. Of empires rising and falling; of emperors, kings and queens, high and mighty in their day, sometimes to rest in honored graves, sometimes to end their lives upon the executioners' block. Recorded history is a series of national events planned and schemed so that the planners and schemers might advance national power and prestige, sometimes to the material benefit of conquered peoples, sometimes to their disadvantage. But though all major wars from early times to the present there can be seen that relentless drive for power and wealth with varying degrees of success. Distasteful as it may be, with those who subscribe to the belief that war is inevitable, we are inclined to agree—unless the hearts of men change. When the Spaniards, centuries ago, took gold from the Incas in Southern America, they simply did what other nations before had done, and other nations since have done, namely, taken by force that which they coveted.

You hear it said quite often that a man is a fighting animal, which is only partly true. You also often hear it said that man possesses a trading instinct, which is wholly true. Generally speaking man will only fight for what is wanted when it can be obtained no other way. Peaceful occupation is still a desired objective and fighting is restricted to where opposition is encountered. But whether advances are peaceful, provocative or antagonistic, the result is always the same, namely, that one nation takes what the other has, if they can. It would seem to us that the word take, holds the key to the situation. Life is a matter of give and take from birth to death, and when emphasis is placed upon one with a total disregard of the other, disaster just naturally follows.

The statesmen of the world to-day are faced with a very great task, they not only have to plan a world economy as they would have it, but they have to undo the results of planning done years ago. Following the war, possibly a direct result of the war tariff barriers were raised to almost unbelieveable heights. Fearful of giving more than they were taking, many nations almost went to the point of living within themselves. World trade fell off tremendously and millions of people in many different countries suffered thereby. What would have happened if the nations had striven to outdo each other in giving rather than in taking, it is of course, impossible to say, but it is doubtful if the result could have been much worse, for after embarking upon a policy of intense restriction, the nations are faced with an ever mounting armament expenditure to add to their trouble of lessened trade.

Fortunately the clouds at the present time seem to be breaking. Prefaced by several months of preparation, it has very recently been announced that important trade pacts between the United Kingdom and the United States of America will shortly become effective. This will most likely start other countries thinking that if more international trade between Great Britain and the United States is desirable, more international trade between all nations is more desirable still. There is no question that the common people of the world desire peace, it is they who suffer the greatest agony of war. We believe the statesmen of the world desire peace, let us hope that they will find it in a greater volume of trade on the principle of give and take with the right emphasis placed upon both.

Armistice Day November 11

FIVE SOULS

First Soul

I was a peasant of the Polish plain;
I left my plough because the message ran:
Russia in danger, needed every man
To save her from the Teuton; I was slain.
I gave my life for freedom—This I know;
For those who bade me fight had told me so.

[illegible]

I was a Tyrolese, a mountaineer;
I gladly left my mountain home to fight
Against the brutal, treacherous Muscovite;
And died in Poland on a Cossack spear.
I gave my life for freedom—This I know;
For those who bade me fight had told me so.

Third Soul

I worked at Lyons, at my weaver's [illegible]
When suddenly the Prussian despot hurled
His felon blow at France and at the world;
Then went I forth to Belgium and my doom.
I gave my life for freedom—This I know;
For those who bade me fight had told me so.

Fourth Soul

I owned a vineyard by the wooded Main,
Until the Fatherland, begirt by foes
Lusting her downfall, called me and I rose
Swift to the call and died in far Lorraine.
I gave my life for freedom—This I know;
For those who bade me fight had told me so.

Fifth Soul

I worked in a great shipyard by the Clyde.
There came a sudden word of wars declared,
Of Belgium helpless, peaceful, unprepared,
Asking our aid; I joined the ranks and died.
I gave my life for freedom—This I know,
For those who bade me fight had told me so.

—W. N. Ewer.

New Mince Pie Stars As Variety Queen of The Family

Mince meat, that time honored male favorite is being groomed as variety queen of the pie family. Apples, cranberries, prunes and apricots and canned cherries and pineapple are just a few of the fruits that have been proven tasty allies of mince meat. This variety in spicy delicacies is especially popular nowadays because modern mince pie is on the "made in a jiffy" list for housekeepers and fits the economy budget. Packed full of healthful fruits, modern mince pie is an epicurean treat that is as nourishing as it is tasty.

Mince Meat Apricot Pie

- 1 (9 ounce) package dry mince meat
- 1½ cups apricot juice and water
- 3 tablespoons sugar
- 1 cup freshly cooked or canned apricots, drained

Break mince meat into pieces. Add apricot juice and sugar. Place over heat and stir until all lumps are thoroughly broken up. Bring to brisk boil, continue to boil for one minute. Allow to cool. Line a 9-inch pie plate with pastry and fill with mince meat mixture. Place drained apricots over top. Put upper crust on filled lower one and press edges firmly together. Trim off surplus pastry. Bake in hot oven (400 degrees F.) 35 minutes.

Spicy Prune Pie

- 1 (9 ounce) package dry mince meat
- 1½ cups prune juice and water
- 3 tablespoons sugar
- 1 cup freshly cooked or canned prunes

Break mince meat into pieces. Add prune juice, water and sugar. Place over heat and stir until all lumps are thoroughly broken up. Bring to brisk boil; continue boiling for one minute. Allow to cool. Line a 9-inch pie plate with pastry and fill with mince meat mixture. Cut prunes in halves, remove pits and place evenly over top of mince meat. Place upper crust on filled lower one and press edges firmly together. Trim off surplus pastry. Bake in a hot oven (400 degrees F.) 35 minutes.

Information Wanted

A witness at the recent Winnipeg sittings of the Turgeon Royal Grain Inquiry Commission told of losses in grain speculation in Manitoba. He said that from personal investigation he found that all classes of people, including ministers of the gospel, had speculated usually with disastrous results.

The gist of the evidence on grain speculation presented to the Commission headed by Sir Josiah Stamp (1931) was that the small speculator invariably lost, also that the bulk of the farmers who went into the market were "bulls" that is, they bought futures and never sold "short."

Had the Turgeon Commission obtained positive evidence regarding the losses and profits made on grain speculation in Western Canada over a period, say of fifteen years, real light would be thrown on the operations of the speculative system of grain marketing. Then the exact figures would be available and the public could judge for itself.

However, this information was not obtained by the Turgeon Commission. The operations of the Wheat Pools since their inception were gone over, Pool records investigated with the greatest thoroughness and nothing of any account left untouched. But nothing was done in the ways of investigating the very important matter of actual losses in grain speculation. Maybe this was due to the impossibility of getting such records now, for Colonel Ralston, the Commission's solicitor was indefatigable in his efforts to get all the available information regarding every angle of the grain trade. In any event the Commission has concluded without this vitally important information being available.

Divorce Is Okay But Losing Good Cook Is Tragedy

Los Angeles, Nov. 13—A divorce was alright and so was $16 a week he was ordered to pay as alimony—but being deprived of his ex-wife's cooking was more than Charles W. Schaefer could bear.

"I don't know what would happen to me if I had to eat someone else's cooking," he protested. "She is the most wonderful cook in the world."

By court permission, and the consent of his flattered former wife, Schaefer will be an "eating guest" at her home daily.

Chicken Timbales

- 2 tablespoons butter
- ½ cup stale bread crumbs
- 2-3 cup milk
- 1 cup cooked chicken
- ½ tablespoon chopped parsley
- 2 eggs
- Salt and pepper

Melt butter, add bread crumbs, and milk, and cook in double boiler five minutes, stirring constantly. Add chicken, parsley and eggs slightly beaten. Season with salt and pepper. Turn into buttered individual molds, having molds two-thirds full, set in pan of hot water, cover with buttered paper and bake twenty minutes. Serve with cream sauce.

End Coffee Burning In Brazil

In June, 1931 the Brazilian government inaugurated a policy of coffee destruction in order to remove the surplus supply. On November 3rd of this year the policy was abandoned because of lack of co-operation from other coffee producing countries in marketing. It is calculated that in the seven intervening years 60 million bags of coffee have been destroyed, principally by burning. This works out at about two years world trade in that commodity.

Brazil formerly supplied 70 per cent of the coffee required in world trade but this has been steadily dwindling until the total reached 50 per cent.

Novel Vegetable Dishes

Potatoes and onions are common foods but they may be dressed up until they are as stylish as old Beau Brummell himself. The following recipes have been selected because they are particularly suitable for Holiday menus—and we have a number of very important holidays on hand.

Candied Sweet Potatoes

- 6 boiled sweet potatoes
- 1 cup maple syrup or
  - 1 cup brown sugar and
  - ½ cup water
- 1 tablespoon butter
- ½ cup sliced Brazil nuts
- 6 cloves

Pare potatoes, cut in lengthwise slices and arrange in greased baking dish, add syrup, or sugar and water, butter, Brazil nuts and cloves. Bake in a moderate oven, 375 degrees F. about fifteen minutes, basting occasionally with the syrup.

Baked Onions With Brazil Nuts

- 24 small onions
- 3 tablespoons butter
- ¾ cup sliced Brazil nuts
- 1 tablespoon sugar
- ½ teaspoon salt
- Pepper

Wash and pare onions, melt butter in baking dish, add Brazil nuts, sugar, salt and pepper. Add onions and stir well. Cover and bake in a moderate oven, 375 degrees F., about one hour until onions are tender and nuts are golden brown.

FOR SALE—Chevrolet Motor; Governor and pulley; 7 inch Grain Grinder; Mare 1200 lbs.; Boat Engine; Pump Head; Wood Splitter. Apply to Maurice McGinitie, Tofield.

An Acknowledgment

The Company's elevators continue to receive a gratifying measure of patronage, not only from shareholders, but also from thousands of other farmer customers. It is such support which in the past has provided the basis for the success of the Company and which it must be the continued endeavor of the Company to merit.

In these words, in the last annual report, the Directors of United Grain Growers Limited acknowledged the loyal support of the Company's patrons.

We are agents for a complete line of Counter Check Books. Prices are the same as if you ordered from an outside source.

The Tofield Mercury

AMISK CREEK

On November 7th a shower was held at the home of Mr. and Mrs. A. Haugen for their daughter, Olive, a bride of last week. The bride-to-be received many beautiful and useful presents. A large crowd was present and a delicious lunch was served.

The Lutefisk and chicken dinner and sale held in the church was very well attended. Dinner was served to nearly 300 persons and the sale of fancy work brought in a fair return. The quilt raffled off was won by Mrs. O. Brannes and Mrs. A. J. H. McCauley of Tofield was the lucky winner of the second prize, a pair of pillow cases. The Ladies' Aid of Amisk Creek extend their hearty thanks to each and everyone who so willingly helped them to make this event such a success.

Ruby and Lily Berg, Ruth Nyberg and Miss M. Robinson from Edmonton attended the dinner in the church on Armistice day.

We regret to report Mrs. Caren Olsen is very ill. Her daughters, Mrs. L. Watt and Mrs. J. Blackburn are taking care of her.

Glen Olson and Arnold Berg were delegates to the Y.P.S. convention held in Holden last Saturday

Hilmar Noen from Phillips spent Sunday at his parental home.

Mr Knutson conducted service in the church last Sunday. Owing to stormy weather the attendance was very small.

Mr. A Erickson visited the city last Wednesday.

Mr. and Mrs. J. Berild were callers at the Erickson and Flasten homes last Thursday evening.

Mrs. C. Erickson, Mrs. E. A. Moen and Mrs. I. C. Olson attended the U.F.W.A. meeting held at the Baptist home last Friday.

Edna Moen who has been assisting Mrs. J. Jacobson with the work for a couple of months arrived home recently.

Lloyd Berg is working for Mr. Steffen trucking coal around to the farmers.

Several from here attended the Lutefisk dinner held in Bardo Saturday, November 6th.

Winter Salad

- 1 cauliflower
- ½ cabbage
- 1 cucumber
- 1 quart onions
- 1 quart green tomatoes
- 2 heads celery
- 2 quarts vinegar
- 1 cup flour
- 3 cups brown sugar
- 1 teaspoon tumeric
- 1 teaspoon celery seed
- ½ cup mustard

Prepare all vegetables by putting them through the food chopper. Allow to stand in salt brine overnight. Then boil for ten minutes in brine and strain. Boil vinegar, mix flour, brown sugar, mustard, tumeric and celery seed in enough cold vinegar to make a paste, add to hot vinegar and boil until it begins to thicken. Pour over vegetables, mix well and bottle.

Carrots and Cheese

Mince twelve medium-sized carrots. Steam until tender. Put into a baking dish. Sprinkle liberally with cheese and a little salt and pepper. Beat three eggs and stir into a pint of milk that has been put on the stove to heat. Let the mixture thicken; then pour over the carrots and cheese and a little salt and pepper dressing. Put the baking dish in a pan of water and place in the oven to brown.

Town of Tofield

Notice is hereby given that under the provisions of The Tax Recovery Act, 1929, the Town of Tofield will offer for sale, by public auction, in the Town Hall, Tofield, Alberta, on Saturday, the 4th day of December, 1937 at 2 o'clock in the afternoon, the following lands:

THE TOFIELD MERCURY

Vol. XVII., No. 41 Thursday, November 25th, 1937 $2.00 Per Year. To U.S.A. $2.50

LOCAL & PERSONAL

Mrs. Pyle is visiting her daughter Esther for a short time.

****

Harry Bowick drove his brothers Jack and Keith to Barrhead on Monday last.

****

Alice Moen, Dennis and Eric Edwards motored to Wetaskiwin on Sunday. Kathrine Moen, who has been visiting at Wetaskiwin for a short time returned home with them.

****

A number of Tofielders attended the Old Timers banquet and dance on Thursday held in Edmonton.

****

Mr. and Mrs. Joe Mullen returned from their honeymoon on Wednesday evening. A number of friends greeted them with a shower of confetti and rice. Later they motored to their home at Round Hill.

CARD OF THANKS

The Ladies' Aid of the United Church wish to thank all those who helped to make their play "Here Comes Charlie" such a success.

Tofield Cattle Wins Honors at Big Toronto Exhibition

At the Royal Winter Fair held at Toronto attended by over 100,000 people, purebred Shorthorn cattle from the herd of Claude Gallinger, Tofield, were awarded honors. Reserve junior and grand championship was won by Duke of Killearne. Second and sixth places were awarded Rothes 4th and Peter of Killearne in the summer yearling bull class. Rothes 3rd was awarded fourth place in the junior yearling bull class. In the bull senior class, Duke of Killearne came first.

This is the first time to our knowledge that Tofield cattle were exhibited at the big winter fair at Toronto and Mr. Gallinger is to be congratulated on the successes met with there.

Local Cast Presents Play

On Friday and Saturday nights last, at the Variety Theatre, a local cast presented the play "Here Comes Charlie." The play was exceptionally well presented and the audience was good on both nights

KINGMAN

Mrs. Alex Asp returned home from Dayaland last Sunday. She was helping to take care of her mother, who has been ill.

Mr. George Vague has gone to Vancouver where he will spend the winter.

We were sorry to hear that Mr. Pete Hogan died on November 18th at his home there. He leaves his wife and one daughter, 12 years old, also his mother and three sisters.

Mr. Hoverstein preached his last sermon last Sunday afternoon at the Lutheran church here. He expects to leave for U.S.A. about December 1st.

Mr. Polmer Bones is visiting his parents at Bawlf for a few days.

Mr. Albin Anderson made a trip to Edmonton on Friday last.

Mr. and Mrs. Norman Wideman visited at the A. Bona home on Sunday last.

James Sebastian Wins Wheat Title

TORONTO, November 19— Grand championship in wheat for all Canada was awarded here Friday at the Royal Winter Fair to James Sebastian, 17-year-old boys' grain club member at Wembley, whose sample of hard red spring wheat, of Reward variety was adjudged the best on exhibition in all classes.

Another Wembley wheat-grower, Fred Paverly, was announced Thursday as winner of the championship in the regional class, confined to west of the Great Lakes. For this he was awarded a first-prize ribbon.

Sebastian, who now tops the list as wheat king of Canada, takes the McLean trophy cup, said to be the "most beautiful grain trophy in the world." His sample of Wembley-grown Reward wheat won in open competition with all others from all parts of the dominion.

Twice previously the open grand championship trophy has been won by Herman Trelle, also of Wembley, but it must be won three times, which no one has yet done, before it can be held permanently.

A member of the Grande Prairie junior grain club, James Sebastian is one of a family of 10 children of Vincent Sebastian, whose farm adjoins that of Herman Trelle three miles north of Wembley.

Two brothers, Peter and Paul, several times were winners at Toronto and Chicago shows before they outgrew the age limit for boys' club membership. Another brother, Albert, is sixth winner at the present Toronto show in the commercial seeds class for hard red spring wheat.

The Sebastian brothers are known throughout the Grande Prairie district as good farmers who have been experimenting in wheat for several years past. James now has developed a superior sample of Reward from registered seed obtained in 1936 from the Trelle farm.

Christmas Dinners, Community Chests and What Have You

Citizens in general may if they so desire, try their luck and perhaps win a dandy cedar chest or on another draw, a Christmas dinner. The Midget hockey team is selling tickets on a dandy cedar chest, proceeds to be devoted to the club. Somebody is going to win a really splendid prize and a two bit ticket boosts the team along.

In aid of the Anglican church, generous donors are donating turkeys, beef, etc., and if you don't win one prize there are several others. This also is for a good cause and your money is not wasted.

U. F.W.A. Meet

In spite of cold weather, a large number of members and visitors met at the home of Mrs. C. Baptist for the November meeting of the U.F.W.A.

After the routine business was completed, a very special treat was tendered the members when the guest speaker, Mrs. Palmer Anderson, gave a talk on "Life Among the Chinese People."

For several years, Mrs. Anderson has been a co-worker with her husband in the missions of China, and is intimately acquainted with the manners and customs of these people.

Interest in the address was enhanced by the display of many cleverly made working-models, depicting phases of Chinese life, such as a coolie-drawn rickshaw with passenger, a school-room with teacher and pupils, a street vendor with wares, and many specimens of exquisite work in silks, brass and chinaware.

Intense interest followed the speaker to the end and a enthusiastic vote of thanks was tendered her.

Both Mr. and Mrs. Anderson are well known here, having lived in the Bardo district for many years before becoming missionaries in the foreign field.

The December meeting of the U.F.W.A will be held on the 2nd Thursday in the Municipal Hall. A full attendance of members is requested at this—the annual meeting.

L.C.C. NEWS

The Basket Social held by the L.C.C. was a great success, although not a large crowd present, the majority took baskets.

The L.C.C. wish to thank everyone who helped make this affair successful and anyone wishing a full account of same will find it in last week's Lindbrook News

The meeting of the L.C.C. for the month of November was held at the home of Mrs. B. E. Wilson. 16 members and 3 guests were present. The guests being: Mrs. L. McGinitie, Mrs. D. McCowan, Miss Ethel Conklin, Miss Olive Heaver and our new bride, Mrs. Harry Logan. Mrs. Logan rejoined the club.

The roll call was answered by Xmas suggestions and recipes and a few very nice ones were given.

A chapter of the new book, "A New Church Faces A New World" purchased by the club for the benefit of the members was read and we think proved satisfactory.

A lovely lunch was served by Mrs. Wilson assisted by Miss Conklin.

The next meeting, our hostess being agreeable, will be held at the home of Mrs. Scott, Mrs Evans assisting hostess.

Roaming Pet Bear Will Become Rug

Simcoe, Ont., Nov. 24—The bear that was Clarence Fraser's pet for two years will soon be a rug in his front room. Fraser was forced to shoot the animal after it broke loose from its chain and roamed around Main street, terrifying residents.

LAKESHORE

Mr. John Warner returned last week from his hunting trip. He was successful in bagging a moose and a deer.

Quite a number from this district were in to see the play "Here Comes Charlie" on Friday and Saturday. Everyone reports that it was very good.

Mr and Mrs. J. H. Johnson visited at the R. C. Phillips home on Sunday.

R. C. Phillips shipped a carload of seed oats to Eastern Canada on Monday.

Ivan Phillips sawed wood for L. H. Graham on Wednesday.

A Successful Pure Seed Plan

The Junior Wheat Clubs of Alberta have been definitely proven to be the most potent method of improving the general run of wheat seeded in this province. These clubs have been operated for eight years jointly by the Alberta Wheat Pool and the provincial and federal departments of agriculture. The contribution they have made to the improvement of seed wheat is a striking one. No other plan approaches it in efficacy, economy and educational value.

As its name implies, the Junior Wheat Club movement deals with the farm youth. It reaches the young people on the farm at an age when their minds are impressionable and when they are eager and capable of learning lasting lessons. These boys are taught the technique of growing good seed and as long as they live that knowledge will stay with them.

Technical agriculturalists have invariably found that adult farmers are set in their ways and it is exceedingly difficult to change them and induce them to practice new methods. This is not the case with the farm youth. The fresh minds of these young fellows coming in contact with the trained, scientific agriculturists are early led into right paths. Some of the men engaged in this work have mentioned how quickly the little brothers and sisters of the Junior Clubbers learn from watching their older brother operate his seed plot and are soon able to differentiate between the varieties of wheat themselves. When it is understood that between 40 and 50 of these clubs operate over the whole farming area of Alberta, it will be better realized how effective is the work of this farm youth training.

The objective is to educate the oncoming generation of wheat producers into the ways of sowing the best type of wheat seed. A wheat producer who knows how to handle a seed plot can develop his own seed on an economical basis. All he has to do is to keep the seed plot growing from year to year and he always has available a generous supply of excellent seed.

The whole Junior Wheat Club plan is not an expensive one, and the three forces behind it, namely, the Alberta Wheat Pool, the provincial department of agriculture and the dominion department of agriculture work in close unison. Highly skilled scientific men bring their knowledge right to the farm and frequently discover an alert mind in a farm youth who never otherwise would have an opportunity to show his ability. It is safe to predict that the future prize winning exhibitors at the big seed shows in so far as Alberta is concerned will come from the ranks of the Junior Wheat Clubs.

Right now some 45 seed fairs are being held, one at each club where conditions were sufficiently propitious as to produce wheat. Prize winners are selected at each fair and these are brought into larger seed fairs. Each year a number of the boys from the various clubs are brought into the central point where the provincial seed fairs are held and there the lads are given an enjoyable holiday and contact with the best minds in the seed production business.

Without question the Junior Wheat Club movement in Alberta is the most successful approach to the pro most successful approach to the problem of improving the seed sown on the 8 million acres cropped to wheat each year in this province.—Wheat Pool Bulletin

Tofield Rifle Club Takes Third Place

Word has been received from the Dominion Marksmen that the Tofield Rifle Club's team placed third in the contest sponsored by the Dominion Ammunition Co. for the championship of Alberta, with a score of 1493 out of a possible 1500. Tofield's team consisted of Wes Taylor, Albert David, Frank Dunn, Cons. Clarke and S. J. Burke.

The Alberta championship was won by a team from "K" Division of the R.C.M.P. at Edmonton with a score of 1498 out of 1500. This team now competes with the winners of the other provinces for the championship of Canada.

10,499 Registered Idle In Province

Registered unemployment in this province at Saturday last, totalled 10,499 according to figures released on Wednesday by officials of the Alberta Employment Service. This is a considerable increase over the figures for the previous week which totalled 10,069.

Calgary maintained is lead as the unemployment centre of the province with 4,504 males and 347 females registered. Edmonton was second with a total of 3,887 males and 394 females.

Lethbridge registered a total of 645 males and 53 females; Medicine Hat 278 males and 64 females and Drumheller 176 males and 11 females.

During the week employment was found for 579 males and 88 females.

THE WORLD OF WHEAT

By M. G. L. Strange, Director Research Department, Searle Grain Co.

"Millers won't buy Garnet. It is harming the reputation of Canadian wheat. Farmers should not produce it!"

These statements have been heard for sometime past, and those who make them point for proof to the wide price spread now current between No. 1 Northern on the one hand and No. 3 Northern and Garnet on the other.

I venture to utter a word of caution to those who are tempted to judge the question of Garnet by the present price situation.

No authority at any time has ever pretended that Garnet is as good a quality of wheat as No. 1 Northern. There is excellent evidence to indicate, however, that Garnet certainly is of as good all-round quality as is the normal No. 3 Northern, and that [illegible] is equal at least to those worldwide average quality wheats such as Australian, Argentine, Indian and Danubian.

[illegible] of the world have actually bought since 1929, I calculate, not less than 200 million bushels of Garnet and have found a use for it. I am bold enough to predict, therefore, that when the supplies of No. 1 and No. 2 Northern become less scarce than they are at the present time the normal price spread between 1, 2, 3 and Garnet then will return.

The following factors have tended to raise price: Considerable frosts in Argentina—Drought causes anxiety in South Africa—Official 1937 Canadian wheat estimate reduced to 183 million—British barley crop smallest on record—Chinese walnut exports decline—Holland likely to require larger wheat and flour imports.

The following factors have tended to lower price: Increase in U.S. official corn estimate—All Italian bread flour must contain five percent ground corn—Roumanian autumn crops get splendid start—Increase in Kansas sweet potato, soy bean and fruit production—Freight rates between Europe and North America to be increased 20 per cent on January 1st.

Great Britain Boosts Production Sheep Cattle, Poultry

Montreal, Que. Nov. 22—Aiming [illegible] self sufficiency, Great Britain is [illegible] wheat increasing its [illegible] dairy cattle and producing [illegible] sheep and poultry, Dr. W. J. Black, [illegible] of colonization and agriculture for the Canadian National Railways, said on his return from a [illegible] business trip to the United Kingdom.

"I was much impressed," he said, "with the new orientation of agriculture in England and Scotland. The English farmers are encouraged by their government to grow more wheat. A few years ago, the government offered to pay them a premium over a certain price. While this advantage does not apply now, with prices above the minimum, still the tendency to grow wheat remains."

To satisfy the greater demand for milk Dr. Black stated, herds of dairy cattle are being enlarged all over the country. He did not, however, see a [illegible] for Canadian beef. The price of beef in England was not sufficiently high [illegible] Canada's price to [illegible] shipping steers from the [illegible]. The market was likely to be [illegible] for some years yet.

"I noticed a [illegible] increase in the number of sheep raised in [illegible]," he added, "and in both England and Scotland a great deal more poultry is being raised. Apparently, Great Britain is aiming at [illegible] self sufficiency in agriculture. This is a condition which appears to be quite general all over Europe, a result of the numerous trade barriers which have been erected since the war."

This was one factor only, however, Dr. Black said. There was certainly encouragement for agriculture in the fact that more large estates were being divided and opened to cultivation. On the other hand, the new tendencies were checked somewhat by the lack of people to work the farms. In [illegible] of the keen demand for farm laborers and the good wages, the number of hands available for agricultural development appeared to be [illegible] limited.

"The normal market in England for Canadian cheese and butter [illegible] quite undisturbed," Dr. Black observed. "There is also a great demand for Canadian apples and for Canadian bacon, at fair prices."

Up to Date

"How did you like those Chinese back-scratchers I brought you?"

"Is that what they were? My wife's been making me eat salad with them!"—Stewart-Warnerite.

Dominion Will Spend $450,000 On Alberta Roads

Motor tourists in all parts of the country found fresh cause for enthusiasm recently when it was announced that the dominion government proposes to spend $450,000 on further construction of the Banff-Lake Louise scenic highway next year.

Only 32 miles of that highway remain to be built while the camps of crews working from the northern and southern ends of the project are only 23 miles apart.

James A. MacKinnon, M.P. for West Edmonton, has announced his intention of pressing the dominion government to complete the highway next year. As the $450,000 evidently will be inadequate, the member says he will urge that a sufficient sum should be voted to finish the road in 1938 instead of leaving a small holdover stretch for the next year.

This means that the highway would be opened to through traffic one year earlier than would otherwise be the case.

The fact that work also is proceeding on the Big Bend stretch of the Trans-Canada highway, 400 men being employed on this project as long as weather conditions will permit this winter, indicates that progress is being made in opening up the west to motor tourist traffic.

Officials of the Alberta Motor Association declare that with Alberta [illegible] ahead with hard surfacing projects and opening of new scenic delights in the mountains for tourists, this province should experience a big gain in traffic next year.

Tomorrow's Stout Men Of The North

Unlike many adult hunters and prospectors from time to time lost in the North country, when Scout Louis Vollans, 15, accompanied by four younger boys, including one of five, found he had lost his bearings in the heavy bush near Wanless, north of Flin Flon, during a Saturday afternoon hunting expedition with a rifle, he did not lose his head.

When darkness shortly came on, with a chilling wind, he bivouacked for the night, kindled a fire for warmth and comfort, and grilled the partridge they had shot. The partridge he divided with care, giving the breast meat to the youngest boy. Then in preparation for daylight, he took direction from the North Star and set a stick pointing in the direction that should bring them out on the railroad. Early in the morning they set off, and finally came out on the rails four miles from home.

Meanwhile the alarmed searchers who had failed to find them the previous afternoon and evening, were on the point of summoning aid from Flin Flon. A lookout on top of the station water tank reported distant figures on the track. A section man sped away on a gas car to investigate, and the lost quintet were soon safe back at home.

But for Scout Vollans' coolness and head work the lads might have been lost for several days, if nothing more serious had resulted. The partridge was the only food eaten since leaving home, and they had been without water. The stout little five year old, when asked if he had not been terribly tired, replied, "Well I was getting tired, but I could have gone two more miles."

New Ranch Area To Be Opened In B.C.

Montreal, Que. November 22—Interested, with a group of friends, in the possibility of developing a cattle ranch of considerable size and finding no suitable opening in the United States, Richard Pearson Hobson Jr., son of the Rear Admiral of the United States Navy who won fame by sinking the "Merrimac" in the Spanish-American War, is coming to Canada as a permanent resident.

With more than $10,000 already invested and financing to carry on a three-year development programme fully assured, the last range cattle company has been incorporated with a British Columbia charter.

The ranch is located between Anahim Lake and the valley of the Blackwater river, including locations in the neighborhood of Sigutlat Lake, and along the Euchiniko lakes. Here control has been secured of sufficient range and meadows to run from 10,000 to 12,000 head of cattle.

Considerable fencing and building is already completed, 12 tons of machinery taken in, and the nucleus of a herd is already on the ground, with feed for the coming winter put up.

Principal officers of the company are Mr. Hobson, Allen Stuyvesant, of Montclair, New Jersey, Floyd Phillips and Gerald Van Amergen, of Calvin Bulleck and Company, Wall Street, New York, who is treasurer. It is anticipated tat George A. Pennoyer, now rated as one of the most experienced cattle men of Wyoming will take charge of handling the stock early next year.

Gasoline Prices Reduced

Reported to be the first results of the use of Turner Valley crude oil in refining in the west, gasoline prices in both Alberta and Saskatchewan dropped half a cent to one and a half cents a gallon on Monday.

The first announcement of a price drop was made by Imperial Oil, which has been using Turner Valley crude in its refining processes for some weeks in its Regina refinery. The company already has started a $150,000 building and extension program at the Regina refinery to handle the crude. Other companies immediately followed suit in the price cuts.

The Alberta reduction in price is one cent on ethyl gasoline, a cent and a half on green gas and half a cent on white gas.

Edmonton service stations on Monday announced a new schedule of retail prices as follows: Ethyl, 32 1-2c; green gas 31c; and white gas 29 1-2c. The new rates in Calgary are: Ethyl, 32 1-2c for green gas and 29 1-2c for white gas.

Protect Your Hard-Earned Savings

THROUGHOUT Canada, life insurance policyholders and beneficiaries should realize the menace to their own and the national welfare that lies in extreme and unjust legislation.

These policyholders represent 50 per cent. of the electors—federal and provincial. Through the institution of life insurance, they have so pooled their resources that their collective interest can withstand attacks that would bring financial disaster to the individual.

Despite war, epidemic, panic and depression, life insurance has met every policy obligation promptly and in full.

Despite the financial disturbance of the past six years, it has distributed, and continues to distribute, to its policyholders and beneficiaries, over $500,000 every working day.

Seventy-five per cent. of this money has been, and continues to be, paid to living policyholders; the balance to beneficiaries.

Life insurance is the greatest co-operative business in Canada. No one doubts its strength and stability. No one questions the prudent and intelligent direction of its affairs.

It is the guardian of the hard-earned savings of 3,500,000 men and women in all walks of life.

Today there are forces in Canada that menace the welfare of these people. These forces would penalize their savings and impair their investments through legislation which cancels public and private debts—regardless of the debtor's ability to pay—and which tends to destroy the ownership of public and private property.

The interests of life insurance policyholders and beneficiaries—as of all other citizens whose savings are invested in one form or another in Canada—demand that promises to pay be observed, when the debtor is able to pay; that hard-earned savings which safeguard the homes and families of the Dominion be protected from unjust legislation.

AGIN THE GOVERNMENT—

THERE IS A much plagiarized story of an Irishman landing in America who asked an early acquaintance what kind of government was in power. The acquaintance replying that he did not know, the Irishman replied, "well I'm agin it." While the situation is not exactly the same, it would appear that concerted efforts are being made by those opposed to the present administration in Alberta to marshal all political forces into one unit so as to present a "united" front powerful enough to defeat the party now in power. Complete success is not being attained.

A few years ago the most popular, or perhaps it would be more correct to say the most commonly used word was economics. From comparitive obscurity, the word economics sprang into constant use. Throughout the land political speakers great and small, used this word as a title theme for their addresses and the number of economic experts that cropped up was amazing. But now it would appear that the popularity of economics as a subject for discussion is on the wane, in its place there has arisen another subject of vital interest, namely, government. The subject, of course, in its broadest sense is world wide, but it can be, and is narrowed down to continents, countries and provinces.

As we have stated before, there are three main political forces in the world today, Communism, Democracy, Facism. It is not necessary to go into the merits or demerits of any one or all of them, it is sufficient to say that in Canada and in the realm of Alberta affairs we are still, as far as profession of faith goes, subscribing to the doctrine of democracy. This is "the power of the people." The democratic form of government calls for a certain procedure, varied of course in different countries, but similar in practice everywhere. This procedure calls for two or more parties with definite plans as to what is best for the people, called a platform, and it is upon this platform that a party is either elected or defeated. Furthermore, under our present political set up, a government is elected for four or five years, unless for any reason the government resigns of its own accord or is defeated by a vote in the House. Perhaps some of our readers can recall a pre-election radio address from Calgary. In this address the speaker stressed very strongly that should the Social Credit party be returned to power it would be for a period of five years—there was no way out. Therefore democracy, as well as meaning "power of the people" could equally well mean responsibility of the people. And this responsibility rests upon high and low, rich and poor alike, because it is expressed in terms of the ballot. This responsibility is very real because no matter what party is in power, a government costs the citizen something in money or labor or both. The government may or may not give value for money received, but the fact remains that each citizen is a participant in a financial deal and participation of this kind creates or should create responsibility. There is another kind of responsibility brought about by democracy, the responsibility of majority rule. No doubt there are many people who chafe against the sayings and doings of the present Alberta administration, but this is the price one has to pay for political freedom of thought and speech and the orderly conduct of democracy as a method of government. In the last analysis it would appear that wisdom among voters is also an important element. It is easy to understand, even if not approved of, the Facist contention that a selected group of able administrators is to be preferred to an elected group of inexperienced administrators. So we find that a democratic form of government embodies the power of the people, the responsibility of the people and the wisdom of the people, and for a government to function efficiently, power, responsibility, and wisdom must function efficiently among the people also.

To attempt to bring about a fusion of all other political beliefs for the one and only purpose of defeating the present administration, is jumping out of the frying pan into the fire. What political bond of unity is there between the Liberals and U.F.A., or between the Conservatives and C.C.F.? Even if success attended their first efforts, where would they go from there? How long would they remain a political unit? Not for very long we are afraid. What we need here in Alberta is fewer political personalities and a sounder political policy—the policy to be first evolved. If the policy is really sound, is fair, just and reasonable, it will form a foundation that will not crumble for any group to build their superstructure upon.

A YANKEE TRICK

When Sir Thomas Lipton returned to England following his last cup race, he was accosted by an extremely patriotic British lady, who anxiously inquired, "Is it true, Sir Thomas, that those Yankees put something in the water to keep your boat from winning?"

"Ah, yes," replied the grand old sailor. "This year it was the Enterprise."

ARCTIC ARISTOCRAT

By William MacMillan in "Forest and Outdoors"

It is probable that not one in ten believes the exquisite white fox he sees in the furriers' windows really exists in the wild state. Knowing only too well that furriers are peculiar for ways that are dark and tricks that are vain he suspects deception and figures it to be some other fur cleverly bleached and whitened. And by the same token probably even less than half the above number have ever set eyes on a white fox in the flesh, so to speak.

It will be a shock to many to learn therefore, that in a good year Canada produces anywhere from 60,000 to 70,000 white fox pelts which, figured at today's values, represents a revenue of something over $1,200,000, a tidy sum of money.

He is a real nomad of the north, this thick-furred fellow, and isn't to be found anywhere else in the world but where snow and cold and storm reign supreme.

Pond Inlet, which as everybody knows is on Baffin Island, ships over 3000 white fox pelts to market every year and longs for more. Other settlements and villages along the same island market a proportionate number, leading one to conclude that the white fox is one of the great providers for the Eskimos and natives of these bleak places.

Before going any further it might be advisable to spotlight, perhaps, some of the features that set these amazing little creatures apart from all other foxes.

When an Eskimo spots a white fox drifting over the snow on soundless paws the animal's fur is usually tinged slightly with yellow. But later, when the chemist has passed it through his cleansing baths, it is as pure white usually, as the driven snow.

But to get back to the fox on the hoof, so to speak. These white foxes are so closely related to the even less common blue foxes—more of them later—it is sometimes difficult to tell them apart. In summer, when their fur is more or less drab and unattractive looking they hunt in swamps and bogs for lemmings, those tiny Arctic mice that frequently keep body and soul together when all else fails.

The hunting is so good at this time he frequently becomes fastidious and turns his back on lemmings, favouring for a while the wild fowl with which the lakes and lagoons are crowded, pouncing on them as they nest and feeding to his heart's content.

Presently, as the flood tide of summer is reached, some instinct warns him of the inevitable winter, when deep snow and bitter cold will manacle the swamps and make life hazardous. With the geese flying south and the brown marsh grasses rustling stiffly in the wind he begins to hunt feverishly, packing away his kill in deep underground caves.

There is nothing haphazard about his movements at this moment, and he lays the fat little lemmings in nature's own refrigerator, pile on pile. Then by way of variety, he will sometimes pack away in layers of moss some quail and duck eggs.

Then when winter comes, cold stars flame in the heavens and snow fills in the depressions, his fur turns white, or at any rate yellow-white, and he comes into the full glory of his inheritance.

The original burrower, the white fox has developed an underground residence that must be the envy and admiration of his less gifted imitators. The entrance, some nine inches in diameter, runs straight into a little mound, or rise, then it turns and angles back about ten or twelve feet. From this main shaft branch off different tunnels. One, for instance might lead to the storehouse, another to the garbage den and still another to the sleeping chamber.

The older foxes, home-loving and content, hug these burrows, but the yearlings, unhampered by experience and fired with a desire for adventure move southward ahead of the winter, frequently going hungry, also, but hunting nevertheless, as they advance.

Later, when the spring suns soften the snow and the days begin to lengthen, the homeward urge makes itself felt and they are glad to turn back and rejoin the families they had scorned but a few short months before.

The supply of white foxes, unfortunately, isn't very even from year to year. To the retail merchant, or even the consumer for whose ivory shoulders most foxes are eventually destined, this is of importance only to the extent that it affects the price. To the Eskimo and native trapper, however, it is virtually a matter of life and death. An astonishing number of people in these desolate regions depend on white fox trapping for a living and a year of what might be called "no foxes" spells want and misery.

Needless to say all sorts of reasons are advanced in explanation of these mysterious fluctuations. Some, natives mostly, think that disease sweeps through the colonies at frequent intervals, taking heavy toll of the dainty foxes. Others, scientists for the most part, claim that since the ebb and flow follow close on the heels of increase or decrease of lemmings, these prolific little mice are really responsible.

As the lemmings, upon which the white fox bases his very existence die off and become scarce, either through migration or disease, the foxes follow suit, reaching the point of diminishing returns, so to speak every 4.2 years. Thus after plumbing the depths of the cycle in 1935 the catch of white foxes was on the upturn last year, thus assuring an even larger crop this year.

History of Brazil Coffee Control

Cables from Brazil announce the final abandonment of 12 years of efforts made by that country since 1924-25 to control the price, the distribution and in some years the production of coffee. The history of the various attempts is as follows:

In 1913-14 the price of Santos coffee at New York was 12 cents per pound, which was considered very satisfactory.

By 1924-25 price rose to 24.8 cents per pound.

Fearing price decline, Brazil set up in that year, the Coffee Defence Institute, which was given complete control of the production, marketing and handling and price. In 1929 the effort failed and the Institute was bankrupt.

Then the State of Sao Paulo took over the bankrupt Institute and carried on with the plan. By 1931 the State Plan also had failed and in that year the Brazilian Federal Government, to save the State, was obliged to take over the plan and set up the National Coffee Council, which started to burn up the accumulated surplus in an attempt to control price.

From 1931 to date the Council has burned up no less than 42,347,493 bags of coffee (each bag weighing 132 pounds) or the equivalent of about four years' total exports of Brazilian coffee, but apparently it has had no effect on price, and has merely meant that a number of other countries increased their own production of coffee to make up for the destruction which took place in Brazil.

The total loss suffered by the Brazilian government is estimated to be 72 million dollars and Brazil with her most important money-making crop, has lost valuable markets to her competitors.

So ends another attempt to control by artificial planning, by a Board of Council, the production and price of an international product. The history of coffee control now joins the attempts made since the war by different countries with wheat, rubber, tin, silk, cotton and other commodities, and [illegible], too, those hundreds of similar attempts which have been made by many governments during the past four thousand years.

The records do not reveal that there ever has been a single success but they do show that all the recorded efforts have most dismally failed and in the end have not only brought losses in money to tax payers and to the people, but in addition have made the conditions actually worse for the very producers that the plans and schemes were set up to help.

The plans have ever failed, history tells us, for one single simple fundamental reason, which is that while any individual in this world, any institution, organization or government, can set by regulation, law or decree, any price desired upon any product, that no regulation or law has ever been, or can be, enforced that will oblige the people of the world to buy any particular product at the set price. The people of the world, which in the long run means the women—the housewives—seem to have an uncanny knack of finding cheaper substitutes for any product the instant the "set" price becomes out of line with other prices.

Why do not governments and the people learn, from the history of the past, of the inevitable failure of such attempts to control price? The answer no doubt is that given by Santayana, the American philosopher, who once said, "History teaches us but one lesson—That we learn nothing from history."—Searle Grain Company, Ltd.

Funny

Landlady. "You seem very hard to please, Mr. Simpkins."

Lodger: "How's that?"

"Well more than a dozen boarders have used that towel today—and you're the first one to complain about it."

North Planes Carry First Winter Mail

Carrying the season's first air mail into the north for this season, two Mackenzie Air Service planes, piloted by Gil McLaren and Bob Randall took off from the Edmonton airport Monday morning with 2500 pounds of mail.

McLaren, flying a Norseman plane, carried mail and freight for Goldfields; Randall was bound as far as Yellowknife with a full load of mail.

Northern mail which had been accumulating at Fort McMurray was shipped by train back to Edmonton by the post office to be flown north. Landings can not yet be made at McMurray.

Three flights are scheduled this winter for points north of Fort Norman to Aklavik and Herschel island. The first is to reach Herschel, December 23, other flights on February 15 and March 28.

First Arctic air mail was flown by Commercial Airways in 1929, being taken over by Canadian Airways in 1931 and operated by them until the close of this summer.

Discovery of gold and other minerals in the north has boosted the mail poundage in the north. In 1935 it was 39,160 pounds and in 1936, 112,490 pounds.

MUCH OUT OF LITTLE

Upon one occasion Nazimova, Russian actress, entertained at a tea, with a recitation in her native tongue. The audience was thrilled, spellbound! They congratulated her heartily. "Intense feeling," they exclaimed. "What did you recite?"

"The alphabet," said Nazimova.

Meeting of Tofield A.T.A. Local

The second regular meeting of the Tofield A.T.A. local for the current year was held in the school on Saturday, Nov. 20. After the business period, Mr T. F. Hamilton, I.P.S., gave a very instructive talk on "Mistakes in Enterprise Teaching." It is planned to have other speakers at future meetings as part of our program for the year.

At the first meeting on October 16, which was attended by sixteen teachers, the following slate of officers was elected: Pres., Mr. S. Olsenburg, Vice-Pres. Miss McKinnon, Sec'y. Treas., Miss M. Stewart and Press Correspondent, M. W. McDonnell.

Next meeting to be held on Dec. 11.

Pete Ingram Dies at Coast

Word was received last week that Mr P F. Ingram, formerly of Tofield had passed away at his residence at Victoria. Few details are to hand but through a letter received from Mr. Ingram about a month ago, we know he was ill and had been in the hospital. Pete, as he was popularly known, lived here for 25 years or more, moving to Victoria about 18 or 19 years ago. While here he was engaged in the real estate business and also followed this business at the coast. Two brothers, Charlie and Jim are still here also a sister, Mrs W. Sears.

No Bad Boys States Chief of Optimists

There is no such thing as a bad boy, but only one who may temporarily be the victim of wrong ideals, said William John Tamblyn, of Forest Hill, Ont., first Canadian ever to be president of Optimist International, as he explained to reporters Wednesday the ideals of the organization he headed.

"All boys want to be good and do the right thing," the Optimist chief reasoned.

"There may be a bad home, a bad gang, or a bad community, but the boy who becomes their victim is not by that token intrinsically a bad boy."

The Optimist Club, he pointed out takes as its motto "Friend of the Boy." Its record proves that the more active is its boys' social service work, the greater the growth of the club unit.

"There is definite need for service today and I believe that no service club justifies its existence or lives up to its ideals unless it actually is of public service."

Glowing tribute to Canadian newspapers as a force in making youth good citizens came from Mr. Tamblyn who is head master of Forest Hill Village Community schools.

Co-operation of newspapers in Toronto had succeeded, he said, in presenting crime news in such a way that gangsters lost their meretricious sparkle and were depicted as men engaged in anti-social activities.

"I think the newspapers of Edmonton deserve much the same tribute, too. I read them carefully last night and was delighted with their method of presenting news. They are a decided help in making young boys tread the paths of useful citizenship.

Founded in 1911 in Buffalo, New York, Optimist International now has about 175 clubs in the United States and 20 in Canada. Its total membership is close to 10,000.

"We doubled the number of clubs in Canada last year and expect to have clubs from coast to coast before the end of this year," he said.

Growth of the organization during depression years may be attributed to the social service work carried on by Optimists, Mr. Tamblyn remarked.

Clubs will be chartered soon at Winnipeg, Ottawa and Chatham, he announced. The Winnipeg unit was organized by Ronald White of Edmonton.

Record of the Edmonton club has inspired widespread interest and earned commendation from groups at Utah, Oregon and Washington.

Dog Fire-Fighters Valued by Owner

Regina, Nov. 24—Dicky, a handsome Alsatian, has a home for life with Oh Kin, Chinese hotel keeper at Bulyea, 75 miles north of Regina. Dicky is a firefighter and has twice saved his master's hotel from flames.

Oh Kin has turned down $300 and $400 offers for the dog with the remark: "No amount of money could ever take the place of Dicky."

Two years ago live coals fell on the hotel carpet. Dicky pushed them off the carpet with his nose, somewhat scarred now. Later he pulled hot embers off the carpet with his feet.

Dicky, gentle and quiet, sleeps with a cat which has been his partner for three years.

5 Greatest Newspapers In China Quit

Shanghai, Nov. 24—Japanese control of Shanghai, which tightened yesterday when Japanese took over the customs administration, became effective today. Five of China's largest morning newspapers with a combined circulation of 400,000, suspended under pressure of Japanese authorities who insisted International Settlement officials suppress all anti-Japanese activities.

Mr. Webster

"Pa, what is an optomist?"

"A man who figures that when his shoes wear out he will be back on his feet again!"

First Meeting Div. 5, Holden School District Held

On Tuesday afternoon the first meeting of Division Five, Holden School Division was held in the Town Hall at Tofield. Representatives of the following schools which comprise the division were present:

McKenzie School District, No. 224; Ingram School District, No. 376; Anderson School District, No. 434; Grand Forks School District, No. 737; Amisk Creek School District, No. 799; Solberg School District, No. 926; Lake Shore School District, No. 987; Shaw School District No. 1418; Ketchamoot School District, No. 1465; Lindbrook School District, No. 1825; Standard School District, No. 1853; Woodlawn School District, No. 1987; Bathgate School District, No. 2054; Weslake School District, No. 3393; Ustle School District, No. 4410; Spilstead School District, No. 4709.

The purpose of the meeting was to nominate candidates for membership in the Divisional board which will consist of five members, one from each division. There were eight names nominated. At the annual election of each rural school district, these names will also be balloted upon. The candidate receiving the most votes in all the rural school districts in the division will be the members of the divisional board for that division.

The names nominated on Tuesday were: Geo. Abernethy, Lakeshore; Ingvald Ness, Grand Forks; William Thompson, Ingram; Mr. Fairbrother, Spilsted; Geo. Yager, Woodlawn; John Brown, Ketchamoot; Kil Solberg, Solberg; Mr. Manderson, Bathgate.

DR. RICHARDSON TO LEAVE FOR UNITED STATES

Dr. Richardson who has paid regular visits to Tofield for some years made his last call here last Thursday. He is leaving shortly for Sedro Wooley, Wash., where he has purchased a dental practice.

Dr. Richardson was well known and well liked here and leaves quite a number of friends. He will be succeeded by Dr. Caldwell who will make professional visits on the same day. Since graduating Dr. Caldwell has practiced at Edmonton and Mayerthorpe.

BEHIND THE HOG

By A.B.C.

We expect to have a school for green curlers under the direction of some of the older boys later in the season. We will endeavor to give you some of the finer points of the game including: Stance, Weight, Delivery, Broom and Conversation, the A.B.C. of curling.

••••••••

As the curlers go into action this season it might be well to let you into some of the hidden secrets of the game. It is a well known fact that curling has broken up many happy homes and courtships. No real dyed in the wool Curler would ever let domestic affairs or love entanglements interfere with his draw, and it is only a matter of fair play, that I again refer you to the Ten Commandments posted on the walls of the rink, I could suggest as No. 3—

••••••••

There's nothing better, seems to me,
Than honest punctuality,
And so I'll put it down in rhyme,
For other's sake, do be on time.

••••••••

My suggestion as to picking rinks: An absolutely green lead, for 2nd, has curled some, judged by his ability to take the broom and play an average game; for 3rd, an exceptional 3rd player or a weak skip, I mean as regards the knowledge of the game; the skipper, possibly a strong 3rd or the tough guy who has curling and skipping ability.

••••••••

If you have any complaints take them to F. G. Imler, he is the Ice Committee.

••••••••

If you find it impossible to attend your game, notify your skip. If skip cannot be present it is O.K. to replace with 3rd or 2nd, but have a rink ready anyway. Don't be selfish, think of the other fellow. And remember Boys, we have the best Curling Club in Tofield—BOOST IT!

••••••••

This week's Brain Wave—
The rink is not so bad as we suspicioned,
We hear it's just been Air Conditioned.

Unusual Highway Mishap

An unusual highway mishap occurred on Wednesday involving Mr. Otto Johanson and a truck laden with lumber from Edmonton. Mr. Johanson was on his way home to Bardo and was crossing the highway when the truck presumably hit his wagon broadside. He was thrown from his wagon box to the ground and the tugs were snapped off. Fortunately, we understand, beyond bruises he was not hurt.

••••••••

The United Church Annual bazaar and sale of home cooking was held on Saturday last. There was a good attendance and the event was a success.

United Church News

"Better late than never" and as those who saw the play "Here comes Charlie" are still talking about it, a word of appreciation and congratulation will not be amiss.

Everybody enjoyed the play and that is saying a great deal. In fact some go so far as to say it is the best amateur acting they have seen in Tofield. Well it is nice when all the bouquets have a sweet fragrance. It would be difficult to pick out a star from the whole cast for they all starred. It went over big and under the leadership of Mr. Larry McLeay it proved a great success. The United Church Ladies' Aid are to be congratulated on this selection of such a mirth provoking play.

••••••••

On Tuesday evening, Nov. 28th, the Y.P. Society had the great pleasure of being addressed by Mr. J. W. Chapman. "Making the Most of Opportunity" was the theme and Mr. Chapman from history, reading and personal experience kept the young folk more than interested. This is a live organization and with intellectual treats and social activities, each meeting gives the utmost satisfaction. We may have a skating party soon—get prepared!

••••••••

The various organizations of the Church are preparing for Christmas. The Sunday School is getting ready for the Christmas tree entertainment. Mrs. Stinson is busy training the Junior Choir for the Christmas music and the Senior choir is practising on Christmas anthems.

As members and adherents of the United Church we should be thinking a little more about the greater works of the church. The Home Missions work of our Dominion is a great task and with so many of our people suffering in the dried-out areas our sympathy and support ought to be very practical. Then let us remember the Christians in China and Japan where our missionaries are doing coürageous and kindly and Christ-like service. Remember the Missionary and Maintenance Fund that makes such service possible.

Three Bardo Oldtimers Pass To Their Reward

Mrs Mary Nordlus passed away at her home here November 24th, after a short illness of pneumonia. Mrs. Mary Nordlus, nee Folden, was born in Norway and was at the time of her death 79 years, 3months and 8 days old. She came to Minnesota in the 80's and in 1902 she came with her husband, Simon Nordlus, who predeceased her 20 years ago, to Bardo, Alberta, where they home-steaded. She was an active worker and was a woman always willing to lend a helping hand. She leaves to mourn her loss Raymond Nordlus of Bardo and Mrs. Theresa Ingram of Victoria, B.C., also a foster son Axel Kindley of Bardo. Two sisters reside in North Dakota. The funeral took place from the Bardo church on Nov. 27th, Rev. Hoverstein officiating. A number of friends and neighbors were present to pay their last respects to the deceased. She was laid to rest beside her husband at the Bardo cemetery. Pall bearers were: Martin Hagen, J. Westby, M. Finseth, Iver Moen, M. Erickson and B. Bjornson. The sympathy of the community goes out to the bereaved.

Peter M. Haugen, who died at La Glace, Alta on November 18th, was an old timer of this district, coming here as a boy with his parents, Mr and Mrs. Halvor Haugen, who came here in 1894. He grew up in this district and was well liked by all for his humorous disposition. His wife, Amanda Johnson Haugen also grew up in this district and to her and daughter Florence, also mother, Mrs. H. Haugen and sisters, Mrs. T. Horte, Kingman, Mrs. J. Ness, Bardo and Mrs. Geo. Quailey, Hughenden, we extend our heartfelt sympathy.

In the death of P F. Ingram of Victoria, an old timer of this district has passed. We extend the sympathy of the community to the bereaved relatives.

Mrs. Geo. Hendrickson entertained the Bardo Ladies' Aid on Thursday last. It being the yearly business meeting, officers for the coming year was elected. Mrs. Loolah Lerbekmo was elected president.

Mrs. Arnold Steen returned from Edmonton last Saturday after spending two weeks with her daughter Edna.

Geo Hendrickson, Tom Rorem and Hans Hillerud returned from their moose hunt last week.

Edmonton visitors last Friday were Mrs. Agnes Haukedahl, Mrs. Joe Stauffer, Mrs. Geo. Hendrickson, Mrs. Reuben Eide and Mrs. Ivar Moen.

All members of the Bardo Male Chorus are urged to attend an important business meeting in the Lutheran church on Monday, December 6th at 8 p.m.

Ed Bannerman returned home last Sunday after a weeks visit in Edmonton.

Mr. and Mrs. O. Johanson and Martin Hagen were in Edmonton on Tuesday and also visited Mr. and Mrs. Ching Johanson at Clover Bar.

Rev Hoverstein is leaving for the States soon where he will spend the winter.

Friends Surprise Mrs. Earl Moore

On Tuesday afternoon a number of friends and neighbors met at the home of Mrs. Bigland in honor of Mrs. Earl Moore, a recent bride. Mrs. Moore, although taken completely by surprise, was able to find her gifts by searching for ringing alarm clocks, which went off at intervals during the afternoon. Games and contests passed the time pleasantly. A delicious lunch was served by the ladies after which Mrs. Moore fittingly thanked her neighbors for their good wishes and the lovely gifts.

A football coach in the West is proposing that kilts be worn by players instead of pants. That would make the forward pass a highland fling.

Windows Won't Open Conductors Relieved

With the introduction of new air-conditioned coaches on the Canadian National Railway lines, the chances of conductors being reduced to nervous wrecks by the time they reach pensionable age are almost entirely eliminated, says the London Free Press.

One of its reporters went to interview the conductor in charge of the first of the 50 new coaches when it was put on exhibition in London recently.

"In the old coaches we could do only as much as the passengers [illegible]," the conductor told him. "After that all we could do was listen to complaints and nagging and say [illegible]." He was referring to those who wanted windows up and those who [illegible].

"But in the new coaches it's all different," said the conductor. "You can't get the windows open because they're sealed, and you wouldn't want them open anyway, because the air-conditioning keeps the atmosphere perfect. And when you can't get the window open there is no draft and no dust to complain about."

Christmas Seals

The most effective appeal which can be made to Canadians is through their sense of responsibility to their fellow men. This humanitarian appeal is not forgotten when it is urged that tuberculosis be fought on economic grounds.

Tuberculosis strikes and kills at all ages. Neither the infant nor the aged is spared. The young adult bears the brunt of the attack. Tuberculosis more than any other disease is most prevalent among the poor, that group which is least able to bear the expense of illness.

Most of the beds in sanatorium are public beds. There are but few families which can carry the financial burden of a disease when the time required for treatment must be measured in years and months rather than weeks and days.

Among the young adults who fall victims to tuberculosis are many who are parents of young children. If it be a mother, then the home life will be disrupted. If it be the bread-winner, the family will likely collapse under an intolerable economic burden.

This is enough to make it clear that we should [illegible] tuberculosis, [illegible] no higher ground than that of [illegible]. Directly and indirectly, we all pay a share of the heavy cost of tuberculosis.

There is only one way in which we can lower the burden, and that is through bringing about a reduction in the incidence of tuberculosis. Surprising as it may seem, there are thousands of Canadians who are suffering from tuberculosis, who are not aware of their condition. Their ignorance not only endangers their own lifes but makes them a menace to others.

The first step in the campaign against tuberculosis is to find the cases. It is among the members of the family, young and old, where there is or has been a case of tuberculosis that unsuspected cases are found most frequently. It is for this reason that the examination of contacts is urged.

At this season of the year, all over Canada, Christmas Seals are being sold. The proceeds of the sale go to support the war that is being successfully waged against our enemy, tuberculosis. The army which fights for us not only takes care of those who fall victims to the disease, but also safeguards our lives, day by day, as we go about our work.

Questions concerning Health, addressed to the Canadian Medical Association, 184 College Street, Toronto, will be answered personally by letter.

TOWN AND PROVINCE

Government News Bulletin

Rash statements are often made about conditions in Alberta compared with other provinces. During the next few weeks, we will issue from this office weekly bulletins based on information gathered from the most authoritative sources. These will, not only reflect the true facts as they exist, but what has been achieved during the two years the present government has been in office.

Changes in the organization of every department of government has been essential to the laying of a solid foundation on which to erect the superstructure of a new economic plan. In the process, we have been told, the government has frightened much-needed capital away from the province, has wrecked the confidence of investors, has retarded development and increased living costs. Here are a few of the facts.

Do you know that Bank Clearings as shown by the records of four of Alberta's largest cities, increased 11 per cent last month, as compared with the same period last year? While this increase took place in Alberta, the other two western provinces Manitoba and Saskatchewan, were down over 17 per cent.

Do you know that collections at the Edmonton Customs Office, during last month, exceeded a quarter million ($258,024.00) the highest since 1929?

Do you know that the volume of goods going into our North country increased to such an extent that transportation companies working at full capacity and using every available means of transportation found it impossible to move all the freight from the end of the steel at Waterways, before the closing down of river traffic this fall?

Do you know that out of a list of seven primary articles of consumption and house rents, only two are higher in average price in Alberta as against the average price ruling throughout Canada? All the other articles are lower. Does that indicate that Alberta is not a good place to live in?

Do you know that among the latest industrial developments are the construction of a hundred thousand dollar plant for the manufacture of stoneware and pottery at Medicine Hat; that a million dollar hydro scheme is well under way at Goldfields to the north, to which Edmonton is the main gateway?

That Alberta comes fourth among the Provinces taking advantage of the Dominion House Improvement Plan, and stood third for building permits in Canada, last month?

That since the Government came into office, 39 new oil companies, with authorized capital of over ten million dollars, have been incorporated?

That 56 other companies have been incorporated in various industries, with authorized capital of over 8 million dollars have been incorporated?

That according to the Canadian Bureau of Statistics our agricultural products show an increase of 8.05 per cent; Mineral products 11.56 per cent; manufacturing 6.07 per cent; retail trade 9.93 per cent; wholesale trade 11.19 per cent; construction, 11.16 per cent.

Owing to regulations made by the Government to encourage development of oil industries, new capital has come into Alberta from all over the American continent, and across the seas, and what is the result? Four times as much drilling took place so far this year, as in 1935. Oil production is now at the rate of seven million barrels a year, about twice what it was in 1936, far in excess of any previous year. Alberta oilwells are producing three times as much as we can consume: one-fifth of the total consumption of the Dominion, and we rank third in the British Empire for production.

New government regulations have thrown open the development of huge tracts of our timber and forest lands, which the the past have been held under leases by speculators. These will now be available to settlers and small operators. During the past year around 82 million feet of lumber and one million ties were taken from our forests, and with twice this, there is still enough to last three hundred years.

Last year our coal output increased to approximately 6 million tons; new capital invested in the tar sands at McMurray will enable us to supply all mines in the North with Diesel fuel, and will make available large quantities of asphalt for roofing and road surfacing, throughout the Province.

The new salt plant at McMurray is now erected, and capable of producing ample salt for our own needs.

THE WORLD OF WHEAT

By H. G. L. Strange, Director Research Department, Searle Grain Co.

The high tariff protection given to industry in the United States, now it appears places the Government in a most difficult position.

Agricultural exports, for one hundred years or more, formed the solid foundations of American prosperity. Then industry began to expand, and industrial and labor leaders pressed for high tariff protection. This was granted by the Government and resulted naturally in a decline in the imports of foreign goods into the United States. The inevitable consequences then were that the prices of the things American farmers had to buy increased, and the export sales of agricultural products declined; for these commodities could no longer be purchased as freely or at the same good prices, by other countries.

American farmers now justly complain, but the Government can remedy the situation only by lowering the high tariffs—against which policy industry and labor violently protest—or by planning to reduce the production of agricultural commodities, which latter plan would definitely mean, on the whole, a lowering of the farmers' income, and so of the farming families' standard of living.

Governments can, it seems, by means of high tariffs, expand home industry and make it more profitable but only at the expense of agriculture and by adding to the burdens of farming farmers.

Following factors have tended to raise price:—Further frosts in Argentina—Rains interfere with Australian harvest—Italian wheat acreage may be smaller than a year ago—Holland buys American corn—Estimates of Poland's 1937 wheat, oats, barley and rye production below 1936—Argentine shippers buy back wheat sales—France buys Canadian wheat.

Following factors have tended to lower price:— Persistent decline in commodity and financial markets—Sino-Japanese war interferes with Canadian wheat and flour trade — 1937 Japanese wheat crop greatest ever produced—Prohibition of Argentine exports removed—Rains improve southern Argentine crops—Poor European demand—Expect record rice harvest in Chosen while millet and soy beans almost record.

Half A Ton of Christmas Puddings For C.N.R. Diners

Montreal, Que. Nov. 22— Half a ton is rather a lot of Christmas pudding for one small kitchen to produce, especially when it's no bigger than the kitchen of a railway dining car which measures only 21 feet by 6 feet 6 inches.

Undaunted by the proportions of their task, a Montreal chef and two assistants have begun mixing operations, in a car not far from Bonaventure Station, and before a fortnight is over they will have their 1000 pounds of plum pudding all ready to eat. Put up in one pound lots for convenience, it will be well mellowed by the time the holidays arrive and it is served to travellers on Canadian National trains. The making of these Christmas puddings was described by a commentator of the Canadian Broadcasting Corporation in a national coast-to-coast hook-up from the kitchen of the dining car.

Thomas Gear, the chef who is in charge of operations, gives out this brobdignagian recipe, founded on an old English original. Bread crumbs, 200 pounds; fine chopped suet, 125 pounds; flour 50 pounds; sugar 125 pounds; eggs 64 dozen; milk 12 1-2 gallons; sultanna raisins and currants 100 pounds each; mixed peel 50 pounds; cinnamon, allspice and nutmeg 3 1-8 pounds each; lemons, juice and rind, 16 2-3 dozen; salt, half a pound; baking soda, 1 1-2 pounds and brandy 600 fluid ounces.

A diplomat is a fellow who can say things in such a way that everybody wonders what he means and no one knows. Memphis Commercial Appeal

Exceeds Fastest Mark of Malcolm Campbell

Bonneville Salt Flats, Utah, Nov. 19—Capt. George Eyston of England Friday set a new world's land speed record of 311.42 miles per hour.

The genial captain from London flashed through the mile and back again in Thunderbolt, a 24-cylinder racing giant, for an average of 11.56 seconds.

Eyston's speed, the fastest man has ever travelled in an automobile exceeded Sir Malcolm Campbell's record of 301.1292 miles per hour by a wide margin.

Campbell made his mark here in September 1935.

Eyston, a thin, scholarly man of 40 who retired from the British army several years ago, clipped the northward mile in 11.70 seconds for an average speed of 305.34 miles per hour and then sped back in 11.33 seconds for a speed of 317.74 miles per hour.

"I knew I was going faster than I'd ever travelled before when I made the run back," Captain Eyston said. "Just before I entered the measured mile, my goggles began fluttering from the wind. I had to drive with one hand while I set them straight. It was a h— of a run and I don't mean that profanely."

Thunderbolt, a seven-ton, eight-wheeled racer which Eyston and his experts built in six months, performed perfectly after he had remedied clutch trouble which spoiled two previous efforts in the past month. He paid high tribute to the three Americans who repaired the clutch.

The 3,100-horsepower giant shot fire from four exhausts as it streaked through the return mile.

Eyston also shattered the kilometre record of 276.16 miles per hour averaging 312.20 miles per hour. He was clocked at 305.53 and 319.11 miles per hour for the two kilometre tests.

Ladner, B.C. Boy. 13 Is World Wheat King

Chicago, Nov. 29—Gordon Gibson of Ladner, B.C., retained the wheat championship of the world for Canada today with Reward variety at the International Livestock Show.

Gibson's sample weighed 68.2 pounds to the bushel. It was hard red spring wheat.

Trelle, five times wheat king, showed a sample of Marquis variety this year, deserting the Reward variety with which he had won previously, in order to pay tribute to the late Sir Charles Saunders, famed Canadian cerealist, who developed the Marquis variety.

Ladner, B.C.—In the small brick school house of this Fraser Valley farming centre the world's new wheat king went through his classes as usual today. Gordon Gibson, 13-year-old son of William Gibson, was not yet aware his entry of Reward hard red spring wheat at the Chicago International Livestock show had retained for Canada the coveted world crown and brought the title to British Columbia for the first time. The new grain king shared his honors with a former winner. The Gibson entry was developed from seed purchased in 1929 from Herman Trelle of Wembley, Alta., five times champion.

We all judge the accuracy of a writer at the points where we can test him with most knowledge.

Nippon Defies Great Britain, United States

TOKYO, No. 29—A Japanese foreign office spokesman declared today Japan takes the position that "we do not have to consult Great Britain and the United States regarding our projected actions in Shanghai."

(The United States made formal representations to the Japanese government stating American concern over anything affecting the integrity of Chinese maritime customs.

(Great Britain made similar representations after Japanese made known their intention to control the Shanghai customs.)

"Shanghai presents a problem wherein legal and strategic phases are badly tangled," the spokesman said. "Chinese authority underlies foreign rights and interests. Certainly we do not have to consult Britain and the United States regarding projected actions."

Warns Against Scarlet Fever

Warning to parents that scarlet fever is prevalent in Edmonton with 31 suspect cases reported to health officials so far during November was issued Monday by Dr. G. M. Little, medical health officer.

Number of cases is not alarming or abnormal, the doctor said. He urged that children not already treated with the anti-scarlet fever inoculation be given this preventive. There were 27 cases of "scarlet" during October, health department records revealed. Eight of the cases reported this month were from points outside of Edmonton.

Boy Plunges Into River To Save His Dog

North Red Deer, Nov. 24—An unidentified lad about 12 rescued his dog from the icy waters of the Red Deer river. The dog ran out on the thin ice which gave way and plunged him into the water. He was unable to scramble out as the ice kept breaking under him so his owner sped to the rescue.

Wading up to his waist in the chill water, he reached the dog, and grabbing him, reached the shore safely, climbed the bank and disappeared among the trees.

All Were "Macs" On C.N.R. Train

The "Macs" have played an important part in the building and development of the west. Place names, oftentimes the only memorials created by a grateful country to its pioneers, abundantly testify to this.

That the "Macs" are still in evidence out in the West in these later days is shown by the fact that when a train of the Canadian National Railways pulled into the station at Kamsack, Saskatchewan, recently all the crew members were from Glengarry, Ontario, and all were "Macs". They were J. R. McRae, conductor; I. McKeever, engineer; E. McNab, fireman and C. E. McFarlane, R. R. McLean and G. S. McDougall, brakemen.

Unreflected minds possess thoughts only as a jug does water, by containing them.—S. Coley.

A National Institution

Spread out over the vast area from the Atlantic ocean to the Pacific ocean there are about seven hundred weekly newspapers. Some are old, going back to Confederation, some are comparitively new born, having been rolled from their presses for only a few years. But all of them, no matter where published are intensely loyal to their seat of publication. To them, they are located in the best district, in the best province, among the best people in Canada. That is their creed, a creed to which they invariably render something more than mere lip service.

They solicit the support of the people of the district in which they are published, certainly, but in so doing so they are asking the people to not only help the newspaper, but to help themselves. A country's greatness can be equally judged by the vitality of its villages as by the importance of its metropolitan centres. A country weekly newspaper may be, and frequently is, a paper of Mr. and Mrs.', but the phrase Mr. and Mrs. represent the true structure of the nation.

The Tofield Mercury solicits your subscription and the subscription of your friends and neighbors. For nineteen years we have published for mutual benefit, and hope and expect to publish for some number of years more. Renew or subscribe NOW.

THE WAY OUT —

By Raymond Crawford in the Canadian National Railways Magazine

FROM ALL THIS welter of jealousies, hatreds, fears, wars and rumors of wars between nations and classes, cold and insensate selfishness, blind and cruel injustice, criminal stupidity and a host of other factors contributing to the mad state of the world reasonable people are earnestly seeking a way out. Some have advanced the queer theory that the emotional irrationality which today affects us is due to sun spots. That of course is nonsense, but what is not nonsense is that the world is irrational, and primitive.

Attempts have been made by Great Britain to bring nations to a reasonable frame of mind. Attempts are being made by legislators to bring classes to a more fraternal and normal condition. Economists also are doing their best, but the advance is not what we could desire. For reasonable men there must be a solution, and there is a sure and infallible one, despised it may be by dictators and sentimentalists, and by all who have not the patience to wait for education and evolution.

History does not move very fast and conditions cannot be changed in summary fashion. It should be clear to all that wars cannot bring in ideal conditions between nations, that legislation alone cannot do it in social relations, for wars leave rancours which break out in more scientific and therefore more destructive forms. Economic theories may provide the mechanics of a smooth working society, but fundamental to the mechanics there must be the motive power—the dynamics, that will bring to an end the causes of our woes. Proposed remedies do not go deep enough, do not touch man as a reasonable being with more than a stomach; they must regard him as a being with emotions, aspirations, capabilities of high personal aims and achievements.

It is essentially a moral problem and the way out is an old one—thousands of years old. It is the way of regarding the human just because he is a human, as having rights, and duties as well as rights, who therefore can and must play the game, put himself in the place of his neighbor, see with his eyes, feel with his sensibilities and in a self forgetfulness, which is only the part of wisdom, give him a chance. Power without principle is one of the cruelest of weapons, whether wielded by the slugger in the back alley or the slugger who may be in possession of power anywhere. A great writer has said that man being what he is at present, it is useless to expect any advance in civilization. This gets to the heart of things, therefore we must get other and more human ideals, and the formula for that is a simple, though apparently difficult one.

The Chinese have a wealth of wise philosophy and one of their sayings is never do to another what you would not wish him to do to you. It is the negative way of putting what moralists call the Golden Rule. Would it work? Most assuredly it would. A year or so ago a small group of people settled a serious strike in one of the cities of the Pacific Coast. There was not an economist among them. They were plain ordinary moralists relying on common sense and uncommon unselfishness. It was a gentlemen's agreement, and however we may define the term "gentlemen" it includes at least playing the game.

If we could be induced to try this simple formula, irregularities, injustices, and all that malign brood of suspicion, fear and bitterness would disappear. It is simple, maybe it is slow, but it is a way out and it is the only way out.

200-Mile Trek Made By Pair

After six days of dawn-to-dusk trekking through unbroken bush country living on raisins and chocolate, sleeping without blankets in sub-zero weather and wondering if they were on the right course. Frank Blue and Howard Purkiss of Edmonton arrived at Fort Smith, nearly exhausted, Sunday afternoon, then were flown to Edmonton Monday.

Impatient to reach the city after more than a month's prospecting and sampling on claims of the United Gold syndicate along the south shore of Great Slave lake, the Edmontonians decided to hike more than 200 miles to the aeroplane terminal, against the advice of Indians in the area.

"There was nothing much to it. In fact we rather enjoyed it, most of the time," Frank, son of John Blue, secretary-manager of the Edmonton chamber of commerce, admitted when he arrived in Edmonton. With Purkiss he was flown south in a Mackenzie Air Service aeroplane piloted by Harry Hayter.

"We decided the best plan was to set our course for Smith, travel light and keep going," he explained. "There was some hard plodding, a certain amount of anxious uncertainty and some difficulty at first in adjusting ourselves to the necessity of living completely outdoors with no tent or blankets."

Six days after they set out from the Rocher river area immediately south of Great Slave Lake, the hikers arrived at Fort Smith, worn-out but happy to have made connections with a south bound aeroplane.

Although the nights were not extremely cold, temperatures on several occasions dipped below zero and it was hard to keep warm on both sides at once, the youths said.

"We built a lean-to of branches for shelter each night, then made a fire which had to be replenished at intervals until dawn when the hike was continued. Usually we roasted on the fire-side and nearly froze on the outside." Mr. Blue recollected.

Raisins and chocolate carried in their knapsacks provided energy during the long walk.

"It was a real thrill to be home Monday night, to have a comfortable hot bath and to forget about direction, mileage and raisins." Frank concluded.

Has any tactful hubby succeeded in persuading his wife that a doorknob is the natural repository for spare ties, socks and vests?—Chicago Tribune.

The World Wheat Situation

Unseasonal frosts in Argentina have damaged the wheat crop in that country to an as yet undetermined extent. Although downward revision of the unofficial estimates, ranging from 200 million to 227 million bushels, may not be great, the quality of a considerable portion of the crop is undoubtedly affected, and Argentina will be faced with the problem of marketing low-grade supplies. To the extent that total wheat supplies are curtailed in the southern hemisphere country, the United States may expect to export more of its available surplus than has recently been anticipated.

News fo the frost damage in Argentina, both on November 12th and November 17th, produced a marked effect in North American markets, with prices rising the five-cent daily limit on both days. From early October to November 12th, wheat markets were influenced principally by the trends in the securities markets. After displaying strong resistance to the stock market decline which commenced in mid-August, wheat prices yielded to the influence of security prices and moved sympathetically downward until the news of the Argentinian frost on November 12th, when they took an independent course. In view of the strong relation which has prevailed between security prices and wheat prices within the past six weeks, developments in securities must continue to be reckoned upon in appraising the wheat situation.

From early October to the present time world shipments of wheat have shown the usual autumn seasonal increase, and the weekly amounts shipped have been holding at slightly under 12 million bushels. From August 1st to November 13th, the total amounts shipped were 136.8 million bushels or 18 per cent below 167.1 millions shipped in the same period in 1936. North American shipments were 52.3 million bushels during this period, compared to 86 millions shipped a year ago. Russian shipments are up from 88,000 last year to 22.9 millions this year. Australia continues to export between one and two million bushels weekly, while Argentine shipments, under the recent governmental ban on exports were nil in the week ending November 13th. The ban has since been lifted.

During the current season the importing countries have been primarily the United Kingdom, Holland and Belgium. European wheat production this year is such that Germany and France are likely to be the largest occasional importers, while Italy, with a much superior domestic crop this year compared with that of 1936, will probably take only minor amounts. Ordinarily, these later-mentioned countries utilise their domestic supplies during the autumn months and commence their import purchases when the southern hemisphere crops are freely offered. It is probable that December and January will witness market support from these continental sources.

World wheat production in 1937 is now placed at 3,817 million bushels which is an increase of 281 millions over the production in 1936. European wheat production, excluding the four Danubian exporting countries, amounts to 1,181 million bushels, showing an increase of 83 millions over the 1936 harvest. The 349 million bushels crop in the Danube is down 34 millions from the 1936 level of 383 millions. The increased production in continental European importing countries this year is contributing toward a lower volume of international trade in the 1937-38 season, as compared with that of a year ago.—Dominion Bureau of Statistics.

Boy Turns Table, Hunts For Hunters

Castor, Nov. 30— Twelve-year-old Leo Paul snickered Monday as he told how he went out to search for a party of searchers who were searching for him.

It happened last Thursday. Leo, who lives on a farm near here, left home on foot just before dark to bring in the cows. Shortly afterwards a blizzard started and his father, on horseback, rode out to help him.

His mother, frightened by the wind's howling, and the boy's long absence, sent out a call for help over the district's party line. She told of a pack of eight coyotes she had seen in the pasture a few days before and expressed fears of her son being eaten by them.

The mother's fears were dismissed a few minutes later when Leo guided by a lamp in the window of his home, returned. Arming himself with a lantern, the boy then set out to call off the search and tell them that he wasn't lost.

Preserving the health by too strict a regimen is a wearisome malady.—La Rochefoucauld.

Believes Drouth Problem May be Ended

Canada's "clover king" left Edmonton Tuesday for his northern Alberta home, convinced he knows the solution to southern Alberta's drouth problem.

"Plant crested wheat grass— and forget about rainfall," is the advice offered to dry-belt farmers by 62-year-old William James Bryant, from whose lands at Boyle, 100 miles north of here, prize-winning samples of sweet clover have gone year after year to exhibitions in Edmonton, Toronto and Chicago.

Last week, for the fifth year in succession, his clover entry won the all-Canadian championship in Toronto's Royal Winter fair. And at the international grain show in Chicago Monday, he placed second to a North Dakotan in an effort to become clover king of the world.

Mr. Bryant was discussing agricultural technique with members of the University of Alberta staff here Monday when he learned what had resulted at Chicago from his first entry of a crested wheat grass sample in any grain show.

He placed sixth.

"But that's the stuff I'm most interested in just now, nonetheless, and I'm going to keep plugging away at it," declared the burly, weather-beaten farmer, whose alert blue eyes peer humorously through thickened lensed glasses.

"I am solidly convinced it holds the salvation of our drouth problem. The toughest, hardiest, grain yet developed—plant it and forget about rain, that's my advice. It's wonderful."

Winner of 63 prizes in five years of exhibiting, the Boyle man didn't get into his "life work" until he was 50, he confided. "But it's got a grip on me now—I won't be quitting until I fall over, or go blind," he grinned.

He was grand champion of Alberta in 1934. That same year he captured second prize at Chicago when competing for the wheat championship of the world.

Mr. Bryant, who left for the north at 9:30 a.m. Tuesday on a N. A.R. train which travels to Waterways, suffered a loss Oct. 1 in the death of his wife, who had been his constant partner in all his show-entry efforts. Now he is living with his 16-year-old grandson, Freddie Grove.

"I'm going to break him in to the grain business to help me the way my wife did and to carry on after I'm gone," the veteran farmer told a newsman as the train started.

Crested wheat grass, imported by America from Russia some years ago, is a drouth-resistant grass which survives extreme periods of dry weather and yields satisfying fodder crops and hay. It is not a grain, and is not meant to take the place of wheat except that many observers are hailing it as a means by which drouth-stricken farmers may obtain rich pasturage and high quality hay regardless of arid conditions. It is a green grass, with a broad head slightly resembling wheat. It was popularized largely in Canada by Dr. L. E. Kirk, dean of agriculture in the University of Saskatchewan.

Say 'Open Door' Is Being Closed

Washington, Nov. 30—U.S. department asked its consular representatives in China Tuesday for information on a report customs rates at Tientsin, North China, were reduced on a wide range of Japanese products.

If the report proves correct, informed sources said, it will mean Japan already has started closing the "open door" of commercial equality in China for all foreign nations.

Fears here for the future of China's "open door" have already prompted the U.S. government to warn Japan not to attempt changes in the Chinese maritime customs before consulting Washington.

The Japanese military exercises control now over most of North China and Shanghai, China's wealthiest seaport.

Geological Map of Alberta

A new geological map of Alberta has just been published on a scale of one inch to sixteen miles. The map is printed in fifteen colors as soft tints which are easy to read. Each color represents a certain division of geological time which is designated in the legend. On the black base is shown the geography; the geological boundaries; and the culture, which includes the township and range lines; all the railways; the cities and several towns. All the surveyed lines, including the base lines are shown.

The topography is shown by brown contour lines, with 400-foot intervals up to 5000 feet. The topographical and geological data shown on this map have been compiled from maps and reports published by the Topographical Survey and the Geological Survey of Canada, and by the Research Council of Alberta.

About one-half of the entire area of Alberta remains unmapped geologically in detail. It is only a part of the foothills and the plains of Alberta in the south half of the province which have been mapped in detail. Only two geological divisions are shown within the Rocky Mountains, namely, the older Precambrian and early Palaeozoic in the western part, and the Palaeozoic and older Mesozoic in the eastern part of the mountains. The Precambrian area in northeastern Alberta is undivided as detailed geological surveys have not yet been made.

In the foothills and plains the distribution of all the major geological formations in the Cretaceous and the Tertiary are shown. The map can be relied upon as a useful guide by anyone interested in the mineral development in Alberta. A phamphlet is being prepared which will describe the geological features which have been included.

The map has been compiled by Dr. J. A. Allan of the Department of Geology, University of Alberta, and is a revision of the geological map which he prepared and which was published by the Research Council of Alberta in 1928. This revised edition has been publishhed with the co-operation of the Department of Lands and Mines, Edmonton. Copies of the map may be secured on application to the Department.

LINCOLN'S CONSCIENCE

As a rule men with bad cases did not go to Abraham Lincoln to defend them, for it was notorious that he was a poor lawyer in a poor case. When he saw weakness in his case he lost courage.

It is related that once in the midst of a trial he turned to his associate counsel and exclaimed, "This fellow is guilty; you defend him I can't.

PATHFINDING

Established in 1817, the Bank of Montreal was the first permanent bank in British North America.

Inaugurating branch banking in Canada, it was the first bank in the capital of Lower Canada, first in the capital of Upper Canada, and first of the present banks in Bytown, afterwards Ottawa, the capital of the Dominion. It was the first permanent bank to be established west of the Great Lakes and the first to achieve a transcontinental system of branches.

The first institution to provide Canada with a domestic currency, both bills and coinage.

The first bank to assist in financing the foreign trade of Canada.

The first banker for the Government of Canada.

The first bank to help finance the improvement of the St. Lawrence Waterway, through the assistance it gave to the building of the first Lachine Canal.

From its inception the Bank of Montreal has held the confidence of the Canadian people. Today that confidence is expressed in the fact that the Bank holds more than one million deposit accounts, equal to a deposit account for one in every two persons in the entire Dominion.

Canadians naturally expect, as the sequel to such a record, that this Bank will retain the spirit of the pioneer in co-operating with the future business life of the nation.

LINDBROOK

Best wishes to Mr. and Mrs. Harry Logan (nee Miss Gladys Johnson) both of this district on the occasion of their wedding, which took place in Edmonton, after which they returned home here, so here's long life, health, wealth and happiness from all your friends of the Lindbrooks district.

The above young couple were the surprised recipients of a chivaree last Saturday week. Quite a crowd gathered at their home to celebrate the wedding. Dancing was the order of the evening and all present enjoyed themselves immensely.

We are glad to report that Mr. Ralph Kortzman, son of Mr and Mrs. F Kortzman of Lindbrook returned home on Sunday from the Royal Alexandra hospital, Edmonton, where he recently underwent an operation for appendicitis and we are pleased to say that he is convalescing rapidly.

It looks as if winter is here, but so far the cold has not been severe enough to worry about.

We understand a meeting was held at the school one evening last week when the new school act respecting the reorganization of school affairs, notably the "larger district" scheme were discussed. The general sentiment seemed to be against the scheme, and a petition protesting same was signed and is to be sent to the government.

Several parties from here attended the Social Credit gathering for this constituency which was held at Mundare.

We have just received the sad news of the death at Elk Point, Alta., of Mrs H. R. Hobbs, former resident of this district when her husband was section foreman for the C.N.R. here. Deceased was well liked and respected by all here. She leaves to mourn her loss, her husband and one son, Leslie of Nanaimo, B.C. Her youngest son, William was, it will be remembered, fatally wounded in a bank hold-up in Vancouver a year or so ago. The sympathy of all the old friends of Lindbrook is extended to Mr. Hobbs and Leslie on this their sad loss. Interment took place at Elk Point, Alta., on Monday, November 29th.

Sharing

"Pardon me for walking on your feet," said the polite passer-by.

"Oh, don't mention it," returned the equally polite victim. "I often walk on them myself."—Pearson's.

OBITUARY

There passed away at the Royal Jubilee Hospital on November 18, Peter Frederick Ingram, aged sixty-six years of 1779 Fort Street. The late Mr. Ingram was born in Woodstock, Ontario and had been a resident of Victoria for the last eighteen years and for many years of Edmonton and Tofield, Alberta. He is mourned by two daughters, Misses Jessie and Stella at home; also four brothers and three sisters, Wesley of Victoria; Emerson of Edmonton; and Charles and James of Tofield; Mrs. G. Owen of Edmonton; Mrs. W. Sears of Tofield and Mrs. Overton, Iowa, U.S.A.

The funeral took place on Monday afternoon at 2 o'clock from McCall Bros. Funeral home, Rev Alan Gardiner conducted the service after which interment was made in the family plot at Ross Bay Cemetary.

Teachers of Holden Division No. 17 Meet

About sixty teachers of the Holden School Division No. 17 met in the Community Hall at Holden on Saturday, November 27. Mr Hemphill of Kinsella gave a short talk on salary schedules in Divisions already established. There was some discussion of Musical Festival, Track Meet and Convention. At the close of the afternoon the Holden ladies served lunch.

Officers elected were: President, Mr. W. Dean, B.A. Viking; Vice-president, Mr. O. P. Thomas, B.Sc. Tofield; Secretary, Mr. L. C. Hergott, Bruce; Press Representative, Mrs. M. C. Selkirk, B.A. Holden.

Five temporary directors appointed to consider the matter of salary schedules were: Mr. James Campbell, Tofield; Mr. A. Richardson, Ryley; Mr. S. Billows, Holden; Mr. G. Dalsen, Bruce; Mr. Hemphill, Kinsella.

The next general meeting of this organization will be held in the early spring.

Social Hour Club Meet

The Ketchamoot Social Hour Club held their November meeting at the home of Mrs. W. J. Ingram. Quite a number attended it. Guests present were: Mrs. O. Barnes, Misses Nellie Lindsay, Marie and Evelyn Lawson, Eileen Stirrett, Lillian Sutton and Maude Wildman. It was decided that instead of the regular meeting which was to be held at the home of Kathleen Ingram, to also have the annual tea and bazaar. The date is Thursday, December 9th, so remember the place—at the Ingram home, and the date and be sure to come.

Miss Forster, Primary Teacher to Leave Here Seven Years

Miss Forster, teacher of the primary school here for the past seven years has handed in her resignation to the local school board. We understand Miss Forster is leaving on account of her approaching marriage. Miss Forster has been an exceptionally good primary teacher, having consistently received the highest gradings possible. She has also taken leading parts in several amateur play productions here. We understand a meeting of the school board will be held tonight to appoint a successor.

Bridge, Whist and Cribbage At the Curling Rink Last Wednesday

On Wednesday last, a nice crowd of fifteen tables assembled at the curling rink where bridge, whist and cribbage was played. The curling club were generous by awarding prizes for all three games but the complete list of awards have been lost track of. The usual lunch was served, the event we understand, being both a social and financial success.

Grand Matron of Alberta—Eastern Star Visits Tofield

On Monday last, Mrs. Turner of Edmonton, Grand Matron of Alberta, Eastern Star, visited Tofield. There were some 35 visiting ladies from Edmonton who chartered a bus for the trip. In addition a number of ladies from Viking and Wainwright were present. Special lodge ceremonies were carried out as well as a delightful social time being spent.

Orchestra To Be Re-Organized

Joe's Melody Makers, the orchestra that has been playing for most of the Tofield dances for some time past is now in course of re-organization, Mr. Griffith announces. New players are being procured and ere long the orchestra will be all set to go.

Business Change

A business change of interest took place this week when the Central Meat Market changed hands. Mr Foss who has operated it for the past year selling out to Walter Schultz. Walter, son of Mr. and Mrs. T. Schultz needs no introduction, being well known throughout the district. Mr. Foss, we understand has other business interests elsewhere.

All Set For Winter Skating

Well, here we are and its December, and the Tofield Skating rink is all ready to go. The opening night was on Wednesday when a large number of both young and old skaters took full advantage to limber up their legs for the coming winter season. This year the rink will be operated by Allistair Swinton under much the same rules as last year.

1,000 Cars Food Aid Drouth Area

Ottawa, Nov. 30—Last of the 1,100 cars of foodstuffs sent by the dominion government into the drouth areas of Saskatchewan and Alberta are going forward and the department of agriculture which handled the movement has received many messages of thanks from the needy western farmers.

One of the plans followed by the department was to supply the westerners with food to which many farmers had not been accustomed. An effort also was made to relieve markets in the other parts of Canada which would otherwise have been glutted.

A family of five was supplied with 25 to 30 pounds of cheese, a bag of beans (50 pounds) a bag of turnips, a barrel or three boxes of apples a supply of other fresh vegetables and from 50 to 60 pounds of dried fish. In this way the cheese markets in Ontario and Quebec, the apple markets of British Columbia and Nova Scotia, the vegetable markets of Ontario and Manitoba, and the oversupply of dried fish in the Maritimes were all relieved.

More's the Pity

Auntie: "I do hope you will like my present. I couldn't decide whether you would like a large check or a small one."

Impecunious nephew: "Any cheque would be ripping, auntie."

Auntie: "Ah what a pity I bought you a stripped tie after all." Philadelphia Bulletin.

British Doctors Are Advertising

London (Sup).—For the first time since its foundation 105 years ago, the British Medical Association is making a direct appeal to the public through newspaper advertising.

Advertisement in any form by doctors is forbidden by the General Medical Council and the B.M.A. has always refrained from advertising its activities.

In its first advertisement the B.M.A. deals with its proposals for a general medical service for the whole nation. The scheme which was first published in 1930 seeks to provide a complete medical service "based upon the family doctor, whom no individual and no communal health service can replace.

It enjoins everyone to take part in the campaign for national fitness and public health, and sets out the work which the medical profession has already done in this respect.

To carry out its new policy the B.M.A. has appointed a public relations officer and engaged the services of a firm of publicity experts.

KINGMAN

Mr. Tom Gibson and family, Mr. David Stutzman and Miss Fannie Bender left for a three month's visit in Ontario Tuesday morning.

Mr. Christenson, Mr. A. Soma and Mr. Hugo Hovelson returned from their hunting trip near Edson, Alta. They got a deer, moose and elk in return for their efforts.

Miss Sarah Stirret is staying with Mrs. Wilson while attending high [illegible]

Mr. Babbits, who has been working on the railroad with Mr. Lindberg has been laid off for the winter and has gone to Edmonton.

On last Friday the Baptist church was moved on the foundation which made quite an improvement in the appearance of the building.

Mrs. Haugen and her daughter Mrs. Horte arrived home from LaGlace last Friday.

First Hockey Game Played This Season

On Wednesday evening the Hasting Lake Flyers met Tofield in the first game of the season. Both teams played fair hockey and by all appearances Tofield will have a "heads-up" team this year. The final score was 7-0 for Tofield. S. Burke handled the bell.

LAKESHORE

Mr. Donald Booth of Athabasca is visiting friends and relatives in this district.

A dance was held in the Community Hall on Friday last. Everyone reported an enjoyable evening.

Owen Eaton and Floyd Norton returned on Monday evening from their hunting trip at Tomahawk. They were successful in bagging a deer.

Mrs. Herman Tiedeman is visiting in the city for a few days this week.

The Ladies' Aid held a meeting on November 24 at the Lester Noland home.

L. H. Graham was a visitor to the city on the 25th and 26th.

Quite a number from this district attended the Old Timers dance at the Macdonald Hotel on Thursday. Those attending were: Mr. and Mrs. T. A. Jones, Mr. and Mrs. J. H. Johnston, and Mr. and Mrs. Herman Tiedeman.

Mr. and Mrs. J. B. Warner and family were visitors to the city on Saturday last.

R. C. Phillips left on Saturday for the Pacific Coast where he will spend a month visiting relatives and friends.

Owen Eaton and Floyd Norton are hunting in the Tomahawk district.

Wesley Weeks spent a few days in the city last week.

Mr. and Mrs. Howard Ferguson and Marjorie Ferguson spent the week end in the city.

BEHIND THE HOG

By A.B.C.

Ho, Ho, we get up in the morning and go to bed at night, and we call it life.

0-0-0-0

We expect to confine our activities this season to jokes old and new, remarks on curling and people in general. The several members of our staff will be snooping around the rink, so watch your step.

0-0-0-0

Some of our jokes come out of the air, some from funny papers, but the local ones we manufacture ourselves.

0-0-0-0

And folks, I still have three sides to all my stories, Yours, Mine and the Truth.

0-0-0-0

If you like this column, tell your friends—if not let me know.

0-0-0-0

The Curling Season opened with a Gala night. The Ice was decorated with the Club Colors and the Welcome signs were out. Art had the ice in lovely shape and the lassitude and Loungitude in the waiting room was perfect. The conversation was general, ranging from curling to what have you. In fact, it looks like a very interesting season. Doc has a B.A. rink and I still have a A. B. rink. I don't know the other rinks so well, but the Glen Woods "Kid" rink looks good. Among the throng we noticed Mayor "Charlie" Swift and wife, Mrs. Dr. Law (President of Ladies' club) and the Doctor, P. Obediah Thomas, Pres. of the club, Willie Chapman, secretary, John Morton, Draw man, The Teachers, Preachers and Butchers, and gobs of other folk whom we will pan before the season ends.

0-0-0-0

One curler asked the Secretary if he ever saw anything so unsettled as the weather. The secretary replied, "I'll say so, the curling fees."

0-0-0-0

You ask me why I go on singing songs
And weaving fancies into halting rhyme,
You who have never heard the fairy [illegible]
And think that dreaming is a waste of time.
And so I sing, my heart be sad or gay,
My little songs (to hope is ever meet)
Knowing full well on the drabest day,
They'll help to make what might be bitter, sweet.

0-0-0-0

We are so full of the Xmas spirit this issue that we won't even slam the office door.

0-0-0-0

A Scotch curler asked another, "How's your cold," and he said "Verra Obstinate." "And how's your wife," he said. He replied, "About the same."

0-0-0-0

No curlers are perfect, and some are absolutely impossible.

0-0-0-0

This weeks brain wave—What we need at the rink is more wagon tongues and less tongue waggings.

JOBB and Co.

AMISK CREEK

The Ladies' Aid held their annual meeting at the home of Mrs. E. A. Moen on Tuesday, November 30th. Most of the members and many visitors were present. There were no new officers elected, the same ones to serve another year—Mrs. C. Ward, president; Mrs. I. C. Olson, vice-president; Mrs. C. Erickson, secretary-treasurer. It was decided at this meeting to make donations to the Old People's Home in Bawlf, the Wood's Orphan home in Calgary and also the usual donation for the congregation budget. The men met the same day to discuss congregation affairs.

The Young People held their election last Sunday evening. Glenn Olson was elected president, Mrs. C. Erickson, vice-president; Lillian Patterson remaining secretary-treasurer for another term. There was also a Program Committee, Lunch and Entertainment Committee elected.

Mr. E. A. Moen was a delegate to the Municipal convention in Edmonton and for the Wheat Pool Convention held in Calgary.

Mrs. R. O. Berg left for Edmonton Monday morning. While there she expects to undergo an operation. At present she is staying with her daughter to gain strength.

We regret to report that Mrs. Karen Olson, who is very ill, is not improving very quickly.

Mr. A. Erickson spent a few days in Edmonton taking in the Old Timer's celebrations.

Hilmar Moen, elevator man at Phillips, visited at his parent's home here over Sunday.

Miss Morrison, Alice and Arnold Berg motored to the city Saturday, returning the same evening.

Our deepest sympathy is extended to Mrs. Amanda Haugen and daughter Folrence, Mrs. Gertude Haugen and daughters and their families in their recent sad bereavement. We also extend our sympathy to Mr. and Mrs. Raymond Nordhus, Mr. and Mrs. W. Jngram and Mr. and Mrs. A. Kinley and family in their sad bereavement.

Miss Magda Annebo is assisting at Brown's store in Ryley this week.

Rev. Hoverstein held his farewell sermon in the church here Sunday, a week ago. He is leaving for the States soon.

Mrs. P. O. Flaaten visited at the J. Berild home on Thursday of last week.

C.C.F. Club Held Meeting

The regular meeting of the Tofield C.C.F. Club was held in the Institute Rooms on the 30th of November with Mr. A. J. Harrison in the usual place.

After the usual formalities or should I say informalities, the following program was adopted.

That we meet the second Tuesday of each month in the Institute Rooms at 7:30 sharp and that following the study period we have a social hour and a light lunch, of course the ladies are the goats in that case but if the men were to take upon themselves the lunch part we wonder if it would be as light as a midnight lunch should be.

We are going to study chapter by chapter "The Case for Socialism" by Fred Henderson, so if anyone is interested either affirmatively or negatively in Socialism, we will be glad to have you come and take part in the discussion.

The program to be as follows when the blanks are filled:

Dec. 14—2nd chapter "Socialism and Confiscation" by Allan Harrison. 3rd chapter, "Socialism and Personal Property."

Jan. 11—Chapter 4, "Socialism and Liberty," led by Mr McDonald. Chapter 5 "Socialism and Officialism."

Feb. 15—Chapter 6 "Socialism and Unemployment" by Mrs. W. H. Anderson.

March 8, Chapter 7, Socialism and Waste."

April 12, Chapter 8 "Socialism and Human Nature." Chapter 9 "Socialism and On Being Practical."

May 9th, "Marxian Socialism" by O. P. Thomas. "Co-operation in the Scandinavian countries and the U.S.A." by A. P. Moen.

Mr. A. J. Harrison then gave us a very comprehensive review of "The Conscience of the Rich when Confronted by the World Crisis" and the first chapter of the above mentioned book, "The A.B.C. of Socialism." Following questions and a good discussion, as the hour was getting late the discussion had to be discontinued but was continued through the lunch period.

LOCAL & PERSONAL

The slippery condition of the roads during the past few days have resulted in much skidding of cars and a few upsets. Norman Scott's car skidded and turned over on Tuesday and J. Warner's car skidded into the ditch on Monday. Fortunately no one was hurt in either case.

Give her a permanent for Christmas. They can be obtained at the Vanity Beauty Skoppe at reasonable prices, Phone 9. Make your Christmas appointment early.

We regret to report that Adam Hummel was taken ill and is now back in the hospital.

Mr and Mrs. A. B. Clutterham motored to Edmonton on Sunday.

Mrs. Malcolm and Muriel spent a couple of days in Edmonton last week.

Mr. Max Rogers spent the week-end at his home here.

Mrs. H. Kendall has gone to Edmonton where she will spend the winter with her daughter Florence.

Barney Kendall has gone to Sunnybrook for the winter.

Mr and Mrs. Billman left Wednesday morning for Victoria.

Student's Union Annual Concert A Success

Friday evening last the Student's Union held their Annual concert. The students presented a very enjoyable and varied program, all numbers being greatly enjoyed by the large audience. Plays, quartets, instrumental numbers, tap dancing, solos and recitations made up the program. All those taking part and those who directed numbers are to be congratulated.

UNITED CHURCH NEWS

The Y.P. held their regular meeting on Tuesday evening, December 7. There was a good attendance. After the opening ceremonies and the business of the organization was completed. Mr. O. P. Thomas, principal, gave a well thought out address. He chose as his theme "My Philosophy of Life." Mr. Thomas showed familiarity with the growth of Philosophy all through the centuries. He emphasized the truth that each one ought to have a way of life that he follows and finds satisfaction in so doing. His address was well received and appreciated.

The recreational period is greatly enjoyed —a ping pong set and balls have been added to our accessories. The refreshments are always good.

The scholars in the Sunday School are getting ready for the Christmas entertainment which we understand is to be held on Tuesday evening, December 21st.

On Monday evening, 13th, the Y.P. are holding a skating party. It should go over big as the ice is in fine shape.

Whist Drive Dec. 17th

A whist drive will be held in the Institute rooms on Friday, December 17th, when the "Christmas dinner" consisting of turkey, beef, etc., will be drawn for. These have been generously given to swell the funds of the Anglican Church. Buy a ticket—you can get them from Walter Bellamy.

Mr Johnston Ferguson has been very ill this week, but we are pleased to say that last reports are that he is improving.

Competition for Canada

The Argentine intends in future to sow only wheat varieties of high "milling" quality

Western farmers should strive to keep ahead by, in turn, using only good seed of recommended varieties.

See the nearest Searle or Home Agent.

SEARLE GRAIN COMPANY, LIMITED 44

The Modern Separator
—Greater Capacity at Less Cost—

The new ball bearing Renfrew separator will be a revelation to those laboring with an old and perhaps obsolete machine. Separates in half the time with half the effort. It has half the cost of upkeep and double the life of many of the older makes and is a good investment. Comes in four sizes. Come in and see it.

Demand Inquiry To Cut Gasoline Price In Alberta

An investigation of gasoline prices in this province with a view to bringing about a substantial reduction is to be proposed when delegates to the annual meeting of the Alberta Motor Association assemble at Calgary shortly.

Approval of a resolution of this kind for submission to the provincial meeting was given at the annual meeting of the Edmonton branch and is expected to receive endorsement from other parts of the province.

Report of the Macdonald commission in British Columbia which found that gasoline could be sold for 18 cents per gallon in that province, has spurred Alberta motor clubs to fresh action on this question.

One speaker at the Edmonton motor club meeting declared that he had bought top grade gasoline in Vancouver for 21 cents per gallon. He was confident Alberta prices were out of line and should be brought down.

The A.M.A. has on several occasions taken up the matter of gasoline prices, making representations to the provincial and federal governments. These representations had [illegible] with the federal government undertaking an inquiry into gasoline prices some years ago.

Suggestions are advanced that the time is ripe for another federal or provincial inquiry into gasoline prices.

Regularity

For too many people look upon life as a hit and miss affair. They will tell you that they just take what comes by following the stream of existence wherever it leads them. There is a certain amount of pleasant philosophy in that way of living but the truth of the matter is that life was [illegible] to be lived that way. Take a look about you. All the laws of nature disclose to an [illegible] person and there is a plan which follows a definite course, whether it be the coming and going of the seasons, the rising of the sun, the blooming of the flowers or the fading of the leaves. Why is that? Because nature is not a hit and miss affair. Nature does things according to schedule and with constant regularity. Nature can be depended upon no matter what occasional divergencies she may show.

Man was created as part of nature's plan. The laws of nature if kept or broken bring their appropriate rewards.

When it comes to ordinary habits we should be guided by a plan which is constant and regular. Now that doesn't mean that we suggest a humdrum or monotonous existence, not at all. But it is necessary to have meals at regular times, to sleep just when one can conveniently do so, to exercise not just as the spirit moves one, to make life worth living. On the other hand the person who cultivates regular habits of eating, sleeping and exercise will be the healthier for doing so. It is a well known fact that boys and girls and older people too, when living under conditions where regularity of life exists, feel better and look better. The human body tends to thrive on regularity of attention.

One of the commonest complaints to which mankind is heir is constipation. And one of the commonest causes of constipation is neglect. The desire to go to stool may assert itself but the individual is busy about something else and the desire is not acted upon. Your doctor will tell you that one of the best ways to avoid constipation or to correct it is to establish a regular habit of answering nature's call. Even though results are not always satisfactory stick to the habit and you will be gratified to see how it will help you to avoid or overcome this common complaint.

Questions concerning Health, addressed to the Canadian Medical Association, 184 College Street, Toronto, will be answered personally by letter.

Short Shots In "Canada 1937" Series

Walter Bowles, Roving Radio Reporter, broadcast from temporary studios at Sydney while CJCB's regular studios were being frantically re-conditioned after gutting by fire.

Same night Vernon Bartlett in Brussels, 3 A.M. over there, last page of notes during interview, it floated deep under great cupboard to be retrieved later only with aid of umbrella. Bartlett had to ad lib [illegible].

Walter bringing coffee to hotel room of arranger asks what writing is. Arranger says afraid it would be Greek to waiter—waiter says: "That not Greek—me Greek".

Victor George, producer of series had morning telephone call to Buenos Aires, few days ago, delayed because it was lunch time down there at beginning of Summer, talked with London shortly after locating Bartlett having dinner in famous Cafe Royal.

London engineer lining up with Canadian and transatlantic circuit hits good channel and says in broad English accent and inflection—"That seems to be the ticket—shall we put [illegible] waves to bed?"

Smooth functioning of orchestra and choir result of great deal of work. Orchestra has six to seven hours as a unit plus individual work, choir has regular schedule ten hours—more if required.

Russ Titus whispering baritone [illegible] when occasion demands, will soon be given opportunity.

Pauline Winters, girl soloist, got break through answering advertisement being chosen from some three hundred applicants. All contestants were known only by a number until the final selection by adjudicators listening in distant office.

Hazards on program many and varied, one program may encounter stiff censorship in Europe, sun spots over Atlantic, sleet in Maritimes, thaw in Ontario, blizzard on Prairies, landslide in Rockies, just as happened on second broadcast—David Scott delayed to last minute by Paris taxi breakdown.

"Canada 1937" is indeed nervous production job.

THE WORLD OF WHEAT

By R. C. L. Strange, Director Research Department, Searle Grain Co.

Argentina is making strenuous efforts to improve the quality of her wheat. She hopes eventually to offer on World markets qualities equal to Manitoba No. 1 and No. 2 Northern.

As a first step, news dispatches tell us, the Argentine has established a grain office in London, not for marketing wheat, but to find out which varieties that can be grown in the Argentine will best please British and European millers.

It is then the intention of the Government to arrange for the growing of large quantities of pedigreed seed of the selected varieties, to offer this high class seed to farmers at reasonable prices, and to induce them to use, in each district, a recommended variety only.

The Argentine evidently simply intends to adopt the identical method Canada has been successfully using for over thirty years. Noteworthy is this new threat to Canada's wheat supremacy must be taken seriously. We cannot afford to rest on our laurels.

Canada, however, can retain the leadership in wheat quality she now enjoys provided our farmers will put forth still further efforts by using only good seed of recommended varieties.

The "Crop Testing Plan" results reveal that 40 per cent of our farmers are not growing recommended varieties, neither are they using the best seed, so there is evidently much room for further improvement.

Following factors have tended to raise price:—Wheats of high milling "strength" scarce on World markets—Frost and some rust reported in Argentina—Reduction in the Argentine official wheat acreage estimate—Sweden in market for Canadian wheat—Danubian exportable wheat surplus may be only fifty million bushels—Rains needed for germination in India—Chinese walnut exports decline.

Following factors have tended to lower price:—First Argentine wheat yields unexpectedly high and of excellent quality—Heavy rains relieve South African drought—Searle precipitation report gives more promising outlook for the Prairie Provinces—Mexican West Coast winter vegetable plantings increase.

Tankage Displaces Costly Minerals

Dominion Experimental Station, Lacombe—Weekly News Letter

When the swine ration contains six percent of tankage there is no advantage in adding mineral supplements. That is the finding of the Dominion Experimental Station, Lacombe, as the result of an experiment just completed.

In this experiment, three uniform lots of pigs were all fed a basic ration of grain containing six percent tankage. But the first group received only these feeds, while the other two each received, in addition, an allowance of a different commercial supplement, in the proportion recommended by the manufacturer.

When all the pigs had gone to market and the results were compiled it was found that not only had the lot receiving no separate mineral supplement made slightly greater daily gains, but it had also produced a greater net profit than either of the lots which had received commercial minerals in addition to grain and tankage.

Place For Minerals

Thus, when tankage was fed, there was apparently no advantage in adding extra supplements. But experiments at Lacombe in 1936 and 1937 showed that when no tankage is fed mineral supplements will materially increase the rate of gain and decrease grain requirements.

When tankage is at all reasonable in price it is more profitable to feed grain and tankage than grain and minerals; but it is always much more economical to supplement the grain ration with either tankage or minerals than to feed grain alone.

More Tankage Better

In the 1937 test a fourth lot of pigs produced even greater and more economical daily gains than the lot fed six percent tankage. This fourth lot received twelve percent tankage until the pigs averaged 110 pounds in weight after which the tankage allowance was reduced to six percent, the same proportion as was fed to the other lots.

Give some of these Practical GIFTS
How many of the gifts you gave last Christmas are still remembered? How many are still being appreciated? You will find that every carefully chosen Electrical Gift you gave, is still bringing happiness . . . is still reminding someone of your thoughtfulness. So this Christmas, make sure that the gifts you give will keep on giving for years —by giving only Modern Electrical Appliances.

Cattalo Calves To Montreal

Montreal, Dec. 6—After a journey from Alberta in a Canadian National cattle car, five Cattalo calves have taken up temporary residence in the Montreal stockyards to be the cynosure of curious eyes. When they are put up for sale it will be the first time Cattalo have been offered on the public market. Fruits of an experiment, they are a cross between the domestic cow and the bison—better known as buffalo—of the Western plains. The calves weigh between 200 and 300 pounds.

FREEDOM OF THE PRESS—

EDITOR'S NOTE. The following editorial taken from the Western Producer, was brought in by a subscriber who asked us to comment upon it. Comment would be of little value unless the Western Producer editorial was first read. Therefore we are publishing it this week and will make our comment next week.

THE QUESTION of the freedom of the press has been raised in this and other countries. It is proving to be no flash in the pan for it will not down. It is being discussed from many angles by various kinds of people with varying motives.

It is safe to say that a vast majority of enlightened men and women, if asked the question: "Are you in favor of the freedom of the press?" would emphatically and without hesitation reply in the affirmative. But if the same individuals were asked whether they were satisfied with the manner in which the newspapers are being conducted today, there would be nothing like the same unanimity. The reason, as has frequently been pointed out in these columns is fairly obvious. The modern large circulation daily newspaper is big-business—it is a luxury which can be afforded only by the wealthy. It must depend for its profits—which are essential if it is to survive—upon the patronage of large advertisers. It is not suggested that these advertisers drop into the editorial offices every morning and dictate to the editor what he is to write. It is suggested, however, that the ownership and the chief source of revenue—both generally representing large aggregations of capital—do, except in extremely rare instances, determine the editorial policy of the daily press. The resulting effect on what is called "public opinion" is often disastrous so far as the interests of the people as a whole are concerned. In this connection, the Archbishop of Dublin, in a recent address to the General Synod of the Church of Ireland, said:

> "What is called public opinion today is not the net result of the working of many minds; public opinion today is organized and marshalled by means of the propaganda and publicity methods with which the mass of individuals is besieged by the few.
>
> "Opinion is handed out ready-made; even the very facts which are the material with the aid of which opinion should be formed are rationed; the public is told what is good for it to know, with lavish suppressio veri, if not suggestio falsi (suppression of the truth or false implication.)
>
> "And with the successful use of these methods, the indispensable conditions of democratic government—viz., intelligent interest in public affairs and sense of individual responsibility—are becoming increasingly absent."

When the interests of common men and women run counter to those of finance capital which controls the newspapers, what are they to do? They are free, it may be said, to start newspapers of their own—a statement which is on all-fours with the remark of Anatole France to the effect that Frenchmen are all equal in the eyes of the law—the policemen will arrest with equal alacrity the beggar or the millionaire if found sleeping on the benches in the parks or under the bridges. The people have not got the million or so dollars necessary to start a newspaper. For instance, recently a couple of long-established papers in Toronto were purchased by a successful mine-owner and united, and have since wielded considerable influence in Ontario in expressly advancing the case of the mine-owning class and big business in general. Doubtless the mine-workers and industrial employees in that province would like to have a similar instrument to plead their cause before the public and they are quite free to have one—if they can muster 10,000,000 dollars. But they cannot and is it, therefore, strictly accurate to say that freedom of the press exists when in practise what does exist is the control of the major vehicles of news and opinion by the millionaire class?

We are here simply posing a few questions. Let it be admitted that in trying to remedy the condition some suggested cures might be found to be even worse than the disease. But that there is a disease is beyond question. Freedom of the press in the old days was one of the principal factors in breaking down ancient tyrannies, but this modern freedom of the press, so-called, may be a prime factor in fastening new tyrannies upon us and in defeating the will of democratic peoples and their governments.

May we suggest that this is a question for calm, dispassionate discussion and is not by any means easy of solution. It is no solution at all to substitute one dictatorship for another, and to limit by law the freedom of expression of opinion beyond the point which it is now limited would be a dangerous and two-edged weapon. But unless reasonable reform measures are recognized as necessary by all concerned it is not at all unlikely that drastic and dangerous courses may prove inevitable.

Winnipeg Grain Market Founded Fifty Years Ago

Meeting Place for Buyers and Sellers Was Reason for Organizing

December 7th, 1937, marked the fiftieth anniversary of the founding of the Winnipeg Grain Exchange. Throughout this half century the Exchange has steadfastly adhered to the purpose for which it was founded. It was established as a place where buyers and sellers of grain might meet to transact their business. Through the activities and the experiences of those buyers and sellers, Canadian grain and its products have found their way, during the last fifty years, into the consuming markets of the world.

In 1883 an attempt was made to form a Grain Exchange. After preliminary arrangements interest waned and the plans did not materialize. On November 24, 1887, a further meeting was called. This resulted in the formation of the Winnipeg Grain and Produce Exchange which commenced to function December 7, 1887.

The Exchange of 1887 was thus founded to facilitate the handling of the products of the rapidly expanding grain acreage of Western Canada. A limited quotation service covering prices prevailing on the British and American markets was provided. The first report of the President in 1888 recorded the fact that 14,000,000 bushels of wheat had been produced in the West in 1887 of which 10,500,000 bushels had been exported in the form of wheat and flour. Since that time the Winnipeg Exchange, which is the largest cash grain market in the world, has facilitated the marketing of wheat and coarse grain crops of many billions of bushels. The Western Crop alone exceeded 500,000,000 bushels in 1928.

The first gathering place of the membership was in the basement of the Winnipeg City Hall. At that time there was no futures market and grain dealers were forced to buy grain on wide margins to cover the risk involved in moving grain to ultimate consuming markets.

In 1892 the continued development of wheat acreage and of the grain business in the West resulted in the Exchange moving into new offices in a building erected on Market Street. At this time a forward step was taken by the Exchange in the establishment of a grain futures market. This made it possible for country buyers to purchase grain from farmers on a lesser margin with the knowledge that it could be sold immediately for future delivery. Today it is a recognized fact that the price margin between producer and consumer is lower on grain than any other commodity. Great expansion of the West took place following the establishment of the futures market for grain. Wheat and coarse grains then became and have remained ever since, the Western farmers' main source of ready cash. Farmers were assured of an immediate cash market for their grain every day of the year. The Grain Exchange kept pace with the development of wheat production in the West. In 1906 it moved into its present location on Lombard Street, at which time the Exchange was reorganized and its present name—Winnipeg Grain Exchange was adopted. The Exchange was in that year organized as a voluntary, non-incorporated, self-governing institution founded "not for pecuniary profit or gain, but for the purposes of promoting objects and measures for the advancement of trade and commerce respecting the grain, produce and provision trades for the general benefit of the Dominion of Canada."

During this half century of service in the marketing of Canadian grain, the Winnipeg Grain Exchange has come in for commendation as well as criticism. In times of falling prices grain exchanges are blamed by producers and in periods of rapidly rising markets criticism is heard from consumers. The great factor concerning exchanges which is generally overlooked is that they are merely meeting places for buyers and sellers. Exchanges neither buy nor sell grain. They gather and make available price quotations, statistical and other information concerning grain and grain markets.

Various Royal Commissions have, with the full co-operation and assistance of the Exchange, investigated the handling and marketing of grain in the futures market react to the benefit of the producer.

West African Scouts' Good Turns to Travelers

Alfred C. Bossom, a British M.P., has presented a handsome silver challenge shield to the Boy Scouts of Bathurst, Gambia, in recognition of the habitual good turns performed by these coloured Scouts for tourists calling at that West African port. The shield was accepted on behalf of the Gambian Scouts by Mr. Ormsby Gore, Secretary of State for the Colonies. From time to time letters from tourists, especially women travelers have told of the services rendered by the African Scouts at Bathurst and Freetown, and the fact that like Scouts elsewhere the boys refused to accept any reward.

Using Surplus Straw For The Land's Sake

Huge stacks of straw in many an eastern barnyard bear witness to the abundance of the material harvested this year. The barn could not hold all the straw at threshing time, and so much of it was blown outside. What will be the fate of those straw piles? Cattle may browse around them, rub, pull out and trample it underfoot, while the rest may gradually rot away.

Farmers who are aware of the need for organic matter in the soil may give some thought to means for the utilization of the surplus straw on the land, but they know that the application of straw, even though partially rotted, will seldom increase crop production perceptibly and may even decrease it.

Where the number of livestock is large, much of the drier part of the surplus straw could be used up in providing extra liberal bedding for the animals. By admixture with the excreta the decomposition of the straw will be promoted through the action of favourable bacteria and other micro-organisms. Besides, the additional litter will effect a greater absorption of the valuable liquid manure, especially if granular phosphate is used in the stable to absorb ammonia and enrich the manure in phosphorus.

Synthetic Manure

Many farmers, says B. Leslie Emslie, are beginning to realize that their land has become seriously depleted of organic matter and are now employing every means at their disposal to restore it, both by more liberal manuring and the plowing in of an occasional green crop. In Europe several methods for the utilization of straw, weeds and other organic waste in the preparation of synthetic or artificial manure are now employed, and the practice has extended to this side of the Atlantic. The product of the process is similar to barnyard manure in appearance and superior in performance, providing the proper procedure is followed.

The original process for the making of artificial manure is known as "Adco" and is now administered by the trustees of the Rothamsted Experiment Station, England, for the benefit of farmers there. It has been modified somewhat recently and forms the basis of others developed elsewhere. The process is conceived on the principle that the organisms of decay require nitrogen and phosphorus for their favourable development, and lime is necessary for the neutralization of organic acids formed, while the straw is the source of food and energy for the bacteria.

The Process

On a level piece of ground a layer of straw, about one foot deep is laid loosely. On this is scattered evenly a mixture of chemicals, at the rate of 150 lbs. per ton of dry straw. Another foot of straw is laid, more chemicals applied and the procedure repeated until the pile is about five feet high. A sprinkling of water should be given after each application of chemicals and the top of the pile left somewhat saucer-shaped, so that it may catch the rainfall. When completed the pile should be thoroughly soaked with water and again at intervals of from four to six weeks. For the thorough making of the artificial manure a period of about four months may be required, assuming that the process is commenced during the late spring or summer. During the winter, or until March the temperatures are too low for active bacterial functions; consequently, the process in these months would be slow.

The chemicals to be employed may be mixed as follows:

Sulphate of Ammonia ...... 65 lbs.
20 per cent Superphosphate .. 30 lbs.
Finely ground limestone .... 55 lbs.

This makes 150 lbs of the mixture sufficient for the treatment of one ton of straw and —or other organic waste which will produce about 2 1-2 tons of wet manure. It is desirable that not more of the chemical mixture than can be used in one day be prepared at one time.

Modified French Process

In France there has been developed lately a modified process which utilizes barnyard manure and straw, the latter being placed in layers of twice the depth of the interposed manure layer. A chemical mixture is applied as in the process already described. This method has merit in that the bacteria of decay, in already active forms, are furnished by the barnyard manure. The process is, however, a more laborious one, and ordinary manure may not always be available for the purpose.

Those who recognize the value of farmyard manure and the importance of its conservation and augmentation may find in one or other of the synthetic manure processes means whereby waste materials, be they straw, grass, weeds or garden refuse, may be made to serve a useful purpose and help solve the problem of depleted soils.

Urge Reduction Car License Fees

Reduction of motor car license fees in this province was urged in a resolution passed by the Edmonton branch of the Alberta Motor Association recently.

When the subject was under discussion, it was contended that the increase in gasoline tax in this province was out of all proportion to the reduction in car licenses. For that reason, the government was urged to give greater relief in the form of lower car licenses.

While no objection was expressed to a license for license or regulatory purposes, strong protest was expressed against this levy being made upon motorists solely for revenue purposes, when the gasoline tax had been created largely for such purposes.

Attention also has been drawn to the province of Ontario where substantial reductions were made this year in motor car and truck prices, resulting in large savings to car owners.

Also, it is recalled that various conventions of provincial organizations have passed resolutions calling upon the government to reduce car license fees.

All C.N.R. Track Gets Safety Test

Montreal, Dec. 6—During the past year, two Sperry Rail Detector cars working on the lines of the Canadian National Railways covered more than 12,000 miles of track, it was learned today in the office of C. B. Brown, chief engineer of operation. Examinations have now been discontinued for the winter season.

Periodic testing of the rails is part of the Canadian National maintenance program. Rails that are perfect when they are put down sometimes develop internal fissures. As the Sperry Car passes along the track, the detector finds them out by electrical impulses and automatically daubs the spot with paint. Faulty steel is taken up before it has a chance to rupture.

In November, one car covered 480 miles in Ontario. Another worked in the Western Region, examining 453 miles in Inwood, Carman, Miami, Sprague, Fort Frances and Kashabowie subdivisions. During the year another 10,806 miles were covered in the Atlantic, Central and Western Regions and along the Central Vermont—a total of 12,097.

Proved

"You can't pass this way, sir," said the country policeman. "I've orders to turn back all motors that come along this road."

"But I'm the Chief Constable," declared the motorist.

"Sorry, sir, I didn't know. I got orders to let no traffic through because of the rotten bridge, but seeing its you, sir, it's a pleasure. Go right ahead, sir."—Tit-Bits.

of Fire Extinguishers

APPEAL TO

FEAR!!!

but the advertisers in the Tofield Mercury appeal to YOUR COMMON SENSE.

They ask you to consider the convenience of being able to get what you want when you want it.
They remind you of the friendly, personal service they offer.

They bring to your attention the saving in time, patience and mileage effected in trading in Tofield.
They give specific instances of good values at FAIR prices.

The amount of business given local merchants and professional folk in Tofield determines the type of service rendered.

This paper commends the people in Tofield who have the trade at home habit. It shows good common sense. Thereby is a strong community spirit fostered. The pity is that all do not trade exclusively at home.

Some Tofield merchants are themselves to blame, perhaps, for a good part of the trading done by Tofield people away from home—because they do not advertise the fact that they carry as good goods at as attractive prices as their competitors in neighboring cities and towns.

New Report Reveals Intensive Study of United Kingdom Market for Canada

A story of neglected opportunities for the sale of Canadian agricultural products in the United Kingdom market is told in a highly informative report issued today by the Dominion Minister of Agriculture, Hon. James G. Gardiner. The report reveals the results of an intensive study of the Old Country market which was conducted last summer by a group of [redacted] agricultural experts who visited the British Isles with A. M. Shaw, recently appointed director of Marketing Service for the Dominion Department of Agriculture.

Practically every product of the Canadian Farm which enters the export market, from cattle and dressed poultry to honey and canned pears, is dealt with in the report; and each item is related to the British merchant and consumer. The report reveals information which the Canadian agricultural specialists gleaned from interviews with importers, commission agents, brokers, wholesalers, manufacturers, retailers, and housewives in eighteen cities in England, Scotland and Ireland. Farms where herds of Canadian dairy cows and beef cattle were feeding were visited; as were fruit auctions, cheese factories, jam manufacturing plants and famous food marts.

The party interviewed officials of the British Ministry of Agriculture, Danish and Russian marketing officials, and representatives of the various British Dominions in London. A study was made of the merchandising methods of other countries in attracting the British consumer, and the advertising and publicity procedure adopted by Canada's competitors was gone into carefully.

Objectives of Inquiry

In the summary of the report it is stated that the particular attention of the Canadian party was directed to:

1. Regularity of supply and distribution of each line of Canadian products.
2. The character and aggressiveness of selling agencies and wholesale distributors.
3. Distribution as between the principal areas of population and between upper and lower class districts.
4. Retail selling conditions, including the recognition of, and standing accorded to, Canadian products generally.
5. Eating and cooking habits of consumers.
6. Sales trends of various products.
7. Effects of advertising and promotional work done by Canada, other Dominions, foreign nations, and large corporations.

Canadian Trade and Commerce Department officials who are located permanently in Great Britain accompanied the agricultural investigators on many knowledge-seeking expeditions.

Part 1 and Part II of the report are entitled "Summary" and "Recommendations." The Summary includes six general findings of great importance to the Canadian farmer and to all those interested in the export of Canada's farm produce to the United Kingdom market. These findings are as follows.

Goods Not Well Known

(1) Present methods of merchandising Canadian agricultural products in the Old Country fall short of being fully satisfactory. British retail stores do not feature Canadian food products as a general rule, whereas the products of sister dominions are regularly featured. Furthermore, the average British consumer is not aware of any special qualities of Canadian farm produce.

London is Most Aware

(2) Londoners are best acquainted with Canada's food products, chiefly as a result of the concentration of trans-Atlantic freight in that centre. In London Canadian cheddar cheese is rated as the most desirable of all imported varieties, while Canada's bacon is rapidly gaining upon the product of Denmark and Ireland in the Londoner's favor.

Every Store Potential Market

(3) Grocery and food shops in the middle and lower class districts stock the most Canadian food products, although almost every provision shop in the United Kingdom and Northern Ireland does carry some Canadian items. A surprising discovery was made that a good range of top-quality goods is carried in the lower class district shops, and that high class food merchandise sells freely in these areas. This fact presents an almost unlimited potential market for the better class goods from Canadian farms.

British Eating Habits Change

(4) The eating and cooking habits of the British people have, according to the report, altered materially during the past fifteen years, and further change is distinctly evident at present. The report says: "Light foods are replacing the heavy, stodgy foods of the past. Advertising by large corporations, propaganda by Government bodies and the gradual but not yet complete strengthening of medical opinion on the benefits of modern diet are all playing a part in bringing about the change. "There is a marked increase in the sale of fresh fruits, "Canadian-type" cereal breakfast foods, canned soups and canned vegetables. Merchandise in attractive packages is rapidly supplementing bulk merchandise in the housewife's favor.

Canadian Advertising Not Successful

(5) Canada has not benefitted to any satisfactory degree from past advertising efforts, insofar as agricultural products are concerned, the report states. In contrast, the advertising and publicity programs of Australia New Zealand and South Africa have had noticeably beneficial effects. The report analyses this situation in considerable detail and emphasizes the fact that there does not exist any ill-will toward Canadian products.

Goods do Not Stand Out

(6) Old Country provision dealers are not familiar with Canadian farm products with the exception of a few items which are mentioned in the report. The department of Agriculture party found that the basic reason for this condition is that Canada has done little to impress British retailers or consumers from this country.

Definite Recommendations

In Part 2 of the report it is specifically recommended that Canada should immediately adopt a three-fold, long-term policy to win a greater and more constant share of the Old Country market for agricultural produce. The three steps recommended are:

(1) Intensive educational and inspectional services in Canada to make sure that a constant and standard supply of high-grade farm merchandise is produced here specifically for the British market.

(2) An extensive campaign designed to impress British food handlers and importers of farm animals with the advantages of developing the Canadian business.

(3) A constant effort to impress the British housewife with the high quality of Canadian agricultural products. Each of the main recommendations is described in great detail in the report, and methods of procedure in each instance are proposed.

Various Items Discussed

The main body of the report issued by the Minister of Agriculture today consists of fifteen chapters. The opening chapter deals in general terms with the British market as the Canadian agricultural officials found it. The final chapter is an exhaustive account of the merchandising methods used by the four chief British Dominions in seeking the Old Country trade. The intervening chapters give an historical and present-day description of the United Kingdom market with reference to cattle, horses, pigs, dairy products, poultry, eggs, canned fruits and vegetables, honey, maple products, tobacco, hay and seeds and furs.

The report gives a clear picture of the competition. Charts and statistics covering every phase of the study are included as appendices to the report.

Advice to Canadian Farmers

Clear-cut recommendations to Canadian farmers are offered by specialists of the Department of Agriculture in connection with the preparation of each item for the British market. The chapter on the British market for Canadian cattle is presented in particular detail and contains many valuable hints which, if followed should greatly enhance the Canadian cattleman's competitive position. The much-discussed matter of the competition between Canadian bacon and hams and those of Denmark and Ireland is encyclopaedic in its wealth of information; and the report's picture of the potential market in Great Britain for Canadian dairy products, honey, maple syrup and fruits will open new horizons to farmers in every part of his country.

Will Be Distributed

The Minister of Agriculture, Mr. James G. Gardiner, has announced that printed copies of this important report are available for distribution, free of cost, to Canadian farmers and others interested in the investigations conducted by Mr. A. M. Shaw and his colleagues.

Gallinger Bull Sells For Big Price To U.S. Buyer

Claude Gallinger's young bull on which he took the reserve junior and reserve grand championships at Toronto Royal, was sold to the Allen Cattle Co., of Colorado Springs, Col., for what J. W. Durno says was a long price. Cattlemen at the Toronto show considered this youngster one of the best prospects for a breeding sire that has been shown in the east for many years.

Mr. Durno, as field man for the far western Shorthorn breeders, is quite pleased with the showing that Alberta's small, though select bunch of show stock made at the royal.

Following are Shorthorn breeders and the prizes they secured:

Claude Gallinger— Reserve junior and reserve grand champion bull; 4th for junior yearling bull; 2nd and 5th summer yearling bull; 1st senior bull calf; 5th, summer yearling heifer; 1st and silver trophy for best two bulls under 2 years; 2nd, get of sire.

E. J. C. Boake—3rd, senior yearling heifer; 6th, junior yearling heifer.

Wm. Hudson—1st, yearling bull; 6th yearling heifer; 5th senior heifer calf; reserve junior champion bull.

School Board Hold Meeting

The local school board held a short meeting on Thursday night last, the purpose being to engage a primary teacher to take the place of Miss Forster, resigned.

Miss Jeanie McCrea of Vegreville was given the appointment.

Cornhill Municipal Council Meet

On Friday last the council of Cornhill Municipal District held a regular meeting. The minutes will be published as soon as available. This is a busy time at the Municipal Office, being the time of the heaviest tax receipts.

Real Winter Sets In

After jockeying around over the week-end the weather Wednesday morning settled right down to winter with a 30 below zero temperature here. Last Thursday was a nice winter's day, Friday a little colder and Saturday a blustery, cold day. Saturday night it turned warm and Sunday some rain fell. As if regretting its unusual and precipitate change to rain, the weather swung right back to below zero temperatures, Wednesday morning being the low of the season with 30 or more below. Thursday was cold but not quite so cold as Wednesday.

'THE TOFIELD MERCURY
Vol. XVII, No. 44 Thursday, December 16, 1937 $2.00 Per Year. To U.S.A. $2.50

All Set for Christmas!

HOLY TRINITY (ANGLICAN) TOFIELD

Once again, this Christmastide, through the kindness of the editor of the Tofield Mercury, I send greetings to all, from Holy Trinity, Tofield. Each Christmas Festival brings back memories of others, in our childhood or youth, which seemed brighter, happier and more joyous than any we now spend, the reason being, that we have grown older and more akin to this mortal sphere. It is, even as one of our poets said "This world is too much with us," this world with it's wars in Europe and China, the cry of want and misery, not only in those war stricken areas, but in almost every country in the world; the mistrust of man for his fellow-man. All these things may have dimmed the sweet message of Christmas "Peace on earth, goodwill to men," but they cannot destroy it, for—

In the Christmas story
there's a golden gleam
and a glint of glory
like a heavenly dream."

As we hear the carols in our Churches, and the bells peal out over our radios, let us rouse ourselves from lethargy and follow the humble shepherds (in spirit) to the manger crib, and there worship and adore Him who is the Prince of Peace, and Who alone can give us true happiness.

"A happy Christmas, a bright New Year
It the wish I send today,
God's help to strengthen, His light to cheer
And His love to guide your way;
A thankful heart for the days gone by
More faith for the days to be.
To face the strife, tho' you know not why
To trust tho' you cannot see;
A life to be spent for lives around
A love which is strong and true,
Through the Christmas joy which you have found,
And the love which came to you.

May you one and all enjoy a very happy Christmas, and a bright and prosperous New Year.

Rev. Albert Wallis

Church Messages

Greeting!

EACH YEAR for a number of years past, we have been privileged to publish a Christmas message from the Churches. We appreciate this opportunity of co-operation and take this opportunity of thanking ministers, both past and present for their writings. We had hoped to publish a message from Saint Francis' Roman Catholic Church in this issue but was unable to contact the Priest soon enough. We expect this to appear next week.

THE MERCURY WISHES ONE AND ALL A VERY MERRY CHRISTMAS AND A HAPPY NEW YEAR

TOFIELD UNITED CHURCH

Christmas 1937 is welcomed by all. I am sure there are many individuals, young and old, and many a home that will say "God bless Christmas."

It is a season of the year when hearts are kindly disposed and we really find how abidingly true Christ's words are "It is more blessed to give than to receive."

Christmas is justified, if for no better reason than the kindly, sympathetic spirit which it creates.

And so we are transported back to the source of all the best things in life and find ourselves adoring and worshipping "the Babe of Bethlehem."

The difference Jesus made to the world can never be tabulated, and as we trace the blessings that have enriched life and created kindliness, thoughtfulness and generosity—we come to Him, the Prince of Peace and of Goodwill. Into this troubled, anxious, disturbed world, may more of the Spirit of Jesus come in all its redeeming and healing power. It is more of Jesus in your life and mine that will overcome all evils and enthrone righteousness and love.

Again through the courtesy of Mr. Worton, I bring you Christmas Greetings.

May our Church go forward into greater channels of usefulness and service.

I am grateful, indeed for the fine co-operation of the officials, workers and members and friends in the carrying on our Church-work during 1937.

I wish you all, A Very Happy Christmas and a Prosperous New Year.

Yours sincerely,
Rev. D. K. Allan.

RACHEL'S CHRISTMAS LIGHT

WONDER if Harris would care? Shall I do it, then tell him afterwards? Rachel Stanton, the morning of Christmas eve, looked admiringly at the brilliant tree in the pleasant living room, then hurried to brush snow from Harris, who, stamping in from the back porch, grunted.

"I've cleaned the driveways to the barns and road but will have to do it again today. What were you saying?" He was interrupted by Rachel.

"The radio announces that the snow plow from Warnton has stuck at the corner and will have to be dynamited out. No one can get through highways farther than the crossroads corner." Rachel hurried to the telephone as it was jingling.

It was Martha calling. She and Jerre and the children started here but are blocked in at a home of kind strangers. I wish we could get food to the Harrison family in the Bottoms. They have no telephone, no near neighbors, and would freeze if they tried to get here through high drifts. Such a winter! It looks as though our Christmas will be "we two," she sighed at the color-lighted tree.

"Well, I see I'll have to shovel out the driveways again," Harris announced, pulling on jacket and gloves.

Later when he went inside to warm his fingers he heard Martha humming and was thankful that she was cheerful over the disappointment of Christmas eve without her relatives. Odors of savory food and the attractive table with Christmas colors, were inviting as he stamped in after evening chores were finished.

"Tonight will be the worst so far this winter. The wind is rising and snow blowing. A terrible night. Surely no one would venture on highways—why, where is the tree? Did you dump it outside because our company didn't come?" he looked, to be sure Rachel was sane.

The Visitor Pointed Toward the West. "That Light Guided Us."—

Then at the empty corner where the tree had stood.

"Yes, the radio announced the temperatures will be lowest of season, so far."

"The tree, Rachel! Did you throw it out?"

"That's exactly what I did—only [illegible]" a shout from outside sent Harris quickly to the door.

"Come in from the terrible blizzard. You poor frozen—how did you get here?" Rachel helped Harris assist five shivering visitors, Mr. and Mrs. Harrison and children.

"It's been terrible getting here. But it was either to freeze and starve at home or risk getting here," Mr. Harrison wheezed.

"But how did you?" Harris began.

"Outside are the dogs. We hitched them to the sled. The blessed creatures helped us over drifts which are now frozen."

Steaming food was soon ready, and faithful dogs were lapping milk and broth near the kitchen range.

"How did you find the first lane, the way in blinding snow?" Harris looked puzzled.

"Well, we got to the top of King's Ridge in the pasture and came toward the light. The light near your grove, back there." the visitor pointed toward the west. "That light guided us."

"What light?" Harris stammered.

"Harris, dear, will you please carry our Christmas tree back into the house? I carried it outside this morning to the grove and put food on it for birds, wild ducks and any other wild animals that need food and shelter. Then, tonight, I hung that large lantern with the strong light on top of the tree to guide whoever might need it."

Merry laughter rang into the night as nuts were cracked and corn popped. Christmas morning Mr. Harrison helped keep the snow from driveways and a path to the grove where the children carried food to a stack of fodder which the men had placed for the wild animals.

"Snow may be drifted high outside But kindness inside of me needs never be blocked so it can not be scattered and be a guide to others," Rachel mused after the happy Christmas of the worst winter.

THE WORLD OF WHEAT

By R. G. L. Strange, Director Research Department, Searle Grain Co.

"There is extensive overlapping and duplication of government services in agriculture"!

A witness before the Royal Commission on Federal-Provincial Relationships recently made this statement.

"Ninety percent of the taxpayers believe this statement is true!" commented a prominent journalist.

Most unfortunately the journalist is right.

My own experience, however, teaches me that this belief is entirely erroneous and unfounded, and can only be described as a most sad and pathetic delusion, which, as long as it is held, definitely hinders the advancement of agriculture.

For years I have been intimately familiar with the services provided to farmers by Dominion and Provincial Governments, by Universities and Schools of Agriculture, and I do not hesitate to assert that there is no unnecessary over lapping or duplication, but that on the contrary, there is a decided need for much more educational and research work to be done by all these good organizations.

Our farmers need badly to know more about the best agricultural practices and just as badly need improved strains of livestock, and more suitable varieties of crops, that is, if Canada is to compete successfully on world markets, and we must depend, in the main, on governmental institutions to originate these needed things.

Following factors have tended to raise price:—Heavy frost losses and low private wheat estimates in Argentina—Germany and Mexico purchase U.S. wheat—Germany negotiates for Hungarian wheat and corn—New South Wales and Victoria report unwanted rains— Russia sells wheat to Spain—Russian wheat sowings below 1936—Lighter European winter orange supply.

Following factors have tended to lower price: Importers assured of adequate supplies from Australia and U.S.—Renewal of Russian wheat offers—Austria uses potato flour as a mixer—Large private U.S. winter wheat acreage estimate—Record apple crop in Germany—Increase in Austrian sugar beet, corn and potato production.

Canadian Rockies Film Wins 1st Prize

Toronto, Ont. Dec. 13—A Canadian film, featuring in natural colors a typically Canadian subject—the Rocky Mountains and taken by Hamilton H. Jones of Toronto, has been judged by the Amateur Cinema League of New York, the best non-theatrical motion picture taken throughout the world during the year 1937. His great achievement, the winning of the Hiram Percy Maxim bronze plaque, the highest recognition which a film can receive outside of Hollywood, carried with it a cash award of $100.

Entitled a "Western Holiday" set in Mount Robson and Jasper National Park, it was selected by the judges as the best of almost 2,000 films which were received from practically every continent on the globe, including such countries noted for the excellence of their film productions as England, Germany, Switzerland, Japan and the United States.

A "Western Holiday" is a record in color of a trip in Mount Robson Provincial Park to Berg Lake and Tumbling Glacier at the foot of the mighty monarch of the Rockies, and a trip through Jasper National Park following the skyline trail from Maligne Lake to Jasper Park Lodge with a special musical sound effect which Mr. Jones perfected himself and which is perfectly synchronized with the showing of the picture.

Plucky Drought Area Children Ask for School Books Rather Than Xmas Toys

Remarkable evidence that drought conditions have not killed the desire for education comes from the pupils of the Violetdale school at Airw[illegible] in one of the drought areas of Alberta. Writing the Boy Scout-Girl Guide Sunshine Toy Shop at Calgary, the children asked for school books rather than toys as Christmas presents. Mention of the appeal in the Calgary Herald brought prompt response, and it is certain that these stout-hearted children of the prairies will receive not only the desired school books, but toys and other gifts as well.

Nuts and Fruits

(Experimental Farms Note)

"So hallowed and so gracious is the time" that the last month of the year must always be associated with the season of goodwill, and that precious thing called home; the all-powerful loadstone which draws the wanderer's heart from the farther end of the earth.

It is the spirit of Christmas, Saint Nicolas or Santa Claus that fills the homes of all with good things, both spiritual and material.

Mr Frank Church once exclaimed —"Not believe in Santa Claus! You might as well not believe in fairies. Nobody sees Santa Claus, but that is no sign that there is no Santa Claus. The most real things in the world are those that neither children nor men can see. No Santa Claus! Thank God! he lives and he lives for ever."

Children will certainly agree with Mr. Church when, at this most gracious season the spirit of Saint Nicolas (their patron) loads them with gifts.

Most Christmas presents owe their existence to plants. Among these will be the indispensable box of candy composed mostly of sweets made with sugar and flavoured with materials of vegetable origin, such as chocolate.

Sugar may be extracted from the sugar-cane, (one of the grasses) from fruit, from the maple tree or from beetroots.

Chocolate is a preparation of the seeds of the cocoa tree which only grows in hot countries such as tropical America and the West Indies. It is interesting to know that its first botanical name "Theobroma" means "Food for the Gods."

Another vegetable flavouring for candy is the cocoa-nut, which grows on the cocoa-nut palm tree. It is no relation to the chocolate-cocoa, but belongs to the same family as the date, which also has a place in the Christmas candy box.

The cocoa-nut palm is one of the wonders of the world because every part of it is said to be useful to man, either to clothe, feed or shelter him. The nut furnishes milk, the young green leaves are eaten like cabbage. A wine is made from liquid produced by the flowers. The sap supplies sugar. Vessels and utensils are made out of the nut-shells. The wood is used for making dwellings. The leaves dried and plaited for the roof or they may be made into umbrellas. Cloth and mats are woven out of the fibres of the leaves, and the leaves sewn together make sails for ships. The fibre also makes string and cordage. The oil expressed from the fresh kernel is used for the seasoning of food and illumination.

The date-palm, which grows to a height of 80 feet and is surmounted by feathery foliage, is the symbol of elegance and grace, hence it became a favourite Hebrew woman's name, "Tamar." The date is common in Palestine. As Bethlehem is only about five miles south of Jerusalem, it probably flourished there on the first Christmas day. Many places are named from its abundance: e.g. Jericho "The City of the Palms," Hazazon Tamar, by the Dead Sea, Baal-Tamar, near Gibeah, etc.

Providence, through the medium of plants, supplies not only the Christmas gifts, but loads the dining-table with delectable fruits and vegetables. The after-dinner cup of coffee is made from the seeds of the coffee tree that belongs to the same family as the familiar bedstraws or Galiums, one of which is appropriately associated with Christmas. It is the Galium verum—the true Galium—because of the legend that this plant was in the hay on which the Mother of Christ rested. It is therefore called Our Lady's Bedstraw. In parts of eastern and western Canada this plant is becoming quite common where its showy sprays of tiny yellow cruciform flowers bloom all the summer.

Gratitude and thanksgiving for the beneficence of festal seasons are the time-honoured and gracious usage of an appreciative world.

Five hundred years before the first Christmas, Aeschylus, a Greek poet whose religious fervor was probably stimulated by the autumn services which represented the deepest and purest element of religion said, "For these things it is meet to give the gods thank offerings long-enduring".

BEHIND THE BOG

By A.B.C.

What we need at the rink is more wagon tongues and less tongues wagging.

0-0-0-0

This week we present for your approval the first installment of "And This is Curling." It will be continued next week.

0-0-0-0

[illegible] years of civilization and still the most famous are those who can Sweep, Kick, Throw, Balance and Weigh a rock.

0-0-0-0

Some of the curlers are biased. Its Bias this and Bias that till they have no money for the fees.

0-0-0-0

I said to Leno: "With no curling on Saturday or Sunday, I hardly know what to do with my week end," and he said "Why don't you put your hat on it."

0-0-0-0

One curler with a philosophic mind says its fun to stay in and read during a storm. When it rains he pores.

0-0-0-0

A little nonsense now and then
A little horse play on the side
Was relished by the wisest men
Who really lived before they died.

My skip said after he missed a shot "I know what you are thinking." Then I said, "Well, I beg your pardon."

This weeks brain wave—Telling curlers where to get off at is best left to Street Car Conductors.

SO THIS IS CURLING

Among many other reasons for the world to give thanks, the Scot has presented her with two of her finest and most popular games—golf and curling. Real skill in the former is for the very few, although the great majority who annually chase little white balls over green pastures are the boys who provide the expensive arena wherein the sultans of stymie may display their precision.

Curling on the other hand is a game which most men who are not cock-eyed can, by practice become fairly proficient. And the equipment is within bounds of the average man's purse. A piece of Canada's commonest commodity, ice, two stones and a broom and away you go. No fair lawn fabriced shirt is needed, no gloriously colored plus fours nor dazzling hose, no hired servitor to carry your weapons. An old pair of pants—the older the better—and as many sweaters as your hide dictates necessary to fend off the breath of Boreas, completes the curler's costume.

The game consists of chucking rocks along the ice at varying speeds depending on whether you wish to draw higher unto the objective point, known as "the button" than doth thine opponent, or to sift one down in swift sufficiency to rattle the ribs of his rock sending it into the perdition of lost rocks behind the "house."

Four men constitute a rink or team. The "Skip" is the main gazebo. He is supposed to know all about the game and doesn't. It is his business to direct the operations of the remaining three and in particular to tell them in dulcet tones of their deficiencies in the fine points of placing rocks where he directs.

The "third" usually knows more of the game than the "Skip" or thinks he does, which is the same thing. And while theoretically he may discuss with the skip the possibilities of a shot, he generally tells the skip what to do when he shouldn't.

The "second" is an embryo third and if the rules of the game technically prevent him from telling the skip and third the many things in the game which they don't know, they do not prevent him instructing the fourth man on the technique of the various shots which in "seconds's" wisdom are being badly executed by the seniors on the rink.

Which brings us to the said fourth man, the lead."

CANADIAN NATIONAL

BARDO

Patricia Eggen, two-year-old daughter of Mr. and Mrs. Peter Eggen, died November 9th, at the home of her parents. Little "Patsy" took the measles which developed into pneumonia and passed away quite suddenly. Mr. and Mrs. Eggen moved down here this summer from Northfield, Alberta. Their two little boys are also very ill with the measles. Rita, an older girl is getting along fine. The funeral of Patricia took place on Saturday, Nov 11th from the Bardo church. Rev. [illegible] officiated. The community extends their sympathy to Mr. and Mrs. Eggen in their sorrow.

Mr. and Mrs. M. H. Ness left for Edmonton on Saturday to spend the winter in the city.

Mr. and Mrs. Ingvald Ness also went up to spend the week end in the city.

The Bardo school and Grand Forks school are both having their Christmas programmes on the evening of the 22nd.

Mahlon Bender underwent an operation for appendicitis at the Royal Alexandra Hospital. He is getting along fine.

Oliver Lehman is doing Mr. Bender's work at the farm.

Mrs. Alma Foshaug entertained the Young People's Society on Friday night.

While out driving Monday night, Leonard Stauffer turned their car over, due to the icy roads. Fortunately Leonard was not hurt, the car suffered a broken wind shield and bent fenders.

The Bardo Junior hockey team defeated the Tofield High School 6-4, last Saturday on the Tofield rink. The Bardo seniors are playing their first game at Round Hill on Wednesday night.

A Greyhound bus with a party from Edmonton going to Round Hill was stuck in a snow drift for 3 hours. Geo. Hendrickson pulled them out with his truck.

Albert Haukedahl is driving a 1938 Dodge.

LINDBROOK

Mr and Mrs F. Kortzman and family seem to be having quite a trouble[illegible] time lately. Five weeks ago their son Ralph was taken to hospital to undergo an operation for appendicitis which same was very successful, and Ralph is [illegible] again and getting around a [illegible]. Then his sister Thelma was [illegible] with an attack of [illegible] and [illegible] after this, she developed appendicitis and was taken to Edmonton to the hospital where she is to be operated upon for same. We all hope that it is a success and that Thelma will soon be home again.

Last week's dash of winter was not a very welcome visitor and the icy condition of the highway was a menace to both cars and pedestrians. Cars seemed to make for the ditch upon the slightest hint of ice, still with a light snow fall its not so bad now.

Edmonton Curlers Visit Tofield

Two rinks of visitors from Edmonton were entertained by the Tofield Curling Club on Saturday evening. They won the round by a score of 21-19. A rink from the Granite Curling Club skipped by P. Rose defeated the Tofield rink of Currie, 17-7, while that of the Thistle skipped by A. P. Gregory lost to the Wood rink of Tofield [illegible]. The personnel of the rinks were:

Granite: P. [illegible], skip; F. Smeed, [illegible]; H. D. Avliss, 2nd; Val Marker, 1st.

Thistle: A. P. Gregory, skip; T. [illegible]; R. [illegible], 2nd; Dr H. S. [illegible], 1st.

Tofield: E. Currie, skip; A. B. Chatterham, [illegible]; A. Cowan, 2nd; O. P. Thomas, 1st.

Tofield: G. Wood, skip; D. F. F. Law, 3rd; W. Taylor, 2nd; R. Evans, 1st.

Town Council Meeting

A regular meeting of the town council was held Monday evening, December 13th, with Mayor Swift, and councillors Love, Rance, Bellamy and Law present. A large amount of business was transacted, [illegible] was mostly of a routine nature, such as the passing of accounts and the discussion of a number of communications. The usual statement of receipts and expenditures for the previous month was read and considered and ordered placed in the minutes of the meeting. Secretary reported that no property had been sold at the tax sale held December 4th last. Approval of the sale of a vacant lot to the [illegible] Municipal District No. 487 was given. This is a lot adjoining the municipal property on Second Avenue.

United Church News

Christmas, Sunday December 19.

For the Sunday School session at 11 a.m. a splendid program has been prepared by the Junior Choir of Christmas music, songs and recitations. The fathers and mothers and adults are cordially invited.

In the evening the Christmas theme will be combined with Christmas anthems by the senior choir.

Worship is a real part of Christmas—Come and join with us in Christmas hymns and worship.

[illegible]

[illegible] December 21st in Tofield.

HOCKEY

On Tuesday evening the Ryley Hockey boys [illegible] Tofield [illegible] at Tofield. The game was [illegible] and many [illegible] rushes were featured during the evening. The final score was 6-5 in favor of Tofield.

On the previous Sunday Tofield motored to Ryley and the Ryley boys won out by the score of 3-2.

0-0-0-0

On Saturday the T.H.S. hockey team met Bardo at the local rink in the first game of the season. Although Bardo came out on the [illegible] end of a 6-4 score the Tofield [illegible] chasers demonstrated that they [illegible] turn out a good brand of [illegible]. With more practice they expect to [illegible] against neighboring teams during the season.

Scoring for the T.H.S.: [illegible] Worton 2, Swift [illegible] Swift, [illegible] Worton (Swift).

Line-ups: Bardo: Larlokken, [illegible] Moore, Anderson, Stauffer, [illegible] Hendrickson, Whillans, Finseth.

Tofield: Harrison, McAllister, Johnsrud, Swift, Worton, Worton, Ennis, McClymont, Swinton.

Watch for announcement of next game. We need your support.

FREEDOM OF THE PRESS—

NO PUBLIC question can be adequately dealt with by the public unless the public understands all or nearly all of the issues involved. Thus when we discuss "Freedom of the Press" as an abstract subject with emphasis on freedom of speech, power of the press, liberty and all those things which tend to make men eloquent, it is also necessary to look to the press itself, confine the search to one area or at least one country, pull the press to pieces and see what it is made of. When we have done this it is possible our preconceived beliefs may have to be considerably altered

It has been stated that the press of Canada today is "big business," which is only at the very best a half truth. It has also been stated that the press depends for its profits upon large advertisers which is wholly true. It has also been stated that the press wields immense influence (note the present tense) which again is a statement subject to discount.

From the early days of press publication in Canada, there has been a remarkable growth— in at least three directions. One, we have the rise of the large city daily with thundering presses pouring out mammoth editions. Two, there has been started very many smaller publications, mostly published once a week. Three, quite a number of publications catering to a specific economic field have come into being. And, of course there are numerous others with particular slants on different things. So we find in 1935 the press of Canada consists of the following: dailies 115; tri-weekly 8; semi-weekly 22; weekly 1000; bi-weekly 58; monthly 440; bi-monthly and quarterly 66; miscellaneous 50; a total of 1,768 publications. Circulation figures that were obtainable from 109 dailies were 2,230,000; from 28 semi-weeklies 113,000; from 884 weeklies 3,929,000. Circulation figures of newspapers in cities of 20,000 or over, 35 cities being listed, are as follows: population of cities 3,386,272; daily papers 22, circulation 2,075,-[illegible]; semi-weekly papers 12, circulation 65,000; weekly papers 170, circulation 2,930,900.

So now we have a pen picture of the press of Canada. Examination will show that in point of circulation, the large metropolitan sheets combined take second place to the combined circulation of the weeklies; also that right in the city daily's own field, namely in cities of 20,000 and over, the combined circulation of weeklies is greater than the combined circulation of dailies. This is rather surprising and perhaps can be partly accounted for by the number of weeklies emerging from large daily offices. At any rate the big bug-a-boo about large city dailies, controlled by big business forcing their views on the people without any journalistic opposition is laid low. If the large dailies, a few of them, or all of them in concert, commenced to advocate a policy, advantageous to themselves but disadvantageous to the public generally, there would be plenty of opposition. Powerful as they are, and their power is more spectacular than real, they are matched reader for reader, elector for elector, by the combined strength of the weeklies. That they are not likely to do any such thing is a foregone conclusion for reasons which we will now discuss.

It is true that large city papers are "big business" in the sense that it costs a lot of money to buy a well established profitable city daily newspaper. But it is not true that sums running into millions of dollars are needed to equip a printing plant capable of circulating opinion. If you were to ask the owner of a metropolitan paper what he considered the greatest asset his paper had, he would probably reply, the goodwill of the public. If you asked him further how he obtained and held this, he would probably reply, by giving people what they want and within reason what they should have. To a very large extent the large newspaper owner is a merchant and one subject to the keenest of competition. His problem is to sell his newspaper to as many people as possible, the more the better, for a large circulation is more attractive to advertisers than a small one. As far as his considered opinion will let him, he is on the side of the people, big business notwithstanding. To face this way he need not be a philanthropist, natural or forced, because from the people comes his bread and butter. It may come via advertising revenue, but the roots of his fortune lay in the good will of the people—not in the piled up wealth of big business. Do advertisers dictate editorial policy? To answer no, would of course be inviting isolated contradiction, but it is quite safe to say that in proportion to the amount of editorial opinion expressed, they do not. Large advertisers demand that THEIR message be read by enough people to make it profitable over a period of time to advertise—in brief, they are more concerned with their own business than they are with the business of the newspaper.

Newspapers generally fall into three classes. Those supporting a definite political party but catering to all classes; those that are politically independent and catering to all classes; and those published for and catering to a particular economic calling. In reading editorial matter, it is very necessary to understand the aims of the paper in which it is printed. Writers are human and it is only natural, sometimes compulsory, that writers view public questions through colored glasses. No false statements are made perhaps, but anything that enhances the particular writer's viewpoint is stressed and anything, even if revelent to the subject in hand that minimizes the writer's viewpoint is barely mentioned or even ignored. One would hardly expect a Liberal paper to stress the Conservative view point or a Socialist paper to laud the Liberal view point. In reading editorial opinion the source from which it comes must be considered. This does not mean that good information cannot be obtained from such editorials, it can, but it does mean that editorials should be read carefully. The above remarks apply chiefly to papers with different political leanings but the same thing applies to papers catering to different economic classes. It would appear then, that an independent paper containing well thought out editorial opinion would be the choice of the many, but actually this is not the case. An independent paper, unless it possesses exceptional merit, has few friends. This is accounted for by the fact that in unbiased writings on public matters, nice things and things that are not so nice affecting people and policies must be written. People will take for granted and quickly forget the nice things that are written, but those things that rankle, even though mentioning them may be justified, are remembered.

A great deal is heard about the power of the press, so much indeed that we are inclined to believe it is overstressed. Certainly, the press wields much influence, but it is the kind of influence that a mirror yields, or for the want of a better illustration, a focussing lens. Day by day, week by week, month by month, it condenses within and reflects from the printed page in sharp relief, the happenings of the world. Naturally, this condensation and reflection of current events from the printed page create varying impressions on different minds, but it is reasonably safe to say very little actual doctoring of news is done. If there is anything wrong it is something wrong in the world of men and women We believe there is room for improvement in reporting and the presentation of the reports on the printed page. Very often in a desire to create a "snappy" make-up, headlines are given out of all proportion to the importance of the text matter and moreover they often express someone's opinion of the text matter. As a great many people hurriedly scan headlines day by day without bothering to read the text, over a period of time, false impressions are created. Another concession to modernism is the breaking up into separate articles, under different headings, reports of parliamentary proceedings. The report of one afternoon's session may be scattered through the paper under various headings, one member says something and another member is going to do something, but if there was ever any connection between the two in the legislative chamber, you would never know it by reading the scattered reports. We can well understand the newspaper's point of view because more than thirty years ago newspapers in England were claiming as a mark of excellence "no long winded reports." This is an age of speed, faster than anything history records, and perhaps it is unwise according to pubic taste for dailies to give verbatim reports in order of procedure.

A great many people associate the power of the press with editorial expression, thought molding it is called. Undoubtedly in the past, and under certain conditions even now, the press does actually mold public opinion, but we believe the power of the press in this respect is much over rated. Especially is this true politically. There are plenty of instances where the press has been almost unanimous against certain policies, yet the people have voted heavily for them. Generally speaking, people like to read editorial matter with which they agree, it satisfies a sense of personal importance. If the subject matter of an editorial is opposed to what a reader believes, it is more likely to create opposition than win over the reader. There are times however, when editorial expression has a definite value, when it does influence public opinion and even shape the course of a nation's destiny. This is in a time of doubt. As we write, an illustration of this comes over the radio. Japanese planes have sunk a United States gun boat, killed an American and wounded several others. Incidents of this kind are sparks that set the fires of war burning. High Japanese officials hastily offer apologies, but apologies cannot bring back a life or lives lost. Should a nation retaliate or not? Millions of people were pondering that question when editorials appearing in New York and London expressed the view that the apologies should be accepted, and these editorials no doubt crystalized thought for very many people—might have even averted a major conflict.

In addition to the power of the press there is the responsibility of the press, which is of very great importance. A clever, even if not overly conscientious editorial writer can find out what people are thinking and write accordingly, thus scoring a hit. But generally speaking, editorial writers write with a sense of responsibility according to the limitations which are placed upon them. This applies of course to the class of paper for which they are writing. A political paper's editorials would have a political color depending upon the party it was supporting; a financial paper the same; likewise farm papers. The responsibility of writing is very real for editorials go out, are copied and are read long after the writer has forgotten what he wrote.

And now we come to the much discussed and high sounding phrase "Freedom of the Press." In cold constitutional law, this means nothing more or less than the freedom of speech and liberty of discussion that is enjoyed by the ordinary citizen. All expressed opinion whether private, public or through the medium of the press is subject to the law of libel. It is true that the press enjoys a kind of leniency in this regard providing that is can be proven that anything published was without spite and in good faith. The writer once listened to a very clever and exceedingly interesting address on libel and slander laws, given by the late Mr. VanAllen of Edmonton. The impression we gathered was that there were so many different angles to a libel or slander action that it resolved itself into the personal opinion of the presiding judge, he in turn, having ample scope, in law, to make what decision he wished. The leniency, if any, that the press enjoys came about as a complete reversal of the Star Chamber methods when public opinion was incapable of expressing itself. Actual freedom of the press came about through the refusal of the English House of Commons in 1695 to re-enact the Licensing Act of 1662.

In conclusion, let it be said that the public and the press are partners in one department of nation building. If there is any doubt or fear in the public mind as regards the press most of it will be wiped away by better understanding. The public must learn to evaluate the press and the press must learn to judge its public correctly. With better understanding the going should be easy.

Christmas Recipes

By Betty Barclay

BEVERAGES FOR GROUPS

The hospitable hostess finds frequent occasion to prepare a cooling beverage for a large group. Here are two excellent recipes for such beverages. Your guests will appreciate these as after-bridge "coolers."

Party Punch

1 pint tea infusion
1 pint cold water
2 cups sugar
2 cups crushed pineapple
1 cup orange juice
1-2 cup lemon juice
1-2 cup strawberry syrup

Mix all the ingredients and stir until the sugar has dissolved. Dilute with crushed ice. Serve in tall glasses garnished with thin slices of lemon and maraschino cherries.

Fruit Punch for a Crowd

(Makes about 4 gallons—80 large glasses, 120 small)

4 pounds sugar
1 quart water
2 quarts tea infusion
1 quart lemon juice
1 quart orange juice
1 quart grape juice
1 quart grated pineapple
2½ gallons iced water
1 cup strawberry slices
2 cups fancy orange slices

Make syrup of sugar and 1 quart water. Make tea infusion by pouring 2 quarts (8 cups) boiling water over 4 tablespoons tea. Cool. Combine syrup, tea, fruit juices, pineapple and iced water. Add strawberry slices and orange slices, which may be cut in fancy shapes or merely halved or quartered.

Less iced water may be used and punch poured over block of ice in punch bowl. When strawberries are out of season the strawberry slices may be replaced by another cup of orange slices. Recipe may be halved or quartered to serve a smaller group.

When those unexpected guests give the doorbell a merry tinkle, your smile of hospitality will be one of genuine joy if you know there's a cake in reserve in the cake box. It's the easiest kind of preparation for those casual "drop ins". Here are recipes for toothsome cakes that can be made in no time and are sure to achieve social success.

Chocolate Spice Loaf

1 (9 oz.) package dry mince meat
1-2 cup water
1-2 cup butter or other shortening
1 cup sugar
1 egg, separated
2 cups sifted flour
3 teaspoons baking powder
¼ teaspoon salt
1-2 teaspoon cinnamon
¼ teaspoon cloves
1-2 teaspoon nutmeg
1-4 cup milk
2 squares unsweetened chocolate, melted

Break mince meat into pieces. Add cold water. Place over heat and stir until lumps are thoroughly broken up. Bring to brisk boil, continue boiling for 3 minutes or until mixture is practically dry. Allow to cool. Cream butter and sugar. Add egg yolk and beat vigorously until smooth and creamy. Sift flour once, measure, add baking powder, salt and spices and sift again. Add alternately with milk, beating after each addition until thoroughly blended. Add chocolate. Blend thoroughly. Fold in [illegible] mince meat and stiffly-beaten egg white. Pour into buttered tube pan. Bake in moderate oven (375 degrees F.) about 45 minutes. Make an average sized cake.

Fruit Loaf Cake

1-2 (9 oz.) package dry mince meat
1-4 cup water
1-2 cup butter or other shortening
1 cup sugar
2 eggs
1¾ cups sifted flour
3 teaspoons baking powder
1 teaspoon cinnamon
1-2 teaspoon nutmeg
1-4 teaspoon salt
1-2 cup milk

Break mince meat into pieces. Add cold water. Place over heat and stir until all lumps are thoroughly broken up. Bring to brisk boil, continue boiling for 1 minutes or until mixture is practically dry. Allow to cool. Cream butter and sugar. Add eggs one at a time and beat vigorously until smooth and creamy. Sift flour once, measure, add baking powder, spices and salt and sift again. Add alternately with milk beating after each addition until thoroughly blended. Fold in cooled mince meat. Pour into greased pan (4x8x2 inches). Bake in moderate oven (350 degrees F.) about 40 minutes.

Date Bars

1 cup sliced dates
1 cup nut meats
1 cup powdered sugar
2 eggs
1 tablespoon melted butter
2 tablespoons lemon juice
4 tablespoons flour
1-4 teaspoon salt

Put dates and nuts through food chopper. Add sugar and beaten eggs and mix well. Add melted butter, lemon juice, flour and salt and mix thoroughly. Spread evenly in a greased shallow pan, having mixture one-fourth inch deep. Bake in a moderate oven, 325 degrees F. about 30 minutes. Cut in strips and roll in powdered sugar while hot.

DELICIOUS ORANGE RECIPES

Holiday Fruit Cup

(Serves 12)

6 oranges
2 small grapefruit
1 cup white cherries
6 tablespoons lemon juice
2 cups powdered sugar
Rubyettes and emerelettes

Peel oranges and grapefruit and separate sections, removing all membrane. Mix with cherries, which have been stoned. Sprinkle lemon juice and sugar over fruit. Chill about an hour and add rubyettes and emerelettes.

The color note of the red and green garnishes may be further developed by serving fruit in double cocktail glasses with finely chopped green or red-tinted ice in outer glass. Ice is made in iceless refrigerator from water to which vegetable coloring has been added.

Orange Toast

(Serves 6)

1-4 cup orange juice
Grated rind 1 orange
1-2 cup sugar
6 slices buttered toast

Mix orange juice, rind and sugar. Spread on hot buttered toast and put in hot oven or under broiler to brown.

California Poinsettia Salad

(Serves 6)

4 oranges
6 tablespoons cream cheese
Paprika
2 red Pimentos

Peel oranges and separate into sections. Make cheese into 6 balls and sprinkle with paprika. Cut pimientos into long narrow strips. Place a cheese ball in centre of each salad plate and arrange orange sections radiating out from it like the petals of a flower. Place strips of pimento between orange sections. Pour French dressing over all.

The Guilty Gift

'THE TOFIELD MERCURY

Vol. XVII., No. 45 Thursday, December 23rd, 1937 $2.00 Per Year. To U.S.A. $2.50

The Spirit of Christmas

Specially written for the Tofield Mercury by W.W.

THE CHRISTMAS DINNER was partaken of. The turkey, a scant hour before, regal in its shiny browniness, had been reduced to a skeleton with here and there clinging pieces of meat, mute reminders of the glory that once was. The vegetables too, reminders of summer suns and copious rains, a few backaches, a few hand blisters and very many weeds, showed gaping holes in the contents of dishes that were once rounded and full. And the plum pudding, that delectable item of Christmas fare. The rich aroma which a few short minutes ago accompanied its passage from kitchen to dining room and which ascended with steamy delightfulness from Ma's glorious creation, had mingled with many others. It's well rounded golden-to-copper jewel dotted form had been reduced to a mere semblance of its former glory. Amid Ahs and Ohs and with exclamations of delight, it had done its duty as a provider of calories. And gave inspiration akin to the spiritual. Completed with fresh fruit, nuts, wine or cordial, it was a marvelous dinner—a Christmas dinner to be thankful for. Contentedly, drowsily, sleepily, I left the others at the table joking, laughing, and pulling crackers, the gaudy paper hats of which would soon be decorating younger heads. The parlor was warm and the lounge very comfortable. Across the room the bookcase, on one of the shelves of which, conspicuous by its thickness, stood H. G. Well's "Outline of History," reflected the warm glow of the fire. The laughter from the dining room seemed to fade into the distance, the lounge became increasingly comfortable, and I was floating, floating, up, up, on clouds so light and feathery that gravitation meant nothing and motion was effortless.

* * *

There was nothing visible except clouds of vapor. Rolling about in huge volume creating tremendous vortexes that filled again almost as soon as they were formed. It was very hot. So hot indeed, that I could feel the perspiration upon my brow. Out of the mist, much to my surprise and adding to my increasing terror, there emerged two giant figures. They were attired in clothes of a kind I had never seen before—or was it natural covering—I could not tell. One had a scaley covering, hard and boney, impenetrable. The other a covering, silky and light—beautiful to behold. Their faces, too, were different. The face of one was hard and fierce—there was no kindness in it. The eyes had the glint of cold steel, the nose was sharp and the mouth tight drawn and unsmiling. My terror was subsiding. Fearful at first at the appearance of such huge giants, their absolute inattention, as far as I was concerned, calmed me. If they knew I was there they did not show it, not even so much as a glance did they give me. The second giant, clad in light and beautiful covering had a kindly face. Broad of brow, with large sympathetic eyes, just looking at him caused all my terror to depart. His nose was broad and just a little stubby. A slight tilt upwards gave the appearance of cheerfulness and added to the permanent benevolent appearance. The mouth full lipped with a slight tilt upwards at the ends made it easy for him to smile. From out of the swirling mist they came and met each other.

Said he of the stern face to his companion, "Brother spirit from far off suns, we have not met before. We have been sent to build a world of land and water, grass, flowers and trees. From these clouds of gases we must make a sphere which will revolve in unison with the other spheres. The great spirit said he would supply light and warmth from the sun. And we must have birds and animals of many kinds and fishes too, for we will have much water." Then he said, sharply, much as if his name was of no consequence, only his will, "My name is Take," and, quite brusquely "What is yours?"

He of the kindly face then spoke for the first time. "Brother spirit from the Valley of Chills," he said, "it is true we have been sent to build a world of land and water, grass, trees and flowers. And, as you said, we must have animals and birds, and for the water, fishes too. But most important of all, we must have men and women. You asked me my name, yes, my name is Give."

"Well, well, Mr. Give," said he of the stern face, "I believe we shall get along splendidly, yes splendidly, do a good job I am sure." But he never smiled.

"Now, Mr. Give," said Mr. Take, "you said something about men and women. What are they?"

"Men and women," said Mr. Give, "are to be the salt of the earth. They are to be endowed with reason. They are to enjoy the fruits of the earth. The world we are going to make is for them. It will be their world to live in—to be happy in."

"But," said Mr. Take, expressing much surprise, "When we make this world, it will be our world, won't it? Why make a world for men and women to be happy in?" But he continued, without wait-

(Continued on back page)

LOCAL & PERSONAL

Mr. Van Dyke, operator at the C.N.R. station left on Saturday for Portland, Ore., where he will spend a holiday. Mr. Watson is relieving at the station.

Mr. Melville Bethel visited Edmonton for a few days last week.

Miss Lois Thompson spent Friday in the city.

Mr. A. Machtmes and L. Burnett motored to Edmonton on Saturday last.

Mr. W. O. Glover visited Edmonton for a couple of days last week.

Mrs. W. E. Seale from Edmonton is staying in Tofield during the holidays.

Mr and Mrs. Ed Hicks and Mary Burnett motored to Edmonton one day last week.

Messrs. Stan and Norman Glover spent Saturday in Edmonton.

Mr and Mrs. McCullo from Saskatchewan are visiting at the Jobb home.

Miss Aileen Allen from Edmonton is spending the holidays at her home here.

Mr. and Mrs. H. Green spent Friday in Edmonton.

Mr. Hubert Bethel spent the week end at his home here.

Miss A. Swift spent Sunday and Monday at her home here.

Miss Julia Lukin spent the week end visiting in Viking.

Mr and Mrs. J. Munro and children are visiting at the Clutterham home.

Blake Clutterham is spending the Christmas holidays at his home here.

Miss Ella Taylor spent Tuesday and Wednesday at her home here.

Mr. Art Francis visited the city on Tuesday last.

Mr. Max Rogers from the University is spending the holidays at his home here.

Mr. Bill Davison who is attending the school of agriculture at Vermilion is spending the holidays at home.

Mr. John Swift who is attending the University of Alberta is home for the holidays.

UNITED CHURCH NEWS

The Christmas Services were very well attended.

The Junior Choir at the morning service rendered the Christmas music exceedingly well. Mrs. Stinson have a very fine musical aggregation and the choruses, duets were beautiful and sweet. The recitations gave a very balanced programme.

In the evening the Senior Choir were never heard to better advantage. The anthems chosen were so fitting for Christmas and the music breathed of joyousness.

The S.S. Christmas entertainment was a big success. The usual song and recitations have been dispensed with, and each class gives one item to the program.

The children did extraordinarily well. The teachers must have given a good deal of time in preparation. But each one of the items was well acted and certainly pleased the large audience. We were glad "Santa" paid us a visit.

Next Sunday the Junior Choir will repeat their Christmas music in Ketchamoot at 2:30 p.m. and at Tofield at 7:30 p.m. No one should miss hearing these young singers.

The Ladies' Aid is arranging Christmas hampers and sending comfort and good cheer into needy homes, so are the Y.P. and C.G.I.T. groups.

LINDBROOK

The people of Lindbrook wish all their friends and neighbors of Tofield and the surrounding countryside A Very Happy Christmas and a Bright, Happy and Prosperous New Year.

The recent thaw, whilst not appealing very much to motorists, is very welcome to the majority of folks as [illegible] easier on all the farm stock.

We are glad to hear that Miss Thelma Kortaman is convalescing rapidly, several of her Lindbrook friends have been to the Alex Hospital to see her this last week.

Lindbrook also has another patient in the Royal Alex hospital, Edmonton, in the person of Mr. Leon Lepine. Just what is the trouble with him we can't say, but friends who have visited him say that he is in good spirits.

KINGMAN

Mr. Henry Johnson has started up a barber shop in Kingman which is sure an asset to our town.

The four N. B. Wideman children all have the measles but are getting along fine now.

Mr. and Mrs. Oliver Thompson made a trip to the U.S.A. recently.

Mr. A. Works was unfortunate enough to break his leg. He is a patient in the Camrose hospital.

Mr. Siguard Lorance, who has been with Mr. Jack Erickson for the past six years has gone to the coast to spend the winter.

Among those who visited Edmonton on Friday last were Mrs. Jack Erickson, Mrs. McIntosh, Mrs. Bob Starret and son Bobby, Mrs. Nickleson and Margaret, Mr. Roy Fleming and Mildred, Mr. Albin Anderson and little Walter Babbits.

AMISK CREEK

Mr. E. A. Moen visited the city one day last week.

Mrs. Berg returned from Edmonton after spending a couple of days there. She expected to undergo an operation while there but it was delayed until she recovers from a severe cold.

Arthur Haugen left last week to visit his sister who is teaching in the Peace River Country.

Miss Edna Moen is assisting with the work at the Erickson home. Mrs. Erickson has not been well for some time but we are glad to report that she is improving.

Lloyd Berg is helping out at the P. O. Flaaten farm.

The Young People are now preparing for the Christmas tree program.

Lilly Berg, who is attending the University this year came home for her Christmas holidays last Thursday. Ellen Sand from Edmonton is visiting with her for a few days.

We are sorry to report that Mrs. K. Olson has not improved a great deal in health.

John Nilson and family who had rented the C. Kiering farm, moved back to their own place last week.

Our deepest sympathy is extended to Mr. and Mrs. P. Eggen and family in their recent sad bereavement.

Mrs. P. O. Flaaten spent the week end in Edmonton, returning home on the bus on Sunday.

As Christmas is now drawing near again, we take this opportunity to wish you all, Editor, Staff and Readers of the Mercury, A Merry Christmas and a Happy New Year.

Buffalo, N.Y., Dec. 21—Supreme court Justice Alonzo G. Hinkley fingered Monday an intricate inlaid wood jewel box—Christmas gift of prisoner 43,274 at Auburn prison. Prisoner 43,274 is Walter Sarnowski, 41, sentenced to a life term in April 1929, by Justice Hinkley.

STORES CLOSED MONDAY

Monday next, December 27th, is a legal holiday, Boxing Day, and all places of business in Tofield will be closed.

COMMUNICATION

Dear Mr Worton,

I feel too often we take your generous and gratuitous services for granted. At least I know from personal experience, you give the church a great deal of free advertising and publicity.

And I am constrained at this time to express my sincere appreciation on behalf of my congregation for your courteous and helpful co-operation. It has helped much to get news and messages across to your readers through the medium of the Mercury.

Then I want to pay a tribute to some of the fine forceful and timely articles from your own pen.

Indeed some of them have been master pieces in sympathy, in searching analysis, and in beautiful description. Thanks a lot and may the "Mercury" continue to serve the Tofield public in widening influence.

Wishing Mrs. Worton, yourself and family the Season's Greetings,

Yours Sincerely,
D. K. ALLAN

WEDDING

At the Manse, Tofield, on Wednesday afternoon, December 22nd, Miss Ella Kleinschroth and Mr. Jacob Weder were united in Holy Matrimony. Mr. Lorne Lee assisted the bridegroom and Miss Elsie Carlisle the bride. The happy young couple will reside on the bridegroom's farm west of Tofield.

The ceremony was performed by the Rev. D. K. Allan.

Give her a permanent for Christmas. They can be obtained at the Vanity Beauty Skoppe at reasonable prices. Phone 9. Make your Christmas appointment early.

Rabbit Chases Coyote While Pal Scares Dog

High River, Alta., Dec. 20—When a rabbit chases a coyote its news. When the rabbit's pal chases a dog and scares it badly that is also news. It happened this way.

A local rancher was walking around a hill in this district recently accompanied by his dog when a jack rabbit, travelling fast dashed round the bend and ran under the dog's front legs, scaring it badly. Right at the rabbit's heels followed a coyote, followed at a distance by another rabbit and yet another coyote.

The last rabbit did not know he was chasing the first coyote and the latter did not know that all he had to do was to stop and let the second rabbit run into his jaws; otherwise the story would have had a different ending. As it was, the coyotes ran up one side hill, the rabbits up another.

Bonnyville Man Clipped In South City

Calgary, Dec. 20—K. W. Fraser, of Bonnyville, Alta., was $173 poorer last night as police sought two "friendly strangers" who flipped coins with the Calgary visitor Sunday.

He met one of the strangers in a downtown restaurant. They went for a walk, met the other man and started a "little game."

Finally the sky was the limit, the stake was $500. A coin was tossed and Fraser and his restaurant friend lost. To the winner, The Bonnyville man handed over an envelope containing $173.

Soon after both men disappeared. Later Fraser reported to the police.

Scared and rather jittery, the dog let all four of them

But Once A Year
HELEN WATERMAN

"THANK goodness," said Martha Goodwin, bustling about her kitchen, "Christmas comes but once a year." She wiped back a loose wisp of graying hair with a weary gesture. "But it will be fine seeing you again, Lad," she murmured, thinking of her distant son. "Now let's see. These star cookies you're so fond of—" She glanced at the hurrying clock.

Loud shrieks of laughter under her window interrupted her thoughts. Those new neighbor children again. If they were dirtying up her freshly swept walk! She strode grimly to the porch. There was a path in the snow from their yard, around hers and back again to their own, where all four of them had apparently trudged, pushing a snowball across her walk in two places. A tussel started suddenly and they were all tumbling about in the snow, shrieking at the top of their voices.

Martha scolded shrilly at them, and they stood up, an abashed little line of stair steps. "The idea! On Christmas, Too!" Martha chided. "Whatever is the matter with your ma, that he lets you make such a racket?"

"She's sick," answered the oldest girl.

"Sick! Then all the more reason why you should keep still. Shame on you." The little group stood like statues.

Martha tucked in the wisp of hair. "You children come in here and sit still while I work and I'll tell you a story," she finished. "Mind and wipe your feet."

"I suppose it should be a Christmas story." Martha began. "Do you know about the shepherds and the wise men?"

"Yes'm," they chorused. "We go to Sunday school," added the oldest girl.

"Then," Martha asked her, "shall I tell you about Santa Claus?"

Her face clouded a little, "Mother told us that," she answered soberly.

"Oh," said Martha. She dusted the flour from her hands and turned to baste the turkey. Four pairs of eager eyes watched her every move. The doorbell rang.

"Laddie! Good heavens," cried Martha, slipping off her apron and rushed to the door.

But instead it was a telegram

"AWFULLY SORRY, DARLING BUT I JUST CAN'T GET AWAY STOP DO TRY TO HAVE A MERRY CHRISTMAS STOP GO ON A SPREE AND I'LL FOOT THE BILL STOP EXPECT TO BE ABLE TO GET DOWN FOR NEW YEAR'S AND WILL EXPLAIN EVERYTHING THEN LOVE LADDIE"

Martha Goodwin read it twice. Then she smoothed the straying wisp of hair and went back to the kitchen.

"Well," the older girl was explaining, "it's sort of like a chicken, I guess only ever so much bigger." The four children looked up as Martha entered. "Why, what's the matter, Mrs. Goodwin?"

"My son—I was expecting him—he isn't coming."

"Gee," came a sympathetic chorus. "And you'd fixed everything so nice and—and Christmassy."

"I'm not going to have it spoiled," Martha decided. "Here," she said and draped the holly wreath over the youngest's arm. "You," she said to the next one, "carry the potatoes, and you take the mince pie—careful, it's hot—and you," to the eldest, "take the vegetables. I think I can manage the turkey."

"But where are we going?"

"Over to your house. Weren't you about to miss out on Christmas dinner?"

"Dinner first, then presents," she suggested, and when, having eaten all they could hold, they gathered about the holly, she found a crudely wrapped present for herself. It was a picture scrapbook, somewhat smudged.

Were those tears in Martha Goodwin's eyes? Surely not, for she was smiling.

"Why thank you," she exclaimed. "Such a lovely surprise: My," she added, "I do wish Christmas came more than once a year."

A MERRY CHRISTMAS TO ALL

THE WORLD OF WHEAT

* * * * * * * * * *

By R. G. L. Strange, Director Research Department, Searle Grain Co.

"Is Registered and Certified seed any better than any other kind of seed?"

"Do seed growers really improve stocks?"

These are questions frequently asked, and here is some evidence which supplies an answer.

In 1935 the "Crop Testing Plan" imported from eight of the best seed growers in Minnesota some 2000 bushels of Minnesota "Registered" Thatcher. On test these stocks were found to contain an average of 30 bearded heads and other off-types on each count of 10,000 plants.

Two thousand bushels of this seed were allotted to thirty-six members of the Canadian Seed Growers' Association, with a request that they should do their best to improve the stock.

After two years of effort these particular seed growers have, this year produced some 20,000 bushels with average impurities of only 5.2 per count, and some stocks having less than 1 per count. (These improved stocks are now being made available by the "Crop Testing Plan" to farmers who desire them.)

Here, it seems, is a definite and tangible illustration of the quality of the work done by our seed growers, and of the value of the methods of crop improvement as set out and required by the Canadian Seed Growers' Association.

Following factors have tended to raise price: Broomhall's World wheat visible less than a year ago—Europe purchases United States' corn—Norway purchases American [illegible]—Crop control bill passes United States House of Representatives—Very unfavourable political developments in the Orient—Severe frosts and ice covering reported in the Ukraine—Continued dryness holds back seeding in Alberta.

Following factors have tended to lower price: Disappointing foreign demand—Navigation closes on the Great Lakes. The Port of Montreal closes—Early Australian wheat offerings of excellent quality—Good rains favour germination in Morocco—Welcome rains in Natal and The Transvaal—Official Argentine wheat estimate 192 million.

Prize Awarded To Calgary Beer

Under date of October 20th, from Ottawa, in an article copyrighted by the Southam Publishing Company Limited, Charles Bishop, the Calgary Herald's Ottawa Correspondent, reports that "out of no fewer than 7000 bottles of beer submitted from throughout the United Kingdom and all parts of the British Empire, the Calgary Brewing and Malting Company won the diploma in the "heavy" beer class against all overseas beer in the bottled beer competition recently held in London, England

For the first time Empire beers were entered in the competition and entries were received from Canada, New Zealand, Australia and Kenya Colony. A number of Canadian brewers submitted entries in the "heavy" class, but Calgary beer topped them all.

A report received by the Department of Trade and Commerce states that "the judges announced they were particularly struck with the fine quality of the overseas brews and had to spend four times as long in arriving at a decision regarding Dominion beers as they had the home entries."

The Scout-Guide Santa Claus

If Santa misses any of the needy homes of Saskatchewan or elsewhere in Canada it will not be the fault of the Boy Scouts and Girl Guides. For the 14th consecutive year a coast-to-coast chain of Scout-Guide toy repair shops, after working faithfully for weeks, are now completing arrangements for handing their good-as-new toys over to Santa. In many cases local distribution is made in co-operation with service clubs and other welfare bodies. Many rural families, whose names have been received from the Toy Shop Secretary at Dominion Scout Headquarters, are remembered by mail. The special effort this year for the dried-out areas took the form of bulk shipments of gifts to the toy shop distribution centres of the eight toy shop areas into which Saskatchewan was divided. Eastern toy shops which shipped west included those at New Glasgow, N.S. Fredericton, N.B., Sherbrooke and Montreal Que.; Ottawa, London, Hamilton Toronto, Cardinal, Elora and Clinton, Ont. and in the west, Calgary.

China Will Absorb Japanese As Invaded States Visitor

China will absorb into herself the Japanese army trying to conquer her, just as [illegible] absorbed every race of invaders or settlers for thousands of years, it declared John McGregor Gibb, Shanghai business man, during a visit to Edmonton Saturday.

If Great Britain and the United States were to set up an economic boycott against Japan to avenge attacks on their property or to prevent further invasion of China, the empire of the rising sun could not continue warfare for one month longer, Mr. Gibb declared.

He was visiting Edmonton en route to Toronto, New York, Philadelphia and Washington. A native of Philadelphia, he went to China more than 30 years ago as a missionary and turned to business a few years ago when world-wide depression resulted in the closing of many mission posts. His wife who accompanied him here, was born in China, the daughter of English missionaries.

One of the early results of the present Sino-Japanese war, said Mr. Gibb, probably will be the enlargement of the International Settlement in Shanghai the great neutral metropolis ruled by foreigners, although the vast majority of its citizens are Chinese. Japan wanted the settlement expanded after the 1932 strife there but the idea was shelved at that time. Great Britain probably will oppose it, the visitor said.

Canadian commerce with China will suffer little from the warfare after peace is concluded, Mr. Gibb believed, because Japan is unable to supply to China most of the products which Canada exports. It can be expected, however, that Japanese will take over many Chinese factories, because expansion of factories in Japan further is next to impossible through shortage of labor, he said.

It is believed generally in Shanghai, he said, that the bombs which caused carnage in the International Settlement of Shanghai a few weeks ago were from Chinese aeroplanes; the one which caused loss of 1000 lives was dropped accidentally when the Chinese aeroplane was struck by a Japanese shell and the bomb-rack wrecked he said.

Master Bandit Drops His Gun; Deserts Bank

Montreal, Dec. 20—When a masked bandit stalked into a north-end branch of the Banque Canadienne Nationale Saturday and announced to the five clients and two clerks that "this is a stickup" no one moved and no one spoke.

The gunman's hand began shaking. The gun dropped to the floor, broke open and two bullets slid out. The bandit picked up the gun and ran out of the bank.

New Alberta Pool Chairman

Lew Hutchinson of Duhamel was elected chairman of the board of directors of the Alberta Wheat Pool on Tuesday, December 14th, in succession to Dr. H. W. Wood, retired.

Mr. Hutchinson has been Pool director for the Camrose district since the Pool was formed in 1923.

An Englishman by birth, Mr. Hutchinson has run the gamut of farming experience in both Western United States and Canada for about half a century. A farmer in Iowa, a student at the University of Michigan, a cowboy for five years in Western Nebraska and a homesteader in Alberta, the new chairman has had a varied and interesting life. He still lives on his homestead at Duhamel with his wife, the former Barbara Middleton, whom he married in 1902. They have ten children.

Mr. Hutchinson was born at Selby, Yorkshire in 1870, where his father and grandfather were cheese and flax merchants. The family migrated to Iowa in 1874 and farmed in the Oskaloosa and Des Moines district. After attending public school and Penn College at Oskaloosa, young Hutchinson entered the University of Michigan at Ann Arbor. On his return home he went to Western Nebraska where he punched cattle from 1892 to 1896 on the Bar Diamond and ICC ranches. Then he returned to Des Moines where he farmed until he came to Alberta in 1900. Mr. Hutchinson picked the Camrose district in which to homestead. Two years after his arrival, he married the local school teacher, Miss Middleton, who came from Medicine Hat.

Mr. Hutchinson has been engaged in wheat growing and mixed farming at Duhamel ever since. For a number of years he specialized in the production of purebred Aberdeen Angus cattle and was a familiar figure in the show rings of the west.

Always deeply interested in the co-operative movement, Mr. Hutchinson joined the Wheat Pool when it was first formed. He was chosen as a director on the provisional board of 1923 and then was elected to the permanent board when it was formed latterly. He has been a member of the board ever since.

A brother, Dr. Woods Hutchinson, was well-known in the United States and Canada as a writer on medical subjects. He was professor of hygiene in New York University and held various other important medical positions in the United States. Another brother, Charles Hutchinson of Des Moines, is a lawyer and a former judge.

Fruit Cup Dessert

1 cup orange pieces
1 cup diced pineapple
1 cup halved strawberries (or white grapes)
1-2 cup powdered sugar
6 maraschino cherries

Combine fruits and sugar. Serve very cold in sherbet glasses with a maraschino cherry for garnish.

HEALTH

Run Down

When a clock runs down, it stops. In order to make it go again it is necessary to wind it. Winding puts energy into a spring and it is this energy that makes the wheels go round permitting the clock to perform its normal functions.

The human body in many respects resembles the clock. It gets run down. Fortunately, for most people, it can be re-energized before it stops, but just like the clock, it will not perform its proper functions unless the springs of energy and power are available within.

Why does the human body become run down? Because the supply of energy and power does not keep pace with the demands. When this balance is upset with expenditure exceeding income it is time to call a halt and look the situation over carefully. To put everything right may not be as simple as winding the clock.

It is important to know two things: Is the demand on energy excessive due to carrying a load beyond one's normal limitation?

Is food which provides energy being taken and assimilated in sufficient quantity?

A little heart to heart talk with oneself in the majority of instances will answer the first question. You know whether or not you are working too hard, or too long, or worrying too much. You know whether or not you are burning the candle at both ends. You know the amount of care you are exercising with regard your body and your brain. If you feel run down—below par—pushing yourself uphill—depressed—do a little plain thinking and ask yourself what is the cause. It may be that despite your care and conservation of energy that run down feeling persists. Then ask your Doctor to find the cause. He is trained for that purpose. You may require a change of diet. Some organ of the body may need toning up. The answer to your problem may be simply found and just as simply cured. But if the cause of the run down feeling is due to some more serious condition it is greatly to your advantage that the cause be discovered early. A stitch in time saves nine—an old adage that is one hundred per cent applicable to this discussion. Early diagnosis permits of intelligent treatment before too much damage is done. Thousands of lives are lost because of delay in diagnosis and treatment.

A run down feeling is a danger signal which should cause one to stop and look. You may go by it without a crash but that is taking a chance and there is nothing heroic or sensible about taking foolish chances with human life.

Questions concerning Health, addressed to the Canadian Medical Association, 184 College Street, Toronto, will be answered personally by letter.

One Japanese Admits Craft Fired On U.S. Gunboat Panay

Tokio, Dec. 20—Foreign office spokesman admitted for the first time Monday that Japanese surface craft fired on the sinking U.S. gunboat Panay.

He indicated Japan would plead self-defence for the surface vessel's attack on the gunboat after she was bombed by Japanese warplanes, Dec. 12 on the Yangtze. It was believed Japan would contend the Panay shifted her position without sufficient notification to Japanese authorities.

His statement reversed former categorial denials of attacks on the Panay's survivors and of the presence of Japanese surface craft at the time.

"It's true a Japanese boat was near the Panay," said the spokesman. "The most important point to be cleared now is which fired first. Soldiers aboard the Japanese boat believed the Panay fired on them."

The spokesman, nevertheless, refused to state definitely whether the Japanese surface vessel fired machine guns despite his reference to "which fired first."

But increasing hostility between Japan and the Soviet Union, rather than tension over attacks on British and U.S. shipping, was the chief reason Monday for the Japanese public's anxiety over the world situation. U.S. charges that Japanese surface craft machine-gunned the little gunboat have been kept out of newspapers.

Meantime the press gave prominence to mounting troubles with Russia. The Harbin, Manchukuo, correspondent of the Tokio paper Nichi Nichi reported the Russian Far Eastern army was being greatly strengthened, with men, munitions, and aeroplanes being rushed toward borders of far eastern Siberia day and night.

Frances Grinstead

HE WAS a small boy named Tim who had never been more than ten miles from his home in the Ozark hills. His teacher said he couldn't even bound Arkansas, his own state, but what his teacher didn't know was how well he knew the mountain "crick" and the hill slopes circled with green-gold pine trees that bounded his father's tiny farm. He also knew what it took to keep a family of six children and that for as long as he could remember his father's farm had scarcely been able to produce enough to stretch over every need.

It was just before Christmas time that he heard his father tell his mother that if there was to be anything "extra" to give the day its meaning for the children, he'd have to get the ax and hack out a few ties. Her face went white, for she knew what that meant. So often had they been forced to remain on the hacking of a few ties to be sold to the railroad for dire necessities that practically all their timber available for that purpose was gone. And trees don't grow over night. She could tell by the look on her husband's face that he was taking a desperate and back-breaking chance of finding a few logs tough enough for the commission man to buy.

As she looked out of the window and saw the passing cars of winter "touristers" on the new scenic road the government had built through the hills, she wondered by what magic folks could come to own automobiles and take time off like that to go traveling. But she hadn't many moments to spare on such thoughts, for her husband had returned to say that the ax was gone. Could one of the children have taken it?

The father had borrowed an ax from a willing neighbor but on the day before Christmas he was silent as he unhitched his team in the wagon lot. Christmas tomorrow and he had been forced to bring back the load from town. The commission man had been truly sorry, for he did need ties; yet none of these were large enough.

He crept to a window, lost in the sense of failure that made him ashamed to walk to his own door. There an odd sight straightened him. Inside were Tim and his mother joyously trimming a Christmas tree. Tim raced to the door to keep the younger children from bursting gleefully into the room and learning its great secret.

When the father entered the house, no one asked him about the ties. "Dad, dad!" Tim shouted. "Do you know those red berry trees that grow way up the crick? Awful hard to get to, but when I found 'em I thought they were so purty I took some to school. The teacher said 'that's holly' and then I read about holly and learned that folks will pay for it to have it for Christmas. So I gathered a lot of it and made me a holly stand up on the new road just hopin' they would. And dad, they did buy it! Stopped their cars and said, 'Why it's holly; who would have thought we'd find it here!' They wanted so much I had to work awful hard getting it, but gee, it was fun! I wanted to surprise mom and you, and now I'll tell you both that I made $27.22. There's $20 right now left after buying our Christmas. Gee dad, I love this old farm! It's got lots of surprises on it yet. This one ain't the last one."

The father brushed a tear from his eye and kissed his wife. Then he shook hands with Tim. "You're the kind of a son a man can be right proud to own," he choked.

"But dad, will you forgive me?" the boy suddenly implored.

"Why Tim, forgive you what?" the father asked in surprise.

The boy led the way to the kitchen. "You see dad, I just had to have it?"

The father pretended to frown as Tim pointed and then he winked.

"Well, being as it's just about Christmas for us, as well as the rest of the world, I guess I'll have to overlook it." For there in the far corner of the room stood the ax. It was Tim who had borrowed it.

Frantic Signals To Airman Saves Lives 2 Indian Homes

Frantic waving of a red blanket, smoke from signal fires, and "S-t-o-p" lettered in branches on a frozen lake, halted Pilot Ernest Kubicek at Moose lake, north of Nelson Forks, B.C., last week and probably saved the lives of two Indian families near starvation in the remote area.

Story was related by the United Air Transport pilot after he had completed the Whitehorse-to-Edmonton air mail flight Saturday.

"I had passed over Nelson Forks with a clear ceiling and was flying towards Lower Post 2,000 feet when my attention was attracted by a red flash against the white patch of a small lake," Pilot Kubicek related.

Circling lower the flier saw two columns of smoke rising from the lake ice, then he saw the crude lettering accepted as a "stop" sign in the north.

He made a landing on the lake, to be greeted with jubilation by two Indian trappers who explained their rations had failed, no game had been found on frantic food-hunts and their families were hungry.

Supplied with sufficient food to last for a few days and assured that supplies would be flown to them on the next flight, the Indians were cheered considerably and waved in farewell as the mail craft roared on its course towards Lower Post and Whitehorse.

First Draft Of Alberta Brief Finished Soon

First draft of the Alberta brief on the subject of the economic and financial position of this province, originally started with the idea of presenting it to the Royal Commission on Dominion-provincial relations, is expected to be completed by the middle of this week, it was learned on reliable authority on Monday.

The brief, while it will not be presented to the Royal Commission, will be made available to the public.

Following completion of the first draft, the brief probably will be revised and amended prior to final approval, in the light of submissions made by other provinces.

It is understood that on many of the points with which Alberta is in accord with other western provinces and which have already been dealt with in submissions to the Commission, there will be no mention in the Alberta document.

Police Abolish "Trap" System For Motorists

Abolition of the "police trap" system for motorists has been carried out at Edmonton, so members of the branch in that city of the Alberta Motor Association have been advised.

This change in policy is welcomed by motorists who have long felt resentful over "police traps," which most frequently result in the wrong type of motorists being penalized for law infractions.

The Edmonton police now operate upon the system that best results are obtained when the officer keeps himself in full view, acting as a reminder to the driver that traffic regulations must be observed.

It is well known that the "police trap" often resulted in getting the innocent motorist into trouble instead of penalizing the consistent violator of driving regulations. People who for the most part gave close attention to motor regulations were caught in the "police trap" and were fined.

Instead of the antiquated "trap" system, fairness and courtesy have been substituted by the capital city police.

This is something which the A.M.A. has advocated over a long period of years. Motorists are not out to break the law and if warned courteously will not repeat the offence.

But no one defends or desires to excuse the reckless driver or "speedster" who persists in ignoring all traffic laws or regulations.

Japanese Chiefs Ban Santa Claus

Tokio, Dec. 21— Santa Claus was banished from Japan Tuesday by a home ministry ordinance. Japan, although not a Christian nation, had been celebrating the day with growing ardor annually.

Shopkeepers have announced instead of the usual Santa Claus and Christmas decorations their establishments will display Japanese, German and Italian flags (The three nations are signers of an anti-Communist agreement.)

Up To Tokio To Show Her Excuses, Apologies Mean More Than Words

London, Dec. 21—Grave warning couched in careful diplomatic language was directed to Japan Tuesday night in the commons by Premier Chamberlain, in the course of a foreign affairs debate during which he announced there had been perceptible lessening of international tension in Europe especially over Spain

The premier, who regretted the necessity for debate because, he said, "a china shop is not the best place for a fencing match," made it clear Japan's excuses and apologies for firing on British ships and killing British subjects would not satisfy the British government.

"There is a major war proceeding in the Far East," he said. "Whether that war has been forced on China or whether Japan, as her apologists say, has been compelled to force war on China, I do not wish now to say. But this I can say, no attempt has been made by Japan to seek settlement by peaceable means."

Summarizing successive failures of international action, especially the Brussels conference, he said Britain drew some satisfaction from the harmonious agreement it had reached with the U.S.

Then in serious tones he went on "We are still anxious to serve the cause of peace by any honorable means open to us, but it must not be thought that in our desire for peace and our patience under repeated provocation we shall be unmindful of our international obligations or forgetful of our duty to protect British interests."

He concluded by declaring it was now for Japan to show that her excuses and apologies meant something more than words

Major Attlee, leader of the Labor opposition who opened the debate, declared not a single member of the house, he believed, would attempt to defend Japan in her present course.

BRITAIN SEEKS SOLUTION PROBLEMS WITHOUT WAR

London, Dec 21— In broad strokes, Chamberlain swept Tuesday across the tortured international field

"We have a definite objective in front of us," he declared in the commons. "That objective is a general settlement of the grievances of the world without war." The crowded government benches roared applause

No dramatic secrets were revealed. He had, however, some strong words for Japan

At times during his speech, Mr. Chamberlain had a running battle with opposition interruptions

Clement Attlee, leader of the opposition, previously had attacked the government as taking a purely materialistic view of British interests and as not realizing that true British interests lay in the rule of international law and international justice

"The world," Mr. Attlee said, "needs a new start with a great appeal. I should like this country to make it."

Mr. Chamberlain recognized that the Brussels conference on the Far East conflict had failed to secure peace. The result was unfortunate but was not a disgrace to the conference

There had been only one way in which the conflict could have been brought to an end. That was not by peace but by war.

It was claimed the policy of non-intervention in Spain was designed to prevent conflicts spreading across the frontier. In that sense, Premier Chamberlain declared, non-intervention had been a success, not a failure. Ironic opposition cheers interrupted Mr. Chamberlain's speech

The leader of the opposition, the prime minister went on, demanded justice for the Spanish government.

"Isn't it clear that he means intervention on one side?" he asked. Again interruptions came from the opposition benches.

Fail To Recover $636 Woman Lost

Mrs. Peter Plypick's $636 in savings, lost Saturday night in a jammed downtown department store, still was missing Tuesday, it was reported by detectives aiding the woman in the search.

Mrs. Plypick, who lives at 9646 108 A ave., Edmonton, dropped her purse containing the money while shopping. She said it represented savings accumulated since she and her husband who is a packing plant employee in Edmonton, were married in Drumheller 10 years ago.

Neglected Wife But Fed Pigs

Quebec Dec. 21—Antonio d'Aigle admitted in court Monday he had failed to provide for his wife and children, but "I gave something for the upkeep of my pigs."

Charged with non-support by his wife, the St. Gerard farmer said he left home because she "nagged and threatened me." When he tried to return, he said, his wife barred the door

He was afraid of her, he testified "Anybody would be if he had any respect for his life," he told Judge Lactare Roy.

The judge took the case under advisement and hoped the two would mend their differences before the holidays

Spring Here? Birdies Bath, Pansies Bloom

Mrs. F. L. Walters, of 9516 101 st., decided Monday at noon that spring is heading for Edmonton. A little birdie told her so

In fact several of them almost did For when she came out to her front garden Monday there was a group of beautiful birds bathing in the bird baths as if it were midsummer.

And in case that were not enough, Mrs. Walters looked around the garden and spied five modest pansies lifting graceful heads as if in herald of the spring.

A National Institution

Spread out over the vast area from the Atlantic ocean to the Pacific ocean there are about seven hundred weekly newspapers. Some are old, going back to Confederation, some are comparitively new born, having been rolled from their presses for only a few years. But all of them, no matter where published are intensely loyal to their seat of publication. To them, they are located in the best district, in the best province, among the best people in Canada. That is their creed, a creed to which they invariably render something more than mere lip service.

They solicit the support of the people of the district in which they are published, certainly, but in doing so they are asking the people to not only help the newspaper, but to help themselves. A country's greatness can be equally judged by the virility of its villages as by the importance of its metropolitan centres. A country weekly newspaper may be, and frequently is, a paper of Mr. and Mrs.', but the phrase Mr. and Mrs. represent the true structure of the nation.

The Tofield Mercury solicits your subscription and the subscription of your friends and neighbors. For nineteen years we have published for mutual benefit, and hope and expect to publish for some number of years more. Renew or subscribe NOW.

The Tofield Mercury

Two New Ford V-8 Cars for 1938

FORD MOTOR Company of Canada, Limited, announces the new Ford V-8 cars for 1938. For the first time Ford presents two distinct lines, the De Luxe Ford V-8—a big luxury car—and the newly styled Standard Ford V-8.

The De Luxe Ford V-8 car is entirely new in appearance, longer, roomier and more streamlined. The front design is modern and distinctive. Fenders are deeper and more massive. The rich interior appointments of the car match its outward beauty. Longer bodies provide more room and comfort and there is larger luggage space in all models. The De Luxe car is powered with the proved 85 horsepower V-8 engine. Shown above (top photograph) is the De Luxe Fordor Sedan.

The Standard Ford V-8 for 1938 brings new styling with a longer hood and flowing curves. Interiors are spacious and neatly appointed. New instrument panels have knobs recessed for safety. The radiator grille louvres continue back into the hood to present smooth flowing body lines from bumper to bumper. It is built on the same 112-inch wheelbase as the new De Luxe and has the famous Ford V-8 engine. The new Standard Tudor Sedan is shown above (lower photograph).

THE SPIRIT OF CHRISTMAS—

(Continued from front page)

ing for an answer, "we must get to work, there is much to be done."

Strangely enough by now I was quite tranquil, fear all gone, only intense interest remaining. And so I watched through what seemed to be aeons of time. Working steadily, without victuals or sleep, the two spirit giants Give and Take worked together and made the world. Before my astonished eyes I saw swirling gases caught and compressed and made into solid substances. A continent and an ocean, islands and seas. Never stopping, the giant spirits worked until they had made a sphere of land and water. On the land, great mountains were formed and in the seas there were many great depths. I noticed as the work progressed, Mr. Give did most of the work while Mr. Take did most of the bossing. And so it went on, birds were started flying and fish were set swimming. Into the now plentiful forests and vast plains were placed animals of all sorts, shapes and sizes. There were animals with hoofs that were cloven and animals whose hoofs were not. There were animals that travelled fast on the ground and those that travelled slow—so many different kinds that I could not remember them all.

It was not until the world was completed did the two giant spirits, Give and Take, commence to converse again. Said Mr. Take: "Well, Mr. Give, we are about done. A fairly good job, don't you think?"

Mr. Give replied: "Yes, quite good so far. The grass is lush and green. We have both salt and fresh water. The mountains send rivers filled with life giving waters, and there are lakes for reservoirs. Yes, it is a good job, but we must not forget the men and women. You know we made this world for them."

"Oh yes," replied Mr. Take crossly, "I do not believe in this men and women benefit idea. But if you are set on this we will put some men and women into the world, though in making this concession I demand that they all be imbubed with the spirit 'take'."

Mr. Give's kindly face clouded, but he spoke evenly and calmly, saying, "I am glad that you agree to putting men and women into the world so that they may, through their reasoning powers enjoy to the full, the blessings of the earth's bounteousness, but I cannot agree that they shall all be imbubed with the spirit of take. I would like them (and Mr. Give looked wistful) to be imbubed with the spirit of give."

"Nonsense," said Mr. Take. "Don't you know that if they all give they will lack the will to create things. They will have no desire to work, to possess things, to become rich. Then they will slowly die and cease to be."

"Yes," said Mr. Give, "I know those things. But I also know being imbubed with the spirit of take will make them greedy. They will quarrel and fight, wound and kill, in order to increase their possessions. Great nations with mighty armies will engage in fearful combat. Empires will rise and fall and after a long, long time the spirit of take will overwhelm them and the world will be as if they never were.

And so the argument went on until Mr. Take said: "Enough! we must settle this thing. We must compromise. You choose what you want and I may agree to it."

"Well," said Mr. Give, "so let it be. I will have all the mothers imbubed with the spirit of give. I know they will do me credit. For their offspring they will sacrifice their possessions, their health, and if needs be their very lives. I can count on mothers everywhere."

"Yes, yes," said Mr. Take, "And I will have—"

"Wait, wait," interrupted Mr. Give, "I have not finished. And I want the children, I want the children especially to be happy and giving, for I know (and here he raised his voice) I know happiness comes from giving even more than from taking. Yes, I must have the children."

"Very well then," said Mr. Take, "To this I agree. The Spirit of Give may control all the mothers and all the children, but I, the Spirit of Take, may control all others. The soldiers and sailors, the generals and admirals, the statesmen and politicians, the big bosses and little bosses, workers everywhere do I control for all time, I, the Spirit of Take."

Mr. Give looked very thoughtful, and I thought his pleasant face took on a saddened appearance. "You have the best of the bargain," said he.

"But I granted your requests," said Mr. Take.

"Yes," replied Mr. Give, and speaking very slowly, "I ask one more. We, together, the spirits of the chill valley and the distant sun, have made a world of land and water, grass, flowers and trees. We have put birds in the air, animals on the ground and fishes in the sea. And now we will give the world to the men and women we will put upon it. We will endow the men and women of the earth with our respective spirits as agreed upon. But this last request I make. That for one day out of every 365 in this new world, all men and women, boys and girls, be imbubed with the Spirit of Give. Grant me this and we will proceed."

"It is nonsense," said Mr. Take, "but I agree."

And so, as the giant spirits made other living creatures, they made men and women and put them to earth. And while mothers and little children love and are loved, give and are given to all the time, all the other people are followers of the Spirit of Take. Except one day each year when everyone forgets their greed, forgets their desires and are imbubed with the Spirit of Give.

Their work done, the two giant spirits prepared to depart for the places from whence they had come. The sun was shining on the new world, it was getting very warm and I heard in the distance, "Good-bye Spirit of Take," Good-bye Spirit of— Spirit of— Spir—"

"Spirit of Christmas!" someone was shouting as they leaned over the lounge upon which I had been sleeping. The glass of the bookcase still reflected the fire's glow and there on the shelf, conspicuous by its thickness was H. G. Well's "Outline of World's History."

Car Turns Over

Mr. and Mrs. Lovel had a narrow escape from serious injury last Friday while enroute to Edmonton by auto. As they were travelling north just before reaching Lindbrook, the car skidded on the icy road. As the rear end swung round, the rear wheel hit a culvert and turned completely over into the ditch. When the car skidded, Mr. and Mrs. Lovel, the only occupants of the car, were in the front seat, but found themselves huddled in the rear of the car when the car stopped and they were able to scramble out. Fortunately they were not seriously injured, suffering only shock and bruises

A Merry CHRISTMAS To All From

Whist Drive

A successful whist drive was held at the Institute rooms on Friday last in support of the Anglican church. During the evening draws for the Christmas dinners, turkeys, beef, etc., were made. These dinners were donated by generous supporters of the church and created both fun and entertainment.

The winners of the Christmas Dinner Draw were: 1st, 20 lb. Turkey, No. 52; 2nd, 10 lb. Roast of beef, No. 154; 3rd, 10 lb. Turkey, No. 289; 4th 10 lb. chickens, No. 35.

We take this opportunity of thanking everyone for their liberal support.

Normal School Reunion

An event of interest is to be held in Camrose, namely the Normal School Alumni Reunion, on the 29th of this month. It is hoped the various members in this district will put forth every effort to attend and help to make this reunion a success.

KINGMAN

A Happy New Year to All!

Mr. Jim Fletcher left last Friday for Galveston, Texas, on a business trip.

Miss Gertude Asp of Calgary and Miss Muriel Asp are at home spending the Christmas holidays with their parents.

Miss Marian Simonson and Miss Archer from Wetaskiwin are spending the holidays at the Clarence Simonson home.

Mr. Oscar Johnson and family spent Christmas day at Mrs. Rogness' home.

The Misses Alice Simonson, Alvina Simonson and Connie Erickson, all attending school at Edmonton, are at their respective homes for the holidays.

Christmas day guests at the Geo. Welsh home were: Mr. and Mrs. McIntosh, Mr. and Mrs. Lars Larson and Miss Evelyn Welsh of Camrose.

Mr. and Mrs. A. Rogstad had Christmas dinner with the Jack Herron family.

The school concert which was held on December 23rd in the Kingman Hall was well attended. A splendid program was enjoyed.

The Baptist Sunday School had a very good program on last Sunday evening.

Miss Malinda Dettwiler is attending Bible School at the Mennonite Church. She is staying with Mrs. Nora Stauffer.

BARDO

To the Editor, staff and readers of the Tofield Mercury we extend a Happy New Year.

Large crowds attended the school programmes at Bardo and Grand Forks.

Rev. Palmer Anderson has returned home from Saskatchewan where he has been preaching during the last three months.

The Misses Hannah Jenson, Carrie Breckan, Edna Steen and Olive Johanson are at their homes for the holidays.

At a business meeting held by the Bardo Male Chorus, it was decided to continue the organization which was organized in January 1932.

Ingvald Ness was nominated to act as a member on the Divisional school board. The election will be held on December 28th.

Reuben Johnson of Northfield is a visitor here during Christmas.

Rev. Palmer Anderson held services in the Lutheran Church on Christmas day.

The Bardo hockey team journeyed to Round Hill last week and defeated Round Hill 4-1. Bardo line-up: Goal, M. Lehman; Defence, A. Steen, E. Steen; Forwards, G. Olson, I. Foshaug, L. Stauffer, P. Anderson, B. Steen.

Mr. and Mrs. Alvin Steen spent Christmas at the Walker home at Lakeshore.

Clarence Rude held a goose shoot last week, Merlin Foshaug being the big winner. Mrs. Rude served lunch after the shoot.

Edna Steen is employed at the Hudson Bay and Margaret Moen at Eatons in Edmonton.

Mr. and Mrs. Arnold Johnson have purchased a quarter of land from the J. B. Anderson estate.

The Junior Choir and Sunday School rendered a lovely program in the church on Sunday evening. Due to the cold weather a small crowd attended.

Mr. and Mrs. Geo. Hendrickson motored to Wainwright for Christmas.

BEHIND THE HOG

By A.B.C.

We continue on from our last issue "And This is Curling," which brings us to the Lowly, Lamenting Lead.

Here is the work horse of the outfit. He must hump eight rocks to the place of business, dust them off and see that the other three, as well as himself, are duly provided with the omnipresent besom.

His besom is no ornament either, for with it he must belabor the ice in front of the moving rocks so that they may glide safely to the precise positions chartered by the omniscient skip. The second and third also sweep but their ladylike pats are merely anathema to the laboring "lead." The skip's broom is but a pointer used to indicate just where the rocks should be placed. Upon whether or not they go there depends the result of the battle.

The ordinary game is a pleasant pastime, providing a little gentle exercise and a faint thrill if one places rocks where skip says and thereby wins a game. But the real campaign is the Annual Bonspiel. For weeks ahead pothunters gather in solemn conclave gathering the old and skilled warriors in compact groups round the prizes so that the result of the war can be foretold to a coffee pot before it begins. But such is the love of a gamble that two or three hundred more enthusiasts will put up three bucks apiece in the forlorn hope that they may be able to wrest even a teaspoon from the talons of the close corporations of cup coppers.

The fight is on. Jargon of draws and sheets, of wicks and wallopings fills the air. Rink after rink of good fellows struggle in the best spirit of good sportsmanship; even the cup coppers can present an oily smile as they approach the push-over outfit, they know as their meat; but slowly and inevitably the ranks narrow down and the scowls of the sparton souls who are flattening less carefully selected rinks, widen as they know that presently Greek will meet Greek with vengeance.

Toward the end interest evaporates. Nine-tenths of the gay adventurers who sought fame as bonspielers, have realized that their chances of getting a hand on a silver cup were and are equivalent to the square root of minus one. The rocks were stacked by skilled hands against them. Occassionaly there is a minor upset accompanied by fearful groans from the vanquished lion, but such upsets are exceedingly rare. And so the trophies go to their predestined homes and curlers crawl back to work.

From all this you may gather that we have been through a Bonspiel. We have, and most thoroughly enjoyed it. What if we knew that the Macwhachels and the Brabtins, the Womanfeets and the Snatchers would ultimately get what they started for? We had a week's good fun, developed a sore pair of shoulders, took an inch off an incipient "corporation" and enjoyed a salutary cleanliness of many a hearty laugh. That's reward enough

0-0-0-0

Not much business in curling this last week—Cold weather and the Christmas Spirit kept us all busy.

0-0-0-0

A Skip's existence might be really worth while if he could fill as many places as a potato on a Menu.

0-0-0-0

One curler said "Sorry I can't stop Skipper, I got to get home and explain to the wife." "Explain what," said the Skip. "I don't know what till I get home," he replied.

0-0-0-0

No curlers are perfect and some are absolutely impossible.

0-0-0-0

I asked the Secretary if he could give me a sentence with the word Venice, and he said "Venice you going to pay your fees."

0-0-0-0

We hear whispers of a Bonspiel and our first item might pop it up a little.

0-0-0-0

LOCAL & PERSONAL

Miss Edna Campbell, nurse at the University hospital in Edmonton spent Christmas at her home here

Mr and Mrs. A. N Booth spent Christmas with Mr and Mrs. Bert Swift of Pallis.

Miss Nadine Everitt of Athabasca spent Christmas at her home here.

Miss Helen Cookson returned home from Paradise Valley She intends remaining home for a few months.

Mr and Mrs. Joe Mullen from Round Hill spent the Christmas holiday at the Everitt home.

Miss Margaret Whyte spent Christmas day at her home here.

Mr. and Mrs. E. Wuotherick and small daughter spent Christmas at Chipman.

Miss Lois Thompson spent Christmas at her home at Leduc. She returned Sunday accompanied by her sister Betty who is spending the week with her.

Mr. and Mrs. Jack and small daughter of Edmonton spent the Christmas week end with Mrs. McConnell.

Mr Bob Evans of the creamery staff spent Christmas at his home at Athabasca.

Mr. and Mrs. J. Lerbekmo, Loret Ross and T. Nomeland spent Sunday visiting at Mrs. McConnells.

Miss Gwen Firth who has been working in Edmonton is spending the Christmas week at her home here.

Mr. and Mrs. Norman Scott and Norma spent Christmas visiting in Edmonton.

Mrs Pyle and Esther spent Christmas in Bawlf.

Mr A. Machtmes spent the holidays at his home at Strome.

Sid Worton from Camrose spent Christmas day at his home here.

Miss Muriel Malcolm spent a few days in Edmonton this week.

Miss Malissa Kallal from Edmonton spent Christmas at her home here.

Miss Myrtle Bethel from Sedgewick and Hubert Bethel from Edmonton spent Christmas at the Bethel home here.

Miss Betty McCarthy and a fellow nurse from the hospital arrived in Tofield on Christmas afternoon.

Mrs. Ellis, Miss Cherry and Joan spent Christmas with Mrs. Malcolm and Muriel.

Miss Jessie Munro spent Christmas visiting friends in Edmonton.

Miss Helen McCauley, nurse at the Ponoka hospital spent Christmas at her home here.

Mr and Mrs. R. Whyte from Wetaskiwin and Miss Audrey Jobb were Christmas visitors at the Jobb home.

Charley Edwards who has been working in Trail, is spending the Christmas holidays in Tofield and Edmonton.

Mr. and Mrs. Abbott spent the Christmas holidays with Mr. and Mrs. Brady of Edberg

Mrs. Brady and two children is now visiting with her mother and father, Mr. and Mrs. Abbott.

Miss Agnes Johnson from Edmonton is spending a couple of days at her home here

Visitors at the Allen home during Christmas were: Mr. and Mrs. Gordon Provost of Edmonton, Miss Margaret Allen of Barrhead and Miss Elspeth Allen of Westlock.

Mr and Mrs. Sinclair returned home from a short trip to the coast.

Mr. and Mrs. Ferguson and son Donald of Edmonton visited at the Johnston Ferguson home on Christmas day.

Mr. Ted Curtis of Edmonton is visiting at the Barden home.

Mr. G. McLaughlin of Wetaskiwin was a Tofield visitor this week.

Miss Beryl Edwards from Ryley spent Sunday at her home here.

Miss Ethel Graham, who has been teaching the junior room at Cold Lake is spending the holidays at her home.

Mildred Graham has been attending the Agricultural College at Vermilion and is also holidaying at home.

Mrs. J. H. Johnson entertained the Phillips and Graham families for Christmas.

LINDBROOK

A Bright, Happy and Prosperous New Year is the wish of Lindbrook folk to all their friends and neighbors of Tofield and surrounding countryside, Bumper crops, Fat livestock and good prices for all!

The Christmas tree and concert was given by the teacher, Miss Y. Phipps and her pupils at the school last Wednesday evening, December 22nd, at 8:30 p.m. The school was very prettily decorated and boasted a large decorated Christmas tree loaded with presents. The stage also deserves credit, especially the fireplace, quite a work of art and ingenuity. The concert this year was given under very difficult conditions, an outbreak of measles causing quite a loss in the rank of "actors and actresses" and believe me, from what we saw of those that acted, some of them substitutes with only a few hours to study their parts, we sure have some pretty good talent right here in Lindbrook. The items were varied and amusing and both teacher and pupils deserve great credit for putting on so good a show, and it really was good. The school was filled to the doors and towards the end of the concert Santa Claus (Mr E. W. Hooper) arrived attired in his red and white costume and he distributed candies, nuts etc to all the kiddies and afterwards the presents, which seemed innumerable The concert closed with the singing of the National Anthem about 10:30 p.m and despite measles, cold weather and other drawbacks it was a real good concert.

Little Miss Agnes McHeffey, daughter of Mr. and Mrs. Willard McHeffey of this district, was taken to a hospital in Edmonton suffering from a serious attack of pneumonia. We hope soon to report her recovery

Irving Spangler of Poe,Alta., and his brother Carl, who is visiting him from Montana, U.S.A. spent last Wednesday with their friends, Mr. and Mrs J. Bracegirdle and family of Lindbrook.

HOLY TRINITY TOFIELD

Holy Communion — — — 11:00 a.m. In the evening the Choir will present the Cantata "The Glorious Song" at 7 30 p.m. All are cordially invited to hear this Seasonable Music

The draw for the handsome cedar chest sponsored by the Midget Hockey club was made Christmas Eve. Miss Betty McCartney, holder of ticket number 80 was the lucky winner

The children's popularity contest sponsored by the Crown Lumber Co. ended Christmas Eve The handsome Shirley Temple Doll was won by Muriel Rogers and the boys boots and skates by Keith McBratney

The draw sponsored by the Tofield Co-Op Store was made Christmas Eve Numbers were obtained by buying a pound of candy. Katie McAllister was the lucky winner.

The Midget hockey team played Bardo on Monday and won their game. Both teams were keen to go and a close game resulted.

On Christmas night Margaret and Jack Whyte entertained a few of their friends at their home. A very pleasant social evening was spent and a delicious lunch was served the guests

The primary Department of the United Church Sunday School held their annual Christmas party on Tuesday afternoon. Due to the measles and cold weather the attendance was not as large as expected. Games were played after which a plentiful lunch was given the children.

Men's Clothing Boots and Shoes

WYEFTEEPER

This is the story of sixty young men of Alberta who, formerly unemployed are now in winter quarters in the upper Highwood Valley within the Rocky Mountains forest reserve It is likewise the story of the initiation of a Dominion-Alberta effort whereby young men are being given the opportunity to secure forestry training and experience in the course of which practical work of a useful nature will be taken in hand While the cost of the project is equally shared by both governments, the actual operat[illegible] responsibility and for the purposes of direction, administration and supervision, the Alberta Forest Service is responsible The project known officially as the Youths Forestry Training Project has [illegible] Wyefteeper by the young [illegible] training which was [illegible]

At the [illegible] of the camp was [illegible] Alberta and British Columbia. The [illegible] ideal, not only as regards [illegible] in practical forestry work [illegible] for outdoor recreation in a form of activity that receives [illegible]

[illegible] the camp was finally [illegible] from the Dominion Forest Service [illegible] organization made a[illegible] of camp buildings [illegible] These buildings, of sectional construction, were dismantled moved, by truck approximately one hundred and fifty miles and erected at the new camp site

Concurrently with this preparation arrangements were concluded having [illegible] the initial food supply, [illegible] equipment [illegible] The preparatory work which had been started about the end of September was sufficiently completed towards the end of October to permit the camp to be entered Some delay had been encountered in the matter of trans[illegible] road conditions but [illegible] delay [illegible] be expected at the time of year that the preparations were taken in hand

Young men selected for training were [illegible] to camp commencing [illegible] and from that [illegible] they arrived from various points [illegible] until the project [illegible] had been reached

[illegible]

[illegible] equate provision was made for storage of groceries, vegetables and meats The store house was lined with damp resistant paper, a ten ton root cellar was constructed at the foot of the nearby mountain slope and a meat house of log construction erected. All buildings were banked with earth and gravel walks put down In addition, two springs were improved and the water piped from one for the kitchen, the other supplying the wash house A well was dug for reserve water supply.

The log buildings constructed by the trainees are a stable, tool shed, gasoline [illegible] meat house, two stall garage and a lean-to addition to the storehouse.

Fourteen sectional huts, plus the log buildings already mentioned make up the camp accomodation Sleeping quarters for the trainees consist of six huts 16 feet by 28 feet accommodating ten men to the hut The dining room is 16 feet by 56 feet and this building together with the kitchen forms a T Two huts 16 feet by 15 feet are [illegible] for indoor recreation and [illegible] large hut is used for wash house bath and laundry

[illegible] cleanliness of huts and camp is strictly observed and adequate provision for sanitation has been made In view of the fact [illegible] Highwood river is in it's [illegible] reaches, a source of domestic [illegible] stream pollution is scrupulously avoided. The camp is situated [illegible] distance from the [illegible] work projects and [illegible] trainees are dealt with [illegible] camp night watchman.

The trainees are largely drawn from localities where opportunities to [illegible] forestry experience is, to a great extent, non-existent As a re[illegible] elementary [illegible] to provide a foundation of understanding, knowledge and experience which will enable the young men to develop into good woodsmen

[illegible] the training more directly [illegible] with forest [illegible] be dealt with as extensively as desired it will be evident that the [illegible] gained an [illegible] knowledge and experience as a result of employment on the work required about the camp [illegible] with dovetailing [illegible] an insight into building work, the use and work [illegible] Camp [illegible] will provide experience in [illegible] camp management Woods work whether for fuel supply or securing timber for log building, the repairing of roads, the construction of a section of telephone line [illegible] the camp with the Forest [illegible] has provided the [illegible] opportunity to se[illegible] of various type[illegible] rangers must [illegible] The camp and the training [illegible] former ranger [illegible] varied experience in [illegible] work This officia[illegible] instruction and di[illegible] as any particu[illegible] on hand and pro[illegible] the training per[illegible] will be actively en[illegible] work, bridge building woods work and telephone line maintenance.

During the training the various forestry subjects will be covered by lectures, demonstration and where possible, by actual field work. Instruction of a technical nature will be provided by competent and experienced instructors Woods work, whether it be that of a field officer of the Forest Service, or in connection with the forest industry, always carries an element of danger. The nature of the work is such that medical aid is often difficult to secure and recognizing this, an important feature of the training is first aid, hygiene and physical fitness This phase of the training is in the hands of a qualified instructor and on this, as on strictly forestry work, the trainees are showing a keen interest and making very satisfactory progress Success in the work that this group of young men have shown a keen interest in, depends to no small extent on physical fitness Recognition of this fact is reflected in the place given to suitable sports and recreation in the training scheme It is but natural that outdoor sports and activity are encouraged, such as exploration, mountain climbing, skiing, and hockey The surroundings are ideal for these pursuits and very little encouragement is needed. In particular, skiing as a form of winter travel, which if mastered might later be of use in actual work, will be encouraged to the greatest extent as possible. However, winter conditions which make winter sports possible, are sometimes so severe that outdoor sports must be foregone for short periods and particularly the evenings in camp must be filled with some form of recreation Bridge is played extensively and naturally the camp has its quota of musicians but many of the trainees are showing a great interest in boxing and wrestling. Suitable equipment for these sports has been provided and it is likely that the camp will have its boxing and wrestling tournament at which the championship of the various weight divisions will be decided.

Each morning, if the temperature permits, and the weather otherwise is favourable, the trainees have setting up exercises. It is probable that food consumption at breakfast is somewhat heavier than would be the case if the morning programme were altered, but as a tune-up for the days work there is nothing equal to this pre-breakfast activity.

And so whether it be work or play, the camp is operating on planned activity. It has been in operation sufficiently long to allow an estimate to be made of the benefits that it is hoped will accrue to the individual trainee. In practically every instance, the response and improvement of the individual has been very satisfactory and leads one to believe that in this scheme, which is to be mutually beneficial, in that useful work is to be done in return for the opportunity offered of securing training, experience and employment, that the young men will, at the end of the training period, be better equipped mentally and physically to meet life's responsibilities. In particular, should the province or industry find it possible to utilize their services, the young men will be able to accept such employment with the assurance that only comes as a result of having the requisite knowledge and experience.

Sleeping Beauty Organist for Richard II

Virginia Omar, the "Sleeping Beauty" of 1931 who slept for six months and woke "feeling fine" with an ambition for a musical career. She plays on a Hammond Organ the new instrument which uses no pipes or reeds, the incidental music during Maurice Evans' stage production of Richard II This production is booked to play this season across the United States and Canada

Above are Maurice Evans, Producer in the title role, and Ian Keith as Bolingbroke, as they appear in the Toronto stage in late December and early in the New Year at Winnipeg Edmonton, Vancouver and Victoria Inset is the Hammond Organ which is manufactured in Canada by Northern Electric Company Montreal.

THE WORLD OF WHEAT

By H. G. L. Strange, Director Research Department, Searle Grain Co.

"Garnet wheat will be removed from the grade 3 Northern."

The above announcement was recently made by the Hon. W. D. Euler, Minister of Trade and Commerce, Ottawa.

This news will bring anxiety to every farmer who is growing Garnet.

Some important queries will at once spring to the producer's mind. Should I continue with Garnet? What is the price of Garnet likely to be? Should I use a different variety, then which one?

The truth is that Garnet has been a good variety for northern farmers, for it has enabled thousands to stay on their farms and to pay their taxes. The bald fact is, too, that there is no variety available at the moment that will, with complete satisfaction, replace Garnet.

Having decided to change the grades, in order to help those farmers who may produce No. 3 Northern, the further duty of the Dominion Government should be specifically to help the Garnet growers. This can be done by increasing the appropriations to plant-breeding institutions, so that the excellent work now going forward to develop a new early variety to replace Garnet can be "stepped up."

Next week I will endeavor to discuss the queries propounded.

Following factors have tended to raise prices:—Greece purchases Australian wheat— Danubian exports practically cease for winter—Japan buys Argentine corn—Three successive poor crops in Morocco exhaust wheat and barley supplies— Reduction in U.S. Government corn, wheat, oats, barley and rye estimates—Excessive moisture in France.

Following factors have tended to lower price Holland limits rye imports—U.S. Senate rejects proposals to buy farm products—Argentine weather favors wheat harvesting —Official Roumanian winter wheat acreage estimate twelve percent above 1936—Wheat, oats, barley, rye and potato estimates for Latvia higher than 1936 Rains improve Indian crop prospects.

Burglars Cut Alarm: Then Get Big Loot

Calgary, Dec 21—Burglar alarms didn't mean a thing to robbers who entered the store of B. R. Cable in Ogden, a Calgary suburb, early Sunday. They disconnected two alarms which the storekeeper thought had been well concealed, cutting the wires and removing the batteries. The burglars, still at large, knocked the combination off the safe and escaped with loot valued at $1,018 including cash, cheques and some jewelry.

All-British

"Under the Red Robe" (British)—A swaggering adventure tale of the days of Cardinal Richelieu, produced by an American, directed by a Swede, photographed by a Chinaman, designed by a Swiss, and played by a German, a Frenchwoman, a Canadian and a Mexican. Otherwise, an all-British picture. Film note in London Observer

Announcing

TWO NEW FORD V-8 CARS FOR 1938

THE DE LUXE THE STANDARD

FORD offers two new cars for 1938 — the Standard Ford V-8 and the De Luxe Ford V-8. They are different in appearance — but built to the same standard of mechanical excellence — on the same 112-inch wheelbase.

Because people liked our 1937 car so well, they bought more than of any other make. They liked its looks, its smooth performance, and the way it handled. We have improved on that car in the newly styled Standard Ford V-8.

But some folks wanted still more size and style, with the same fundamental Ford advantages. For them, we have designed a new De Luxe line.

The De Luxe Ford V-8 Sedans are longer with more room, larger luggage space, and finer appointments. De Luxe cars are equipped with the 85-horsepower Ford V-8 engine. They provide more motoring satisfaction at low Ford prices.

The Standard is even lower priced than the De Luxe. It is a brilliant, modern car. It has graceful new lines and well-tailored interiors. It gives you the same basic advantages of the 85-horsepower Ford V-8 engine.

Before Ford made V-type 8-cylinder engines available to every one, they were used only in expensive cars. Since then, four million Ford owners have learned the genuine enjoyment of driving an 8-cylinder car with all-round economy. The low prices of the De Luxe and Standard cars make it easy for you to step into the V-8 class.

FIT YOUR CAR TO YOUR NEEDS

With two distinct designs, two body sizes and two price ranges, you'll find a 1938 Ford car to fit your personal needs exactly. Whatever one you choose, you get time-proved Ford V-8 performance. Whatever price you pay, you get a car built soundly to serve you well. . . . That's the Ford way.

FOR LOW DELIVERED PRICES SEE YOUR LOCAL FORD DEALER

De Luxe Ford V-8 models are Coupe, Tudor Sedan, Fordor Sedan, Convertible Coupe, Club Coupe, Convertible Club Coupe, Phaeton and Convertible Sedan.

Standard Ford V-8 is available in three models: Coupe, Tudor Sedan and Fordor Sedan.

Ford sells a fully equipped car at the lowest possible price. The prices on De Luxe models include twin tail lights, two windshield wipers, two sun visors, twin electric horns, cigar lighter, de luxe steering wheel, glove compartment clock and lock, chrome wheel bands, in addition to front and rear bumpers and guards, spare wheel and tire and tube, tire lock, and headlight beam indicator.

Prices on Standard models include front and rear bumpers and guards, spare wheel and tire and tube, tire lock, one tail light, one windshield wiper, one sun visor, cigar lighter, headlight beam indicator, and two horns.

THE TOFIELD MERCURY

A Weekly Newspaper Published At

Tofield, Alberta

W. Werton, Publisher

EDITOR'S NOTE: The following Christmas message, while written in time for our Christmas issue, was delayed in the mailing. It very appropriately arrived Christmas morning and we are very pleased to convey to readers the message of the Rev. Father through the medium of the printed page.

". . . . Here comes Santa Claus . . ." ". . . Hurrah . . ." ". . . Merry Christmas . . ." "This is for you . . ." "What a beautiful gift he gave me . . ." ". . . Here love is true . . ." And so the fanfare of pleasure that ushers in the world's happiest feast—Christmas.

Is this the whole message of Christmas, this fanfare of fun, alone?

"Peace on earth to men of good will." Thus was the first Christmas ushered in; thus was the starry stillness of that Palestine night broken by the chorus of angels singing, "Peace on earth to men of good will."

With the gift of His Son, God gave us peace. But God was giving His gifts to men and women who were His images; men and women who had minds and wills, who could appreciate His Gift. But there is no gift unless there is someone to receive, and man has that God-given power to receive or reject. Therefore did the Angels sing: "We bring you good tidings of great joy . . . Peace on earth to men of good will."

He made us free, and free He leaves us; we can enjoy His gift if we will. Only men of good will receive His gift of peace.

This is the Christmas message: this is the Christmas gift to all of good will—Peace.

And to you all, our sincerest wish and heartiest greetings. Peace and Merry Christmas.

John C. Naphin, C.SS.R.

WHAT WESTERN CANADA MEANS TO EASTERN CANADA—

(Montreal Daily Herald)

LEST WE forget what Western Canada means to Eastern Canada, and what the harmonious union of both means to the continued existence of British North America as the home of a people free to go about their peaceful avocations with none to make them afraid, let us look at Canada as a whole for a few moments.

First, look at it in the light of the land-hungry nations. **What would Germany or Italy not give to gain possession of the three Prairie Provinces of Canada,** provinces which not only constitute one of the choicest agricultural territories in the world, but are richly endowed in metals, coal, and oil?

Few people realize that each of these provinces is larger than either Germany or Italy—that the three provinces together have more than double the land area of Germany and Italy combined.

Germany's land area is 181,800 square miles. Italy's is 120,000 square miles. Alberta, Saskatchewan and Manitoba each have a land area of 250,000 square miles or more.

Now let us look at the history of these provinces. In the first decade of this century the filling up of the West by agricultural settlement exerted a profound influence on the general development of the Dominion.

Vast amounts of capital were attracted to Canada for the construction of transportation and other facilities and the building up of such cities as Winnipeg, Regina, Saskatoon, Calgary and Edmonton.

Where was this money spent? Largely in the East for materials—for steel and rolling stock for the railways, for agricultural implements for the new farms, home-furnishings and clothing.

This activity laid the foundation for an era of factory building that contributed greatly to the growth of population and prosperity in the Eastern Provinces.

What built the Angus shops in the East End of Montreal and contributed much to the activity of the Point St. Charles shops in the West End?

The trade of the Western Provinces.

What built up the grain ports of Fort William and Port Arthur, and made Montreal one of the world's greatest seaports?

The grain trade of the Western Provinces.

What for years has been the biggest single factor in our export trade?

The western wheat crop.

What has given the greatest amount of employment to men engaged in the inland and ocean shipping and railways centering upon Montreal?

The western wheat crop.

What single product has brought more ready cash than anything else into this country to be spent on the products of industrial Quebec and Ontario?

The grain crops of the Western Provinces.

Italy would love to include the Western Provinces in the Roman Empire. Germany would revel in their possession.

And, coming nearer home, there is a general feeling in the West that the United States would be ready to assume all obligations of the Prairie Provinces in return for the privilege of making them the 49th State of the Union.

Yet here in Eastern Canada are some who are talking as though the Western Provinces were a liability instead of an asset—some who would grudge generous help to these provinces to tide them over the troubles caused by a depression that hit these provinces harder than any other part of the Dominion.

The Western Provinces will come back—make no mistake about that. One good crop would alter the entire economic outlook not only of these provinces but of the whole of Canada.

Let us as a people deal with the Western Provinces in a spirit of helpfulness in their time of trial.

Let us remember how much of our past prosperity we owe to them and how much they mean to our future.

Let us remember that with the Western Provinces an integral part of the Dominion which is ours, we, as a young nation and yet but a small nation, have solved for us for all time the problem of room for expansion which is creating such unrest among the land-hungry nations of Europe.

HEALTH

A HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION AND LIFE INSURANCE COMPANIES IN CANADA

Do You Know This Woman?

She lives in Canada She is between 45 and 65 years of age Several months ago she noticed a lump in her breast It was quite small, not painful to touch and really gave her no trouble.

As weeks passed by, she observed that the lump was becoming a little larger It seemed to be somewhat bound down in the breast tissue, but still not very troublesome. Her husband suggested that she see her doctor but that didn't seem to her necessary, especially as she was not feeling ill.

The lump, however kept on swelling and spreading and a certain amount of tenderness was noticed. She began to go down hill physically; became tired and weary, appetite not so good, and rather restless in her sleep.

Why not see the Doctor? Well, what could he do? Perhaps it was not serious and then again he might say it was cancer and that would mean and operation and No, she would keep away from Doctors and after a while all would be well.

You aren't this woman, are you? If you are, let us tell you as kindly but as frankly as we can, that you may be gambling with death.

You may have cancer of the breast.

A few months ago, if you had gone to your Doctor, he could have removed that small lump and given you a reasonable bill of health for the future Now, if your life is to be spared, you must not delay a day longer in placing yourself in the hands of a competent medical adviser Your chances of a permanent cure have been greatly reduced by your delay. You face a grave problem but your only chance for life is to receive proper treatment. If you continue to ignore the condition, it le[illegible] does mean certain death How different the picture would be if treatment had been undertaken when you first noticed that lump It was the [illegible] of cancer, but in an early [illegible] After treatment is so much [illegible] than now and cure [illegible] certain

And reader, you are not this woman, but [illegible] you [illegible] in a few [illegible] Have you a small lump in the breast? Well, if you have see your Doctor now It may not be cancer at all [illegible] something much less serious However take no chances

Last year 11,6[illegible] Canadians died [illegible] cancer [illegible]

[illegible]

Canadian National Railways Carries 450 Relief Cars Free

Montreal, Dec 27 Since September, the Canadian National Railways have carried free approximately 450 carloads of relief supplies to drought areas in Western Canada, it was [illegible] today Inquiries were made at the railways' freight office here following the remark made by J. A Argo, chief of the tariff bureau, Freight Division, in giving evidence at the Chevrier Royal Commission hearings in Toronto

Shipments of fruit and vegetables were carried without freight charges from all parts of Eastern Canada, including Prince Edward Island, which sent potatoes In addition 150 carloads of apples went to Saskatchewan from the Okanagan.

More than 1500 smaller shipments of clothing, books and other supplies have been carried as well The Canadian National has made this contribution to the welfare of the stricken people of the west for the past five or six years Churches, charitable organizations and other clubs and associations gather materials

1938 CHEVROLETS PRESENT MANY ADVANCES

Models of 1938 Chevrolets announced recently are now making their debut at local showrooms. Chevrolet presents three distinct lines—the Master de Luxe, the Master, and the Master Special. All are newly-styled and smartly equipped. New Tiptoematic clutch and new starting mechanism head the list of mechanical improvements. There is a remarkable system of soft-ride springing on the Master and the Master Special series. The Master de Luxe has improved knee-action. Above is shown Coupe in the Master de Luxe series; below, the new convenient battery arrangement.

Ship Distress Message Says Vessel Sinking

London, Dec. 21—Lloyds announced today the United States Liner City of Hamburg had wirelessed that she was sinking after a collision 10 miles east of Terschelling, the Netherlands.

"We sinking fast 10 miles east of Terschelling after collision," the S.O.S. said.

The City of Hamburg is owned by the Baltimore Mail Steamship company and is an 8,124-ton vessel. She was built in 1919.

The distress message was picked up by Lloyd's North Foreland station.

Lost Baby Is Soon Discovered

Toronto, Dec. 21—Less than an hour after 22 month-old Barbara Ann Parks was reported [illegible] from her baby carriage in front of a downtown department store today, police announced the child had been found

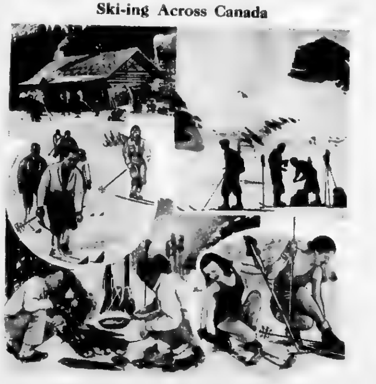
It turned out another shopper had felt sorry for Barbara Ann, left in her carriage in near freezing weather. The child was taken into the store next door to keep warm.

Eighty Bodies Of Fire Tragedy Are Removed

Tokyo, Dec 21—Eighty bodies of children and adults had been removed today from the blackened ruins of a village school at Tomita, Wakayama prefecture, victims of a holocaust that started when a [illegible] film [illegible] fire.

The film was being shown to [illegible] fort the families of Japanese soldiers killed on the Chinese fronts. Three hundred children and 150 adults were in the school auditorium yesterday when the fire broke out

Ski-ing Across Canada



Pleasure and company of skiing now rank high among the major winter sports throughout Canada The keen sun-lit winter days call thousands to the trails, from the Maritime Provinces in the east to British Columbia in the west. The Canadian Pacific Railway is contributing in large measure to the development of ski areas both in the east and in the west From Montreal and eastern United States thousands travel on the "Ski Specials" to the Laurentians each week-end, and on the prairies and in British Columbia [illegible] Banff, Sunshine Valley and other Canadian Pacific resorts for the winter season Layout shows upper left the ski club on Grouse Mountain Vancouver, upper right skiers halting for a breather on a high pass above Sunshine Valley, Canadian Rockies, middle left is a group of Winnipeg enthusiasts on one of the ski trails south of that city, and lower left shows Laurentian Mountain enthusiasts preparing luncheon on the trail Lower right are two ultra-enthusiasts-object, the famous Laurentian sun-tan.

Heroic Chinese Boy Scouts

Details of the heroic work done by Chinese Boy Scouts at Shanghai and elsewhere in China have been hinted at in press despatches and news reels. International Scout Bureau at London reports more fully as follows:

Despite the grave danger of bombing in and around Shanghai, Chinese Boy Scouts carried out their Scout obligation to "help other people at all times." Their services in the hospitals and other places can be looked upon as nothing less than heroic and under the [illegible] danger they still persist in carrying on.

Immediately after high explosives have been dropped in Shanghai young Scouts began searching for the dead, dressing the slightly wounded with bandages improvised from blood-spattered piles of material and acting as stretcher bearers.

One of these young Scouts performed a task from which a grown man would have shrunk. A [illegible] building had [illegible] the ground and [illegible] the explosion [illegible] ed from the [illegible] had been [illegible] injured persons [illegible] death had intervened [illegible] the space, but the opening was too small for an adult. A Scout went up, hesitated before what he saw, then threw down a pith helmet filled with blood and performed the gruesome task of removing the dead.

An early morning bombing raid, raining death on [illegible] village for twenty minutes was another scene described in which Boy Scouts, police and other charity workers rushed to rescue the wounded. The destruction covered a wide area and [illegible] engaged [illegible] buried beneath the debris.

[illegible] Girl Guides are also helping in refugee [illegible] and attending the wounded [illegible] emergency hospitals [illegible] after the crowds of frightened refugee children.

When a group of journalists were being shown through the hospitals in the Chinese territory, and were taken to the Vienna Garden, a dancing hall turned into an emergency hospital, they discovered more Boy Scouts were attending the wounded.

"Canada 1937"

"Canada 1937" will swing its listeners from Coast to Coast into a New Year's Eve mood with a special broadcast this Friday.

In keeping with the gayer side of this festive occasion, Imperial Tobacco's popular programme will cater to the musical and dancing pleasure of Canadians, young and old.

Presented on the night Old Father Time ushers in 1938 this will be the last "Canada 1937" broadcast, and will ring up the curtain on "Canada 1938" with a programme featuring special arrangements of old favourites and song hits as new as to-morrow. Heard with the large Orchestra will be the featured vocalists Pauline Winters, Russ Titus, and a mixed choir, under the direction of Leo Le-Sieur.

An echo of Broadway's New Year's Eve celebration will be brought to Canadians by L.S.B. Shapiro, well-known columnist now residing in New York. Mr Shapiro will furnish his listeners with his usual quota of news bits from the entertainment world, and candid microphone shots of personalities which make news, as well as telling his vast audience just what is doing on the Great White Way.

Featured on the programme will be two New Year's Medleys interpreted by orchestra, soloists, choir, girl's trio, male octette and quartette.

Little Bobby had eaten unsparingly of cake, candy, nuts, popcorn, fruit, etc., at the party.

"Will you have a little more cake before you go?" asked his hostess.

"No, thank you, Mrs. Jones, I'm full," he replied.

"Then," said the hostess, "you'll put some nuts and candies into your pockets, won't you?"

"They're full, too," he said regretfully.

GENERAL MOTORS PRESENTS THE
NEW 1938
CHEVROLET

TODAY, we invite you to see the best-looking and biggest-looking car Chevrolet has ever produced—the new Chevrolet for 1938—The Car that is Complete.

It's roomier, more luxurious, more massive in appearance—beautifully different with its new Modern Mode Styling—outstandingly complete in exclusive quality advantages. To see and drive this smart, dashing car is to know that you'll be ahead with a Chevrolet. To own it is to save money all ways . . . for the Chevrolet trade-mark is the symbol of motoring savings.

Come to our showrooms today. Drive the brilliant new beauty leader—and value leader—in the lowest price field.

MODERN MODE STYLING
Styling as different as it is beautiful, for this bigger-looking, better-looking, low-priced Chevrolet.

PERFECTED HYDRAULIC BRAKES
Smooth — powerful — positive . . . the safe brakes for modern travel . . . giving maximum motoring protection.

GENUINE KNEE-ACTION
With Shockproof Steering
So safe—so comfortable—so different . . . "the world's finest ride". On Master De Luxe Models.

ROOMIER ALL-SILENT ALL-STEEL BODIES
With Safety Glass All Around
Larger interiors—lighter, brighter colors—and Unisteel construction, making each body a fortress of safety.

VALVE-IN-HEAD ENGINE
Giving the most efficient balance of power, economy, dependability.

FISHER NO DRAFT VENTILATION
Giving protection against drafts, smoke and windshield clouding. Each passenger has individually controlled ventilation.

NEW TIPTOE-MATIC CLUTCH
A simple, efficient, single diaphragm spring replaces the conventional multiple-coil springs—for easier, tighter-pressure action—long life.

Monthly payments to suit your purse on the General Motors Instalment Plan.

THE CAR THAT IS COMPLETE CHEVROLET

A National Institution

Spread out over the vast area from the Atlantic ocean to the Pacific ocean there are about seven hundred weekly newspapers. Some are old, going back to Confederation, some are comparitively new born, having been rolled from their presses for only a few years. But all of them, no matter where published are intensely loyal to their seat of publication. To them, they are located in the best district, in the best province, among the best people in Canada. That is their creed, a creed to which they invariably render something more than mere lip service.

They solicit the support of the people of the district in which they are published, certainly, but in doing so they are asking the people to not only help the newspaper, but to help themselves. A country's greatness can be equally judged by the virility of its villages as by the importance of its metropolitan centres. A country weekly newspaper may be, and frequently is, a paper of Mr. and Mrs.', but the phrase Mr. and Mrs. represent the true structure of the nation.

The Tofield Mercury solicits your subscription and the subscription of your friends and neighbors. For nineteen years we have published for mutual benefit, and hope and expect to publish for some number of years more. Renew or subscribe NOW.

Woodlawn Christmas Tree

The Woodlawn Christmas tree and concert held on Tuesday, December 21st was presented to a large audience—the school and porch were simply packed and many could not gain admittance. The decorated room and Christmas tree, temporary stage and scenery was quite an attraction. A lengthy and varied program consisting of drills, choruses, duets, plays and orchestral selections was creditably presented by the pupils. The surpliced choir was very effective and lent dignity to the Christmas choruses. The Alice Blue Gown drill costumes and scenery were very picturesque and was rendered pleasingly by the older girls. How the boys did enjoy the Tramp Drill! The Wooden Soldier Drill produced many a laugh and was cleverly done. The various plays were very happily and clearly given. The audience was not slow in expressing their appreciation and the general opinion was, it was a very enjoyable and wonderful concert and best of all was the knowledge that the teacher and pupils were so happy about it all. Santa Claus (Mr. J. W. Robinson) suitably attired distributed the usual bags of candies, nuts, etc., to all the kiddies. Apples were passed around and Santa was kept very busy handing the vast array of presents to the children. The concert closed with the singing of the National Anthem, greetings were exchanged and one and all returned to their various homes, the teacher and children to enjoy a well-earned holiday, and the adults to look back upon the days when they were young and got such a thrill out of taking part in a Rural School Christmas concert.

School re-opened on Tuesday of this week after the Christmas holidays, the teachers returning from their homes to resume their teaching duties.

LAKESHORE

A dance was held at the T. A. Jones home on Tuesday evening in honor of Mrs. Jones, the occasion being her birthday. Mrs. Jones was the recipient of many lovely presents.

Miss Grace Mackinnon returned from her home at Mannville where she had been spending the Christmas holidays.

Mr. and Mrs. J. H. Johnston, Mr. and Mrs. Rodway and R C. Phillips were visitors at the L. H. Graham home on New Years day.

Miss Ethel Graham returned to her school at Cold Lake on Sunday after spending the Christmas holidays at home.

Miss Mildred Graham who is attending the Agricultural School at Vermilion is spending her holiday at her home here.

Charles E. Nelson Dead From Seizure

Charles Edward Nelson, 72, resident in Edmonton and Ryley for 40 years and a great war veteran, died Tuesday at Ryley as a result of a heart attack as he sat at the wheel of his snow-stalled car.

Mr. Nelson lived in the Queen's hotel in Edmonton. He had gone to Ryley to get his daughter, Helen, who had been spending the Christmas holidays there.

Other survivors are three sons, Leroy, Charles and Stanley, and another daughter Alice, all of Edmonton. Funeral will be held Friday from Connelly and McKinley's funeral chapel, with interment at the soldier's plot in the Edmonton cemetery.

The late Mr. Nelson was Mrs. J. Noland's brother.

BEHIND THE HOG

By A.B.C.

As I flitted across the ice the other night I was mistaken for one of the Dean boys. One curler said, "Get out of the way Dizzy.

0-0-0-0

"How's your game today," I asked one of the boys. He said "Fine, I just broke the curse record.

0-0-0-0

Most curlers are like Electric Fans, they go round and round, never get anywhere and circulate a lot of hot air.

0-0-0-0

Skips say more things that sound well and mean nothing than any other human being.

0-0-0-0

Many's the curler who puts up a bluff, trips and falls over it.

0-0-0-0

Whatever trouble Adam had
No man in days of yore
Could say when Adam told a joke
I heard that one before.

0-0-0-0

What do you suppose we saw on every hand at the rink the other night, Boys. Gloves and Mitts of course.

0-0-0-0

How about a game between Doc's B.A.'s —I hear they are curlers, and Ables' A.B.'s, who think they are curlers.

0-0-0-0

THIS WEEK'S BRAIN WAVE
A POEM SELECTED

A scientist has now revealed
That skirts as bose is doomed,
He thinks that in the bossing field
The women folk have loomed.

He says we'll live a thousand years,
When this thing comes to pass,
BUT we've got to live a thousand years,
Before it comes, Alas.

The learned professor does not say,
Just who would do the work,
But if the girls then hold full sway,
I'm sure they will not shirk.

Won't that be fun, Oh boy, Oh pals,
We'll sit at home and spin,
While in the business world, the girls
Can take it on the chin.

Me thinks this ranting scientist,
Is further off his bean,
Than all of Wake's ungainly crew,
Yes, even Gunga Din.

HOCKEY

RYLEY vs. TOFIELD

The Tofield senior team played its first league game of the season at Tofield on Tuesday, their opponents being Ryley. As an opener it was a good game although there was little in the way of sparkling hockey. Benwick for Tofield played a good game turning aside plenty of shots. Helton the Ryley goal keeper turned aside many shots also. He kept the spectators on edge by repeatedly falling to the ice in an effort to save. Many were afraid he would be seriously hurt. On the night's play Tofield were worth their win but with better luck Ryley would have probably cut down the score. Anderson for Ryley injured his shoulder and had to retire.

Tofield opened the scoring a few minutes after play commenced Everitt scoring in a melee following a rush. Worton scored a few minutes after and Sears made it 3-0 before the period ended.

In the second period Tofield scored four times making the score 7-0. The marksmen were Worton, Sears, Whyte, Sears.

In the third period Ryley put on pressure that netted them a goal, Helly for Ryley scoring. Everitt for Tofield scored another, making the final score 8-1 in favor of Tofield.

Line-Up:— Goal, Helton; defence, Helley, A. Chappel, Bendickson, Forwards, Young, Mekus, Vergette, Grige, Anderson, E. Chappel, Bahren.

Tofield Goal, Benwick, Defence L. Glover, Norman Glover, Forwards: Swinton, Worton, Everitt, Whyte, Marktimes, Sears.

Referee: Bob Evans.

••••••••

On Sunday the high school team journeyed to Dodds and played the high school team there. The game was very even, the score 1-1 indicating the run of play.

The Tofield players were: Allan Harrison, Jim McAllister, John Moore, Allan Swinton, Harris McClymont, Jack Innes, John Warner, Arthur Hardy, Charlie Worton, Leonard Worton.

A side light on the trip was the shot scored something or other. The puck went through two windows of John Warner's car. These windows had only recently been put in. It would almost appear as if the team was entitled to a donation from a glass factory.

LOCAL & PERSONAL

Clifford Appleby returned to Vermilion after spending the holidays at his home here.

••••••••

Mrs. Bertha Seale and Miriam spent a few days in Edmonton last week.

••••••••

On Monday, January 3rd, a miscellaneous shower was held at the home of Mrs. Oliver Thompson of Kingman in honor of Mrs. J. Lorbeken. There were thirty guests present and the bride received many lovely and useful gifts. A delicious lunch was served by the hostess.

••••••••

Mr. Everitt, Rose and Ivan Patton spent Sunday at Round Hill visiting with Mr. and Mrs. Joe Mullen.

••••••••

Mrs. Ed Wuetherick and daughter spent New Years with her parents at St. Paul.

••••••••

Harland and Betty Thompson from Islay and Raymond Hull motored to Tofield on Sunday.

••••••••

Muriel Malcolm, Wes Taylor, Bob Evans and Harry Bowick spent New Year's Eve in Edmonton.

••••••••

Messrs. Ben Hobson and Hubert Bethel from Edmonton spent New Years in Tofield.

••••••••

Miss Enid McLaughlin of Wetaskiwin spent New Years with Jean Innis.

••••••••

Mrs. Wm. McIntyre of Baron, Alberta is visiting her parents Mr. and Mrs. A. N. Booth

••••••••

Mrs. Malcolm spent a few days in Edmonton this week. She attended the funeral of Dr. John Steele Smith.

••••••••

Mr. Van Dyke, operator at the C.N.R. station returned from Portland Oregon, where he spent a short holiday.

••••••••

Mr. Lee Burnett left on Sunday, January 2nd, for Montreal.

••••••••

Mr. Harold Green is spending a couple of weeks in Calgary.

••••••••

Mr. and Mrs. Burke spent a few days in Edmonton last week.

••••••••

Miss Esther Wark of Edmonton is visiting her sister Mrs. Harold Green.

••••••••

Mr. and Mrs. W. L. Foreman left for Nova Scotia on Wednesday, Jan. 5th, for a holiday.

Mr. Alvin Schultz visited at the S. Nomeland home for a few days last week.

Mr. and Mrs Murray McHeffey of Okotoks spent New Years at the Fred McHeffey home here.

Mr. and Mrs. Albert McCann of Meaford, Ontario, are visiting at the Burke home. Mr. and Mrs. McCann are Mrs. Burke's parents.

Isabel Robinson, teacher at Woodlawn School, who spent the Christmas and New Year holidays with her parents and sister resumed her duties last Monday.

Born: To Mr. and Mrs Walter Kendall on New Year's Day, at 2:45 p.m., a son. Congratulations.

Born: To Mr. and Mrs. Allan Herndon on January 5th, a daughter. Congratulations.

New Arrival On Jan. 1st

Much interest is created each year in Edmonton as to the first baby born in the new year, merchants giving the new arrival a start in life by providing suitable gifts. In the city of course, there are actually several children born on the first day of the year and careful records are kept as to the exact hour and minute.

Here in Tofield, we are right in line as there was born to Mr. and Mrs. Walter Kendall, at the Gray nursing home on January 1st, a son. It has been suggested that Tofield follows Edmonton's lead and prove to the little fellow that he's welcome to Tofield by business men presenting gifts and we gladly pass the suggestion along.

The Gray Nursing Home starts the list by giving a box of choice baby soap.

The Mercury presents a woolen jacket.

The list is wide open and we will be very pleased to record your gifts.

AMISK CREEK

The school children held their concert in the school on the Tuesday before Christmas in the evening. A very good program was given all doing their parts well.

Christmas was very quiet due to the cold weather. It warmed up towards the New Year and we are now enjoying pleasant weather.

Missionary Palmer Anderson conducted a service in the Church on Monday, December 27th.

The Young People and Sunday School held their Christmas tree and program in the church Tuesday evening, December 28th. A very nice program was given, after which the treats and presents were distributed. We take this opportunity to express thanks to all those who took part in the program and entertainment.

Mr and Mrs C Kallal entertained the young people from here Wednesday evening. All report a very enjoyable time. A bountiful lunch was served at midnight.

Two carloads of young people motored to Tofield to spend the evening with Mr and Mrs Conrad Patterson. A lovely lunch was served as the old year went out and the new year came in. A very enjoyable evening was spent.

The Flaaten, Berg and Patterson families were dinner guests at the E. A. Moen home Christmas day.

The E. A. Moen family were guests at the A Haukedahl home in Bardo on Sunday, December 26th.

Mr. and Mrs J. Holthe and son from Lake Demay were guests at the C. Erickson home at Christmas.

Mrs. P. O. Flaaten was an overnight guest at the Annobo home Thursday of last week.

Mr. and Mrs. E. A. Moen were dinner guests at the H. Hillerud home on Monday December 27th.

Those spending their holidays at their parental homes here were: Agnes Annobo from Camrose, Ruby and Lily Berg from Edmonton, Gladys Olson from C.L.C., Camrose, Hilmar Moen from Phillips, Merle Hillerud who is teaching school at Grand Prairie, Doris Watt and Pearl Patterson who are training for nurses in Edmonton hospitals made short visits to their home between Christmas and New Years.

Mr and Mrs Patterson motored to the city last Saturday to take Pearl back to the hospital

Quite a gathering was held at the home of Mr. and Mrs J Berild last Sunday to help Mr and Mrs. C Johnsrud celebrate their twenty-fifth wedding anniversary Mr E. A. Moen made a few remarks and presented Mr and Mrs. Johnsrud with a nice case of silverware and a purse of silver from their friends, neighbors and relatives Mr. and Mrs Johnsrud responded very fittingly Mr J Berild sang a solo after which lunch was served to all. Mr. and Mrs Johnsrud received hearty congratulations and many good wishes for the years to come from their many friends.

Mr and Mrs. J Olson motored to Camrose with Gladys last Monday.

The Congregation held their annual meeting at the E A Moen home last Monday evening Mr. E. A. Moen was elected chairman, Mr. A. Erickson retiring. J. Olson was elected trustee, P O Flaaten retiring. Mrs P O. Flaaten took the Sec-Treas E. A. Moen retiring.

Mrs. R O Berg, Lily and Arnold motored to the city Tuesday morning. Lily was going back to her studies at the university and Mrs. Berg expects to enter the Royal Alexander hospital to undergo an operation

L.C.C. NEWS

The monthly meeting of the Lindbrook Community Club was held at the home of Mrs Scott, Mrs Evans assisting hostess.

Eleven members and two guests were present. Guests were Miss Christie Robinson and Mrs. Wagner, Mrs Wagner joining the club.

Roll call was answered by humorous jokes.

At this meeting a full committee was elected for the coming year consisting of lunch, entertainment and [illegible] meeting.

Roll call to be answered by Scotch joke.

The L.C.C. wishes one and all a prosperous and happy 1938.

The news reporter omitted to mention in the last report the money obtained by selling poppies on the night of the basket social given by the club, amounting to $3.25, was sent in to the Bulletin in aid of the wounded soldiers by the pupils of Lindbrook school.

Mrs. LaFlame left for Quebec after spending some time with her parents Mr and Mrs Gravelle.

Your Meat Is Ready---
Come And Get It

Or if you like we will deliver it. We try to carry a stock that will fill all requirements. Fresh and cured meats, fish, etc. We choose only the choicest of animals, thus right at the start we take care that your meat is the best that can be procured.

THE DAYS ARE GETTING LONGER—
SPRING IS DRAWING CLOSER EACH DAY
SEED CLEANING TIME IS HERE

Viking Grain Cleaners

THREE MILLS IN ONE—CLEANS, GRADES, SEPARATES

Farmers can get strong, clean and healthy seed from their own crops by Viking selection. Good seed is scarce and high priced. The man who sells his seed with the Viking can sell any surplus at nice profit. Sub-normal moisture in many areas demands only the best seed be sown. The Viking gets the best kernels from wheat, oats and barley . . . a clean, sound seed that whips drought and weed pests.

High Lights and Low

THE STAR ON THE THEATRICAL STAGE STANDS IN THE BRILLIANCY OF SPOT LIGHT ILLUMINATION; THE POLITICAL LEADER STANDS IN THE BRILLIANCY CREATED BY COUNTLESS VOTES; THE ATHLETE STANDS IN A LIGHT CREATED BY THE PLAUDITS OF A MULTITUDE. YET FOR ALL OF THEM, SOME DAY THE LIGHT FADES —EVEN IS EXTINGUISHED. THERE ARE LIGHTS HIGH AND LOW OF VARYING DEGREES FOR EVERY INDIVIDUAL IN EVERY WALK OF LIFE, BUT FOR THE GREAT MAJORITY OF US, PLAIN ORDINARY DAYLIGHT SUITS US BEST. AS LONG AS LIFE LASTS WITHIN US, DAYLIGHT RECURS WITH UNFAILING REGULARITY.

IT IS MUCH THE SAME IN THE REALM OF COMMERCIAL AFFAIRS. SOMETIMES THE LURE OF THE CITY CAUSES US TO BASK IN THE LIGHT OF A "GREAT BARGAIN," BUT WE FIND ON SOBER REFLECTION THAT THE BARGAIN LIGHT, LIKE THE SPOT LIGHT OF THE THEATRE, IS PURELY ARTIFICIAL AND MAGNIFIES AND GLORIFIES THINGS OUT OF ALL PROPORTION TO THEIR TRUE WORTH.

EVERY-DAY BUYING FROM YOUR LOCAL STORES, ESTABLISHED TO SERVE YOU, IS LIKE DAYLIGHT, SAFE, DEPENDABLE AND REAL.

TOFIELD STORES STAND READY TO SUPPLY YOU WITH ALMOST ALL OF YOUR DAILY NEEDS. CATCHPENNY SCHEMES ARE ALMOST UNKNOWN AND YOU GET VALUE FOR YOUR MONEY—WHATEVER YOU BUY. MAKE 1938 A TOFIELD TRADING YEAR. YOU WILL BE JUST AS WELL OFF IN THE END.

THE MERCURY

Thrilling Homeward Journey

Across the mountains of Asia, the searing sands of the Syrian Desert, through the lofty Himalayas by way of the Khaibar Pass into Afghanistan, through Switzerland's sub-freezing temperatures and across the highways of Europe and Great Britain. This was the route followed by four adventuresome American students in returning to the States after completing a year's study at Lignan University, Canton, China. Exchange students from American universities their party included John Fuller of San Mateo, California; Emmett Durrum of Harvard and Richard Lace and Clayton Zahm of Penn State. Fuller who is known as a navigator of some accomplishment in the water off San Mateo, chartered the homeward course. The fifth member of the party was a 1933 Chevrolet coupe which had already seen more than 42,000 miles of service in the United States when the trip started. The car was shipped from Hongkong to Calcutta, and from there the adventurers commenced their thrilling journey home.

Fight Way Across Muddy Rivers

The first leg of the journey led 840 miles over winding, primitive roads to Allahabad, India, after several days and nights of driving. Leaving Kabul, they found that the bad roads of India had been excellent highways compared to what they had in front of them. The car was forced to carry gasoline supply sufficient to take the party over 1,000 miles at a stretch where there were no repair shops and no supply depots. "If the car had needed repairs, we would have been out of luck." Fuller admitted "We had to trust to the dependability of the Chevrolet. Through the entire 12,000 miles of hard, rough treatment, the car never gave us a minute's trouble. We had a little trouble with some Arabs once or twice, and we had a little difficulty getting the High Mayor of Baghdad to let us cross the Syrian Desert unescorted, and in Turkey a mechanic took our carburetor apart to clean it and couldn't get it together again —but aside from that there wasn't anything to complain about." The route took them through the deserts of Persia, over the old silk route that great merchants of the dim past once used between Rome and the Far East. Fighting their way across muddy rivers, over roads that were no more than rugged, jutting rocks, across swirling sands, the party came to Baghdad —and faced a 600-mile stretch over the Syrian Desert to Damascus.

Reach Oasis in Desert

Leaving Baghdad at 6 p.m., the party navigated by the light of the North Star, setting their course for an oasis half way across the desert. The floor of the desert, related Fuller, was like a billiard table, and for the first time since leaving Calcutta, they drove at 60 and 70 miles an hour. "We made the oasis about 6 a.m.," he continued. It was only a few deep wells in the middle of a lot of sand, and we left after getting a supply of water. We got to Damascus at noon, averaging about 40 miles an hour driving time for the 600 miles. Just outside Baghdad we encountered a temperature of 130 degrees in the shade, although in Baghdad itself it had only been 119 degrees. On the desert, the thermometer went above 100 degrees every day, while at night it dropped to around 50 degrees. Going across the desert, the water boiled a little, but we didn't have to add any till we reached Damascus." Describing the roads at one point, Fuller stated that it wound up a steep mountainside at the rate of 270 feet per mile, while the road leading into Constantinople was nothing more than an unused cart track. The last leg of the journey through Turkey was made at an average speed of about two miles per hour. Young men walked alongside of the car helping to lift it over almost impossible barriers.

Reservation Difficulties

In Switzerland, they were glad to keep under blankets and quilts in sub-freezing temperatures, the mercury hanging around 20 degrees. Swinging through France, they stopped for a time at Paris, crossed the English Channel and headed for Southampton and the liner which was to bring them back to the United States. "There was some difficulty about reservations for the car coming back," stated Fuller, "and by the time we got that settled we found that we had only 10 minutes in which to catch the last tender to get aboard before sailing. After more than 12,000 miles across Asia to Europe, we just made the boat by the skin of our teeth." Throughout the trip, Fuller reported the car consumed only 14.2 quarts of oil, and 750 gallons of gasoline—an average of 16 miles to the gallon over the roughest country in the world.

Doctor: "Did the sleeping powder do any good?"

Patient: "I scattered it over the whole bed but it did no good."

You've Been Eating Onions!

From the Commentator (U.S.A.)

Maybe you didn't know it, but last year you ate more onions than you should have. The trouble was that the national onion crop was too good. Growers had produced 45,000 carloads and the department of agriculture coldly informed them that 30,000 carloads was all the United States could eat. The price of onions on September 1, 1936 was forty cents per hundred-weight —scandalously low. Fifteen thousand carloads of onions had to be dumped. The faces of the officers of the National Onion Association were longer than those of the Republican National Committee.

Then old-fashioned publicity agent Arthur Lockwood was called in to look the situation over. In a few days Lockwood had his ballyhoo mill working. He secured a statement from a Yale professor showing that scientific breath-testing machines had proved that a chlorine solution would cure onion breath in thirty seconds. The newspapers printed this and asked for more. In Cincinnati two professors popped up with the statement that "the only way to avoid onion breath is to stop eating onions." The controversy was on.

Lockwood organized the Onion Anti-Defamation Committee and demanded a congressional investigation of the motives behind the professor's statements. He called (publicly) upon Senator Vandenburg to do something in the crisis. The O.A.C. released stories discussing the coming development of an odorless onion. Prominent columnists were asked to refrain from using the words onion or "scallion" as symbols of opprobrium.

But this was not all. Lockwood organized pageants in onion-growing centres with onion queens (in bathing suits) and onion kings. He conducted poetry contests with prizes for the best verses on the subject of onions, and he spoke over the radio about onions and their part in the well-balanced diet. Finally, he hired a dozen trucks, had floats constructed and up one of New York's main thoroughfares sent an onion parade, with pretty girls and signs about "that body-building fruit."

And what happened? Oh, nothing just a jump in onion consumption around the United States from a normal 2,300 cars per month to 7,000 cars in October, and a rise in the price of onions from forty cents to $2.50 per hundredweight and the disposal of every last onion in those 15,000 carloads. That's all. Just be thankful it wasn't a garlic crop surplus because Mr. Lockwood would have sold it the length and breadth of this land.

A Health Review

At the beginning of each year it is customary for many folks of the human endeavour to review the twelve months which have passed, to take stock, and to [illegible] whether or not the year has been a profitable one. It is [illegible] the successes and failures of the past year that we base our plans for the future.

It is, therefore, rather an appropriate time for us to review the health conditions of our own families as they were during the past year. First of all, we should consider whether or not we have taken those steps which would protect us from certain diseases. Vaccination does prevent small-pox. Have you allowed yourself or your children to be exposed to this disease through failure to use vaccination as a means of protection? Diptheria can be prevented by diptheria immunization. Have you allowed this disease to continue as a menace to the very lives of your children by your failure to have them [illegible]?

[illegible] are fundamental [illegible] water [illegible] dirty [illegible] the cause of [illegible] deaths. Have you [illegible] that the water [illegible] and the [illegible] are pure, or do [illegible] dangers of impure water and [illegible] your [illegible]

Have you [illegible] attention to your [illegible] done screened to [illegible] pen to allow for proper ventilation? Does the sunshine get into your rooms?

A much larger measure of health is within the grasp of most of us, but we must make the necessary effort to see to it. If you delayed last year, if you were careless in health matters, start off this year by doing the things you should do in order to avoid certain diseases and to lead healthier lives.

Questions concerning Health addressed to the Canadian Medical Association, 184 College Street, Toronto, will be answered personally by letter.

THE WORLD OF WHEAT

By H. G. L. Strange, Director Research Department, Searle Grain Co.

"Should I continue with Garnet wheat, or should I use a different variety? If a different variety, then which one?"

These are questions that are disturbing those farmers who now depend upon Garnet for a living.

It is true that over 200 million bushels of Garnet, mixed in No. 2 and No. 3 Northern, have in recent years been bought and used by millers, and bought, moreover, at relatively good prices. Yet very little pure Garnet, under that brand name, has so far been sold. What the price of Garnet will be when offered only under a special "Garnet" grade name, therefore remains to be seen.

For those who desire to change from Garnet to another variety, and who operate in north-eastern Saskatchewan, —a rust area—I suggest that Thatcher might be considered, for while it is seven days later than Garnet, yet it is three days earlier than Marquis. Fertilizer would make the Thatcher still earlier.

For north-western Saskatchewan, and for the whole of northern Alberta, where rust is not a menace, Red Bobs, being six days earlier than Marquis has much merit. Some farmers have even found that Marquis with fertilizer [illegible] early enough for certain areas.

Reward is a high quality early wheat, but the yield, unfortunately, is rather low.

Following factors have tended to raise prices: U.S. Department of Agriculture [illegible] World wheat [illegible] Kansas winter rye acreage [illegible] condition lower than a year ago. Reduction in Japanese [illegible] small corn surplus [illegible] Argentina — [illegible] crop needs [illegible] South Africa wheat crop smallest [illegible] years.

Following factors have tended to lower [illegible] offers wheat freely [illegible] wheat, oats, barley and [illegible] larger than last year—compulsory admixture of potato flour in bakery products throughout Austria. Increase in Japanese cane sugar production. European crop outlook better than a year ago. Curtailed consumption and use of substitutes reduces wheat buying.

No money required!

A GOOD OMEN?

IT IS QUITE a while since the actual sounds of construction, the song of the saw and ring of the hammer has been heard on main street Tofield. Consequently as the writer was walking up main street on January 1st, these sounds coming from just east of the municipal office, were rather pleasant to hear. To be sure, it was no great edifice that was going up, merely a new warehouse for municipal machinery. But just the same, the sound, the time and the place all tended to create the impression that anyway, the new year in Tofield was starting out right. And this is not all, Tofield can boast of a new baby arriving on January 1st, a son to Mr. and Mrs. Walter Kendall. So with new building activity and increase of population, what better sign could any town ask for January 1st?

FIRE—

CHILDREN USED to be told in school and perhaps still are, that the greatest catastrophe that can befall the seaman is fire at sea. While perhaps burning of a prairie home does not quite equal in peril the burning of a ship at sea, the actual difference is hardly worth mentioning. For anyone whose home is isolated to have it burn on a cold night, is peril enough. Fighting fire in scanty attire in a frigid atmosphere is danger nigh unto death. Consequently any precautions against fire, however mundane or ordinary, should be carefully taken. When a "warm spell" comes along during the winter, the opportunity could be taken to check over heating appliances; seeing that stove pipes are not unduly filled, and paying special attention to where pipes pass through partitions, bedrooms, and attics. It may appear a needless chore, but there are enough prairie farm fires throughout Western Canada every winter, with disastrous results, to prove that eternal vigilance is the price of safety.

SHOCKING DECISION—

If the precedent set by a judge in Lowell, Mass., is followed by other courts, it will be possible for drunken drivers to kill pedestrians right and left and go scot-free. A young man, his wife and their two-year-old son were struck by a car. The husband and child were killed, the mother is in the hospital. The driver was drunk.

In court he was convicted of drunkenness and of reckless driving, but the judge acquitted him of manslaughter—because he was drunk!

An old, well-settled rule, laid down by Sir Edward Coke, the great English jurist, more than three hundred years ago, is that drunkenness is no excuse for the drunkard's conduct. "A drunkard hath no privilege thereby," wrote Coke. "Whatever ill or hurt he doth, his drunkenness doth aggravate it."

But the Massachusetts judge brushed that aside and handed down the amazing dictum that "manslaughter must result from willful, wanton and reckless conduct. If Curry was so drunk that he could not formulate his will, can it be said that he is guilty of being willful, wanton and reckless?"

If that view is adopted by other courts, and becomes prevalent, what curb is there on drunken driving, or upon homicide in any manner if all the killer needs to do to go free is to plead that he was so drunk he did not know what he was doing? It is not only bad law, but a very definite added menace to the safety of highways.

Automobiles are already taking a frightful toll of lives. Every effort of society should be to impose heavier punishments upon reckless drivers, not to lighten them. But here we have the shocking spectacle, while other communities are tightening the restrictions upon driving a car while drunk, of a judge exonerating a criminal because he was drunk!

It is to be hoped that this will prove to be an isolated instance, and that no other court will take the same view. Alcohol and automobiles must not be allowed to mix.

TRANSPORTATION IS CIVILIZATION—

"Transportation," wrote Rudyard Kipling, "is civilization." That sums up the story of mankind's progress from barbarism to whatever degree of culture the human race has reached. Transportation—easier, shorter and speedier ways of getting people and goods from place to place—is the foundation upon which our world-wide civilization rests.

The story of the development of transportation is fascinating. Men learned first to build boats and to row them. They harnessed the wind to their boats and navigation made neighbors of peoples separated by seas and lakes. Trade began. On land, men tamed and rode wild animals, horses, camels, elephants. Then someone invented the wheel, and modern land transportation began. The American Indians had no wheels. They gave way before civilization which had better means of transportation.

Civilization's latest development in transportation is in the air. Alone among the methods of moving from place to place, aviation began its greatest development throughout Europe so that their armies might move swiftly and keep the conquered colonies in subjection. Today the nations of the world are vying with each other in the building of warplanes.

There are short-sighted people who would stop building aircraft because they are useful in war. As well have stopped building roads because armies can march over them. The roads that Caesar built became highways of a world's commerce. The money which is being spent today for the development of faster and bigger airplanes for war, is teaching how to utilize this latest and swiftest means of transportation for the more civilized uses of peace.

Check Headlights For Safe Driving

Correct Maintenance Could Help Modify Highway Accidents At Night States General Motors Executive

In reports of automobile accidents on the highways at night, some drivers lament the fact that they did not see the victim until they were on top of him. Others frequently claim they were temporarily blinded by the headlights of an oncoming car.

"The frequency of such incidents on our highways would be modified," remarked N. H. Daniel, General Service Manager, General Motors Products of Canada Limited, "if motorists would exercise the same precaution with their headlights as they do towards the other parts of their automobiles."

"Snuffing-Out" Gradual Process

There are 50,000 candles of light at the disposal of the motorist in the average car of recent years, if the headlamp equipment is kept in good condition, it is pointed out, but very few drivers are conscious of the fact when fifteen, ten or five thousand of these candles are snuffed-out. The reason for this, it is suggested, is that the "snuffing-out" is a gradual process. But the 50,000 candle power in a new pair of headlights is what is needed by the motorists at all times for safe driving under the variety of conditions of current motor car operation.

Whether they be two-filament or three filament type of bulbs, they will not only burn-out but will diminish in power output and they require regular attention. Periodic checking of lamp strength instead of the usual practice of waiting until the bulb has burned out completely, is what is needed, Mr. Daniel declared.

Because headlight bulbs in today's cars are of the fixed-focus type, this does not mean as many motorists assume that lights never need adjustment. Even a fixed-focus bulb can get so far out of correct aim that it may appear like a searchlight combing the skies for enemy airplanes, he pointed out, and declared "If every motorist took the trouble to notice the pattern of light ahead of his car, the above fact would be obvious. Every six months is not too often to have the light adjustment checked even when it seems to be all right."

Dirt Causes Distortion

Simplest of all forms of correct headlight maintenance is that of keeping the lenses clean, it is revealed. Although few motorists seem aware of the fact, it is possible that the volume of light available may be reduced to 10 to 15 per cent by a dirty lense. Moreover, it is stated, this amount of dirt on the glass will cause beam distortion which cannot provide the stream of light that can be followed with safety in high-speed night-driving.

It is the reflector that is the real unit of power in a headlight, Mr. Daniel explained. The startling amount of light obtained from a [illegible] candlepower bulb [illegible] the reflector [illegible] the original volume [illegible] flectors in the headlights [illegible] of today are protected to a far greater degree than ever before [illegible] weather effects and dust and dirt, nevertheless their highly polished surfaces must be maintained to obtain the full benefit of the [illegible].

Linking up with the campaign to promote greater safety on highways, Mr. Daniel intimated that General Motors Dealers had made periodical checking of headlights a feature of their service. The company's National Training Program, he pointed out, called for a special study of this subject.

Thatcher Too Late For Central Alberta

(Experimental Farms Note)

Thatcher wheat cannot be recommended for production in Central and Northern Alberta, because of its relatively late maturity, according to the Dominion Experimental Station, Lacombe, where this variety has been tested for a number of years.

Since it has been decided that Garnet is to be regraded, farmers are considering replacing this variety and in their quest for a suitable substitute, many eyes are being hopefully turned toward Thatcher.

Thatcher's Place

Thatcher is a rust resistant variety of wheat developed at the Minnesota Agricultural Experiment Station. It was introduced into Canada by Major H. G. L. Strange, Director of the Crop Testing Plan, for the benefit of those portions of the Prairies where rust is a serious problem.

In these rust-stricken areas, Thatcher has given a good account of itself, but in Central Alberta it does not compare favourably with the varieties now in general use.

Variety Comparisons

At Lacombe Thatcher is also nine days later than Garnet, seven days later than Reward, and three [illegible] Red Bobs 222 [illegible] maturity than [illegible]

[illegible] Red Bobs al [illegible] Although Reward [illegible] varieties [illegible] quality grain [illegible]. That [illegible] whether [illegible] yet [illegible] settled. The kernels are not [illegible] appears [illegible] satisfactory for bread [illegible].

Fertilize For Maturity

Instead of using Thatcher to replace Garnet, it might be well to hasten maturity, as well as to increase yields and improve the quality of the grain.

Recommendations

Since fertilization will thus help to solve the problem of early maturity, the Lacombe Station recommend that farmers [illegible] Calgary Edmonton highway [illegible] of the Edmonton [illegible] highway, use Reward [illegible] Red Bobs and east and south of [illegible] Reward, Red Bobs or Marquis.

At all Christian Science Churches last Sunday the subject of the Lesson Sermon was "Sacrament." The [illegible]

Sponge "Catches" Go To Market

[illegible] sensitive-nosed people [illegible] its own peculiar odor [illegible] no doubt whatever [illegible] of Nassau, particularly [illegible] fleet has arrived in harbor [illegible] large its cargo of sponges reft from the ocean's floor [illegible] not very far down around Bahamas.

The sponge boats work on shares, several men to each, and when the fleet arrives over the sponge beds, two men are sent out in each of the many small boats carried, so that the water may be dotted in all directions over a wide area. The sponges which grow from five to thirty feet or so below the surface are located through a water glass and hooked by a long pole which yanks them from place to float surfaceward, when they are thrown into the dinghy, a glutinous grey or black mass. For twenty-four hours thereafter they are exposed on rocks in the hot sun to die, and the odor which arises is strong and racy. Next day they are returned to the sea for a thorough washing, when they emerge much toned down in color and smell, after which they are taken to the sponge markets along Nassau docks where the catches are sorted into their various types: reef, velvet, wool, yellow, grass and hard heads to be sold by tender under government inspection, then clipped into proper shape by the men and women who squat among them, experts in their line who can determine size and quality at a glance. All under four inches are rejected and thrown into a pile which is carted away as trash; it takes three years or more for them to become good fertilizer. Those sponges shipped run six or eight to the pound and are from four to ten inches in diameter. They are then baled and shipped, and later, bleached by chemicals a light yellow so that they resemble in very little the strange dark animal which was their original being.

The beds around the Bahamas were once a great source of income, but [illegible] fishing has depleted them, though as experts given time they will again [illegible] many substitutes have come to take their place and where once they were indispensable in the bathroom of the average home they are now far more often found in the housemaid's kitchen or in the garage. Among the ancient Greeks and Romans sponges were used pretty much as we use them today, and certain very fine, small types were valued as paint brush tips.

But storm or shine, the little sailing fleet goes out on its quest year after year, returning at midnight perhaps, when the little town is sleeping, to discharge its skeleton cargo.

By May Holland Cox in the Canadian National Magazine

Trustees For New School Division Elected

The election of trustees for Holden School Division No. 17 was held on Tuesday, December 28th, amid unfavorable weather conditions, which resulted in a very small vote being recorded.

Many polls reported no votes cast while the majority of polls showed a poor turnout.

While the Mercury would have liked to give the returns by polls, we are unable to do so at present as they are not as yet available.

The trustees credited with being elected, although returns are incomplete are: In sub division 1—J. W. Baden; No. 2—John Skoloey; No. 3 Alfred Leferud; No. 4—J. W. Stambaugh; No. 5—Geo. R. Yager.

Oysters From the Pacific

It is written that the ancient Roman nobleman after a night of gay abandon would seek relief next morning in a liberal portion of raw oysters. That influence is but one of the oyster's many virtues. Someone has pointed out from the standpoint of economy oysters rate highly. A pound of oyster meat is all meat, no bone or gristle, and contains Vitamins A, B, C, D and G together with such essential minerals as iron, phosphorus, copper, iodine and calcium.

Be that as it may, Canadian National's Express on the Pacific Coast [illegible] oysters in high [illegible]. Oyster growing commercially commenced on the Coast not far from Vancouver in 1931, during the depth of the depression. Now it's grown to the point where oysters are being shipped from the Coast even [illegible] eastern territory.

There's a human interest story behind that growth. William Klein turned from wheat farming in Saskatchewan to oyster farming in Pender Harbor, one of the many beautiful inlets on the lower B.C. coast.

Farming is the right term, for you plant your seed oyster in beds and cultivation is absolutely essential to good plump growth, you transfer oysters to different fields to fatten them up and you reap your crop for the fall and winter market.

Believe it or not Mr Klein's oyster farm covers 21 acres leased from the government. Pender Harbor is especially suited for oyster growing because of the swift flowing tides and the high mineral content of the water.

Oysters are very lazy but also very active, according to the way you look at it. They settle down in one spot and stay there, waxing fat in the process. Nevertheless the oyster builds his own house, drinks nearly a pint of water a minute and spawns quite nicely, thank you.

Ostrea Gigas is the name of the Pacific oyster and Ostrea Virginica is his eastern cousin. Like the clam he filters his food from the water pumping 3½ quarts a day through his sieve, so gills to strain out the microscopic plants. We don't want to start an East versus West argument but we feel we must tell our Eastern readers the Pacific oyster is really industrious compared to Ostrea Virginica for he pumps 60 per cent more water to make his livelihood.

Mr. Klein's first planting in 1931 was 20,000 seed oysters. In 1937 his marketable crop exceeded 400,000 oysters. It will probably be double this amount for 1938. But there was two years hard work before the marketing stage was reached and Mr. Klein was still importing seed oysters up to 1937.

Now he is ready to let compound interest work for him. By 1939 he estimates his output will be over a million and by 1940 one and a half million oysters. Incidentally the oysters are shucked and packed the same day and moved to market by Express as quickly as possible to preserve their freshness.

So three cheers for Ostrea Gigas, may his plump shadow never grow less and may his number flourish to the good of the express business!

Two Cars Shown In 1938 Ford Line

For 1938 Ford Motor Company of Canada, Limited announces two distinct Ford V-8 cars differing in appearance, appointments and price. One is the de luxe Ford V-8, the other the standard Ford V-8.

The standard car is designed for buyers to whom economy of first cost and operating is paramount. The de luxe car provides added luxury and style for those who desire them.

Both cars have the same V-8 chassis. There are eight de luxe types available and three standard types. Both de luxe and standard are powered with the famous Ford V-8 engine.

The de luxe car is a stylish sister of the standard. It is entirely new in appearance. The radiator grille is of new design. Appearance of the hood is longer and more sweeping. Fenders are massive. Interior appointments are in keeping with the styling. [illegible] substantially more [illegible] sedans, greater passenger comfort and much larger luggage space are provided.

The standard V-8 cars reveal new styling with a different radiator grille design, long hood and flowing [illegible]. The spacious interiors are [illegible] and attractively upholstered and appointed.

In addition to the two passenger cars Ford is showing a new line of V-8 trucks and commercial cars. Both are newly styled to lend "eye-appeal" in commercial transportation. The 1938 group of Ford trucks includes the 134-inch and 157 inch wheelbase trucks in addition to the 112 inch commercial cars.

The 134-inch wheelbase truck is new this year, replacing the 131 1-2 inch wheelbase in the big truck line; a new frame width for the 134-inch and 157 inch wheelbase units, improved brakes and easier steering and stronger construction throughout are other advances. The two-ton truck is powered with the Ford V-8 horsepower engine and the 1 1-2 ton truck and commercial cars with the 85 horsepower V-8 engine.

WIT And WISDOM

Handicapped

"Poor ole Bill! 'E's so short-sighted 'e's working 'imself to death."

"Wot's 'is short sight got to do with it?"

"Well, 'e can't see when the boss ain't looking so 'e 'as to keep on shovelling all the time!"

A Warning

Mrs. Jones (to husband who has ventured to assert himself): "Now, Henry, understand once and for all, just because you've been on a ten days tour in Italy don't get the idea you're a second Mussolini!"

After the Dinner

"My dear, it was frightfully interesting at that dinner last night. I was talking to a Pole most of the time."

"Oh, John! And you promised you wouldn't have more than one drink."

Death of Nelson

A man stood on the street corner playing a cornet. When he had played one refrain, a little urchin went up to him and said, "What was that tune mister?"

"That, my boy, was 'The Death of Nelson,'" answered the player.

Urchin: "What a 'orrible death."

Was it Red?

Here's a little clipping we picked up somewhere—just something to meditate on

There was a brave lass of Connecticut

Who signaled the train with her petticut,

Which the papers defined

As presence of mind—

But deplorable absence of etticut!

More Than Fiction

This is a problem. You figure it out. There's only one answer. A lot will say "If . . . , it would have made a difference."

Question: A motorist 100 yards away from an open level crossing was traveling 45 miles per hour. A train was also approaching at 60 m.p.h., its distance from the crossing, 150 yards. Did the motorist get across?

Answer: There's an error in the spacing of the last word of the question. Of course, he got a cross. His widow had it erected over his grave and paid for it out of his insurance money.

Hardy Family

A town dweller walking in the country had a conversation with a farm laborer who, after a few minutes volunteered the information that he was seventy-four.

"You are remarkably fit for a man of seventy-four," said the town dweller. "How old was your father when he died?"

"Father's not dead," replied the laborer; "there he is in the garden reading the paper to grandfather."

WANTED— Large quantity baled oat and barley straw, paying cash $4.00 ton on cars. Also green oat sheaves not baled, properly packed in cars $6.00 ton. Also quantity good wild hay $7.50 ton baled on board cars. Also few cars of grade feed oats and barley and grass seed. Write Murray Seeds, Murray Bldg., Edmonton, Phone 26664.

Fire Destroys Farm Home

On Sunday, about noon, fire destroyed the house and contents of Mr. and Mrs. G. M. Lee. The home is situated in the Woodlawn district on the farm of Mr. and Mrs. H. Lee. Mr. G. M. Lee was at Lindbrook at the time, the fire being first seen by his parents just after they had finished dinner. It had gained such headway as to make it impossible to save anything.

In addition to the loss of the house, furniture, clothing, etc., 1400 pounds of flour, 50 pounds of sugar, 25 pounds of honey and 200 quarts of fruit were destroyed.

This is a hard knock for a comparatively young couple as there was no insurance of any kind carried.

Leg Fractured in Hockey Game

Don Bernes, 16, R.A.C. juvenile, suffered a broken leg early in the game at the 119 st. rink with Maple Leafs Monday night in an Edmonton District hockey association league game, when he accidentally collided with a teammate in front of the Maple Leaf goal. He was taken to the Royal Alexandra hospital.

All Seats Please!

A young lady has a vivid memory of rural courtesy.

She was struggling with a hot cup of coffee in a small town railway station, trying to gulp it before the train pulled out. A youth, standing a couple of yards away, noted her plight, and seeing the conductor looking anxious, came to the fore.

"Here, ma'am, you can take my cup o' coffee. It's already saucered and blowed."

THE FUTURE OF GARNET

The Dominion Government will advise Parliament to make Three Northern free from Garnet.

Should Garnet growers use another variety or continue with Garnet?

See the nearest Searle or Home Agent for the latest information

SEARLE GRAIN COMPANY, LIMITED 40

A National Institution

Spread out over the vast area from the Atlantic ocean to the Pacific ocean there are about seven hundred weekly newspapers. Some are old, going back to Confederation, some are comparitively new born, having been rolled from their presses for only a few years. But all of them, no matter where published are intensely loyal to their seat of publication. To them, they are located in the best district, in the best province, among the best people in Canada. That is their creed, a creed to which they invariably render something more than mere lip service.

They solicit the support of the people of the district in which they are published, certainly, but in doing so they are asking the people to not only help the newspaper, but to help themselves. A country's greatness can be equally judged by the virility of its villages as by the importance of its metropolitan centres. A country weekly newspaper may be, and frequently is, a paper of Mr. and Mrs.', but the phrase Mr. and Mrs. represent the true structure of the nation.

The Tofield Mercury solicits your subscription and the subscription of your friends and neighbors. For nineteen years we have published for mutual benefit, and hope and expect to publish for some number of years more. Renew or subscribe NOW.

UNITED CHURCH NEWS

Rev. D. K. Allan conducted the funeral service for baby Leslie Van Buskirk on Friday January 8th. Leslie was a twin son of Mr. and Mrs. Donald Van Buskirk. The interment took place in the Van Buskirk cemetery at Rose Creek.

The Annual Congregational meeting of the Ketchamoot Church was held at the home of Mr. and Mrs. Chas. Whillans on Wednesday, Jan. 12th. Considering the condition of the roads there was a good attendance. All obligations were met. The following were appointed to the Board of Stewards, Messrs. Whillans, Mitchell and McCowan.

At Lakeshore on Thursday, 13th, the Annual Meeting of the Lakeshore United Church was held at the home of Mr. and Mrs. Murray. There was a splendid attendance. The reports were well received and a balance shown in all departments. The following are the Board of Stewards: Mrs. Booth, Mrs. Anderson, and Messrs. J. Warner, Guy Walker and Geo. Francis.

The Annual Meeting of the Tofield United Church will be held on Monday, January 17th at 8 p.m. This is an interesting and important gathering. Reports from all organizations will be given. A Social half hour at the close.

The Young People will meet on Tuesday evening, January 18th at 8.15 p.m. We expect a good attendance at the first meeting this year 1938.

The Tofield High School Hockey Team and the Tofield Midgets will stage a "double header" at the Tofield rink on Friday night. Their opposition will be teams from Holden. Citizens are asked to turn out and give the youngsters support.

HOCKEY

HOLDEN 5—TOFIELD 12

On Tuesday evening at the local rink Holden and Tofield senior teams met in a league encounter. The game was featured by the large number of goals scored, 17 in all. On the night's play, Tofield had a distinct edge, particularly in the second and third periods. In the first period the teams played on fairly equal terms, though towards the end of the period Holden had a little the better of the play. The large score for the locals was chiefly due to "heady" hockey, skillful passing and taking advantage of the breaks as they came. In an effort to score Holden played four and five men up and while this no doubt earned them a goal or two it also gave Tofield a good chance to score on break-a-ways. The game was quite fast, particularly towards the end of the first period. End to end rushes featured the play at this time and both goalies were kept busy and did good work. The first period ended with the score 2-1 for Holden.

In the second period Tofield scored three times to Holden's once. In this period a Holden player when given a minor penalty started pushing the referee around and it was increased to five minutes. Later when a Tofield goal was disputed, the Holden goalie attacked the goal judge and drew a minor penalty. The game was reasonbly clean. This period ended with the score standing at 4-3 for Tofield.

In the third period Tofield scored no less than eight times to Holden's once. There were all kinds of goals, from scrimmages, combination plays, rebounds and breakaways, the final score being 12-5 for Tofield.

Goals: Tofield—Swinton 5; Worton 3; Whyte 2; Sears 1; Everitt 1.

Holden: W. Doran 3; Logan 1; Fryer 1.

Line-up: Holden—Goal, L. McLennan; Defence A. Logan, A. Black; Forwards Forsythe, E. Stewart, N. Gryson, Zwierschke, M. Gryson, Doren.

Tofield Goal, Bowick; Defence Les Glover, N. Glover; Forwards, Swinton, Worton, Everitt, Sears, White, Machtmes.

Referee Bob Evans.

LOCAL & PERSONAL

Mrs. H. Kendall sr. of Edmonton spent a few days in Tofield last week.

****

Don Bernes returned home from Edmonton to recuperate after having broken his leg while playing hockey.

****

Among those who visited Edmonton this week were: Mr. and Mrs. Simpson, Mrs. J. Lerbekmo, Angus Mitchell, J. Sutton, Toby Nomeland, Alvin Schultz, Jean Baptist, Margaret Moline, and Loretta Rose.

****

Mr and Mrs. J. O. A. Letourneau left on Thursday by car for a trip to California. Dorsey will meet them at Calgary and accompany them on their trip.

****

Mrs. Geo. Cookson underwent an operation in an Edmonton hospital on Thursday last. Latest reports are that she is doing nicely.

****

Frank Dunn is away at Calgary attending the Ford Service School.

****

Mrs. J. W. Cookson was a visitor to Edmonton this week attending the Poultry Show there.

****

Mr. Joseph Rogers sr. is at present a patient in an Edmonton hospital. It is expected that he will undergo a minor operation.

LAKESHORE

Mrs. Bertha Seale gave a Bridge party on Friday evening last. Mrs. W. McIntyre won ladies first prize and Mr. Stan Yakabuski won gentleman's first. The consolation prizes went to Mrs. E. Chevreaux and Mr. Lester Noland. At the conclusion of play Mrs. Seale served a delicious lunch.

Mrs. W. McIntyre and Gordon Ferguson motored to Rosalind on Saturday last.

Mr and Mrs. T. A. Jones gave a card party and dance on Monday evening.

Miss Mildred Graham returned to Vermilion on Thursday last.

Mr. and Mrs. T. A. Jones, Norman Jones and Miss Audrey Scott spent Sunday afternoon at the J. H. Johnston home.

Mr. Lloyd Wood is constructing a new barn.

McKENZIE

Mrs. Eric Anderson of the McKenzie district is a patient in the Royal Alex hospital in Edmonton. She underwent an operation and the latest reports are that she is doing nicely.

Mr. and Mrs. V. Moss spent the week end visiting Mrs. Moss' parents at Hardisty.

Miss Francis Dale who is working at the Secord home spent the week end at her home suffering from a bad cold.

Mr. Wm. Roberge has been laid up with rheumatism for the past few weeks.

Mr. and Mrs. J. A. Jacobson, Mavis and Trueman had Sunday dinner at the C. Rude home of Bardo.

The Young People of this district are busy practising for a play which will be presented to the public at a later date.

U.F.W.A. NOTES

The U.F.W.A. met at the home of Mrs. Sam Johnson on Saturday, January 8th. There was a good attendance and the time was mostly spent in discussing the resolutions to be brought up at the U.F.A. convention and having a social time. Mrs. Haukedahl and Mrs. Olson were chosen delegates.

The next regular meeting will be at the home of Mrs. A. Moan in Tofield on February 12th. Hoping for a good attendance of old members and prospective members.

BEHIND THE HOG

By A.B.C.

Curlers would do well to observe the following rules.

0-0-0-0

Players during the course of each end shall be arranged along the sides, [illegible] as their skips may direct [illegible] party except when sweeping according to rule shall go upon the middle of the rink, skips [illegible] to stand within the 12 foot circle; the skip of the party playing to have the choice of place and must not be obstructed by the other in front of the tee, while behind the tee the privilege of both as regards sweeping shall be equal.

0-0-0-0

A [illegible] play must not be touched or marred in any way, if so it must be taken off the ice.

0-0-0-0

Players must not change rocks after the start of play without the consent of the opposing skip.

0-0-0-0

A measuring of shots allowable [illegible] the termination of end.

0-0-0-0

[illegible] the above on your rink [illegible] where you will get.

0-0-0-0

The Hammond rink Electrify the Bleachers but the Fred Imler rink [illegible] Gas 'em.

0-0-0-0

We have one rink away to the Viking Spiel, Glen Wood, Wes Taylor, Ed Hardy and Thomas McBratney. They are 0 wins, 2 losses.

0-0-0-0

Some day the Jubb and Abre's rink are just going to leave it too long. Last week against well known skips they were down at the 7th end 9 to 3, and 11 to 2. They both finished with the juicy total of 14 to win the games. But we will never do that again.

0-0-0-0

In my game against the Chapman rink the rocks we loved to touch were either at the backs or up near the hog. If our adding machine was working I would give you the results.

0-0-0-0

And folks, I still think we are going to have a Bonspiel.

0-0-0-0

We understand that two Ladies Rinks from Edmonton are coming down after the cup on Thursday of this week. Mrs. Law and Mrs. Bernes will skip the Tofield rinks. More dope on this next week.

0-0-0-0

This week's Brain Wave: We all seem to be in the Banana class this year. Slipping, Slipping.

0-0-0-0

Was at the rink while the ladies were curling the other day and Boys, they have the quaintest sayings, especially when they wish to exterminate a rock from the back of the house.

Air-Conditioned Coaches Now on "The Continental Limited"

Winnipeg, Man., Jan. 10.—More than half of the new equipment ordered by the Canadian National Railways this year has been delivered and most of the remainder will be completed before the end of the year according to information released today. The delivery of the new type of air conditioned day coaches has been practically completed and a full complement of this new up-to-date type of day coach is now carried on the Trans-continental trains between Montreal and Vancouver, affording the "head-end" passengers the utmost in travel comfort.

Already delivered are 2,000 steel box cars, 275 freight refrigerators, 300 Gondola cars, 40 steel sand cars, 100 Gondola cars for the Grand Trunk Western, 100 freight refrigerators and 200 automobile cars also for use on United States lines. Forty nine flat cars were purchased second hand. Fifteen snow ploughs are still to come.

Passenger equipment ordered includes 10 mail and express cars, which will be ready within the next month, 10 baggage cars and 50 first class air-conditioned coaches. Of the coaches, 35 have been delivered.

HOLY TRINITY TOFIELD

Sunday School — —	11 a.m.
Ardrossan —	3 p.m.
Lindbrook — — —	2.30 p.m.

FOR SALE—International Light Delivery truck in good condition, a IHC Cultivator, a 12 inch and a 14 inch John Deere Gang Plow and a few other snaps in second hand goods. Apply M. C. Hammond, Tofield.

KETCHAMOOT

Hi, Everyone. Ketchamoot calling after an absence of a few months. Yes, back. I enjoyed my trip very much [illegible] friends and relatives at Des Moines, Creston and Prescott, Iowa, Drexel, Missouri and La Cygne, Kansas.

Mr Geo. Yager of Woodlawn was elected trustee of the larger school district. A school meeting will be held at the school house on Saturday [illegible] to elect local school trustee and a new secretary.

Mr and Mrs. Paterson and little son of Edmonton were guests of Mr and Mrs. A. F. Schultz Sunday.

The [illegible] telephone line [illegible] held their annual meeting at the Schultz home Monday evening of last week. All the subscribers were present except two. Officers for 1938 are Mr. G. W. Sears, President; J. H. Ingram, Vice-President; A. Harris, secretary-treasurer; A. F. Schultz and [illegible] trustees and [illegible].

Mrs. Ethel Jeandheur of Flint, Michigan, who has been the guest of her uncle Mr Geo Lawes and Mrs. Lawes and relatives for several weeks, left on Friday [illegible] and family, Mrs. Harold Smith of Vancouver, after which she will visit friends at Seattle and then on to Los Angeles to spend the remainder of the winter.

(continued on back page)

LINDBROOK

Well, the New Year has started OK here as far as the weather is concerned, quite mild and easier on everyone and everything.

The annual ratepayers' meeting of the Lindbrook S.D. was held at the school last Saturday, Jan. 8th at 2 p.m. It was very poorly attended probably owing to the fact that the people think that the management of school affairs will be in future administered by the larger district trustees. The trustees have replaced the old organ at the school with a piano which will be much appreciated by both scholars and devotees of dancing and singing.

We hear that Mr Jack Rogers who [illegible] East somewhere has lately tied the knot and his old friends of this district wish his bride and himself the best that life can offer them. Mr. J. Rogers is a son of Mr. Asa Rogers of this district and Jack also a former resident and well known [illegible].

Mr and Mrs Jas Bracegirdle and Mr and Mrs E. W. Hooper spent the New Year's holiday visiting relatives and friends at Wainwright.

School reopened Monday 3rd, with [illegible] absentees owing to measles though we are glad that it is abating.

A [illegible] gathering was held at the School one evening this week.

(continued on back page)

Your Meat Is Ready--- Come And Get It

Or if you like we will deliver it. We try to carry a stock that will fill all requirements. Fresh and cured meats, fish, etc. We choose only the choicest of animals, thus right at the start we take care that your meat is the best that can be procured.

To Give You Better Service

Mr. Frank Dunn, our mechanic, has just recently returned from the Ford Service School held at Calgary, where the most efficient and advanced methods of Ford Service were explained and demonstrated. This course was taken so that Ford Owners and owners of other cars in this territory may be assured of really expert and efficient service.

Overhaul Jobs

January and February are good months for overhaul jobs. There is not so much traffic and work goes forward uninterrupted. This is a good place to have that overhaul job done. Good mechanics, well equipped shop and charges reasonable. Bring your car in now.

The Tofield Service Station
C. Patterson, Prop.

THE DAYS ARE GETTING LONGER—
SPRING IS DRAWING CLOSER EACH DAY
SEED CLEANING TIME IS HERE

Viking Grain Cleaners

THREE MILLS IN ONE—CLEANS, GRADES, SEPARATES

Farmers can get strong, clean and healthy seed from their own crops by Viking selection. Good seed is scarce and high priced. The man who sells to his seed with the Viking can sell any surplus at nice profit. Sub-normal moisture in many areas demands only the best seed be sown. The Viking gets the best kernels from wheat, oats and barley [illegible] clean, sound seed that [illegible] drought and weed pests.

High Lights and Low

THE STAR ON THE THEATRICAL STAGE STANDS IN THE BRILLIANCY OF SPOT LIGHT ILLUMINATION. THE POLITICAL LEADER STANDS IN THE BRILLIANCY CREATED BY COUNTLESS VOTES; THE ATHLETE STANDS IN A LIGHT CREATED BY THE PLAUDITS OF A MULTITUDE. YET FOR ALL OF THEM, SOME DAY THE LIGHT FADES —EVEN IS EXTINGUISHED. THERE ARE LIGHTS HIGH AND LOW OF VARYING DEGREES FOR EVERY INDIVIDUAL IN EVERY WALK OF LIFE, BUT FOR THE GREAT MAJORITY OF US, PLAIN ORDINARY DAYLIGHT SUITS US BEST. AS LONG AS LIFE LASTS WITHIN US, DAYLIGHT RECURS WITH UNFAILING REGULARITY.

IT IS MUCH THE SAME IN THE REALM OF COMMERCIAL AFFAIRS. SOMETIMES THE LURE OF THE CITY CAUSES US TO BASK IN THE LIGHT OF A "GREAT BARGAIN," BUT WE FIND ON SOBER REFLECTION THAT THE BARGAIN LIGHT, LIKE THE SPOT LIGHT OF THE THEATRE, IS PURELY ARTIFICIAL AND MAGNIFIES AND GLORIFIES THINGS OUT OF ALL PROPORTION TO THEIR TRUE WORTH.

EVERY-DAY BUYING FROM YOUR LOCAL STORES, ESTABLISHED TO SERVE YOU, IS LIKE DAYLIGHT, SAFE, DEPENDABLE AND REAL.

TOFIELD STORES STAND READY TO SUPPLY YOU WITH ALMOST ALL OF YOUR DAILY NEEDS. CATCHPENNY SCHEMES ARE ALMOST UNKNOWN AND YOU GET VALUE FOR YOUR MONEY—WHATEVER YOU BUY. MAKE 1938 A TOFIELD TRADING YEAR. YOU WILL BE JUST AS WELL OFF IN THE END.

THE MERCURY

Agriculture Versus Mining

The rapid expansion of mining throughout Canada, and particularly the increasing production of gold, has led some to the belief that the industry will supercede agriculture in the dominion's economy. It should not be forgotten that mining is a wasting industry while agriculture is a progressively productive one. There has been a rapid increase in the extent and number of Canada's mines in recent years and also in the price of metals, particularly gold. On the other hand, the prices of agricultural products have been very low and production has been reduced by a series of bad seasons.

Mine wealth has proven a boon to Canada during the depression, but in the long run its importance is not to be compared with agriculture. It is too short-lived. The great Nile Valley in Egypt is just as fruitful today as it was in the time of the Pharaohs if not more so. The Danube Basin produces as prolifically today as it did one thousand years ago. The farms of England are more fruitful even than they were in the time of William The Conqueror.

In contrast, what has happened to many of the mining fields of the world? They have been worked out and cannot be replenished. Dr. D. H. [illegible], Professor of Mining at Harvard University, in describing the Kalgoorlie goldfields in Australia which produced a total of twenty [illegible] ounces of gold, said: "[illegible] mines, active and profitable twenty five years ago, are now marked only by high dumps of tailings and decaying poppet-legs. At one famous old mine, the Great Fingal, a tall rusty steel structure stands alone in the desert beside a drifting pile of sand and from a vanished cyanide plant, with little else to mark the former existence of a mine which produced $20,000,000. The sites of other less imposing operations are in some cases marked only by a few pepper trees, brought in by the miners some thirty years ago to relieve the monotony of desert brush."

Canadian Legion To Hold Convention

The Canadian Legion of the British Empire Service League will be holding its Dominion Convention in Fort William opening January 30th and continuing for five days.

Prior to the opening of the Convention, Special Committees have been set up to consolidate and discuss the hundreds of resolutions which have been sent in.

The Dominion Convention of the Canadian Legion can well be called the 'Parliament of Ex-Service Men' as all problems affecting them are created and recommendations made to the Dominion Government. At the last Dominion Convention which was held in Vancouver in March, 1936, the question of unemployment amongst returned men was one of the principal matters.

Following the Convention, a Parliamentary Committee was appointed. This Committee consisted of returned men, who represented all parties in the House of Commons. They discussed evidence and their main recommendation was that a Veteran's Assistance Commission be appointed to travel Canada taking evidence and making records of all unemployed ex-service men and to assist towards the employment of the former members of the Forces.

This Commission in the first instance consisted of Colonel John Grant Rattray, C.M.G., D.S.O., as Chairman, and Lieut.-Col. Hugues Le Moyne de Martigny and Brigadier-General Alexander Ross, K.C., C.M.G., D.S.O., V.D., A.D.C., as Members.

Brigadier-General A. Ross owing to the work he had undertaken for the Canadian Legion as its Dominion President had a breakdown in health and was obliged to resign and Sgt. Robert Macnicol, Provincial Secretary of the Canadian Legion for British Columbia was appointed in his place.

At the last Session of Parliament, the Commission brought in an Interim Report recommending numerous suggestions which would lead toward the placing in employment of unemployed ex-service men or to their being taken care by the Dominion Government rather than as at present through Municipal Relief. They, also, made recommendations which would materially have assisted Imperials now resident in Canada.

This Report was not acceptable to the Dominion Government in whole. The Government did, however, set up in principal points voluntary [illegible] Committees composed of leading citizens who gave their services without charge; the Government paying for office and secretarial work.

As a consequence of this, a Corps of Commissionaires has been formed in practically every Province and a number of ex-service men have obtained employment through this source.

A scheme of Probational Training was, also, accepted but in the case of Alberta, this has not proved of very material benefit, only ten or fifteen men having been granted this.

The local committees have been successful in obtaining casual employment for quite a number of men and in a lesser degree have obtained permanent employment for a number.

The Canadian Legion are indebted to these local Honorary Committees and their Secretaries for the assistance that they have given in this problem.

We are still, however, faced with the fact that a very large number of ex-service men, who offered their services to Canada in time of need are still unemployed. A number of them, of course, have reached the age where it is a [illegible] to expect them to find remunerative employment in the present labor market.

Small [illegible] have been accepted [illegible] the Province and are at present [illegible] tal stage.

In one [illegible] Veteran Work Shops have been started up and have [illegible] employment.

The Veterans' Assistance Commission has now presented to the Government its Final Report. The Report consists of one hundred and [illegible] pages and [illegible] recommendations to be [illegible]ed. One fact, however, does stand out in both the Interim Report and the Final Report and that is that the Commission believed that ex-service men who served in an actual Theatre of War and are now in need through no fault of their own but owing to the general [illegible] throughout the Dominion should be taken care of by the Federal Government and should not be a charge upon the Municipal or Provincial Authorities owing to the fact that a large number are without employment because of their having enlisted when otherwise they would have been receiving training which would have enabled them to obtain special abilities in different occupations.

They, also recommend that where a returned man is unemployable because of physical, mental or other disabilities, he should be eligible for War Veterans' Allowance and they ask that not so much stress be paid to medical examinations as has been the practice hitherto.

The Canadian Legion at its last Convention felt that men who had reached the age of fifty or fifty five years of age and had been unemployed for a good many years should be considered unemployable and granted War Veterans' Allowance until such time as they could obtain employment. There is no question at all but that the men involved would very much prefer employment at a living wage than having to accept War Veterans' Allowance or Unemployment Assistance. If, however, it is found and the evidence would point to the fact that a large number of these men are permanently unemployable, then the Federal Government should assume responsibility for them.

Draughts

A bugbear to many people is draughts. A draught is a current of air which, striking one part of the body cools or chills that part, while the rest of the body remains warm. We can stand out of doors in a good stiff breeze and feel stimulated by the rush of air. We can go in bathing and have the whole body wet and yet experience nothing but good out of the plunge. If, however, we have a perceptible breeze strike only one part of the body, or if our feet become chilled after having been wet, such an experience is apt to be followed by discomfort in the part chilled by the draught, or a cold in the head may follow. There is no question but that some people are more sensitive to draughts than are others.

Fear of draughts should not lead to our living a life shut off from fresh air. Living in over-heated rooms, with the air absolutely still, is to be avoided, for it has a definite ill-effect on the body. It is quite practical to keep the air in a room in the gentle motion which comfort and good health demand, without draughts. The motion of air which does not strike and chill one part of the body is an essential of good air and makes a most desirable atmosphere in which to live and work.

Draughts may be avoided by opening the window an inch instead of a foot, or by the using of window boards to direct the incoming air upward and so prevent a direct draught. In offices and schools a good practice is to open the windows wide at regular intervals while everyone moves about or takes some simple exercises.

Those who are sensitive to draughts can frequently overcome the condition by the use of cold baths or by douching the chest with cold water. In this way they train their bodies to adapt themselves to changes in temperature. Clothing according to the thermometer is also necessary.

Questions concerning Health, ad[illegible] Medical Association, [illegible] College Street, Toronto, will be answered personally by letter.

Recipes for Winter Weather

COLD WEATHER MEATLESS FOODS

By Betty Barclay

It's cold! We need real food! Meat is still expensive? What shall we do? Why not use hot meatless dishes filled with healthful foods like nuts, butter, dried Lima beans, cheese and bread? This seems sensible and you will find the following dishes very, very pleasing.

****

Lima Timbales

2 cups cooked, dried Limas
2 tablespoons butter
2 tablespoons chopped onion
1 1-2 tablespoons flour
1-2 cup milk
1 egg, slightly beaten
1-2 cup chopped walnuts
1-4 teaspoon pepper
1-2 teaspoon salt

Rub Limas through a coarse sieve. Melt butter, add chopped onion and cook until yellow. Add flour, stir until smooth then add milk. Stir constantly until creamy. Add pureed Limas, egg, salt and pepper. Pack in greased [illegible] place in pan of hot water. Bake in a moderate oven (350 degrees F.) for about 30 minutes. Turn out and serve with tomato sauce.

****

Limas au Gratin

2 cups cooked dried Limas
1 cup thin white sauce
3-4 cup grated cheese
1-2 cup buttered crumbs
1-2 teaspoon salt

Arrange Limas, sauce and cheese in layers in a baking dish. Cover top with crumbs and bake in a moderate oven (350 degrees F) about twenty minutes.

****

Steamed Carrot Pudding

[illegible] flour
1 [illegible] salt
1 [illegible] soda
2 [illegible] baking powder
1-2 teasp. each of cinnamon, cloves and mace
1 pound grated carrots
1 cup chopped suet
1 1-2 pound raisins
1-2 [illegible] currants
[illegible] sugar
1 1-2 cup light molasses
1-2 pound sliced Brazil nuts

Mix in the order given. Fill greased [illegible] cover tightly. Steam [illegible] hours. This makes four small puddings, each of which will serve five persons.

Pigs, Goats, Birds And Boy Scouts

[illegible] Scouts and a [illegible] and wounded [illegible] a friend [illegible] wounded by hunters. Two [illegible] gulls with permanently crippled wings have become very clever pets.

TOWN FINANCIAL STATEMENT—

IN THIS ISSUE there is published the 1937 Town of Tofield Annual Financial Statement which together wth the 1937 Financial Statement of the Tofield School District gives to ratepayers a splendid opportunity to review the finances of the town or school district in which they live.

Both statements run fairly close to the preceding year and indicate careful financing, as it would be easy enough to spend money for needed improvements were there plenty of money available to spend. The largest expenditure item is the school which took $6250.00 to operate throughout the year, this is $300 less than 1936. This is, perhaps, accounted for by the board omitting to teach grade twelve for the 1936-37 school year. Debenture payments are being held up pending some form of adjustment with the bond holders, which is long over-due. Care is being taken however, to lay aside $4000 annually, there now being a trust fund of $8000.00 against the time an adjustment is actually made. A new item of expenditure "police" shows up as an item of $171.00. This item was only $12.00 last year. The difference is no doubt due to the fact that we have had for several months a combination of night watchman and policeman. This expenditure is well justified, as only the other night an incipient fire was discovered and extinguished. As a town we are not getting rich very fast, but we are better than holding our own—even wearing down the large debenture indebtedness. This, it can be said for the benefit of the bondholders, while a recognized duty, is also a questionable pleasure, as it is only being done by going without badly needed improvements. Sidewalks especially are needed; a new community hall is needed; as well as other civic improvements.

CREDULITY—

Cynics used to aver that people should believe nothing that they hear and only half what they see. It might have been good advice except for the fact that as regards vision, no one knew which half to believe and which half not to believe. Anyway, at least there is some truth in the saying, because time and again popular beliefs are shattered by the revelation of facts as they are.

We recall reading a letter in a reliable publication a year or so ago. It had to do with a chicken heart that had been kept alive for 17 years or more. Like the writer of the letter, we had read articles from time to time regarding the chicken heart and wondered how a heart, apart from the body, could have been kept alive for such a long time. The letter writer, being in the city in which the heart was located, decided to call at the institution and view the strange phenomenon, expecting to see a real heart beating. Presenting himself at the door he made known the purpose of his call. He was made welcome, but was told there really was not much to see. It was not a heart but a living cell that was being kept alive. It was very small—and so went visions of seeing a chicken heart that had been beating for 17 years in a glass bottle.

About the time the depression began to really take hold in the United States, technocracy became prominent. One of the illustrations given to prove that technocracy was inevitable was that of a rayon mill which by the addition of new machinery could be operated by one man, where previously many had been employed. The report, according to H. B. Elliston, financial writer in the Christian Science Monitor, was entirely baseless. Personal investigation by him brought out the following information. In the mill in question, new machinery in one department had reduced labor 25 per cent. This innovation reduced costs to such an extent as to bring about a lower price for the finished product. The net result was two fold—more rayon sold and a larger total personnel for the mill. And there goes the one man rayon mill belief.

Last night we read where a lady in B.C. had undergone an operation and the doctor had removed 23 six-inch spikes from her stomach, and the lady says, according to the report, she does not know how they got there. Now, 23 six-inch spikes weigh between two and three pounds, which is pretty fair ballast to carry around all the time. We have seen sword swallowers, glass chewers, etc., but for an ordinary—it surely must be extraordinary—lady to have 23 six-inch spikes in her stomach is something else again.

SAW THE POINT AT LAST

A tramp stopped at the kitchen door of the farmhouse and asked for something to eat.

"If you'll go out in the woodshed," the farmer's wife told him, "and split up the logs you find there, I'll give you a good meal."

In a surprisingly short time the tramp returned; but an inspection of the woodshed by the good wife showed all the logs carefully split, except one gnarled, knotty old stump. Well satisfied, she spread a generous meal before him, and as he ate, she said: "I do wish you'd tell me how you split those logs so quickly and so easily."

"Why, madam, I simply stood beside them and told them funny stories and they split themselves."

In the middle of the night there was a great commotion in the woodshed, and on rushing in to investigate, the amazing discovery was made that the gnarled, knotty old stump had split itself into a thousand pieces.

It was a piece of English walnut.

A. Mitchell, Mrs. Chas Campbell, Mrs John Lee, Mrs C Coombes Mrs L McGinitie, Mrs. H McGinitie, Mrs John Brown, Mrs. Milton Ray, Mrs Emily Carlisle, Mrs Elsie Carlisle, Mrs Wendall Wiley, Mrs Oliver Thompson, Mrs J H Ingram Mrs. G W Sears, The Misses Edith Davison, Ethel Coombes, Hazel Sears, Marie Lawson, Evelyn Lawson, Eileen Sverris, Marie Butchak, Margaret Mitchell, Noreen Carlisle, Alice McGinitie.

Car Licenses Gain In Alta.

[illegible] passenger car licenses have been issued in Alberta since April 1 when the new license year plan came into effect, according to recent [illegible] Provincial Secretary's Department.

This total is some 1,500 in excess of the aggregate for the previous calendar year 1936. As the present year will not close until March 31 it is apparent that there will be a substantial increase over the previous year.

Purchases of new cars are expected to increase the license total in the [illegible] of government officials [illegible] the first three months of 1938 many new cars are expected to be bought.

Increase in car licenses already over last year is taken as full justification for the policy advocated by the Alberta Motor Association which claimed these and other advantages would result from changing the opening of the license year from January 1 to April 1.

With more cars on the highways, garages, service stations and general business will reap benefits during the first three months of 1938, in a period which in past years has been [illegible] of the number of cars taken off the roads because of winter conditions.

LINDBROOK

(Continued from front page)

the speakers being Mr Jameson of Acadia, Alta, and Dr McPherson, M.L.A. of Ryley.

Divine Service was held at the School here Sunday afternoon, Jan. 9th. Rev. A. Wallis of Tofield officiated.

How's this "lovely" curling weather suit A.B.C.? Probably not so hot.

We hear the fishing is good at [illegible] Lake, several good catches [illegible] You don't need a rod or a [illegible] for this style of fishing, only a [illegible], a line and hook, a bit of bacon fat or suet and unlimited patience.

A WINTER FISH DISH

By Betty Barclay

I present the following very tasty fish recipe as my contribution to those who have a leaning toward the finny tribe as food:

Baked Fish Loaf

[illegible] halibut steak
[illegible] cup bread crumbs
[illegible] cup milk
[illegible]
1-4 cup butter
2 eggs, beaten separately
1 [illegible] teaspoons minced parsley
[illegible] teaspoon lemon juice
Salt and pepper to taste

Remove the skin and bone from the raw fish and separate it into little pieces. Then run it through the food chopper with the finest attachment. Soak the bread in the milk and [illegible] combined, and cook until there is a tendency for the material to leave the sides of the pan. Stir to prevent burning. Mix with the fish, butter and eggs and season with the salt, pepper and lemon juice. Form into a roll or loaf, [illegible] buttered bread or cracker crumbs [illegible] with butter and place in a hot oven for from one-half to three-quarters of an hour. Serve with the following sauce.

Fish Sauce

1-2 can solid pack tomatoes
1 small onion, sliced
2 tablespoons melted butter
3 tablespoons flour
1-4 teaspoon salt
Sprinkling of pepper

Cook the onion in the tomatoes for ten minutes. Rub through a sieve and add to the butter and flour, which have been rubbed to a smooth paste. Season and pour over the fish loaf before sending to the table or serve from a separate dish.

THE WORLD OF WHEAT

By H. G. L. Strange, Director Research Department, Searle Grain Co.

Thatcher, that new valuable rust-resistant wheat, is truly an international product.

Marquis formed two of the four grandparents of Thatcher, and Marquis was originated by the Central Experimental Farm, Ottawa. One of the other grandparents was Iumillo, an Italian Durum wheat. Another grandparent was Kanred, a selection from Turkey Red, a Russian Black Sea area variety.

Going back a little further, we find that the parents of Marquis in turn were Red Fife, which came from the shores of the Baltic Sea in Germany and Poland, and Calcutta Red, an Indian wheat from the Himalayan Mountains.

Thatcher, therefore, going back only three generations, can really be said to be the final product of the vision, imagination and talented work of the plant breeders of the United States, Canada, Italy, India, north and south Russia and of Germany.

What a remarkable picture of fine international co-operation between the scientists in agriculture of many different races and nations; all finally resulting in a considerable increase in income to the farmers of the United States and Canada; resulting too in substantial benefits to all engaged in the international wheat industry, and to the people of the whole world who consume wheaten bread.

Following factors have tended to raise price: South Africa suffers from worst drought in many years—Argentine corn needs further precipitation—Absence of Argentine wheat competition—Belgian millers have only small wheat stocks— Cold weather in Europe will stimulate bread consumption— Drought delays sowing in Orange Free State—India buys Australian wheat.

Following factors have tended to lower price: Russia makes further wheat shipments—India reports useful rains with crop prospects good—Protective snowfalls received in Russia—Beneficial rains in Algeria and Morocco—Chosen 1937 rice crop larger than 1936 crop—Greece increases propaganda for expansion in rice crop.

For 1938

Sir Arthur Salter, British economist, at a recent meeting of the Statistical Society of Manchester, presented to business and political leaders 10 New Year resolutions which will help maintain international peace

1. Stabilize currencies.
2. Negotiate more bilateral trade agreements.
3. Ease the most-favored-nation practice in the interest of reciprocal trade.
4. Facilitate the sale of colonial raw materials on equal terms to all countries.
5. Make fresh efforts to maintain and extend foreign trade.
6. Enlarge export markets for countries willing to work co-operatively for peace.
7. Extend the "Congo-basin" policy—equal economic opportunity—to all colonies in tropical Africa.
8. Reduce provocative competition involved in state aid in foreign trade.
9. Make the Anglo-American trade agreement both a great success in itself and a nucleus to which other peace-loving countries can adhere.
10. "Let us no longer all try to sell more and buy less."

FOR SALE— Bay Mare. Smooth mouth, weight about 1200. Apply to J. E. Stinson.

Teeth Frozen In Jug So Traveller Grabs It All To Make Train

Prince Albert, Sask. Jan 10—Railway men swear this one is true: Travellers en route to Flin Flon usually snatch four hours' sleep at Hudson Bay Junction hotel while waiting departure of the northbound train from the Junction village. On a recent morning as the engineer gave his last warning toot to call commercial men from the hotel, one was observed to rush from the hotel doors his coat tail flapping behind him in the frigid wintry air. In one hand he carried his travelling bag and in the other a white porcelain water jug of the type invariably found on washstands in country hotels.

As he neared the train, the conductor shouted: "Hey, you; you're stealing the hotel's crockery. "I know came the shouted reply, "but my teeth are frozen in this darned water jug."

Obligingly the C.N.R. trainmen thawed out the teeth and the hotelman got his water jug back before the train departed.

WANTED— Large quantity baled oat and barley straw, paying cash $1.00 ton on cars. Also green oat sheaves not baled, properly pack, ed in cars $6.00 ton. Also quantity good wild hay $7.50 ton baled on board cars. Also few cars of grade feed oats and barley and grass seed. Write Murray Seeds, Murray Bldg., Edmonton. Phone 26664.

C.N.R. International Makes Grand Record

Montreal, January 10—During the 37 years the International Limited has been operating between Montreal and Chicago, it has traversed more than 1000 times the distance around the earth at the equator and has carried approximately 2,000,000 passengers. These were the figures given today by H. C. Rochester, general car accountant of the Canadian National Railways. Since the five big 5700 class locomotives were put into service seven years ago, he added, they have travelled 3,500,000 miles or 140 times around the world. Previously it took three locomotives to make the run between Montreal and Toronto, changes being made at Brockville and Belleville. The 5700 engines go the whole way.

"It used to be the practice," said Mr. Rochester speaking of The International Limited's head-end, "to run an engine for about 50,000 miles and then give it a general overhauling. As a result of improved methods, the mileage between shoppings was extended to 60,000 and then 70,000 miles, but now these 5700-class engines are running an average of about 250,000 miles between general overhauls."

THE FUTURE OF GARNET

The Dominion Government will advise Parliament to make Three Northern free from Garnet.

Should Garnet growers use another variety or continue with Garnet?

See the nearest Searle or Home Agent for the latest information

SEARLE GRAIN COMPANY, LIMITED 41

A National Institution

Spread out over the vast area from the Atlantic ocean to the Pacific ocean there are about seven hundred weekly newspapers. Some are old, going back to Confederation, some are comparitively new born, having been rolled from their presses for only a few years. But all of them, no matter where published are intensely loyal to their seat of publication. To them, they are located in the best district, in the best province, among the best people in Canada. That is their creed, a creed to which they invariably render something more than mere lip service.

They solicit the support of the people of the district in which they are published, certainly, but in doing so they are asking the people to not only help the newspaper, but to help themselves. A country's greatness can be equally judged by the virility of its villages as by the importance of its metropolitan centres. A country weekly newspaper may be, and frequently is, a paper of Mr. and Mrs.', but the phrase Mr. and Mrs. represent the true structure of the nation.

The Tofield Mercury solicits your subscription and the subscription of your friends and neighbors. For nineteen years we have published for mutual benefit, and hope and expect to publish for some number of years more. Renew or subscribe NOW.

Man Loses Fingers in Gas Line Accident

On Tuesday about noon and somewhere near Deville, Glen Millard, employee of Northwestern Utilities Limited, met with a serious and painful accident involving the loss of his fingers.

From information to hand it appears that young Millard, who had only recently joined the staff of Northwestern Utilities Ltd. was sitting on the back of a truck which had become stalled in the snow and which was being towed out backwards by another truck. A cable had been fastened to the stalled truck from the truck ahead. While pulling, the truck ahead temporarily became stalled and the cable becoming slack, went into a kink. Whether the unfortunate man attempted to straighten out the kink, or whether the cable whirled around and caught his hand is not clear, but as the truck ahead went forward again the cable suddenly straightened, catching Millard's right hand in the kink, tearing off the fingers and thumb. The injured man was brought to Tofield where Dr. Law gave immediate treatment and then took him to an Edmonton hospital. We understand amputation of most of the hand will be necessary.

It is a very unfortunate happening for the young fellow as he had only been employed at Tofield for the past week or so.

Wm. Wideman Dies Suddenly Wednesday

Wm. Wideman, old-time resident of the Ketchamoot and Tofield districts, died suddenly on Wednesday. Mr. Wideman was on his way to attend a district school board meeting when death suddenly overtook him. Heart failure was the cause of death as pronounced by Dr. F. F. Law. Mr. Wideman leaves a wife and fourteen children.

The funeral will take place on Saturday afternoon.

LOCAL & PERSONAL

Miss M. Beirnes of Fort William is visiting Mr. and Mrs. A. Beirnes.

Blake Clutterham from Edmonton visited his home here on Sunday.

Miss Esther Wick visited her sister Mrs. Grom for a few days this week.

Messrs. M. Bethel and W. E. Seale spent the week end in Edmonton.

Mr. Alvin Schultz is working in Edmonton.

Miss Annie Johnson spent the week end in the city.

Mrs. Hammond, Mrs. Law, Mrs. Chapman and Muriel Malcolm are taking part in the Edmonton bonspiel this week.

A number from Tofield attended the dance held in the Kingman hall on Wednesday evening.

Miss Margaret Moen from Edmonton, who has been visiting her home is spending a few days with friends in town.

HOCKEY GAME

On Sunday afternoon the Wetaskiwin Colonels will meet the Tofield Senior Hockey team at the local rink. This promises to be a good game so lets see a good turnout of supporters.

BEHIND THE HOG

By A.B.C.

LADIES' WEEK

The men will now take their seats at the back of the House.

0-0-0-0

I hied myself to the rink the other afternoon to watch the Ladies curl and also to pick up the ODD item for this column.

0-0-0-0

When I write about the ladies, I often think that I shall write, A lovely feathery poem; of birds and trees and skies above; and girls that build a home; of waters deep in lakes and sloughs; of waves so fiercely blown; and in the thickness of the woods; a poor lone windy moan; I take my pen and quickly write; down go the first few lines; Oh tough, the brainwork that I do; to make it fit the rhymes; I cannot find a word to suit; I try—it will not come; at last I throw my pen, the stove, and it is done.

0-0-0-0

Curling Girls are sweeter far,
Than all the other girls that are.
Curling Girls with wide, shy eyes,
Like the laughing summer skies.
Many too, with eyes of brown,
Fringed with lashes, soft as down.
Curling girls with dewy eyes,
Often lit with glad surprise.
Curling girls are everything,
Pansies blooming in the spring.
Roses, Poppies, Rubies, Pearls,
All of these make Curling Girls.

0-0-0-0

And girls, when you are curling, how can you stand so still when every nerve is straining at the check? With every muscle clamoring loud, To tear and rend—to smash and grind and wreck—Your calm tranquility, the sweetness of your smile, your quiet eyes, Bespeak a will of steel, a perfect balance and a level head when sudden Ends arise.

0-0-0-0

And Lem, "the village cut up" when I asked him if he liked the ladies who talked a lot or the other kind replied, "What other kind."

0-0-0-0

The ladies' hats were all different shapes, BUT then, so were the ladies.

0-0-0-0

They were curling on a very windy day and one lady said to another. "Does the wind bother you?" She sweetly replied, "No, my dear, talk as much as you like."

0-0-0-0

A LOT of conversation was taking place and one lady curler said to two other lady curlers who were talking. "I can't hear a thing." They replied, "Is that so, well what we were talking about is none of your business.

0-0-0-0

The Tofield Ladies defended the Cup last Thursday by a small margin and also got about a 50-50 break on the conversation and cake. I think all the Edmonton Ladies are good bridge players.

0-0-0-0

Some of the ensembles worn by the ladies this year are marvelous in the extreme, Strawberry, Raspberry, Orange, Lemon and Lime seem to be the popular colors, altho' Raspberry is what they look like to most of the skips.

0-0-0-0

Peggy Hammond and her 3 little willing helpers, Mrs. Dr. Law, Mrs. Will Chapman and Muriel Malcolm are away to the Edmonton spiel. Going to press we hear they have won two and lost two.

0-0-0-0

Next week we start a new skit entitled "Soup 'er Up" in two installments. You will find it both amusing and instructive.

0-0-0-0

This week's Brain Wave—And Ladies, Maybe there isn't much to see in a small town, but it is a lot easier to see.

New Year Baby Given Good Send Off

The New Year baby son of Mr. and Mrs. Walter Kendall which arrived at the Gray Nursing Home as 1-9-3-8 dawned, received a good send off from those wishing to extend congratulations to the first baby born in this district in the new year. The gifts would no doubt have been more numerous had a canvas been made but the gifts recorded are spontaneous and as we know them.

Gray's Nursing Home—A box of soap; Tofield Mercury— Baby's Jacket; H. E. Rogers—Baby's Bonnet; Geo. B. Bruce—Baby's Bath.

Here's hoping that Floyd Kendall will find 1938 a pleasant year and that a whole long string of other pleasant years will follow.

KETCHAMOOT

Miss Mabel Lawson is home from Camrose being detained from teaching owing to illness.

Mrs. Oscar Barnes was taken to an Edmonton hospital Friday of last week. She has not recovered from her recent attack of the flu and thought a short stay in the hospital would be beneficial to her.

Mrs A. Harrison visited a few days in Edmonton with her mother and aunt.

Mrs Chas. Whillans entertained the Ladies' Aid at her home Wednesday of last week after which the annual congregational meeting was held

At the school meeting on Saturday, John Brown, whose term had expired was re-elected by acclamation. The board now is Messrs Jim Sutton, Roy Lee and John Brown. A secretary has not yet been elected.

Mr. Harold Barnes, youngest son of Mr and Mrs. Ralph Barnes suffered an attack of pneumonia but is doing nicely now. Mrs. Barnes' mother, Mrs. Barrows, helped care for her grandson.

Mr Ralph Barnes and Douglas Barnes visited their mother, Mrs. O. Barnes at the hospital on Tuesday.

Among the passengers to Edmonton on Friday of last week were Mrs. Whillans, son Neal, Mrs. Jim Sutton, Jimmie Ingram and Lyle Coombes.

Mr J. H. Ingram is attending the U.F.A. convention being held in Edmonton this week.

Mrs G. W. Sears and Stanley and Mrs H McGinitie motored to the city Friday to bring Mrs. McGinitie's son Donnelly home from the hospital who underwent an operation some two weeks ago.

Mr A. Harrison entered the Royal Alex hospital Tuesday evening where he expects to undergo an operation. His many friends wish him a speedy recovery.

Mrs. Adolph Weber, nee Ella Kleinschroth, entertained the Social hour club at her home in Miquelon district, Thursday of last week.

Mr. G. W. Sears attended the Spanish American War Veteran's club meeting in Edmonton Thursday

Ryley To Hold Short Course in Agriculture

Commencing Wednesday, January 26th, a short course in agricultural school will be held at Ryley. Registration of students will take place on Tuesday, January 25th, but for those who are unable to arrive before Wednesday morning, registration can be completed then. The course is primarily for young folk, 18 to 30 years, who are interested in agriculture, but there are no strict age limits.

A central dining hall will be established and dormitories are being arranged for. It is expected the course will last about two weeks and students should bring cot, mattress and bedding. Those eating at the central dining hall are asked to contribute food such as bread, butter, eggs, milk, cream, cheese, vegetables etc. However any young person from the district interested in agriculture will be taken care of whether or not they are able to bring cot, mattress, or food. The attendance of young people at this course is desired and every effort will be made to make the student comfortable and the course instructive.

It should be noted that the course was originally scheduled to commence February 21st, but the correct date for registration is January 25th and for commencement of the course January 26th.

Mrs. Mead, Well Known Here Dies at Kitchener

Mrs. Matilda Mead, wife of W. C Mead of Kitchener, Ont. passed away on Saturday, January 15th, aged 47 years. Mrs. Mead was well known at Tofield having visited her mother, Mrs. F. M. Webb and her brother Mr. W. Webb. The departed lady leaves her husband, one son William, an adopted son James, all of Kitchener; her mother Mrs. F. M. Webb and a brother Mr. W. Webb, both of Tofield

CARD OF THANKS

Mrs. F. M. Webb and son, W. A. Webb and family wish to thank their many friends for the kindness and sympathy extended to them during their recent bereavement.

United Church Hold Annual Meeting

The Annual Congregational Meeting of the United Church, Tofield, was held on Monday evening, 17th of January. There was a good representative gathering present. The reports of the session and the Board of Stewards showed that the services of the church had been well maintained and that a loyal spirit exists among members and adherents and that all financial obligations were met

The report of the Sunday school and C.G.I.T.'s and Y.P. revealed that a fine spirit of co-operation exists in this important task of the church. The officers and teachers have been very devoted and faithful and the children and young folk have kept up their attendance.

All the week-night activities have been carried on with enthusiasm and success.

The Ladies' Aid report showed that nearly $500 had been raised by their endeavors. The W.M.S. have had splendid gatherings and a fine missionary spirit has been created in the congregation

Mr Haker was re-elected to the Board of Stewards.

The Rev. D. K. Allan presided and expressed his sincere appreciation for the splendid co-operation given him by the officers, by the workers and by the congregation.

Mr Hugh McDonald acted as secretary of the meeting.

The sick of the congregation were not forgotten, amid the other business. Letters were asked to be sent to Mr Rogers, Mrs. Geo Cookson and Mr and Mrs Johnston Ferguson in the way of affectionate remembrance and hoping for a speedy recovery.

The Social hour was most enjoyable for which Mrs. Jacobs and her associates deserve much credit.

The Young People met on Tuesday evening and had another delightful meeting. Marjorie Stewart gave a splendid missionary talk on Dr Strong of China. The recreational activities were entered into with vim and kept all busy until the gong went for eats. The story evolved around the refreshment table produced much mirth.

Your Meat Is Ready--- Come And Get It

Or if you like we will deliver it. We try to carry a stock that will fill all requirements. Fresh and cured meats, fish, etc. We choose only the choicest of animals, thus right at the start we take care that your meat is the best that can be procured.

Spring Time Is Improvement Time

During the winter months plans are made for the improvement of crops, stock and business of all kinds for the coming year.

Why not include your Home and farm buildings in this program at this time of the year? Perhaps a new Porch, new Floors or an added Room is required at your home. A brooder house is a big factor in the proper raising of baby chicks. A new coat of paint will add to the beauty of your Farm and give you dollars worth of protection against replacement in future years.

Call in at the "Crown" and talk over your Improvement Plans. Our experience along these lines will be of benefit to you.

ANY DAY A FISH DAY

Oil In Alberta

By J. L. Irwin

The history of Alberta's oil industry started as early as the year 1878, when Professor Dawson of the Dominion Government Geological Survey reported on oil occurrences found by him in the Athabasca district.

Later Dr. Bell of the same department made reference to the bituminous sands which he thought to have been caused by an up-welling of petroleum perhaps unparalleled anywhere in the world. He thought these sands were at least five million years old and that they had been subjected to a constant soaking of oil from seepages below, otherwise, he was of the opinion, they would have dried out and become dead many years ago.

However it was not until 1883 that drilling resulted in the discovery of dry gas at Langevin, now known as Alderson, situated about forty miles northwest of Medicine Hat, and [illegible] five years later—1890 [illegible] the first productive gas well was drilled at Medicine Hat by the Canadian Pacific Railway, when at a depth of 650 feet a pressure of 250 pounds was obtained.

Notwithstanding the quantity of gas that has been withdrawn from this field substantial pressure is still maintained.

On the recommendation of its geologists the Dominion Government drilled a well in 1894 at Athabasca Landing. This was abandoned at 1,200 feet owing to casing trouble, although a gas flow had been struck. At a later date the drilling outfit was taken down the Athabasca River and another hole was drilled near the head of the Pelican Rapids. A strong flow of gas was encountered at 750 feet which blew the tools out of the hole and caught fire. The fire which continued for several years was eventually extinguished by a representative of the Dominion Government and the well was capped.

The Bow Island gas field, some fifty miles west of Medicine Hat, had its first well drilled in 1900. Four years later the northern field at Pelican Rapids was attempted again by a private enterprise. Three wells in all were drilled and an oil and gas belt was located.

At the time this discovery was made the nearest railway was at Edmonton over 300 miles away. The transport of heavy machinery by teams [illegible] and scows over the hazardous rapids of the Athabasca River represented a pioneer feat well worthy of mention.

The first discovery of oil in Alberta to attract outstanding attention took place in 1913 when the Calgary Petroleum Producers brought two wells into production in Turner Valley. One was at a depth of 1,557 feet and the other 2718 feet. The product secured, though the limestone was not reached, showed [illegible] of naptha mixed with [illegible] oil of high gravity. Following [illegible] the oil boom [illegible] 1914 was started to be halted [illegible] by the war.

[illegible] the war the only discovery [illegible] was the [illegible] commercial dry gas field of Viking, some eighty miles southeast of Edmonton, from which the gas requirements of Edmonton and [illegible] proximity of the pipe-lines have been supplied ever since.

In 1922 the progress of the Kevin-Sunburst field in Montana revived interest in Alberta and operations [illegible] resumed in Turner Valley. It was at this time that the [illegible] Royalite No. 4 well [illegible] started.

[illegible] the [illegible] reached by Royalite No. 4, [illegible] not proving spectacular, drilling was continued to 3450 feet, at which [illegible] the Palaeozoic limestone was encountered. A prevalent theory in oil circles at this time was that it was useless to look for oil [illegible] in a limestone body [illegible] first 150 to 200 feet after the [illegible] formation was penetrated.

Drilling however, was continued to a depth of 400 feet in the limestone when it was decided to abandon the well. Before orders to this effect reached the drillers, a petrol zone was struck at 3,740 feet, from the surface of which there suddenly issued a violent outburst of wet gas which prevented the tools from being withdrawn and immediately afterwards from some unknown cause the well caught fire which took some time to extinguish.

The magnitude of this field and the quality of the product, [illegible] known in any oil-producing area [illegible] classed as a freak and many [illegible] forecasts were made that the flow of naptha would [illegible] duration and also that similar production was improbable in other wells which might be drilled in the area.

Royalite No. 4 however, once under control increased its production until it reached a maximum flow of about 600 barrels of naptha a day and demonstrated its permanence by producing for a period of over six years. During that time it presented the industry with a total yield of 911,313 barrels of naptha, valued at over $3,000,000.00.

For over a year the importance of this discovery was not appreciated, but during 1925 and 1926 interest in oil development returned and a number of new wells were started. The completion at a still later date of Okalta No. 1 well on the west flank of the Turner Valley structure and Home No. 1 in the south end, approximately three miles from Royalite No. 4 revealed the full significance of Royalite's performance and another oil boom was launched. Drilling in the Valley became extremely active and continued until the beginning of the depression years in 1930 slowed down progress.

From the start of Royalite No. 4's production until the end of December 1935 approximately 180 wells were started in this area of which 80 per cent only were completed. The remainder were abandoned either on account of lack of capital or because of the fact that the well sites were off structure.

Naptha recoveries during this time totalled 6,453,000 barrels of which approximately one-seventh came from Royalite No. 4 alone.

This production came from the limestone formation, before reaching which, the wells penetrated four distinct crude oil producing sands. In addition to the naptha recoveries already quoted the quantity of crude oil produced from these sands over the time stated amounted to 371,906 barrels, 80,000 of which were obtained from one well.

Alberta shows no sign at the surface of the ground to indicate the presence of oil beneath with the exception of one or two insignificant seepages found in the north of the Province. In other parts of the world, sign-posts of nature have always been present to guide the prospector. With surface topography in Alberta, however, ranging from 2000 feet and higher above sea level and the country covered in most parts with glacial drift below which there is everywhere present impervious beds of shale, the absence of surface indications is not surprising. Indications of oil from underground pools would require tremendous pressure to force a path through such strata.

In spite of this handicap to exploration the many and widely separated oil-fields in Alberta which have been discovered by "blind groping" methods, justify the assumption that the province is underlain by many vast underground seepages.

Taking the discoveries of oil in sequence from north to south of the Province, the following sites are named:

1. Near the town of Athabasca—Oil of 12.1 degrees gravity, Beaume discovered at 1,650 feet.
2. Duvernay-Brosseau—Oil-bearing sands commencing at 1,490 feet and continuing [illegible] feet—not tested for productivity—wells abandoned.
3. Wainwright—Oil varying in gravity from 18 degrees to 21 degrees Beaume, is at present in production. Depths 2100—2250 feet.
4. Ribstone—Oil discovered in wells at depths 1800—1900 feet. Quality—14.5 degrees Beaume.
5. Oyen—Low gravity oil discovered at 3000—3123 feet but development discontinued.
6. Taber—Wells in production at depths approximating 3200 feet with gravity at 20 degrees Beaume
7. Turner Valley—Crude oil ranging in gravity from 35 degrees to 55 degrees Beaume is produced from four distinct oil sands above the limestone and from the limestone itself. Naptha from the limestone is also produced in gravity from 60 degrees to 75 degrees Beaume.
8. Pekisko—Crude oil, 40 degrees—45 degrees Beaume gravity, proven at 3878 feet but not developed.
9. Kebo—near Lethbridge. Oil of 32.4 degrees Beaume gravity, proven at various depths below 3,680 feet.
10. Skiff—Oil of 20 degrees gravity Beaume, proven at 3,054 feet
11. Red Coulee—near Coutts Oil of 31 degrees gravity Beaume at depths of from 2400 to 2500 feet.
12. Twin River Twenty miles west from Coutts. Gravity very similar to that produced at Red Coulee. Depth approximately 3675 feet
13. Spring Coulee near Cardston Oil of light gravity encountered during drilling at 1550 and 1660 feet

With the start of the depression years in 1930, oil production in Alberta declined from a total of 1,614,202 barrels in the fiscal year 1930—1931 to 871082 in 1932-1933. From then on production increased reaching 1,249,506 barrels in 1935-1936.

On June 16th, the [illegible] chapter in Alberta's oil industry was opened by the [illegible] production of the Turner Valley Royalties well on the extreme western flank of the structure in southern Turner Valley. This well, now a pioneer of the heavy crude oil producers, satisfied the long anticipated desire of securing a high grade crude oil from the limestone in [illegible] quantities. Its initial production was at the rate of [illegible] barrels per day which settled down eventually to [illegible]. With acid treatment [illegible] has now been [illegible] The oil registered a gravity of 41.9 degrees Beaume.

At this time a paper was presented at the annual meeting of the [illegible] of Mining and Metallurgy [illegible] Turner Valley [illegible] the field.

Since the [illegible] been actively carried out in this section of the Valley.

Following the Turner Valley Royalties discovery [illegible]

[illegible] National [illegible] Royal [illegible] Pacific [illegible] Royal [illegible] Davies [illegible] largest [illegible] being 19,092 [illegible] Pacific No. 5 [illegible] month with 39791 [illegible] Pacific No. 1 [illegible] 1648 barrels [illegible] actually [illegible] applied [illegible] three [illegible] half a mile in [illegible] far north and south [illegible] not yet [illegible] The eastern boundary of this [illegible] fairly well established [illegible] western is still undefined territory.

(To be Continued Next Week)

THE WORLD OF WHEAT

By H. G. L. Strange, Director Research Department, Searle Grain Co.

We have just passed through a rather hectic wheat year. A number of unusual and striking features developed. Some of these were as follows:

Western Canada experienced the lowest yield per acre ever recorded and in consequence harvested only half a normal crop.

The United States, after several years of drought, produced a full or normal crop.

For the first time in ten years the Canadian "Carry-over" was down to the longtime average of 37 million on August 1st, 1937.

The premiums paid on World's markets for the top grades of Canadian wheat, because of their scarcity, were higher than ever before registered.

The World's estimated demand for export wheat was the lowest recorded since 1913-14.

Wars and fear of wars greatly disturbed wheat markets, both buyers and sellers.

For the first time in three years the World produced sufficient wheat to supply its annual consumptive needs.

World wheat "Carry-over" is still [illegible] million bushels less than is usually considered sufficient.

The [illegible] Argentine wheat crop was [illegible] damaged by frost.

All these unusual factors had a marked influence in causing prices to rise or to decline rapidly as news of the various occurrences came forward.

The following factors have tended to raise prices: Active buying of Argentine wheat by Brazil and Argentine [illegible] Lack of moisture in U.S. Middlewest. Germany buys several cargoes of Argentine wheat—Exports to European countries [illegible] exceed a year ago—South Africa prohibits corn exports—Taiwan (Formosa) rice crops smaller than a year ago.

The following factors have tended to lower prices: [illegible] Argentine [illegible] crop [illegible] Australian private estimate higher than official—Unsatisfactory [illegible] in imports [illegible] United Kingdom [illegible] wheat—Ar[illegible] believed larger [illegible] almost double [illegible]

Scottish Curlers Arrive to Meet Canadian Rinks

These bonneted Scotsmen photographed in the lounge of the Canadian Pacific liner Duchess of Bedford on arrival at Halifax New Year's Eve are members of the party of curlers who have come to Canada to meet Canadian adherents of "the roarin' game" in many cities and towns of the Dominion. They are all members of the Royal Caledonia Club. Captain William Henderson is seated third from the left of the group.

During a two months' tour they will visit Saint John, N.B., Sherbrooke, Quebec, Three Rivers, Shawinigan Falls, Montreal, Ottawa, Sharbot Lake, Kingston, Port Hope, Lindsay, Peterboro, Galt, Detroit, Toronto, Welland, Hamilton, Medonte, Port William, Winnipeg, Regina, Calgary, Banff, Edmonton, Saskatoon, Sudbury, North Bay, Timmins, Seneca, Kirkland Lake, Buffalo, Utica, Albany, Boston and Portland, Me., and will sail from Saint John in the Duchess of Bedford on February 25.

THE U.F.A. CONVENTION—

THIS WEEK in Edmonton, the capital city, the annual convention of the United Farmers of Alberta is being held. There have been larger U.F.A. conventions in point of numbers, and it is possible that the association's political affiliations at the time may cause some to believe, more important conventions. Actually, even now, the U.F.A. convention is the most important convention in this province to day. With or without a political touch, it makes no difference.

When a body of duly appointed delegates, representing the most important industry in this province meet, it is only reasonable to suppose that the convention is a very important one. In years gone by the convention was partly political and partly economic and in the hey-day of U.F.A. power probably mostly political. Then, politically speaking, they were on the inside looking out, now they are on the outside looking in. But this does not in any way diminish the importance of the convention because the things the United Farmers of Alberta originally stood for—and most likely do yet—are more important even than the U.F.A. being the controlling party in parliament. And these things, what are they? Why, better economic advantages, greater skill, more knowledge, more cultural advantages and an all round better life for Alberta farm folk. Men seem to have a rather pathetic faith in political governments being able to do for them those things, which of necessity, they must do for themselves. Not that political governments are altogether impotent. By the fixing of tariffs, quotas, subsidies, and the dozen and one things that political governments do when they attempt to improve the country's business, they do affect the lives of the people, sometimes beneficially, sometimes adversely. But it is a kind of cris-cross effect, some country benefits, another loses; the east gains at the expense of the west; the south makes a compromise with the north and so on indefinitely. Political governments have often in times past, so governed, that a country became great. Political governments have also, due to a multitude of causes, so governed that once prosperous countries became poor. But which ever way the tide of fortune ran, there must first be potential wealth to make real, or actual wealth to fritter away or destroy.

Alberta's arable acres, her climate, plus human ingenuity combine to make Alberta wheat, for strength, the best wheat in the world. Without this combination and other kindred sources of wealth, there would be no need of or money to pay for political government. Desert areas and arctic regions are left alone with the exception of occasional travellers. Were they prolific of wealth, they would have, yes, they would **need** political government.

This is the reason we believe the U.F.A. to be the most important organization and the most important convention in Alberta to-day. Their members represent an industry which gives the most to the greatest number and which keep the wheels of industry, yes, and of government turning. As an organization we believe the U.F.A. can go on to greater heights of usefulness in the future than it has reached in the past. Whether it again becomes a strong force politically does not really matter—it might even be better if it did not. What does matter is that the organization have wise and experienced men as leaders. And that these leaders by association, example and precept are able to transfer at least some of the wisdom and experience throughout the rank and file of the organization. U.F.A. members could reflect upon the fact that those things that grow overnight rarely withstand the heat of the noon-day sun. As an organization the U.F.A. should be considered a permanent organization, going on for years and years until it becomes increasingly buttressed by tradition and experience. As an economic organization it should adopt a tolerant attitude towards other organizations, perhaps of lesser economic power, and should accept the belief that real power, economic or otherwise, is a trust, to be guarded and used carefully, not to exploit and destroy, but to build and create.

We believe the basic principles of democracy preclude an economic group controlling the reigns of political power. But others equally believe that a numerically strong economic group, because they ARE a strong economic group, should control the reigns of political power. In any event whether the U.F.A. continue to embrace politics or whether they will continue as an economic-social organiation remains to be seen and, after all, this is really their own business. We do feel however, that within the realm of the U.F.A. and U.F.W.A. there is a field in which can be cultivated a vast amount of good, not only for the association but for the province of Alberta. But for this to come about, leaders of exceptional merit must arise. Men and women who are willing to devote their time and their talents to the welfare of the U.F.A. and U.F.W.A. organization without expectation of reward. For the U.F.A. and U.F.W.A. to really function as economic and social organizations, sacrifices on the part of various people will have to be made. Leaders, lieutenants, captains and rank and file must give to and not expect to extract from the organizations. And strangely enough in a set-up like this, nature somehow arranges it that the cause grows stronger and stronger, the benefits accruing greater and greater until the time comes when those things so earnestly sought to bring about a higher standard of living, become commonplace.

Annual Financial Statement 1937

TOWN OF TOFIELD

RECEIPTS

Cash on hand January 1st, 1937	$ 1846 23
Municipal and School Taxes	13848.13

	$9555.83

Of the amount $1871 98 shown as cash on hand as at December 31st, 1937, the sum of $1675.30 is held in a trust account to retire 1937 and 1936 debenture coupons at such time as an adjustment of the debenture debt shall have been effected.

M. C. McCANNEL, C. A., Auditor.
J. W. CHAPMAN, Secretary-Treasurer.

AMISK CREEK

The Ladies' Aid held their monthly meeting at the home of Mrs. J. C. Olson on January 6th. A good attendance of members and many visitors were present. The missionaries from China, Mr. and Mrs. P. Anderson were [illegible]. Miss Mary Anderson [illegible] and gave a short address.

Mr. [illegible] Berg underwent an operation [illegible] Alex hospital [illegible]

[illegible]

[illegible] Creek [illegible]

[illegible] last week.

[illegible] January 23rd [illegible]

[illegible] attending the U.F.W.A. convention in Edmonton as a delegate.

Mrs. Bjornstad from Holden is assisting at the Olson home to care for Mrs. J. H. Olson.

Mr. R. O. Berg and Alice and Mrs. P. O. Flasten motored to the city last Saturday and visited with Mrs. R. O. Berg at the hospital. They also visited Lily and Ruby Berg and at the N. Sand home and with Mr. and Mrs. P. Aas.

Mr. F. A. Moen is shipping some [illegible] Tuesday of this week.

Hilmar Moen from Phillips spent the week end at his parental home here. He returned on the train Monday morning.

LAKESHORE

Miss Grace Mackinnon has been confined to her bed with the flu for the past ten days.

Mrs. Bertha Seale and Miriam spent the week end with Mrs. Yakabuski in Tofield.

Mr. Henry Tiedeman spent the week end in Edmonton and [illegible].

Miss [illegible] spent the week end at her home in Edmonton.

Mr. [illegible] was a visitor in the city on Friday last.

The Local Hockey Boys held a skating party and wiener roast on Thursday evening of last week.

The Young People's Club held a skating Party on Tuesday evening at the rink on Walker's farm.

Mrs. W. McIntyre returned to her home at Bahren, Alberta one day last week.

The dance at the Community Hall on Friday last drew a very large crowd. Everyone reported an enjoyable evening.

Another Big John Deere Day Coming

Another big John Deere day is to be held at Tofield on Saturday, February 19th. Readers will remember John Deere picture shows that have been presented here in previous years and will be pleased to hear that another one is coming. There are four new talking pictures, entertainment that is really good and instruction that is really profitable. Reserve Saturday, February 19th to come and see these pictures. Admission is by ticket but is free. M. C. Hammond, Tofield John Deere dealer is sponsoring these shows.

TOWN OF TOFIELD

Notice of Annual Meeting

Public Notice is hereby given that a meeting of the electors of the Town of Tofield will be held in the Town Hall, Tofield, on Friday, January 28th, 1938 at 8 p.m. for the purpose of receiving the report of the Mayor and Secretary-Treasurer and the chairman of the various committees of the council.

Dated at Tofield, this 18th day of January A.D. 1938.

J. W. CHAPMAN,
Secretary-Treasurer

TOFIELD SCHOOL DISTRICT NO. 1939

Notice of Annual Meeting

Public Notice is hereby given that the annual rate-payers meeting of the Tofield School District 1939 will be held in the Town Hall, Tofield, on Friday, the 28th day of January, A.D. 1938 at 8 p.m.

Dated at Tofield this 10th day of January, 1938.

J. W. CHAPMAN,
Secretary-Treasurer.

The Domestic Animals Act

SALE AND REDEMPTION OF IMPOUNDED ANIMALS (Sec. 48)

Notice is hereby given under Section 48 of the Domestic Animals Act (Municipalities) that three (3) red and white cows (no age given); and two (2) calves about three months and (one red and white and one roan) Two (2) cows branded "2 and a reversed G over V" on left hip and no brand on one cow and calves. Brands were not visible until cattle were roped, examined and clipped, was impounded in the pound kept by Geo. Clark, Deville, Alta. Located on N.W. 2-51-20-W4M, on Saturday the 8th day of January A.D. 1938 and that the said animal was sold on the Tuesday, the 18th day of January, 1938, to Daniel Murray of N. Cooking Lake, Alta., and that said animal may be redeemed by the owner or on his behalf within a period of thirty days from the publication of this notice in The Alberta Gazette, upon payment of all fees and costs due to the municipality and the purchaser of said animal.

For information apply to the undersigned.

J. W. LETOURNEAU,
Acting Sec-Treas., of the M.D. of Cornhill No. 487.
Post Office —Tofield, Alta.

KINGMAN

The Annual School meeting was held last Saturday, January 15th at 2 p.m. It was poorly attended, probably owing to the fact that the people think it will be run by the higher officers. Mr. Andrew Johnson was re-elected as one of the local trustees.

The Silver Wedding of Mr. and Mrs. Bill Olsen was held in the Kingman Hall on Sunday afternoon. The short program consisted of recitations by Grace Grahn, Nora Molvik, Lloyd Skalen, a duet by Doris Rogness and Evelyn Johnson and short addresses by A. C. Soma and Mr. Earl Skalen after which lunch was served. A very enjoyable time was had by all.

Mr. Albon Anderson is in Edmonton attending the U.F.A. convention.

There will be the regular Ladies' Aid meeting held in the Kingman Hall on January 27th at 2 p.m. The hostesses are Mrs. Roy Molvik and Mrs. Thor Horte.

We are glad to see Alpha Works able to be around again even if on crutches. He came home from the hospital a few days ago.

Rev. Milo Stutzman and Mr. Ezra Stauffer are at Duchess, Alta., conducting Bible School for six weeks.

Mr. Pete Kozak is busy sawing wood for people in Kingman.

The Common Cold

Every fall we have to consider the common cold, not because we wish to do so, but because it forces itself upon our attention. Nearly everyone contracts at least one cold during the year, and so everyone is interested in knowing what he may do to prevent or avoid colds.

We have all noticed how colds run through a family; first, one member has a cough or a sneeze, and soon all the family are coughing, sneezing and blowing their noses. So it seems that whatever the living agent or germ is that causes a cold, it is passed along by those who have colds to those who have not.

The lesson to be learned from this is that the individual who has a cold should be isolated from the other members of the family. Bed is the best place for the person who has a cold, it is best for him and for others. By keeping him in bed, he is kept away from the family, and if his dishes and eating-utensils are boiled there is comparatively little chance that the disease will spread. It is more simple to use paper handkerchiefs which can be burned; otherwise, handkerchiefs must be boiled.

Persons with colds who refuse to go to bed should cover their coughs and sneezes with a handkerchief, because the germ present is in the secretions of the nose and throat which are thrown broadcast by careless unguarded coughing, sneezing and expectoration. Unless dishes and eating-utensils are washed in very hot water and common drinking cups done away with, colds are sure to spread. The person who has a cold should never prepare or handle food that is to be used by others.

We can do much to avoid colds by building up our powers of resistance. There does not appear to be any doubt that those who live in overheated rooms, who wear too heavy clothing, and who overeat and take but little exercise are more apt to fall victims to the common cold.

FOR SALE—International Light Delivery truck in good condition, a I.H.C. Cultivator, a 12 inch and a 14 inch John Deere Gang Plow, and a few other snaps in second hand goods. Apply M. C. Hammond, Tofield.

High School Hockey

Ryley and Tofield High School hockey teams met at the local rink on Friday night last. The game was a good one and a good crowd was on hand to see the juniors in the national game. The score at the close of the game was 7-2 for Tofield.

Tofield marksmen were: A. Smith, 3; A. Swift, 1; J. Moore, 2; L. Worton, 1.

Tofield line-up: Allan Harrison, Jim McAllister, Allan Swinton, Jack Innes, Art Smith, John Moore, Arnold Swift, Harris McClymont, Charlie Worton, Leonard Worton.

KETCHAMOOT

Mr. and Mrs. Herman Lawson entertained the young folk of the community to a party at their home Tuesday evening of last week. All reported a pleasant evening.

Mr. and Mrs. C. A. Ingram were Sunday dinner guests of Mr. and Mrs. John Lee.

Mr. Oscar Barnes was taken to the Royal Alex hospital in Edmonton one day last week suffering from an attack of pneumonia. Mrs. Barnes is also a patient in the hospital.

Mrs. Jack Erkenbrock, nee Pearl Sutton and two children, Miss Hazel and son Glen of Binger, Okla., U.S.A. arrived on Saturday morning for a visit with their mother and grandmother, Mrs. Fannie Sutton, also brothers and their families and old time friends. This is Mrs. Erkenbrock's first visit home in fifteen years.

Mrs. J. H. Ingram, Mrs. W. Wiley and James Ratigan visited at the T. D. Ferguson home Sunday.

Master Harold Barnes is still a very sick child and will be confined to bed for at least two more weeks.

Mr. A. Harrison underwent a successful operation at an Edmonton hospital one day last week. Mrs. Harrison returned home Sunday evening after spending several days in the city.

Miss Mabel Lawson, Mrs. Roy Lee and daughter Doreen were passengers to Edmonton Friday returning home on the evening train. Miss Mabel Lawson returned to Camrose to take up her teaching duties.

Mr. and Mrs. Alex Kleinschroth entertained the Social Credit Club at the Harry McGinitie home Friday. After a short business session cards and music followed by refreshments soon passed a pleasant evening away.

Town Council Meeting

A regular meeting of the town council was held on Monday evening, January 24th, presided over by Mayor Swift. A By-Law appointing the Secretary-Treasurer to act in the capacity of Returning Officer was given three readings. The Secretary was also appointed assessor for the year 1938, and approval was given, by By-Law, for the assessment of businesses and buildings and improvements on the same basis as in previous years. Some routine communications and accounts were dealt with, and the auditor's report for the year 1937 was received and considered.

FOR SALE—A used McCormick-Deering Tractor, ready for work. Apply M. C. Hammond, Tofield.

Mr. Alex Kleinschroth is president; Frankie Dunham Secretary-Treasurer. The February meeting will be held at the Whillans home.

The subscribers of Telephone line 19, South Tofield, held their annual meeting at the Lorne Lee home Thursday evening with William Stairs president and Lorne Lee Secretary-Treasurer.

The School board held their first meeting of the year at the Roy Lee home Saturday. It is rather difficult to get a secretary under the new school act.

The regular monthly meeting of the Ladies' Aid will be held next Wednesday February 2nd at the home of Mrs. G. W. Sears. A cordial invitation is extended to all.

Harold Ovelson suffered a painful injury one day last week when a raised pump fell down and took off the end of one of his fingers.

Mrs. J. H. Ingram, Mrs. W. A. Mitchell accompanied Ralph Barnes to Edmonton on Monday to visit the sick folk.

HOCKEY

There has been plenty of action in hockey circles this past week. Local teams comprising Midgets, High School and Seniors have all seen their share of play.

TOFIELD MIDGETS 1—RYLEY 1

Last Friday evening as part of a double header the local midgets met Ryley and after a strenuous game the score was even, each team having scored a marker. The youngsters took their game seriously and budding players could be spotted here and there.

HIGH SCHOOL 5—ROUND HILL 1

After the Midget game Tofield High School and Round Hill Intermediate team clashed and a keen close game resulted. There was plenty of action in the game and the crowd present voiced their appreciation. The score was 5-1 for Tofield.

Bill Worton refereed both these games.

TOFIELD 6 — WETASKIWIN 3

On Sunday the senior team met the Wetaskiwin Colonels on local ice and one of the best games seen here in years resulted. The game was evenly fought as regards skating and stick-handling but Tofield had an edge in passing and shooting. The score was 6-3 in favor of Tofield.

Line-up: Wetaskiwin — Baker, K. Kirstein, McIlhargey, Moen, Spencer, Rankin, R. Kirstein, Merner, McLaughlin, F. Kirstein, Lindsey.

Tofield—Bowick, L. Glover, Everitt, N. Glover, Smith, W. Worton, S. Worton, Swinton, Machtmes, Sears.

Goals: Smith 1, Swinton 1, S. Worton 3, W. Worton 1.

Bob Evans refereed the game.

VIKING 0 — TOFIELD 6

On Monday night the local senior team met Viking in a gas line fixture. The visitors were late in arriving and as if to make up for lost time the teams set a torrid pace in the first period. End to end rushes with hard drives on both goals kept the fans on edge all through the first period. This was one of the fastest skating periods seen here for some time. Tofield scored four in this period.

The second period was not quite so fast and there was no scoring by either side. There was plenty of action and both goalies were frequently called upon.

In the final period Tofield added two more to the score in their favor and while Viking at times played four and five men up they were unable to break through Bowick's guard on his citadel. The game ended 6-0 for Tofield.

Line-up: Viking Goal, Rasmussen, Defence Slaruk, McLaren; Forwards, Kelly, W. Ash, Runyon, Ash Craig, McEachern.

Tofield—Bowick, L. Glover, Everitt, Whyte, Smith, Worton, Swinton, Machtmes, Sears.

Goals: Tofield Swinton 1, Smith 3, Worton 2.

Bob Evans was the referee.

WETASKIWIN 7 — TOFIELD 5

On Tuesday playing the third game in as many days, the seniors were defeated at Wetaskiwin by a score of 7-5. There were quite a few spectators from Tofield at Wetaskiwin and they say it was a nice game to watch. Fast enough to be interesting, quite clean and close enough to make competition keen.

Bob Whyte refereed the game.

The Tofield Hockey senior team wish to express their thanks and appreciation to their fans for the loyal support which has been afforded them for the last few games.

Chipman Curlers Visit Tofield

Two strong rinks from Chipman challenged two Tofield rinks on Saturday evening January 22nd, and the games were played on local ice. Glen Wood's rink defeated A. L. Nichols by a score of 13-6, whilst Dr. Law's rink went down to defeat under E. Gallagher, the score being 12-6.

Chipman—A. L. Nichols, skip, H. Grant, third; Paul Wasny, second; S. Din, lead. E. Gallagher, skip; J. Josten, third; G. Foster, second, John Bereskim lead.

Tofield—Glen Wood, skip; A. B. Clutterham, third; A. R. Francis, second; T. Jacobs, lead. Dr. F. F. Law, skip; J. W. Chapman, third, C. R. Currie, second; A. Cowell, lead.

Dr. Law has entered a rink in the Red Deer bonspiel which is being held on January 25th to 27th inclusive. J. W. Chapman, C. R. Currie and A. Cowell are the other members of the rink.

BEHIND THE HOG

By A.B.C.

F[illegible] the Bonspiel—Lots of C[illegible] as yet, although the [illegible] are staging a Bingo Party at the rink on Saturday Feb 5.

Th[illegible] on Saturday nights, drop [illegible] and see them. And while on [illegible] I understand some of the [illegible] to some of our [illegible] last week. She's a tough life, [illegible]

0-0-0-0

F[illegible] last week—We present for [illegible] approval the first installment [illegible] Up."

0-0-0-0

C[illegible] an ancient Scottish pastime [illegible] very prominent among Scot[illegible] to the finer arts [illegible], wherever Scotsmen and are [illegible] the same place there is bound to be a curling game. There is an old saying that when two Scots meet they start a St. Andrew's society, [illegible] the [illegible], when eight of th[illegible] together they start a bonspiel.

As [illegible] mentioned, curling is a Sc[illegible] creation, and together with plaid [illegible] and tartan ties, it has invaded the very ends of the earth. To qualify to be a curler you must be able to warble "It's a braw, bricht moonlicht nicht" with a fine burr, to impart the impression that you have only recently left the heathered shores of Loch Shiel. In addition, you must have a voice like a bull moose. To think of a curler without a basso voice is just like thinking of Mae West without thinking of a story. You've got to have a voice strong enough to crack the rafters at the other end of the rink. With these qualifications you stand a pretty good chance of becoming a first-class curler, providing you spend the next twenty years of your life learning the difference between an out turn and an in turn.

A rink is made up of four members, a lead, a second, a third, and a skip. Take the lead for instance, although nobody wants to take him. At the skipper's command he tosses up his pair of rocks and then sweeps all other rocks diligently until it is his turn to throw rocks again. He has no say in the evening's proceedings, he cannot come over the line known as the hog line and he is not allowed to enter into any discussion or argument which generally arises after each rock is thrown. In fact, as far as recognition is concerned he may as well be in a land of strangers.

If necessary he may have to supply the other members of his rink with matches, or the odd pipeful of tobacco. In the latter instance he is usually upbraided for smoking a poor brand of the weed and is cautioned to smoke a more expensive variety in the future. After eight or ten years a lead may graduate and become a second, but this largely depends on the age and health of the skip. The actual retiring age for a skip has never been officially set, although most of them give up the game for something less strenuous after they reach the age of 104 or 105.

The second man is really a glorified lead, and his duties are about the same. He tosses his pair of rocks up to the other end and spends the rest of his time sweeping. He cannot cross the hog line either but remains ostracized with the lead, and the second and lead of the opposing rink. All four have a hunted hangdog look, although some of them, being married come by it legally, and are accustomed to being in a second or lead position.

(Continued next week)

This week's Brain wave: Just a look backward and then we march on.

ADAM HUMMELL SELLS BARBER BUSINESS

Adam Hummell who has operated a barber shop here for a year or so sold his business last week to Norman Glover who will later take over control. Mr. Hummell had been in poor health for some time. Norman is at present in the city polishing up on the fine points of the business.

Variety Theatre Sold

Owner of String of Over Thirty Theatres Acquires Tofield Picture House

The Variety Theatre, Tofield's picture house has been sold to Mr. Sharp, who we understand, owns over thirty theatres in the province. The theatre which at the time of sale was owned by the Town of Tofield will once again ring to laughter created by comedies and to [illegible] the sighs of drama. The projection booth will be [illegible] and the [illegible] improved.

With thirty [illegible] showing films Mr. Sharp will be able to show first class pictures which will be an attraction to both town and country residents. It is not known exactly when shows will commence but it will be as soon as circumstances will permit.

The Variety Theatre has seen [illegible] owners during the past twenty five years. [illegible] was an [illegible] were the proprietors, later, W[illegible] Bellamy had it for a number of years, then Frank Ball, then Frank Wood, then Mr. Fraser, then John [illegible] the Town of Tofield.

Mr. Sharp will bring to the [illegible] experience in theatre management and the regular showing of [illegible] will no doubt prove attractive [illegible] town and country alike.

LAKESHORE

E. [illegible] Phillips spent several days in Edmonton last week.

The Rocky Mountain Rangers supplied the music for the dance at the Community hall last Thursday. There was a very large crowd in attendance and from all reports everyone had a wonderful time.

Mr. and Mrs. Lester Noard and [illegible] friends at Ryley on Sunday.

The Lakeshore School opened on Monday after being closed for nearly [illegible] weeks.

[illegible] McKenzie school is closed due to a case of diphtheria in the district.

A number of young people from [illegible] district are taking the short [illegible] Agriculture being put on by the government.

Life Insurance Business For 1937 Reviewed

London, Ont. January 26—In reviewing the record of life insurance in Canada during the past year, Mr. G. Wilson Geddes, President of the Canadian Life Insurance Officers Association and General Manager and Actuary of the Northern Life Assurance [illegible] pointed out that no [illegible] was of such material [illegible] so many people as that life insurance, in which more than third of the men and women of country had their savings as safe-[illegible].

[illegible] at the end of 1937 were protected [illegible] of life [illegible] death and pensions old [illegible] approximately $4,000,000,000 [illegible] then in force [illegible] December 31 [illegible] Province [illegible] ordinary [illegible] properties in public [illegible].

In this way the savings of more [illegible] thrifty citizens have [illegible] public and [illegible] years of [illegible] through [illegible] cash [illegible] of [illegible] the recession in other [illegible] continued Mr. [illegible] The [illegible] per cent [illegible] $675,000,000 mark [illegible] important than the increase in new business was the de[illegible] which was at the lowest level since [illegible]. This is an indication that conditions are improving and that the average policyholder is realising more and more that his life insurance is his greatest asset.

"In their trustee relationship to policyholders and beneficiaries, the greatest problem confronting life insurance executives," declared Mr. Geddes, "is the handling of investment matters.

"On the whole, conditions improved throughout the country during the past year and a number of municipalities and industrial corporations have been taken out of default, and less is being heard of threatened repudiations. The decided recession in business which developed in the United States last summer, fortunately has had little effect on Canadian business [illegible] far. The newsprint industry seems to be the only one to feel the effects [illegible], and of course, the security market has reacted in line with with the New York market. The recession in newsprint and security values presents another problem for life insurance companies, but of [illegible] one.

Life [illegible] companies have [illegible] great depression [illegible] fail [illegible] life insurance company, then there is danger that the [illegible] life insurance companies are impregnable against financial difficulties of any kind [illegible] to [illegible] insurance business [illegible] foundation and [illegible] the safest [illegible] under natural [illegible] been [illegible].

A fair rate of interest for the [illegible] funds of the [illegible] necessary for the [illegible] The [illegible] be [illegible] the [illegible] would be twice as great as [illegible] and it would [illegible] attempt to [illegible] Policies pre[illegible] and guaranteed by the companies are based on the assumption that a fair rate of interest will [illegible]. The companies are debtors [illegible] policyholders under these contracts but, of course, can only pay their debts in full if the majority of debtors of the company (that is, borrowers from the company) pay their debts in full.

"In Great Britain and the United States debtors, when and where necessary, have been relieved at the expense of the general taxpayer, but in Canada legislative relief for the debtor has generally taken the form of forcing particular classes of creditors to extend that relief. Among these creditors the life insurance companies, with their mortgages invested all over the Dominion, carry a great part of the burden. This tendency, of course, is very marked in the Province of Alberta, but the legislation of nearly every Province, as well as that of the Dominion, shows a tendency to relieve the debtor at the expense of life insurance policyholders and other thrifty citizens. We all agree that where the debtors burden has become too heavy, something must be done for him, but why should not the whole citizenship of Canada share in this relief, rather than a particular group of the most thrifty and hard working individuals. In this instance, at least, the United States legislation would seem to [illegible] a fairer spirit and [illegible] far reaching vision.

"Mortgage loans" said Mr. Geddes, "constitute one of the most suitable field for the investment of life insurance funds and there is a great deal of money available for first class loans at low interest. Real estate however was so depressed in value because of the high taxes assessed against such property, that mortgage loaning was necessarily [illegible] a proportionately low amount in each case. If tax rates on real estate could be cut to conservative levels, the desirability of owning a home rather than of renting a house would be considerably increased.

"Executives of life insurance companies have always felt that the true facts of life insurance should be placed fairly and squarely before the public. This has been done through the institutional advertising, sponsored by the Canadian Life Insurance Officers Association in the interests and for the information of policyholders and the public generally, which for seventeen years past has appeared and will continue to appear in the press of every Province in Canada and which publicity, on occasion has been augmented by radio advertising."

FISH FOR HEALTH
By Mrs. Fisher

WHEN USING FISH FOR BREAKFAST

Canadian Fish Hash

Chop from four to six slices of bacon and fry the pieces until crisp, then add the following mixture: Two cups of any Canadian cooked and flaked fish, two eggs, two slices of onion, finely minced, and one-half cup of fish or meat stock. Heat slowly, stirring meanwhile, brown and serve topped with chopped parsley, minced green pepper or other like ingredients may be added for a change of flavour.

Canadian Fish and Shellfish are especially good foods because they are so easily digested and are rich in vitamins and health-giving mineral substances.

WHEN USING FISH FOR LUNCH

Canadian Fish and Cheese Casserole

Place a layer of cooked peas or cooked spinach in the bottom of a large, shallow, greased baking dish. Place on the vegetables a layer of any variety of Canadian fish, using either slices of fish or fillets cut into suitable serving portions. Sprinkle salt and pepper and cooking oil over the fish. Place the dish in a hot oven for six or eight minutes. Then, having a cheese sauce ready, pour it over the fish, sprinkle with fine bread crumbs, dotted with butter, and put the dish back into the oven until the top is nicely browned. The cheese sauce may be made as follows: Melt two tablespoons of butter, blend with it two tablespoons of flour, and add a cup of liquid (a cup of milk or of milk and vegetable water combined); cook the mixture until it is thick and smooth, stirring constantly, and just before removing it from the stove add a half a cup of grated Canadian cheese, and continue to stir the sauce until the cheese is melted.

Canadian Fish are rich in vitamins and health-building minerals and, having regard to nutritive value, are among the most nourishing of foods.

WHEN USING FISH FOR DINNER

Canadian Oven-fried Fish

Using fillets or steaks of any desired kind of Canadian fish, wipe each piece carefully with a damp cloth wrung out in cold salted water. Dip each piece in egg, beaten slightly with a tablespoon of cold water, or in salted milk. Toss the fish into a pan or bowl of finely-sifted, dry bread crumbs, coating each piece of fish with the crumbs. (Use one hand for dipping the fish in the liquid and the other for working with the crumbs) Place the pieces of fish on a greased baking pan, add salt, and sprinkle lightly with cooking oil. Leave the fish in a hot oven—500 degrees F—until it has lost its watery colour and no juice escapes when the slices are pierced with a knitting needle. The length of cooking time required depends on the thickness of the fish; not more than ten minutes in a hot oven is needed for a piece of fish an inch thick. Over-cooking is the most common mistake in fish cookery.

Canadian Fish Foods, rich in nourishment and health-giving substances are unexcelled anywhere

HEALTH

A HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION AND LIFE INSURANCE COMPANIES IN CANADA

The Epileptic Child

The vast majority who suffer from epilepsy experience their first seizures early in life. This is a matter of extreme importance for parents because parents must know that there should not be any delay in securing medical attention for the condition. Treatment should begin at once. Unfortunately, the disease is usually incurable, but treatment is successful in some cases, and if it is to be most helpful, it must start before the disease has become chronic.

Some cases of epilepsy are due to brain injury, following fracture of the skull for example. Cases of this type are often helped or cured by surgical treatment. The cause in the vast majority of cases is not known. Heredity is an important factor. The disease appears in two main forms, the major and the minor.

In the minor form, there may be simply loss of consciousness for a moment or two. The child stops what he is doing and sits or stands with his eyes fixed and staring; the face is somewhat pale. In a few moments, however, he starts again where he left off. He may fall or make certain movements. From this mild type, the disease grades out into the major form.

The major form has two outstanding symptoms, muscular spasm and unconsciousness. The attack is sudden, although many patients experience a warning sensation or "aura" which precedes the attack. The aura is followed by an abrupt loss of consciousness. The patient falls if he is not already lying down. The muscles are first held contracted, the face turns blue, and then, for a minute or two, follows a twitching or jerking of the muscles. Consciousness returns, the patient may be dazed and he frequently passes into a deep sleep.

Every epileptic should receive prompt medical care. Physical defects should be corrected, and the health of the child built up. The child must be prepared for life by firm, but kind and understanding care. The child will have to be watched and trained with regard to his habits. Overeating, excitement and exposure are to be avoided. It will be necessary to select an occupation that is within the child's mental capacity and which will, at the same time, be safe for an epileptic.

We cannot be optimistic about [illegible] epilepsy [illegible] that by prompt treatment and training, a great deal can be done provided the case receives early attention.

Questions concerning Health, addressed to the Canadian Medical Association, 184 College Street, Toronto, will be answered personally by letter.

THE WORLD OF WHEAT

By H. G. L. Strange, Director Research Department, Searle Grain Co.

There has recently occurred a decided slump in the price of stocks, shares and commodities in the United States. This has had its effect upon prices in Canada, including that of wheat.

Some people are fearful that an intense Worldwide depression, such as occurred in 1929 is upon us again.

For my own part I do not agree with this pessimistic view. It seems to me there were very good reasons for the temporary recession that has taken place in the United States.

The price of stocks, shares and commodities, including wheat, are not, I believe, too high; indeed not high enough is my own personal view and for this simple reason—The value of money in terms of gold in Great Britain, the United States and Canada, has been inflated since 1914 by 69 per cent. In many other countries by a greater percentage—but the prices of commodities, stocks and so forth on the average have only risen since 1914 by about 25 per cent.

Eventually, it seems to me, the full 69 per cent increase in the prices of all goods, commodities, wages and salaries must take place, for history tells us that over in the past the prices of all things have increased, after a time, by exactly the same percentage as the money was inflated.

Following factors have tended to raise prices: Dust storms and lack of moisture in the U.S. winter wheat belt. Russian wheat reserves low and further exports likely to be unimportant. Spain makes further wheat [illegible] of export business next April. Norwegian potato crop smaller than year ago.

Following factors have tended to [illegible] European crops mostly satisfactory. Moderate rains benefit Argentine corn—Timely snows prevent crop damage in Danubian countries. Turkey becomes a wheat exporter. Brazilian wheat bread must now contain 30 percent domestic [illegible] has larger wheat crop than last year. Good crop conditions in [illegible].

ANY DAY A FISH DAY

Styling as different as it is beautiful, for this bigger-looking, better-looking Chevrolet.

Smooth—powerful—positive . . . the safe, self-energizing brakes for modern travel . . . giving maximum protection.

So safe—so comfortable—"the world's finest ride". On Master De Luxe Models.

Giving the most efficient combination of power, economy, dependability.

Larger interiors—lighter, brighter colors—and Unisteel construction with Safety glass for safety.

Eliminating drafts, smoke, windshield clouding and assuring each passenger individually controlled ventilation.

Easier, tiptoe-pressure clutch operation. Wear is greatly reduced. No lubrication required.

MODERN MODE STYLING
PERFECTED HYDRAULIC BRAKES
GENUINE KNEE ACTION
VALVE-IN-HEAD ENGINE
ROOMIER ALL-SILENT ALL-STEEL BODIES
FISHER NO-DRAFT VENTILATION
NEW TIPTOE-MATIC CLUTCH

You'll be ahead with a CHEVROLET!

Buy It Now, and Put Yourself Ahead in Style and Savings . . . in Winter-driving Safety and Dependability

To check the exclusive features listed to the left is to know that Chevrolet leads because Chevrolet gives more for the money. To check the advantages of buying your new 1938 Chevrolet now, is to know why you see so many on the streets already. For example . . . You can face bad weather conditions confidently—no starting troubles, no repair expenses, no worry about weak, smooth tires. You'll enjoy the priceless safety of perfected Hydraulic Brakes, always equalized, quick-acting—the protection of an All-Steel Body by Fisher, and Safety glass all around you. And don't forget you'll be saving costly depreciation on your present car.

Chevrolet puts you ahead in everything . . . in style, safety — in the little it costs you to buy and run!

—Illustrated—Master Sport 4-Door Sedan with trunk

PRICED FROM $820 (2 Pass. Master Business Coupe) MASTER DELUXE MODELS FROM $892. Delivered at factory, Oshawa, Ont. Government tax, freight and license extra. (Prices subject to change without notice.) Monthly payments to suit your purse on the General Motors Instalment Plan.

RAY COATTA, PROPRIETOR

Oil In Alberta
By J. L. Irwin

(Continued from Last Week)

Alberta's potential production at the moment is approximately 25000 barrels a day or at the rate of 9,000,000 barrels per year. A quantity sufficient for the requirements of the three prairie provinces and equivalent to one-quarter of the Dominion's consumption.

A visible market now extends from eastern British Columbia to Rainy River in Ontario. Problems in marketing facilities, which at first presented difficulties with the rush of suddenly increased production, are beginning to be solved. With the exception of one of the larger marketing companies, contracts with United States producers are not being renewed, refinery extensions are being constructed and additional pipe lines installed. By the spring of 1938 a most encouraging report on increased production and marketing is anticipated.

A most encouraging one can already be given. Largely due to the performance of the Turner Valley Royalites well which came in in June 1936, and which according to reports paid for its drilling within five months, the following increase in Alberta's oil production for 1936 is given:

1935 Barrels 1,263,750; 1936 Barrels 1,320,442.

Increase in oil production for the calendar year 1936 over 1935 56,692 barrels.

Comparative production increases for the first ten months of 1937 are as follows:

	1936 Bbl.	1937 Bbl.	Increase Bbl.
January	105,171	127,977	22,806
February	96,077	140,515	44,438
March	101,857	161,832	59,975
April	94,230	172,608	78,378
May	98,709	175,997	77,288
June	97,639	191,634	93,995
July	122,771	226,000	103,229
August	124,287	271,898	147,611
September	120,210	281,154	160,944
October	120,438	325,723	205,285
TOTALS	1,081,669	2,075,338	

Increased oil production for first ten months of 1937 over the similar period for 1936 993,669 bbl.

To this most satisfactory progress there now comes a new encouragement in the improved process of acidizing producing wells with a view to [illegible] increased production.

The cost of such processing is insignificant in comparison to results obtainable and returns have so far proved generous in the extreme.

Expenses involve the installation of tubing in a well plus the purchase of acid. The amount used is generally [illegible] 3000 to 6000 gallons. The total cost of this processing is generally recoverable by only a few days' increased production.

The acid, possessing a hydrochloric base and containing an inhibiter for the protection of the metal tubing from corrosion, is injected into the wells by means of pumps. On reaching the productive horizon it removes obstructions from the porosity of the limestone.

The results of acidization have been spectacular. Producing wells in [illegible] have been increased [illegible] result of this form of processing two or three times their original potential capacity and many have been subjected to a second treatment.

Popular amendments to both the petroleum and prospecting regulations were made last year. In the latter instance larger areas were granted with reduced fees which offered a distinct encouragement to more intensive geological work. Following the promulgation of these amendments surveys were conducted in different parts of the Province which resulted in a great deal of valuable data being gathered in. Surveys on a still greater scale are being carried out this year.

Research of this nature will result in a more scientific location of drilling sites which, it is hoped, will lead in turn to the opening of new and productive fields.

Petroleum and natural gas leases active during the fiscal year ending March 31st, 1937, numbered 5,674 covering an area of 770,506 acres. These figures represent an increase over the preceding year of 2,237 in number of leases granted and of 112,064 in acreage covered.

Prospecting permits issued for the last fiscal year involved a total area of nearly half a million acres—more than twice the size of territory secured for this particular purpose during the previous year.

Alberta is underlaid with a petroliferous formation, a fact which has been proven by the drilling of many wells. A large number of these wells while not securing commercial production have nevertheless found showings of oil and gas in most parts of the Province. There is, therefore, ample reason for believing that other productive pools will yet be discovered both in the plains' and foothills areas. In addition to the activity in Turner Valley work to a far greater extent than is generally known is being carried on in exploratory fields scattered throughout the Province and twenty-five wells are at present being drilled in those different areas.

Now Valley, northeast of Turner Valley, may well develop into an attractive field as a result of discoveries made by its first well drilling in that area. The same may be said of Taber where production is being secured at an approximate depth of 3000 feet. The districts of Wainwright, Ribstone and Red Coulee all possess producing wells. In the southern plains close to the international border the search is continuing for pools which may prove to be an extension of the Sweetgrass Arch, the productivity of which has been demonstrated in many pools in northern Montana. Hunter Valley to the west of Olds is receiving encouraging indications of oil and gas and tests of the Pouce Coupe and other northern structures are under way.

Of importance is the test about to be made by the Home Oil Company on the Brazeau. Before proceeding to drill a thorough geological examination was made and the structure defined as definitely as possible from surface indications. This investigation was supplemented by an aerial survey when photographs were made of the structure. Drilling will commence very shortly and it is expected that oil may be found at shallow depth.

Another important area to be investigated is situated on the Ross River, where arrangements have been completed for the drilling of a test well. This area has been thoroughly investigated by geological examination and most favourable reports have been made.

It is only within the past quarter of a century that Alberta has been seriously considered as a mineral producing province. Prior to that time ranching and later farming were the essential industries. For this reason therefore, considerable areas of Alberta lands, some forty or fifty years ago, were from time to time alienated, transferring not only surface, but also mineral rights, always reserving gold, silver and precious metals to the Crown. In addition to this proviso occasional reservations were made for coal and, in extremely isolated cases, for petroleum.

The situation in Alberta today reveals, therefore, that under the general heading of royalties obtainable from petroleum production the Government benefits only from those recoveries which have been made on Crown lands. Taking the month of March of this year as an example, 161,832 barrels of oil were obtained from [illegible] producing wells. Of this number 18 of the wells, which produced 90,713 barrels, were on Crown lands and subject therefore, to the payment of a ten per cent Government royalty. The remaining wells, drilled on freehold land, produced 71,119 barrels, for which no Crown royalty was collectable.

"Dwarf cows have been added to a California zoo."—Press report. And now 500 paragraphers will be bound to want to know if these cows give condensed milk.—Washington Post.

CANADIAN NATIONAL

A National Appeal

Beginning January 23rd and extending over a period of approximately one month, the Canadian Red Cross Society and the Religious Bodies in Canada are uniting in a National Appeal for the relief of war sufferers in China.

The attached letter and pamphlet which are being sent to a large number of Canadian citizens, will explain the nature of this Campaign.

Appeals will also be made from the pulpits of all Religious Institutions throughout the Dominion.

Fully cognizant, as we are, of the fine humanitarian spirit which has motivated the policies of Canadian newspapers for many years, we confidently ask your support in this endeavour. The need is apparent, doubtless more so to you of the press than to any other section of Canadian people, and we feel sure that any contribution Canada can make to the mitigation of suffering and destitution in China, will meet with your hearty endorsation.

In two ways particularly, the press could be of great assistance: (1) through its editorial columns, and (2) through announcements inserted at the end of the more distressing war reports. These are merely suggestions for your consideration.

The support of the Press of Canada, we realize of major importance to this Appeal and we will be deeply appreciative of your kindly co-operation in keeping this matter before the public during the period mentioned above.

China's Need—Canada's Answer

Both Japan and China were tendered medical relief assistance by the International Red Cross representing all National Societies. Japan declined stating that she had already made necessary provision. China accepted with a gratitude that reflects her terrible need.

China is suffering.

The extent and severity of that suffering has seldom, if ever, found equal in the history of nations.

The shelling and bombing of cities [illegible] terror, death, disablement [illegible] not alone to soldiers, but to countless women and little children hopelessly caught in the maelstrom of war, have created distress of unparalleled proportions.

At the expressed wish of Canadian citizens in many parts of the Dominion, the Red Cross and the Religious Bodies of Canada, in affiliation, are creating a Fund, through which our people may express their sympathy in tangible form.

No brief is needed for this appeal. Day by Day, press and radio are in[illegible] the stark [illegible] great tragedy before us. The need for hand [illegible] will never be greater. In the face of suffering such as theirs, our sympathy and help can know no barriers of race or creed.

We feel confident that Canada will meet this need promptly with generous hand and heart.

Might Spoil His Appetite

In his early boarding-house days in Kansas City, Eugene Field was invited to dine at a hospitable house where the best of everything was to be found. Some delicious strawberries were passed. Field gazed at them [illegible] head.

"Mr. Field," said the [illegible], "[illegible]"

Nomination Meeting

TOWN OF TOFIELD
Municipal Elections 1938

Public Notice is hereby given that I will attend at the Town Hall, Tofield on Monday, February 7th, 1938, from eleven o'clock in the forenoon until twelve o'clock noon for the purpose of receiving nominations of candidates for the office of councillor for the next ensuing two years.

Given under my hand at Tofield this 26th day of January, 1938.

J. W. CHAPMAN,
Returning Officer.

TOFIELD SCHOOL DISTRICT NO. 1939
School Elections 1938

Public Notice is hereby given that I will attend at the town hall, Tofield, on Monday, February 7th, 1938, from eleven o'clock in the forenoon until twelve o'clock noon, for the purpose of receiving nominations of candidates for the office of school trustee for the ensuing two years.
Given under my hand at Tofield, this 26th day of January, 1938.

J. W. CHAPMAN,
Returning Officer.

BARDO

[illegible] Nash of Knotek-Hill, B.C., has gone to Spain to join the government [illegible] in the Civil War. He is a nephew of Martin Eide of this district.

[illegible] Anderson has gone to Moose Jaw where he will act as pastor there.

[illegible] Land of Vancouver, B.C. a former resident of this district, spent New Years visiting here.

Mrs Geo. Hendrickson entertained the skaters to lunch last Friday night.

[illegible] visitors last week were: Mrs. Joe Stauffer, Mrs. A. Haukedahl, Martin Hagen, O. Johanson, John Westby, Bennie Finseth, Gladys Johanson, Geo. Hendrickson, Mrs. A. Steen, Mr and Mrs Alvin Steen, Eddie [illegible], Buddy Steen and Mr. and Mrs. A. [illegible].

Mr. and Mrs. Art Moen spent last week at Holden visiting Mrs. Moen's folks.

Mr. and Mrs. M. B. Ness of Edmonton spent the week end at the I. Ness home.

Miss Margaret Moen spent last week here visiting relatives and friends.

Bardo 7 and Devils 2 was the result of the hockey game played on the Bardo rink last Wednesday. Bardo lineup: Goal, C. Jevning; Defence, A. Steen and E. Steen; Forwards, G. Olson, L. Stauffer, L. Foshaug, I. Foshaug, P. Anderson and B. Steen.

Pete Borreson of Ryley, a former Bardo resident won first honours in "A" class at the ski tournament held in Edmonton last week.

Evelyn Rudd of Camrose is assisting Mrs. Monrad Finseth with her housework.

Our sympathy goes out to the W[illegible] Wideman family in their recent bereavement.

McKENZIE

Jean Eaglesham has been on the sick list for two weeks with a bad earache. She is now at the University hospital in Edmonton but is reported better and expects to be home this week.

Lylla Bailey is spending a few days with her grandmother since school was closed.

The Social Credit Group met at Glen Bailey's on Tuesday evening of this week. A good time was reported.

Jim Eaglesham was unfortunate in getting his hand cut. He had to have some stitches put in.

Gordon Ferguson has been on the sick list with the flu the last few days.

The McKenzie and Ross Creek boys played hockey Saturday at the Wacker rink, the score being 8-8. Another game was played on Sunday at Ross Creek, the score being 10-7 in favor of Ross Creek.

Charles Roberge has been helping Bert Jones haul grain this week.

We hope Mrs. Record will improve after her new treatment.

Mr and Mrs. Munroe Trent visited with the Johnerud family south of Tofield on Saturday.

Molly Dale had the misfortune of spraining her ankle badly at school on Wednesday of last week.

LOCAL & PERSONAL

The Misses Margaret Whyte, Annie Swift and Ella Taylor, nurses at the Royal Alex hospital visited their homes on Sunday.

Miss Jessie Munro visited in Edmonton over the weekend.

Mrs. R. Whyte from Wetaskiwin spent a few days in Tofield, returning to Wetaskiwin on Sunday.

Mr. A. Hammell left last week for Vancouver, where he intends to stay some time.

Mr. Norman Glover left for Edmonton this week where he will take up a course in barbering.

Mrs. Cairnes is visiting with her daughter Mrs. C. R. Currie.

Mrs. J. W. Robinson attended the Quarterly Meeting of the Edmonton Diocesan Board of the Womens' Auxiliary last Friday. The chief speakers were Rev. Dr. Rowe; Rev. Gower who spoke on the Oxford and Edinburgh Group Conference and Miss Hope Simpson, a graduate of Cambridge University. At present she is affiliated with the University of Alberta as Secretary of the Student Christian Movement. She gave an interesting address on the World's Student Christian Movement.

KINGMAN

Mr. Will Wideman passed away last Wednesday very suddenly. He had not been well since Christmas. He was 57 years of age and leaves to mourn his loss his wife, 15 children, 8 grandchildren, 4 brothers and three sisters.

Miss Lina Kasper of Drumheller is here at the home of her sister, Mrs. Will Wideman for a few days.

Quite a few people from Kingman attended the funeral of the late Mr. Will Wideman last Saturday at the Mennonite church and we all extend our sincere sympathy to the family.

The Gospel Team from Wetaskiwin held services at the Baptist church on Sunday last, forenoon and evening. They had a good service and it was enjoyed by all those who heard them.

Miss Marion and Leonard Simonson spent the week end at their parent's home.

Mr and Mrs. Amos Hostetter and son Arnold visited at the J. K. Dettwiler home on Monday afternoon.

Mr W Grahn who was ill with the flu is much better again.

Wedding

A wedding of local interest took place in Edmonton on Monday, January 24th, when Eva Eileen, third daughter of Mr. and Mrs. Frank Scott was united in holy matrimony to George William, eldest son of Mr. and Mrs. Henry White. Rev. Mackie officiated. The young couple are well known in Tofield and district and best wishes are extended to the happy couple from their many friends.

The One Thing Needful

Mrs. Patton Ayres: "I fought a tough battle to get into society in Boson but I finally managed it."

Mrs. Nozer: "I imagine you had to keep your chin up."

Mrs. Patton Ayres: "No, just my nose."

LINDBROOK

The dance put on last Friday week by Messrs. C. Lindgren and Robt. Scott was very well attended and enjoyed by all present. The Lindbrook Orchestra provided the "swing or rythm" or whatever music is called those days and those who ought to know say that it was pretty good stuff. It is to be hoped that more dances will be given and help our orchestra to achieve fame, who knows? they may be heard over the C.B.C. some day (shouting in a mob at a hockey match likely.)

We had a minor train wreck here one evening last week, a couple of cars derailed. This held up a few trains for an hour or so, amongst them the 7 p.m. passenger to Edmonton. It was quite lively, what with flares, torpedoes, and whistles, too bad it wasn't the 25th or else we might have thought it a Burn's celebration.

The measles epidemic is about over now and all the pupils back on the job.

The Dairymen's Association are holding their annual convention at the MacDonald Hotel, Edmonton on February 8th to February 10th.

Work is being done modernizing the projection booth at the Variety Theatre. It is hoped soon to have a regular picture show here.

The Holy Trinity W. A. will meet at the home of Mrs. Malcolm on February 3rd, 1938.

A little girl found weeping in the street, confided to a sympathetic citizen that she had lost a penny. Search for the missing treasure proving useless, the Good Samaritan produced another penny.

"Oh!" breathed the child in shocked accents. "And did you have it all the time?"—Edinburgh Dispatch.

"If it were not for the cranks, half the beautiful streets in London would be in danger."—Robert Lynd.

'THE TOFIELD MERCURY

Vol. XVII., No. 52 Thursday, February 3rd, 1938 $2.00 Per Year. To U.S.A. $2.50

Town Secretary's Annual Report

1st.—Personnel of Council. Mayor Swift, Councillors Brace, Lovel, Bellamy, Coutts, Hammond and Law. Councillor Coutts ceased to be a resident of town and submitted his resignation. This was accepted on November 15th, 1937. No election was held to fill the vacancy, as the Town & Village Act prescribes that where a vacancy occurs within four months of the time an election is due, then no special election need be held to fill the vacancy. The terms of office of Councillors Hammond and Law expire in February 1938.

2nd. Auditors: Books and records were audited by McConnell Brothers & Co. Chartered accountants of Edmonton, in accordance with the requirements laid down by the Department of Municipal Affairs. A Statement of Receipts and expenditures together with the balance sheet was published in the Tofield Mercury issue of January 13th, 1938.

3rd. Inspections: An inspection of the office was made by an inspector of the Department of Municipal Affairs, Mr. H. T. Curran, who reported that all records were being well and neatly kept. The report covered an inspection of cash books, ledgers, assessment roll, minute books and other records.

4th. Assessments: The assessment roll of 1936 was adopted as the basis of assessment in the year 1937. The only new property to be assessed was the new bank building. This was one year in which no residences were moved out of town.

5th. Tax Collections: Municipal and school tax collections were very similar to those of 1936, being slightly larger.

6th. Arrears of Taxes: The amount of taxes estimated to be collectible as at December 31st 1937 is $11609.00. This includes the amount collectible from acreage contained in cancelled subdivisions. Value of those lands for the purpose of these computations was kept within $15.00 per acre, so the figures are well within what may reasonably be expected from these lands.

7th. Reserve Fund: There has been no real change in the Reserve Fund. Bonds of the City of Edmonton of a par value of $3000.00 are held. Edmonton has had a scheme of refunding approved by both the bondholders and the Board of Public Utility Commissioners. Under this scheme the bonds held by the town will be exchanged for bonds of a similar amount.

8th. Health: During the year the town has assumed the cost of certain health services rendered to school children and children of pre-school age at a total cost of approximately $200.00. This consisted of vaccinations against small-pox and a series of sprays administered to the noses and throats of school children for the prevention of poliomyelitis (infantile paralysis).

9th. Police & By-Laws: During the year a curfew law was passed requiring children under the age of sixteen to be off the streets by nine o'clock p.m. each evening. To enforce this and other laws, and also to act as a permanent night-watchman, Mr. James Campbell was sworn in as a constable. The value of this has been demonstrated a number of times. On one occasion Cons. Campbell arrested a suspicious character prowling around the back alleys at night. This man proved later to have been convicted on previous occasions of such offences as house-breaking, and horse stealing.

10. Debenture Debt: The proposed refunding of debentures has not yet been accomplished. During the latter part of the year 1937 a suggestion came from a bondholder's representative suggesting that the whole matter wait in abeyance for a period of five years. This the council refused to consider, feeling that a permanent adjustment should be made at this time. It would appear that the scheme of readjustment is being held up at the present time by one large bondholder. It is hoped that this bondholder's objections can be overcome and that a refunding of the debentures will be made in the near future.

J. W. CHAPMAN,
Secretary-Treasurer.

Tune in Monday, February 7th at 9:30 p.m. on CJCA or any station connected with the Canadian Broadcasting Corporation, and enjoy an interesting half hour with the Canadian Western Lumber Co.'s mill at Fraser Mills, B.C. The night shift will be working while this broadcast takes place and no doubt many interesting items will be disclosed regarding the manufacturing of lumber by this mill. The Canadian Western Lumber Co. operate the largest mill in the British Empire and their products are regarded as second to none. Besides the milling of lumber, they manufacture Douglas Fir Veneer, Doors, Lath, Shingles.

CROWN LUMBER Co.
LIMITED

HOCKEY

TOFIELD 8—RYLEY 4

On Monday night at the local rink the seniors met Ryley in a gas line league fixture in a game that at times was extremely dull and at other times was packed full of interest. The locals went into the game with only one sub instead of the usual extra forward line and in consequence played cautious hockey for the first period. Ryley attacked again and again but the rushes were mostly broken at centre ice and only occasionally landed behind the Tofield goal. To affect a tight-defensive game Ryley did some long shooting but failed to score on this play. Tofield scored the only goal in this period, Worton breaking through flanked by Glover who received a pass and made a neat goal. The score ended 1-0 for Tofield.

The second period was faster and there were flashes of good hockey. Ryley was well in the picture and at one time it looked as if the score would be tied but this actually did not happen. In this period Ryley scored three and Tofield five.

The third period was the most interesting of the three, both teams skating hard and fast. Tofield scored first to add to their lead but Ryley cancelled that one by a smart effort. To make sure of it, Tofield added another which made the score 8-4 for Tofield, this being the score at the close of the game.

GOALS: Ryley—Vergette 2, Chappel 2.

Tofield—Glover 1, Smith 1, Worton 6.

Line-up: Ryley— Kjelter, Osland, Umphrey, Helley, Greig, Vergette, E. Chappel, A. Chappel.

Tofield— Burke, Glover, Whyte, Smith, Sears, Swinton, Worton.

Referee—Bob Evans.

Wedding

SCOTT—GRANT

A very pretty wedding took place at the home of the officiating clergyman, Rev. F. E. Chapman, Upper Woodstock, when Stella Fern, only daughter of Mr. and Mrs. Raymond Grant of Canterbury, was united in marriage to Allison Clifton Scott, son of Mr. and Mrs. Frank Scott of Tofield, Alberta. The bride was becomingly attired in blue silk crepe with accessories to match. She is a member of the Primitive Baptist Church of Canterbury and an active worker in both church and Sunday School. The happy couple will reside at Canterbury.—Fredericton Gleaner.

LOCAL & PERSONAL

Mr. Joseph Rogers, who has been in an Edmonton hospital for the past week or so arrived home on Wednesday improved in health.

Walter Kendall and Wilbur Gallinger were called to serve on the jury in Edmonton last week.

Glen Wood and Harry Bowick motored to Calgary on Sunday where they will take a two week's course in welding.

Miss Edythe Barden and Miss Schmidt, nurses at the General hospital, spent the week end at the Barden home here.

The Junior C.G.I.T. are holding a Silver Tea and sale of candy in the United Church basement on Saturday, February 5th, from 2:30 to 5:00 p.m. Everybody welcome.

Mrs. C. R. Currie is visiting at Lacombe for a few weeks.

Mrs. W. E. Seale, and Messrs. H. Bethel and B Hobson from Edmonton spent the week end in Tofield.

BEHIND THE HOG

By A.B.C.

At last we have the Dope on the Spiel. Four events and Aggregate. Lots of good prizes—if you win them. I expect to have 4 games and will have lots of time to pick up the odd item for this column.

0-0-0-0

A [illegible] for curlers would be to take Wednesday and Saturday evenings off and watch the Girls rinks out. They feature the Marathon or Endurance game. We might offer a few suggestions as to speeding the game up, but we have lots of trouble now.

0-0-0-0

SOOP 'EM UP
(Continued from last week)

While the lead man has to supply the matches and tobacco, the second man does not escape entirely. More often than not he is the fellow who has to purchase a goodly quantity of Glen[illegible] Dew, which the skipper passes freely around while the second looks gloomily on from his position on the far side of the hog line, thinking of terrible things but not uttering a sound. There is no armour against fate.

The third man is but a step from the skip. After years of patience and hard work he is elevated to this position, and has only to wait for the skipper to die or retire, in order to achieve his life's ambition. The third hangs around his chief like a faithful collie and even offers occasional advice to the old man although it is beneath the worthy's dignity to accept it. The third holds the broom in position when the skip takes his shots, and takes the blame when the old boy misses by [illegible]. After all a skip has a reputation to keep up.

The skip is a dictator. His word is law and what he says goes. If he calls for an "in" he must get it, even if the lead thinks an "out" or a "draw to the button" is the correct shot.

The skip is monarch of all he surveys,
He is lord over second and lead.
He refuses the third's good advice
In the plays,
He's one of the know-it-all-breed.

The idea of the game is to heave the granite rocks (they call them stones) up and down the ice, twelve times in all, each man shooting alternately and sweeping in between time. Everybody sweeps except the skips. Men of their standing do not have to stoop to such menial duties. Anyway, the team that is on its feet at the end of twelve rounds wins the match and the losers have to buy the cigars and coffee.

Curling is a gentleman's game and perhaps the only one in which [illegible] has made no inroads. Cheating is unknown, although if you accidentally nose your own rock closer to the button with the toe of your boot or ease the other guy's out to the boards in the same manner, you are considered a successful curler.

0-0-0-0

And in the coming Spiel—
It ain't the individual nor the curling as a whole,
but the everlasting teamwork of every blooming soul.

0-0-0-0

And it is also praiseworthy to keep cool in a tight place—but to keep tight in a cool place is the most fun.

0-0-0-0

My grandpa notes the world's worn cogs,
And says Curling's going to the dogs.
His grand-dad in his house of logs,
Swore curling's going to the dogs.
His dad among the Flemish bogs
Vowed curling's going to the dogs.
The Caveman in his queer skin togs,
Said curling's going to the dogs.
But this is what I wish to state,
The dogs have had an awful wait.

0-0-0-0

Drop a word of cheer and kindness
Just a flash and it is gone.
But there's a half a hundred ripples,
Curling on and on and on.

Whenever you are blue, find something to do,
For somebody else who is sadder than you.

Soop er Up, Soop er Up, Soop er Up

0-0-0-0

Small skill is gained by skips who cling to ease,
The able curler hails from stormy Tees.

0-0-0-0

This weeks brain wave—And curlers, because you have occasional cycles of despondency don't despair. Even the Sun has a sinking spell every night, but it rises again all right the next morning.

0-0-0-0

Doctor Law's Rink proved to be the 2nd best visiting rink at the Red Deer Spiel. They captured 2nd prize in the visitors.

"Friendly Valley" to be Shown Here as Part of John Deere Day Program

"Friendly Valley," an all-star Hollywood picture, will be the main feature of M. C. Hammond's John Deere Day show which will be held on Saturday, February 12th at 1:00 p.m. and [illegible] p.m.

This brand-new all-talking picture is packed with human interest, good music, dancing and homey philosophy. In the large cast of Hollywood entertainers are Frank Darien, Edward Keane, Pat Barrett, Lenita Lane, Louise Keaton and many others.

The story portrays the loyalty of a rural community to the home-owned radio station that serves that community—loyalty that is typical of a small town and rural people. It shows how the people of "Friendly Valley" rally to the support of Marjorie Kent and WFV and how Jimmie Badger brings Marjorie and WFV into the Badger network.

Three other pictures will be shown in addition to the feature presentation. They include "School Days" an instructive and educational picture on tractor service and tractor design; "Champions on Parade" a comprehensive portrayal of the most modern farming methods; and a short newsreel showing new developments in agricultural equipment.

"Our John Deere Day show is a part of a national program sponsored by John Deere dealers," says Mr Hammond. "For several years. John Deere dealers throughout the country have been putting on these shows. And because of the high quality of the programs, more and more farmers and their families have been attracted each year.

"I want to take this opportunity to extend a special invitation to all farm boys and farm wives. They, too, will enjoy our John Deere Day, as our program has been designed to be of interest to them, as well as to farm men. I promise everyone who comes a real treat."

Plans are being made to make this open house one of the big events of the year in this community, and farm families from many neighborhoods will have a chance to get acquainted there and exchange ideas and experiences in their own farming operations. Dozens of new ideas will be presented during the day which will be valuable to everyone present.

[illegible] Mr Hammond [illegible] will be made by ticket only and anyone who has not received tickets can get them by inquiring at his store before the show.

The Rev. D. K. Allan attended the meeting of the Wainwright Presbytery on Tuesday and Wednesday, 1st and 2nd of February at Viking. Mr Allan as chairman of the Presbytery presided over the sessions. The Rev Dr A. S. Tuttle of St. Stephen's College, Edmonton, gave a masterly address at the evening session on the "Greater [illegible]."

Correction

In the printed financial statement of Cornhill Municipal District an error [illegible] in the Assets (Municipal) section. The last line reading "Balance of Municipal Liabilities over Municipal Assets (Deficit)" should not be there, but the figures are O.K. and should have been preceded by the words TOTAL Municipal. Actually there is no balance of liabilities over assets, but rather a balance of assets over liabilities amounting to $12,938.08 as is shown in the Liabilities (Municipal) section.

FOR SALE—Fresh Cow. Also some 222 Wheat. Apply to E. McClymont, Tofield.

SEWING WANTED: Prices reasonable. Sewing, Mending, Darning—Apply to Mrs. Janet, Tofield.

FOR SALE—A used McCormick-Deering Tractor, ready for work. Apply M. C. Hammond, Tofield.

Miss Anne Marie Robinson of Holden visited with Muriel Malcolm over the week end.

THE WORLD OF WHEAT

By H. G. L. Strange, Director Research Department, Searle Grain Co.

"Many farmers are cleaning their wheat before taking it to the elevator because they find they are getting too much dockage for weeds."

[illegible] notation appeared in a [illegible] issue of the "Stettler Independent", Alberta.

From the point of view of farmers, this, it seems to me, is important news, for the writer has put his finger on one of the most serious forms of loss from which farmers in Western Canada are suffering, and which loss, moreover, can be reduced by all, just as it is being reduced by some [illegible] in the Stettler district.

[illegible] weed seeds are present [illegible] the farmer loses by [illegible] expense of hauling weed seeds [illegible] elevator and the cost of the freight from the country point to Fort William, then the loss of the feeding [illegible] weed seed, for there is hard[illegible] that does not contain [illegible] feeding value, even when fed in mixtures with [illegible]

[illegible] out the weed seeds through the separator at [illegible] or by a cleaning machine [illegible] farm before the grain [illegible] the elevator, certainly [illegible] farmers increased revenue.

[illegible] have tended to [illegible] Much low grade wheat [illegible] yields in Argentina. Locusts threaten Argentine corn crop—Germany negotiates for further Argentine wheat cargoes on barter basis. Portugal negotiating for American wheat. Belgian wheat, oats, flax, [illegible] production below a year ago. European rye acreage decreased.

[illegible] have tended to [illegible] Moderate rains in Oklahoma and Texas. Rains in Northern [illegible] help [illegible] U.S. interior [illegible] elevator stocks on January [illegible] greater than a year ago. [illegible] India wheat [illegible] promising. [illegible] area.

Three Small Boys Are Asphyxiated By Monoxide Gas

[illegible], Alta., Feb. 1—Playing in a closed garage where they had [illegible] the motor of an automobile, 3 young boys were asphyxiated by carbon monoxide fumes here on Monday.

[illegible]

Jackie [illegible], 5 years old.

[illegible] Williams, 11.

Tommy Foxcroft, 8.

Jack Barns, five, escaped a like fate when his parents refused to let him go out to play with the other children. His mother told him it was "too cold."

The tragedy was discovered by [illegible] Williams when he entered his garage on his return from work shortly after 6 p.m.

Huddled in the front seat of the car he found his son and the boy's [illegible] playmates. He detected a [illegible] in all three bodies but the [illegible] were [illegible] when doctors arrived. Four doctors answered an emergency call and applied artificial respiration in an effort to revive life.

The body of Young Jackie Yokom, [illegible] of Mr. and Mrs. C. B. Yokom was [illegible] under the steering post of the car with Tommy Foxcroft [illegible] on the seat. The Williams boy was [illegible] on the seat and resting on his [illegible] on the rubber floor mat.

An immediate investigation was [illegible] by Coroner P. J. Carroll. Later he announced no inquest would be held.

It was expected a joint funeral would be held probably Wednesday afternoon.

[illegible] of the victims, Mr. Williams and Mr. Yokom are local [illegible] dealers. Jackie Yokom was the only son in the family. Tommy Foxcroft, son of Mr. and Mrs. Foxcroft, is survived by his parents, three brothers and two sisters. His father [illegible] unemployed at present.

Brandon Rover Scouts Prevent Theatre Fire Panic

Prevention of a fire panic at a children's Christmas Eve entertainment at the Oak Theatre, Brandon, Man., was credited by Manager D. H. Roberts to four Rover Scouts whom he had invited to be present. When the fire alarm was given the Rovers [illegible] acted to quiet the children, kept them from crowding the aisles and marshalled them promptly and safely to the exits and out. "The theatre was cleared in a remarkably short time" stated Manager Roberts, "and what might easily have become a serious panic was completely avoided." The Rovers were Arthur Wilcox, Donald Thompson, Ted Spears and George Hillikon.

Canada 1938

"CANADA 1938" will open its third series of broadcasts when it takes the air Friday evening, February 4th, at ten o'clock E.S.T. The wholehearted approval and commendation accorded past programmes has prompted [illegible] to extend them [illegible] The decision means that Canada's outstanding [illegible] to provide [illegible] Canadian [illegible] national [illegible] to Canadians.

Of a half hour's duration, the broadcast will [illegible] Walter Bowles, roving [illegible] on his [illegible] the Atlantic [illegible] again [illegible] different [illegible] that [illegible]

Lionel [illegible] pondent [illegible] on [illegible] direct [illegible] be given [illegible] programme [illegible] choir [illegible] day's [illegible]

On the [illegible] February [illegible] speak from [illegible] Canada [illegible] great [illegible] achievements [illegible] hours.

CHEER SENT TO EDMONTONIANS IN SPAIN WAR

Packed into a crate sent to the government forces in Spain by members of the two Plus Two club in Edmonton, a first aid primer with the name of a young Edmonton lady written on the fly leaf has brought a reply from Tommy Lyons, former resident of this city but now fighting with the anti-Fascist forces in Spain. [illegible] has a dress as [illegible] 270 Plaza del Alamena, Albacete, Spain [illegible] with the Mackenzie-Papineau Battalion. In his letter, he tells of the deaths of Jack Bloom, [illegible], and Mike Kelly, all of whom left Edmonton to enlist on the side of the Spanish government and all of whom met death in battle.

The [illegible] Lyons is with is made [illegible] of Canadians and [illegible] appreciation [illegible] chewing gum, [illegible] heavy woolen [illegible] from Edmonton.

WHAT'S IT TO BE? AN EARLY SPRING?

[illegible] contemplating [illegible] weather future. [illegible] Groundhog [illegible] hallowed [illegible] six weeks more winter is in prospect, the legend says.

What is Life Insurance?

Answer.—It is Canada's greatest co-operative business.

Question.—Why?

Answer.—Because 3,500,000 Canadians are policyholders.

Q.—What is the total number of policies in force in Canada?

A.—Nearly 6,500,000.

Q.—Who are the policyholders?

A.—Hard-working, thrifty men and women who put aside their regular savings, their premium payments, from year to year, to protect those dependent upon them and to provide for their own old age.

Q.—How many policyholders are there in Alberta?

A.—Over 100,000—a policyholder in every other family.

Q.—And the total number of policies?

A.—Over 224,000.

Q.—What benefits do policyholders in Alberta receive from their Life Insurance?

A.—They have the protection of insurance amounting to more than $313,000,000—and, in one year alone (1936), policyholders and beneficiaries in Alberta received from Life Insurance savings over $8,600,000 in cash.

This is the first of a series of messages sponsored by Life Insurance Companies operating in Canada. The second, to appear in two weeks' time, will discuss Life Insurance premiums.

EGG CONSUMPTION FALLING OFF—

Editorial appearing in the January issue of "Canada Poultryman"

DO YOU KNOW the extent our domestic market for eggs has shrunk in the last ten years? We'll wager you don't, but if you do, we imagine you want to do something about it.

This month we present the cold facts . . . and they give cold comfort.

Our per capita consumption in Canada has dropped from 356 eggs in 1927 to 260 eggs in 1936—EXACTLY EIGHT DOZEN less eggs eaten by every man, woman and child in the Dominion!

The egg has been chased off the breakfast table by other food products prominently displayed in newspapers, magazines, billboards and window displays. And it has been chased off, not because of the superiority of the other products but because of the consistent advertising of these other food-stuffs and the almost complete silence the poultry industry maintains towards its own products.

We've got to put the egg back on the breakfast table, put it in the noon-day meal, the evening snack. We've got to popularize eggs all over again in restaurants, trains, work camps and holiday resorts.

In short we are faced with the task of raising consumption by one hundred eggs per person per year before we can talk of over production.

Can it be done? It IS being done with other food products!

Here's a parallel case. Two years ago the fish industry was languishing—fish wasn't selling. As a result of this our fishermen were being poorly paid for their labors, and all down the line lessened employment was causing hardship to Canadian workers.

The Dominion Dept. of Fisheries, Ottawa, stepped in and conducted an intelligent, forceful advertising campaign. Consumption commenced to rise, and it has risen 14 per cent to date. This year the Dept. knows it is good business to appropriate the sum of $100,000 again for a resumption of the campaign, and every daily newspaper, weekly newspaper, most magazines and some trade papers will be carrying the message to the consuming public that it is healthful to eat more fish. AND THE PUBLIC WILL EAT EVEN MORE FISH!

This is exactly what the poultry industry must have today. Cereal foods, fruit and vegetable juices, and other well advertised foods, many not even produced in Canada, have made such inroads into the sales of eggs that the time has come when we simply must TAKE ACTION. Low consumption creates weak markets which make for low prices, and continued low prices are putting the poultryman's business in the red right across the Dominion. District and provincial schemes while undoubtedly entered into with the best intentions are NOT going to solve this problem. It is national in character, as much the concern of the Maritimes as the Prairies, equally the problem of Ontario as of British Columbia.

Two courses only are open to us. The first is to let things go along as they are, with low prices forcing poultrymen to the wall through the disposal of their laying stock, to a point where the very small production put on the market can be merchandized without effort, but its very smallness making impossible the progress science has made available. The second course is to get down to tacks, realize just what we are up against and then go ahead and create a demand for our product to at least the extent of our markets of ten years ago. To do this there is positively no other effective way than a NATIONALLY PLANNED ADVERTISING CAMPAIGN.

The present per capita consumption of eggs is under 22 dozen per year. With only a 14 per cent increase—using the fishery industry's figures—the consumption would be raised to 25 dozen, or over eight hundred thousand extra cases in a year, which is over sixteen thousand EXTRA cases per week. Do you realize that to attain our status of ten years ago the above figures would have to be DOUBLED?

A report in the December 29th Dept. of Agriculture's "Egg and Poultry Market Review" goes into some detail of the strength of the Christmas demand for graded turkeys, following some direct advertising to the consumer in daily papers by the Department. Further down in this report is: "In contrast to the firmness of the poultry market, the egg situation at the moment is quite weak." By this admission it is obvious then, that if advertising poultry meat shows beneficial results, the same procedure will build up our egg markets.

At present we are a sick industry, a very sick industry, due, not to overproduction but to weak, out-of-date merchandizing methods. Our product is as good, if not better, than it was ten years ago. Egg inspection is carried on as rigorously now as then. The poultry industry is worth, at present, OVER ONE HUNDRED MILLION DOLLARS PER YEAR to Canada. It is the sole means of livelihood for thousands producing eggs and thousands more engaged in their distribution. For tens of thousands of farmers the egg money pays the grocery bills, buys the children's clothes, goes a long way to help keep the people on the farms.

Organization of these tens of thousands who contribute to the egg market is not possible and yet, if the public is not made egg-conscious, and quickly our industry is going to remain sick and hundreds who have invested their all in it are going to be on relief, or close to it.

We believe, as in the case of the fishery industry, help must be forthcoming from the Dept. of Agriculture. In the past this department has carried out a costly program for increasing production by better breeding and management. Times change and today, while good breeding is as important as ever, it is not the major problem confronting the poultry raiser. His problem right now is to meet the intense competition of other foodstuffs and this cannot be done in any other way than by forceful, consistent advertising. By appropriating a fund of, say, one hundred thousand dollars for the purpose, no precedent will be created. Lamb has been advertised, fish is being advertised and dressed poultry was advertised last Christmas by government departments. Unless such a step is taken it will be useless for the government to continue their work of promoting production. We have production, we need consumption!

If a hundred million dollar industry is not worth one hundred thousand dollars being spent on it for its salvation—one tenth of one per cent of its value to the country—then what in the name of commonsense is worth saving?

Farewell To Dobbin

Musical but outmoded, the clop-clop of iron hoofs is but a dying echo in the crossroads of modern Canadian transportation, drowned in the ever-rising rumble of the motor truck. This fact was alluded to recently by R. S. McLaughlin, president, General Motors of Canada Limited, during his review of the automotive industry at the close of the 1937 season. There were today, he pointed out, three [illegible] as many trucks on the streets and highways of Canada as there were passenger cars when the war began in the heyday of the horse [illegible] the end of [illegible] passenger cars [illegible] only fourfold, compared [illegible] have increased eight[illegible] year the Dominion's [illegible] has been decreasing [illegible]

The Menace of The Skid

[illegible] an unexpected wave [illegible] "freeze on [illegible] skid can become [illegible] driver. But [illegible] how to [illegible] the two common types of skid, and more particularly, how to avoid them. The slippery pavement skid can be prevented [illegible] and by the [illegible] gear as a brake. The brake skid, when caused by unequalized or poorly adjusted [illegible] brakes, has only one cure—adjustment by a [illegible] Its symptoms [illegible] even on dry pavement [illegible] the steering-wheel when the brake is applied even gently. Badly-adjusted brakes can be almost as dangerous on wet pavement [illegible] brakes at all.

Western Industry Stimulated

[illegible] Western Canada already are [illegible] increased activity and larger [illegible] Western production well [illegible] program [illegible] at the Western [illegible] industry from Winnipeg to the Pacific Coast.

Save Battery Power

With the sharp increase in battery drain during the Winter months, [illegible] electrical energy [illegible] A twice-monthly check of the battery for fluid and charge is also [illegible] to have [illegible] the generator charging [illegible] battery drainage. If, however, [illegible] Winter generator adjustment is [illegible] necessary, [illegible] with [illegible] voltage control.

BORROWING AT THE BANK to "Cream" Dairy Profits

Producers and distributors of dairy products may skim deeper, richer "cream of profits" from their business by borrowing, at suitable times. The purchase of a few more good milk cows, the buying of better equipment, providing modern storage for cheese, butter and other dairy products—for example—may mean *increased profits.*

You, who believe you can increase your profits by borrowing on security of your dairy products, are cordially invited to consult with our local branch manager regarding loans.

MODERN, EXPERIENCED BANKING SERVICE . . . . *the Outcome of 120 Years' Successful Operation*

Tofield Branch: A. E. ALLAN, Manager

KETCHAMOOT

Mr. Frank Hull sr., is visiting at the home of his nephew and wife, Mr. and Mrs L. Carlisle in Tofield.

Mr A. Harrison was able to return home Sunday evening from an Edmonton hospital.

Misses [illegible] Street, Marie Lawson, Margaret M[illegible] and Edith Davison, Charley Sears and Lyle Coumbes are attending the short course agricultural [illegible] in Ryley.

The Ralph Barnes family had the phone installed in their [illegible] last week. Little Harold is recovering very slowly.

Mr and Mrs J[illegible] entertained a number of friends and relatives at their home Wednesday evening in honor of their daughter Lillian's birthday anniversary.

M[illegible] J. H[illegible] and Chester Co[illegible] Monday.

M[illegible] Mr and Mrs [illegible] Mr and Mrs. [illegible] Misses [illegible] and Albert Sears [illegible] surprised Mr. and Mrs. [illegible] in the [illegible] Wednesday evening of last week.

Friends of the Winter family of [illegible] were sorry to hear of the death of their [illegible] and brother on Tuesday [illegible] pneumonia.

Mrs. [illegible] and brother Mr Fred [illegible] to Edmonton [illegible] a few days with friends.

L.C.C. NEWS

The meeting of January 26th, was held at the home of Mrs. J. Bailey. Thirteen members and one guest were present. The Roll Call was answered by Scotch jokes and some very "Scotch ones" were given. Anyway they [illegible] a lot of laughter.

The usual whist drive given free for the [illegible] folk was all set for January 28th, but Jack Frost being so very stern it was postponed. We expect the day will be re-set later.

Mrs. Bailey served a very nice lunch aided by her daughter Joyce and Mrs. Glenn.

The next meeting Ladies, will be at the home of Mrs. F. Kortzman, on February 24th, Mrs. W. L. Gill assisting hostess. Visitors welcome.

Real Estate Prices Show Improvement

TORONTO, Feb. 1—Real estate prices and demand are showing definite evidence of improvements it was stated at the annual general meeting of the Canada Permanent Mortgage Corporation held here. The general business condition was described as "distinctly reassuring" the economic position and prospects of Canada's west were outlined in detail.

The year just past, said President F. Gordon Osler, has shown an increase in mortgage investments, with the Corporation's loaning activities during 1937 greater than for several years past. This he coupled with the statement that "we have had very definite indications of an improvement in prices and an increasing demand for properties."

Dictators Bluffing

"Europe is full of war talk, and the various countries are arming at a furious rate, but many of us believe that the dictators are merely putting up a front and are trying to bluff their way through by scaring their neighbors. They are building themselves big boats and guns to fight with but they have no money to buy ammunition for a protracted war [illegible] whats the use of starting [illegible]," commented Gustav H ff Stegmunfeldt, former Edmonton resident, [illegible] representing the Danish Sugar Beet Company of Denmark. Mr. Stegmunfeldt's headquarters are now Copenhagen, but he was a resident of Edmonton from 1927 to 1934 during which time he made a soil survey of Alberta.

The Danish company supplies more than [illegible] per cent of the world's sugar beet seed and it is in connection with this work that Mr. Stegmunfeldt makes an annual trip to Canada.

[illegible] he spent some time in Russia studying agricultural conditions at the request of the Russian government and since leaving Edmonton [illegible] has [illegible] surveys in Germany and nearly all other European countries and in the Holy Land which is forging ahead rapidly agriculturally.

On his present trip to the American [illegible] he spent several days [illegible] Lake City addressing a convention of [illegible] experts from all over the United States and is scheduled to speak at Oxford university in England next March. He left Edmonton for Winnipeg on Monday night.

On his trip to Edmonton from Calgary, Mr. Stegmunfeldt had a "pleasant chat" with Premier William Aberhart. "Mr. Aberhart was very interested in our farmers' corporation, which is very much like your co-operative wheat pool; and I explained to him that it could be worked here if you people have only a little patience. You know, here in Canada you all want things done in such a hurry," he smiled.

"Our farmers' corporation is the back-bone of the average farmer and has been built up since 1866, when we lost a large piece of land to Germany. A handful of nationally-minded men saw that what had been lost to Germany, must be regained within the confines of our country as it stood; and it was through this belief that Denmark started to build up a reputation in the field of dairy farming which has world-wide distinction today," the expert explained.

About 30 per cent of the world's production of butter comes from Denmark; 60 per cent of the bacon used and 30 per cent of the eggs.

City people also got behind the corporation movement and united to further the cause of Denmark.

"There is now a division which takes care of the market for butter, one for eggs, another for bacon, etc., and these boards see that the farmers receive a fair price for their produce" said Mr. Steigmunfeldt.

For all research done by the corporation the government pays half the expenses and the organization is supervised by the government although the people actually control it.

"Canada is very much like all the other countries. Times are bad all over and Canada doesn't seem any better [illegible] than the others," he said commenting on Canadian conditions.

Lost 12 Hours Sick Boy Gets Home On Skis

WEST VANCOUVER, B.C. Feb. 1—Exhausted almost to the point of collapse, 11-year-old Jose Slocombe reached the home of Mrs. C. B. Dill here Monday after struggling down creek beds from Hollyburn mountain for 12 hours Sunday night.

Slocombe was skiing on Hollyburn mountain Sunday and decided to return home when he felt ill. Unfamiliar with the west flank of the mountain he lost his way and began to work his way down tortuous Cypress creek to Burrard inlet.

Notified the youth was lost police called out 14 hikers and organized a search party. The party was disbanded early Monday morning and two West Vancouver police constables started up the mountain from its base. They missed Slocombe but the lad managed to reach Mrs. Dill's home without help.

Ashmont Has $10,400 Fire: One Man Hurt

ST. PAUL, Alta. Feb. 1—Fire which swept the village of Ashmont located near St. Paul and 120 miles northeast of Edmonton, caused damage to the extent of $10,400 Monday. Four buildings were razed, one man received severe but not critical burns and his family was homeless as a result of the blaze which originated in a small restaurant, when a gasoline lamp exploded.

Fire losses were:

Clarence Hayes' cafe $900.
Clarence Hayes' butcher shop, $500.
William Pearson's store, $4,000.
William Pearson's warehouse $1000

The fire raged for four hours while firemen from St. Paul fought the flames in 20-below-zero weather. Only a brisk wind from the east which blew the fire away from other buildings prevented destruction of the whole village. Population of Ashmont is 150 and it is situated in a mixed farming district near St. Paul.

Ryley Farm School Has 150 Students

Rural districts within a radius of 40 miles and tributary to some 12 town and village centres in the Bawlf-Vegreville-Viking area, having contributed approximately 150 students at the short-course agricultural school being held at Ryley under the dominion youth training school which is understood to be the largest of the kind in the province, will close Friday.

Royal bank building, a few vacant residences and a gymnasium studio are being used as dormitories and a number of homes in the village have provided additional accommodation for the students with the Lutheran church hall as dining room. Provisions for the dining service are supplied from the student's homes.

The teaching staff comprises W. S. Morrison and W. Wallace in farm mechanics, field husbandry, poultry and horticulture; Miss J. Irwin, home management, health and handicraft, Major F. H. Norbury, art and designing; Miss R. Mechinski, nutrition and food values. Lectures and demonstrations are given in all subjects on the [illegible]

Worthy Settlers Said Canada Need

MONTREAL, Feb. 1— Prosperity and unity would be obtained more readily in Canada if the population were increased by worthy settlers, Senator J. B. Farris, Vancouver, told the Canadian club here Monday.

Canada had incurred heavy debts in developing the country, he said, and needed more citizens to share liquidation of the debt and more people to develop still further the country.

Speaking of national security, the senator reminded his audience Canada, with an area as large as Europe, had a population of only 11,000,000. "We realize what is going on at the other side of the Pacific and similar conditions in Europe. All those over-crowded countries must look at Canada with envious eyes.

"I predict that if we do not take proper stock of our national security and of our national development there may come a time when others will conceive the idea they will do our settling for us."

Miss Gwen Firth from Edmonton spent the week end at her home here.

FOR SALE—International Light Delivery truck in good condition, a I.H.C. Cultivator, a 12 inch and a 14 inch John Deere Gang Plow, and a few other snaps in second hand goods. Apply M. C. Hammond, Tofield.

Social Creditors Tory Allies Says Mackenzie King

OTTAWA, Feb. 1—The Conservative party would turn Canada into a water-tight compartment so that economic experiments might be conducted "between the Conservatives and their new allies the Social Creditors," Prime Minister Mackenzie King charged in the House of Commons last night.

The prime minister was replying to charges by Conservative Leader Bennett that the government was maintaining a policy of inaction whereas it should be attempting experiments to better economic conditions, perhaps along monetary lines.

The two leaders led off the address debate Monday and will be followed today by John Blackmore, leader of the Social Creditors. The debate may continue a week or longer.

The Conservative leader made the charge electoral corruption was rampant in Canada and that levies were being made against government contractors, including Canadian National Railways contracts. He offered to give particulars to a house committee.

As a climax to his speech, Mr. Bennett moved an amendment to the address in reply to the speech from the throne, criticizing the government for taking no steps against unfavorable [illegible] conditions or proposing "To deal effectively with the prevailing uncertainty and insecurity resulting from the inadequate incomes of large numbers of our people."

Conditions in Canada were infinitely better than a year ago or two or three years ago, the prime minister replied. Employment records were better. Trade was better. There was more security for the people.

Touching on the personnel and duties of the Rowell commission on Dominion-provincial relations, Mr. King said it would not draft changes in the constitution. It was merely a fact-gathering commission, and even in the short time it had been in operation the people of the East understood better the problems of the West and vice versa.

"The commission is not to change the constitution but to gather facts," the prime minister emphasized. Parliament and the provincial legislatures would look after constitutional changes after the revelant facts had been gathered, the government was not even obligated to accept its findings.

The prime minister touched briefly on power export. He said the government advised President Norris of the Montreal Light, Heat and Power Consolidated on August 14, 1937, there could be no licenses granted until parliament had passed on this major policy. The same reply was given Premier Hepburn of Ontario on Nov. 29 when he sought permission for the Ontario Hydro Commission to export 90,000 horsepower.

The government's power policy, the prime minister stated, was summed up in these words: "As the executive we are the servants of parliament, not its masters."

The government would welcome any suggestion that could be offered to make electoral corruption impossible in Canada, Mr. King said. But, at the same time, he suggested Mr. Bennett was one of the last men who should lecture on promises to the electorate, considering his 1930 record.

The dominion, Mr. Bennett said, was shrinking and evading its responsibilities under the constitution. It was shirking its responsibility regarding Alberta referring legislation to the courts.

As a guiding principle, Mr Bennett suggested the Dominion rule "any provincial legislation that denies the right of any person to go to the courts will be disallowed."

The Conservative leader's corruption charges may lead to a parliamentary investigation, the Conservative leader agreeing to "thresh it out" before a committee giving details and facts. The contractor's levies even extended to the Canadian National Railways, he said:

Never in Canada's history had electoral corruption been so rampant, Mr. Bennett said. "It is not a case of $5000 or $10,000 in a constituency but has to do with large sums of money for corrupt purposes."

"I am not unmindful of the fact that contributions to political parties are not censurable in any sense," he added. "I know of men who make contributions to political parties as they do to their churches. But a levy is an entirely different thing. When an organizer goes to a contractor and says that he wants one or 10 per cent, that is a levy and not a contribution. What is more, I say it threatens the very life of this state."

OBITUARY

MRS. ROY LONGSON

Mrs. Annabelle Longson, beloved wife of Mr. Roy Longson of the Halcourt district, passed away following a brief illness early Monday.

Miss Annabelle Kellner was born at Tofield, Alta., on May 7, 1906, the eldest of two daughters of Mr. Alex Kellner and the late Mrs. Alex Kellner. Her sister, Miss Jean Kellner is a member of the nursing staff at the Municipal hospital.

Married on December 18, 1925 to Mr. Roy Longson at Tofield, Mrs. Longson came to Halcourt where in the intervening years she endeared herself in an ever widening circle of neighbors and close friends. An active member of the United church she gave generously of her time to its many activities. She was also a valued member of the community's women's organizations by which she will be sadly missed.

Surviving to mourn her loss are the sorrowing husband, five young children, Dorothy Jean (11), Marguerite (9), Kenneth (7), Donald (5), John (3), her father Mr. Kellner at Beaver Lodge and sister Jean at Grande Prairie.

Funeral services were conducted by the Rev. Geo. A. Shields from the Halcourt church on Wednesday afternoon at 2:30.

CONFIDENCE

Confidence has nothing to do with age or size. A small industry may have it and it's patrons swear by all it sells. A great industry may lose it—and be great no longer. The Alberta Brewing Industry prize your confidence above all else. They hold firmly to the fundamental principles that safeguard public interest by selecting only the choicest ingredients for ALBERTA BEERS.

Councillors and School Trustees Elected By Acclamation

Nominations for town councillors and school trustees was held in the Town Hall on Monday February 7th. The retiring councillors were Dr. F. F. Law, M. C. Hammond and G. A. Coutts, whose resignation was received some few weeks ago. Dr. Law and Mr. Hammond were nominated again while Mr. T. W. Taylor was nominated to fill the vacancy caused by the removal of Mr. Coutts.

The retiring school trustees were J. W. Robinson, A. J. Harrison and A. J H. McCauley. Mr. McCauley declined to accept a nomination and his office is filled by Mr. S. J. Burke, while Mr. Robinson and Mr. Harrison were re-nominated.

All councillors and trustees are elected by acclamation.

LAKESHORE

Mr. A. N. Booth was taken to an Edmonton Hospital one day this week.

Shirley Phillips has been quite ill with pneumonia but is a good deal better now.

Mr. Lester Noland was confined to his bed with the flu, but is up and around again now.

One of the Ferguson boys is ill with the mumps.

News is very scarce this week, due, no doubt, to the very cold weather.

Hundreds of Northern Indians Suffering

With 40-below zero weather contributing to their misery, several hundred gaunt Indians were eking out an existence under starvation conditions in the Fort Simpson and Nahanni areas, Pilot Archie McMullen, Mackenzie Air Service reported after his arrival in Edmonton from the Arctic Wednesday.

Hunger which beset scattered tribes with failure of buffalo and caribou migrations into the Nahanni this year has continued to stalk lonely trap lines, trapping of beaver is forbidden at present and wolves are prowling the forests to drive out food game.

One family of seven near Simpson is living on one fish a day while many others in the area are in similar straits," Pilot McMullen said.

General opinion of the white residents of the stricken districts was that opening of the beaver season, ordinarily closed until mid-March, and raising of the present restrictive limit (15 pelts per trapper) would help to relieve acute distress, the airman said.

"Some supplies have been given to hungry families through the Indian department, but this does not offer a solution. Raising of the present five-dollar bounty on wolves would be of some assistance, according to residents of the area." McMullen reported.

In desperation many hunters have abandon the woods to camp on the ice of lakes, fishing through holes in the ice with nets and hooks. But by an unfortunate coincidence there is a shortage of fish also this year. Some Indians have 80-foot lines which they lower beneath the ice to catch trout. But these have to be baited with smaller fish, the flier explained.

Unless measures are taken to relieve the present situation, "there will be a serious famine before spring," northern authorities said.

BEHIND THE BOG

By A.B.C.

About Bonspeil time we expect to see something running across the ice without legs—Water no doubt.

0-0-0-0

Some curlers are prejudiced, we wouldn't get off so many wisecracks if we preserved a no-pun mind.

0-0-0-0

We present for your approval, A Frenchman's version of a Bonspeil.

0-0-0-0

THE BONSPIEL

De noder day a frien' ob mine
He says "Bateese" to me,
"W'y don' you go upon de rink
For see Bonspiel?" says he.
"Dere's plaintee chair for sit upon
De place she's nice and warm—"
And so a' las' I t'ink I go
She can't do me no harm.

Vell, dat is de mos' foolish game
I never yet did see,
For all de men was yell so loud
I t'ink dey go crazee.
Dey have a stone lak beig spetoon
An' shove it wid der han'
But w'y dey get so mooche excite
I cannot onderstand.

De man down at de noder en'
Is put hees broom down—so
An' den he yell-"Now tak dat ice-"
Dat's fooleesh ting you know.
He cannot take de ice away
She's frozen down so hard,
But still he yell—"You tak her out,
I do not want de gard."

An' see dem feller sweep de broom,
For w'y I cannot tell
Dere is no dirt upon de ice
And den some feller yell—
"Yes; hold her up"—say w'at he mean?
Madam's not dôe at all
And marm'selle in de gallerie
I do not see her fall?

All sorts of fellers play dat game
Dere's some dat's t'in and long,
An some dat's mabee short and stout
And some dat's purty strong.
But w'en dey yell de stout mans wide"
An' man dat's long and tall—
He's narrow sure," I do not t'ink
I stand for dat at all.

I wonder w'at dat name she mean?
Wall, "Bon" in French she's "good"
An' "Spiel" in Scotch for de big talk
Dat's w'at I understood.
I s'pose on's sort of half-breed name
I spik de way I feel—
I watch dat game for two, t'ree nights,
I t'ink she's mostly "Spiel."

An Oui Nus.

After our remarks last week the Girls' Rink curled the next game in 1 hour, 46¾ Minutes flat.

0-0-0-0

Don't think when you have troubles,
That your opponent goes scot free,
Because he shows a smiling front,
And battles cheerfully.
No man! He, too, has troubles,
But herein the difference lies,
While you go moping down the ice,
The other fellow tries.
Tis' hope and cheery courage,
That incite one to retrieve
One's past mistakes, to start afresh,
To dare and to achieve.

This Week's Brain Wave: For curlers this weather is like a Model T Ford Spring. It gives one a pain in the seat of the pants.

Making Friends

The happiest business in the world
Is that of making friends,
And no "investment" on "the street"
Pays larger dividends.
For life is more than stocks or bonds,
And love, than rate per cent,
And he who gives in friendship's name
Shall reap as he has spent.
Life is the greatest investment,
And no man lives in vain
Who guards a hundred friendships
As a miser guards his gain.

—Anon.

LOCAL & PERSONAL

The W. A. are holding a Bridge and Whist drive at the Institute Rooms on Thursday, February 17th. Come and win a fowl for your Sunday dinner. Price 25c.

••••••••

Messrs. W. Seale and Melvin Bethell spent the week end in Edmonton.

••••••••

Miss Aileen Allan left this week for Barrhead where she will spend a couple of weeks.

••••••••

Mr G. McSporran spent the week end in Edmonton.

••••••••

Mr. Lleif Swinton of Fairview spent a few days with his parents, Mr and Mrs. Swinton here.

••••••••

Norman Glover, who is taking a course in barbering in Edmonton spent the week end at his home.

••••••••

Mr. Joe Lachstand, who has been running the barber shop left on Saturday and Mr. Stone from Edmonton is taking his place.

••••••••

Mr Kimmett of Edmonton is working at Tofield as a member of the Northwestern Utilities staff.

••••••••

Mr. C. R. Currie, manager of the local creamery, is attending the dairymen's convention held in Edmonton this week.

••••••••

Miss Marguerite Stevenson left recently for Clive, Alta.

••••••••

Mrs. Schmaltz is visiting friends and relatives at Delbourne, Alberta.

••••••••

Miss Marjory Stewart spent the week end at her home in Edmonton.

••••••••

Mr. Arthur Beirnes returned on Monday evening from Trail, B.C. We understand that the store where Arthur has been employed is closed for a month, and Arthur will be returning to Trail in a month's time to resume work.

••••••••

Mrs. Cadger of Holden spent a day visiting with Mrs. Thomas this week.

••••••••

A number of curlers from Tofield visited Edmonton on Wednesday to see the Scotch curlers in action. Among those who went were: Miss Muriel Malcolm, Wes. Taylor, Mr Bratney.

••••••••

Miss Olwen Hoover of Hastings Lake is a guest at the J. E. Stinson home for a few days.

••••••••

On Wednesday afternoon last, the softball team held a miscellaneous shower in honor of Mrs. Eric Edwards at the home of Mrs. O. P. Thomas. A large basket, decorated in pink and white, piled high with gifts was presented to the bride. A lovely lunch was served by the girls.

AMISK CREEK

Those who attended the Agricultural Short Course in Ryley from here were: Edna and Marvin Moen, Evelyn and Glen Hillerud, and Lloyd Berg.

The Ladies' Aid Meeting was held at the home of Mrs. A. Patterson on Tuesday, February 1st. In spite of the cold weather a good number of members and visitors were present.

Mr. R. O. Berg visited the city with Mrs. Berg and his two daughters the last week end of January. Mrs. Berg is now out of the hospital and will soon be returning home.

There was no service or Young People's meeting last Sunday on account of the cold weather.

Mrs. Bjornstad, who was assisting with the work at the R. Olson place, received a telegram to meet her husband in Edmonton last week. Mr. Bjornstad came from Goldfields for a short stay. Mrs. Bjornstad returned last Sunday.

Hilmer Moen from Phillips spent the last week end of January with his parents here.

Arthur Patterson left for the Coast a couple of weeks ago.

Mr. A. Erickson attended the last Old Timer's doings in Edmonton.

There was an error in the last correspondence. It read Mrs. E. A. Moen was the secretary for the Amisk Creek School. This is not correct, Mrs. Moen was the retiring secretary and Mr. C. Ward is the secretary for this term.

COMMUNICATION

CO-OPERATION

Dear Sir,

On February 7th, in the Catholic Church Manse, a non-partisan meeting was held with quite a number in attendance, to discuss the possibilities of organizing a Credit Union in Tofield. Let me say here, it is the Credit Unions that are playing such an important role in the Co-operative field of endeavour. Sweden, Denmark and England, being the most prominent.

A Credit Union is a union of it's members for the purpose of making it possible for them to take care of their own short term credit problems. It is definitely not an investment union. Co-operation is not interested primarily in money, it is interested in men and women, in saving men and women. Another meeting on February 20th at 8 p.m. Everybody welcome.

Yours,
GEO EDWARDS

Tofield, Alberta.
Feb. 8th, 1938

Dear Editor

As we look at the Auditor's Account of the Municipal District of Cornhill and compare it with the reports of the last few years we are struck with the unwarranted increase in the rate of taxation for general purposes. Nearly doubled in the last four years without intelligent cause or justifiable results. Of course we have the big grader and tractor but the comparative inventories show but a small increase in the value of the equipment as compared with the years before the majority of the council got big-outfititis.

Last year at the annual meeting we were told that the big grader would pay for itself in the saving of work, but whose work except that of the taxpayer, who cannot now pay his taxes and who is not allowed to work part of them out. It is a crime and a scandal that in these hard times the ratepayer should be compelled to pay such exorbitant and unnecessary taxes and in cash only. And is the end yet? At the last annual meeting, though we listened for about two hours to the excuses of the council for their policy by the deputy reeve, no mention was made of a provisional order for over $7,000 worth of new machinery to be delivered this year. Was it a case of "the less said the better?" And if so, better for whom?

If we were getting roads it would be a horse of a different color, but we got seventeen miles of road; if used in this district alone at that rate, it would take over one hundred and twenty years to complete them and then we would be ready to go over them again, if the outfit still hung together, whether they needed it or not.

It's time to call a halt and that time is at the annual meeting. Demand that the incoming council cease this tomfoolery and reduce the taxes to a par if possible, with the value of production. Insist that the remaining members tell us what they plan to do for the ensuing year.

Yours very truly
GEO G ABERNETHY

BARDO

At the annual meeting of the Bardo Male Chorus, officers elected were: President, I. Moen; Vice-President, A. Kindley; Secretary, Leif Foshaug; Treasurer, J. Ness; Director, A. Anderson; Music Committee, B. Bjornson, B. Anderson and E. Steen. Librarians, A. Kindley and G. Foshaug; Marshall, B. Bjornson; Janitor, Art Moen.

Annual meetings of the Bardo and Grand Forks S.D. were held last week. Bardo officers are: Chairman, M. Finseth; Trustees, Mrs. Loolah Lerbekmo and I. Moen; Sec.-Treas. M. Hagen.

Grand Forks officers are: Chairman, E. Maurer; Trustees J. Ness and C. M. Rude; Sec.-Treas. M. Eide.

Mr. A. Moen of New Westminster, B.C. is here on business and visiting with his sons.

Mrs. Selma Olsenberg was taken to an Edmonton hospital on Saturday to undergo an operation. We all hope for a speedy recovery.

Edmonton visitors last week were: Geo. Hendrickson, Geo. Foshaug, Milton Jevning, Art Moen, I. Moen and A. Moen.

Mr. and Mrs. John Ness returned home from the city on Saturday where they have lived the last three months.

The school children at Bardo had a holiday on Monday when repairs had to be made to the furnace.

The hockey boys and Geo. Hendrickson battled snow drifts for four hours last Thursday night on their way to Camrose to play the Commercials, but had to turn back tired and disappointed. No hockey games were played last week owing to the cold weather.

Mourad Finseth had the misfortune to lose a young horse last week.

The Bardo Community extend their sympathy to the P. Lee family in their recent bereavement.

Toronto, Feb. 9—Only one thing prevented Mrs. Mary Atkinson from dancing the Highland Fling on her 102nd birthday which she celebrated Tuesday. That was an injury she received while she was doing the dance a year ago.

ANY DAY A FISH DAY

The Ultimate Democracy

1. Next to the free public schools the consumer's co-operative movement is the greatest social invention of modern times. It is of the people, by the people, and for the people.

2. The co-operative movement serves every type of human need, both economic and cultural.

3. The co-operative movement thrives in every country where freedom is not entirely destroyed.

4. The co-operative movement removes the causes of war and of internal strife between classes.

5. In a world disheartened by unemployment and torn by war, the co-operative movement offers a peaceful pathway toward a better civilization.

6. As United States Supreme Court Justice Louis D. Brandeis points out in "Other People's Money" the co-operative movement overcomes corporation privilege, domination, monopoly, and excessive concentration of wealth by establishing a motive higher than greed and by performing a superior service.

7. [illegible] development of the co-operative movement conditions in the English-speaking North America are [illegible] favorable [illegible] abundant [illegible] democratic tradition, a high level of general education, and a great area free from tariff barriers.

8. When studied and practiced in the school, the co-operative movement gives young people a new life and a sense of responsibility for their own destiny.

9. The co-operative movement is the most [illegible] form of education for both children and adults; people learn by doing, they develop faith in themselves and [illegible] their [illegible]

10. When fostered by the church—as Kagawa has pointed out—the co-operative movement is an instrument of self-help [illegible] the impoverished and the desperate.

11. The co-operative movement is the practical application of the golden rule; it is the ultimate democracy.

—Journal of the National Education Association

Special Holiday Fares Offered To Coast

Winnipeg, Feb. 7—To assist those whose annual holidays cover just two weeks of the summer months, the Canadian National Railways will offer special low fortnightly vacation fares to Vancouver and Victoria this coming summer from Port Arthur and Armstrong in Ontario and west [illegible] Manitoba, Saskatchewan and Alberta.

In making this announcement, the Canadian National recognizes the [illegible] and for holiday fares of this [illegible] will offer this special fortnightly fare [illegible]

[illegible] dates of sale will be set for [illegible] 10, 11, 12; June 21, 22, 23; July [illegible]; July 22, 23, 24 and August 12, 13 and 14 [illegible] of 16 days. These special fare tickets will be [illegible] all classes of accommodation.

[illegible]

[illegible] general health, the child may fail to grow normally, and he may be underweight, pale, listless [illegible]

The [illegible] and adenoids [illegible] enlarged [illegible] diseased [illegible] removed should be made by the doctor who examines the child and studies [illegible] history. There is no doubt that diseased tonsils should be removed, and this before they have done any harm.

There are few things which are more beneficial to a child's health [illegible] the removal of tonsils and adenoids when they [illegible] indicated. Not only does this procedure correct many cases of mouth-breathing, discharging ears, deafness, sore throats and coughs, but it is a real preventive measure for rheumatic fever if the removal is carried out before the first attack. This last also means the prevention of heart disease which commonly follows rheumatic fever.

Questions concerning Health, addressed to the Canadian Medical Association, 184 College Street, Toronto, will be answered personally by letter.

Expect M.L.A. And S.C. 'Expert' Will Start Sentences Tuesday

Five Alberta appeal court judges Monday unanimously dismissed appeals by George Frederick Powell, British Social Credit "expert" and Joseph H. Unwin, Social Credit party whip and M.L.A. for Edson, from supreme court convictions and sentences for defamatory libel "well knowing same to be false."

Both Mr. Unwin and Mr. Powell indicated they would begin serving three and six months terms respectively in Fort Saskatchewan jail Tuesday. Warrants for committal of the accused probably will be issued by the sheriff's office late Monday following filing of formal orders of judgement by George H. Steer, K.C. counsel for the complainant in the "Bankers' Toadies" case.

Because both decisions were unanimous, neither Mr. Powell nor Mr. Unwin can appeal to the supreme court of Canada unless their respective counsel can convince a judge of the highest tribunal in the dominion the Alberta appeal court judgements "conflicts with the judgement of any other court of appeal in a like case."

Well informed barristers, after reading the judgements, said "there is no possibility" of counsel for the appellants finding an appeal case in either Canadian or English courts that would permit further appeal. There is no record of an appeal case in which the facts corresponded exactly to the famous "Bankers Toadies" case, it was stated.

If one or more of the five judges had dissented in one of the appeals, it could have bee carried to the supreme court of Canada.

Mr. Unwin said Monday that he expects to commence serving his term at Fort Saskatchewan on Tuesday afternoon.

"I have seen my lawyer and have been advised that the sheriff is willing to let me have until Tuesday to arrange my affairs."

Asked to comment upon the appeal court judgement, Mr. Unwin said, "I am an ex-service man and served at the front for the first division Canadian Corps and I can take it."

Mr. Unwin called at the legislative buildings to collect his mail and was greeted by a number of the members including W. Tomyn, M.L.A. for Whitford and David Lush, M.L.A. Empress.

Asked about an appeal, he said his understanding was there would be no opportunity for such action.

Seen at mid-day Mr. Powell said he had no statement to make but was conferring with his solicitor. It was understood however, that no action would be taken by him.

Premier Aberhart maintained silence Monday upon hearing of the court decision in the Powell and Unwin defamatory libel appeal cases.

"I have no comment to make," said the premier.

Asked concerning the fresh rumor of sharp differences between the cabinet and the Social Credit board, the premier replied:

"There is [illegible] that report which I have denied already on several occasions."

Mr. Steer, who acted as [illegible] prosecutor in the Powell-Unwin trial and [illegible] the appeal hearings, said he had no comment to make on the judgement.

Britain Warns Rebels 'Patience Is Exhausted' Reprisals Are Planned

London, Feb. 7—Foreign Secretary Eden told a cheering house of commons Monday Britain has informed the Spanish insurgent government that its "patience is exhausted," and that British warships will take reprisals without notice should another British vessel be attacked in the Mediterranean.

The government has reached the conclusion the time has come "to make it known once and for all that they cannot deal with these attacks solely by protest and claims for compensation," the foreign secretary declared.

Mr. Eden did not disclose the new "anti-piracy" measures in detail but said British warships would attack any submerged submarine in the western Mediterranean and "retaliate" against any further Spanish insurgent aeroplane assaults on British ships.

He added the U.S., Germany, and Portugal, in addition to the 10 powers subscribing to the Nyon "anti-piracy" accord of last September had been informed of measures taken to strengthen the Nyon patrol since last week's sinkings of the British freighters Endymion and Alcira.

Meanwhile, under conditions of wartime secrecy, a powerful Anglo-French destroyer fleet operates off the Balearic Islands, Spanish insurgent submarine and aeroplane base. The Sunday Times (Independent) stated the effect of the patrol would be to prevent submarines from entering or leaving the islands.

Frosty Rail Bad For Coyote's Tongue

Sturgis, Sask., Feb. 7—There's one coyote somewhere in the Sturgis district who, from experience, will not try to lick the moisture off the Canadian National Railways rails again!

Recently when Ed. Therrien, Tony Evaniew, and John Michalchuk were riding into Sturgis on their jigger, they saw the coyote, his tongue held fast to the rail. Coming closer they saw the coyote jerk and tug to get free.

A few feet away in the ditch stood two other coyotes, helpless in their companion's predicament. As the men neared the coyote it tugged from a double fear and leaving part of its tongue on the rail it freed itself and vanished with the other two into the bush nearby.

Chiang Kai-Shek Heads New National Chinese Boy Scout Association

Completion of organization and formal recognition of the General Association of the Boy Scouts of China is announced in the January issue of "Jamboree" the official world publication of Scouting. The association's President is Generalissimo Chiang Kai-Shek and the total membership is given as 210,832. Separate Scout organizations have existed for some years in different parts of China. The new organization is national. Scouting in China has been given a new impetus by the splendid and courageous first aid and relief service rendered by Chinese Boy Scouts in the sections of their country invaded by the Japanese.

FOUR LONE DRIFTERS—

A RATHER peculiar phase of human nature bobs up right now on the front pages of the world's daily newspapers. Amid counter attractions of greater public interest, involving wars and rumors of wars, the interest in the four Russian scientists who were left at the north pole with the idea of staying there for some long time, is very great. Armies clash, ships are sunk, epochal conferences are held, yet almost daily one reads of the "drifting" of these four men. And drifting they are. Since last May they have drifted approximately 1000 miles southward, and are now in peril of losing their lives due to their particular section of ice being crushed between larger and heavier sections. Amid all the human turmoil of temperate world zones, involving millions and millions of people, these four men seeking information about weather, isolated from civilization and alone under the stars, have made front page news.

To those people raised in tropical or even temperate zones, there may be an element of vagueness about the whole thing. They can of course, refer to a map and visualize the vast distances and imagine the loneliness; by means of pictorial reproduction they can obtain a fair idea of what "scenery" the Russians have around them; they can even go to their zoos and see living polar bears and seals. But what they cannot do is to feel the sting of a below zero wind on the face; hear the crunch-crunch-creak-creak of below zero snow as one walks; or, what perhaps is more important, stand outside at night when it is very cold and look to the horizon across bare and glistening expanses of snow. Then the stars seem very near even if devoid of warmth, a cold sterile beauty envelops all, and such things as cities, populations and the ever clashing turmoil of human emotions actuated by desire of possession and the fear of losing what one does possess seems a long way off. To most Canadians, certainly to those outside the cities, this is a familiar experience, and in consequence they are deeply interested in the progress of the four Russians and can feel with them some of the rigors of climate—even if not the dangerous episodes—they have undergone. Canadians particularly with the rest of the world, will hope that, despite the crashing of the dirigible destined for their rescue, other means of rescue will come quickly. Moreover, that their nine month's strenuous existence will prove profitable, not only to the scientific world but to the everyday world as well.

SERIOUS MATTERS—

UP TO THE present time the legacy left to the world by the Great War of mistrust, suspicion, and hate has passed Canada by. That is as regards rearmaments, naval and military units and defence programs. Economically in the trading world, we have paid our share. But now apparently, this wild race toward naval and military superiority, together with grandiose schemes for empire development have caught up with Canada. And we find our senior government faced with the problem of making decisions the wisdom or unwisdom of which can only be proven by the passing of time. These decisions will entail the expenditure or preventing the expenditure of vast sums of money. With the exception of Canada's contribution to the Great War which cost this dominion a great amount both in men and money, and which incidentally we are still paying for, Canada has more or less been content to develop under the protection afforded by its connection with the British Empire and the protection afforded by its close proximity to a friendly southern neighbor, the United States. The geographical location of the American continent as related to both Europe and Asia brought about the adoption by the United States of the Monroe doctrine, and indirectly, this together with the two previous mentioned means of protection, have satisfied Canadians for many years. However, conditions have been gradually changing. The great countries of the world are combining into two or three armed camps. Canada itself, growing older and becoming more independent, have been breaking legal binding ties with the British Empire one by one, and the Monroe doctrine is not the air tight thing it once was.

To those people raised in Europe, soldiers and sailors are commonplace. That is, upon almost any village street almost at any time soldiers and sailors can be seen in uniform. In the large towns and cities, except when on parade, they do not excite comment. Residents of sea-port towns often see battleships, destroyers, cruisers, submarines, etc. One grows up to view the whole thing as a part of life—almost as a part of creation. Perhaps it is necessary, in a world of humanity tuned to grab all it can, it probably is necessary. What is, amid the glamor of naval and military display, generally forgotten, is the terrific cost. Farmers and fishermen, artisans and professional men, old men and women, and little children, somehow, somewhere, sometime contribute and continue to contribute to the upkeep of armies and navies the world over. This is the problem the statesmen of Canada are faced with today. Up to the present with the exception of the Great War, Canada's military and naval expenditures have been quite light. How far shall Canada go in the spending of money and toward taking her place among the armed nations of the world is a matter for very serious consideration.

The Farmers' National Is Dissolved

On Tuesday, January 22nd, the Farmers' National Grain Corporation of the United States was dissolved with an estimated loss to the U.S. government, which backed the Corporation financially, of about 20 million dollars.

So passes probably the last of the attempts that were made by several governments of the World to sustain wheat prices artificially and which attempts started with the American Farm Board's effort in 1929.

The Farmers' National Corporation itself was started in 1929 with the blessings of the U.S. government under provisions of the Agricultural Marketing Act; it was a step-child of the U.S.A. Grain Stabilization Corporation.

In June 1936, the National Grain Corporation was in a bad way financially. The government came to its assistance, wiped off a debt of 14 million dollars and advanced considerable new credits to enable the Corporation to be saved from bankruptcy at that time. The Corporation has been in existence for eight years, and has not shown a profit in any one year of its operating life. (Despatch from Chicago Tribune).

The fate of the Grain Corporation and the huge cost to farmers and to tax payers, of the several abortive attempts which were made to assist farmers by trying to raise world wheat prices artificially, indicate clearly that such attempts are doomed to failure, so can never be successful. Indeed history is replete with the story of the failures of innumerable similar attempts, and history does not record one single success in thousands of years.

It seems to be quite evident to students of agriculture, and of industry, that the serious disability which is imposed by industry upon farmers of the world, through the medium of high tariffs, cannot be remedied by attempting to raise artificially the prices of agricultural products—usually against the forces of supply and demand.

There is a sound way, however, to help agriculture and to help farmers and farming families, and that way is to rectify the original wrong done to agriculture; namely for governments to remove as far as possible the high tariffs, and the restrictions and quotas against the international exchange of agricultural products and industrial goods, so that the purchasing power available to farming families may be equal to that of the people engaged in industry, all as it once was.

It seems strange, however, that this obvious remedy seldom finds supporters, even amongst farmers themselves, but that many people and some governments favor permitting the high tariffs and restrictions to remain in force, and even to become higher, and merely favor trying to offset these evils by attempting to raise artificially the price of the products farmers grow and have to sell.

Attempting to raise the price of agricultural products would be a most excellent remedy if it were not for one grave defect, which is simply that it cannot be done. It never has been successful and probably never will be, for the simple reason which we have often pointed out in these columns, that while governments can set a price for agricultural products, while even any individual farmer himself can set his own price on the products which he grows, there is no law nor regulation that can be passed by governments or made by farmers, either singly or in combination, that will have the slightest effect upon the people who live in a hundred or more countries in the world, and upon whom the farmer depends to purchase his products.

The true remedy still lies, as it ever has done, and probably ever will, in correcting the first handicap imposed upon agriculture and upon farmers; simply by bringing down tariffs and removing quotas and other restrictions which now exist against the exchange of agricultural products for the commodities and goods manufactured by people in other countries of the world.—Searle Grain Company, Limited)

At Least They Didn't Lost Their Stockings

Montreal, Feb. 7—More man used to laugh at what he called the weaker sex for carrying money in her stocking. "The First National Bank" he labelled it facetiously.

But here comes a man who not only puts a brand-new dollar bill in his mitten for safe-keeping but proceeds to lose the mitt.

It was found on a Canadian National train in Montreal and turned in to the lost and found office.

The man came to T. P. Mooney, Baggage Agent at Bonaventure Station, and the mitten was handed over. He put his hand in the mitt, felt nothing and looked with dismay at the baggage man. "I think I had a dollar bill . . ." he began.

"Here it is," said Mr. Mooney, gently advising him to be more careful in the future.

Back went the dollar into the mitt.

For The Valentine Party!

Orange Cherry Valentine Dessert

Gay days call for gaiety in foods—and this intriguing dessert with a heart motif is particularly gay in red and gold for a St. Valentine party. For the orange slices with which the heart mold is surrounded, California Navel oranges with their seedless characteristics are especially easy to prepare. Their firm texture also adds to their attractiveness as a garnish. Oranges are especially valuable in the diet at this time of year when other fresh fruits are scarce.

◦◦◦◦◦◦◦◦

To Make: Make a cranberry mold—with or without gelatine. Pour mixture in heart mold and put in a cool place to set. When ready to serve dip the mold in warm water (never hot) and turn out on a large serving plate. Surround with orange slices which have been dipped in honey and chilled. Decorate the plate with candy hearts. This may also be made in individual molds (fills 6 molds).

◦◦◦◦◦◦◦◦

Valentine Squares

1 package cherry-flavored gelatin
1 pint hot water
1 sheet cake
1-2 cup cream, whipped

Dissolve gelatin in hot water. Pour 1-2 inch layer into shallow square pan. Chill until firm. Cut 2-inch squares from cake. Cover tops with plain sweetened whipped cream and sides with whipped cream into which bits of gelatin have been folded. Place on paper doilies. Cut hearts from gelatin with small heart-shaped cutter and place on top of cake. Serve at once. Serves 12.

◦◦◦◦◦◦◦◦

Orange Banana Salad

3 California Navel oranges
Lettuce
3 Bananas
1-4 cup finely chopped nuts (walnuts, almonds, pecans or peanuts)

Peel oranges and cut into 1-4 inch slices. On lettuce-covered salad plate place 2 orange slices. Cover with 2 lengthwise quarters of bananas, sprinkled with lemon juice and rolled in nuts. Top with slice of orange. Garnish with mayonnaise and maraschino cherry.

Variation: Roll Banana fingers in grated coconut.

Jail Preferred To Fine Of $2

Lindsay, Ont. Feb. 5—James Thorndyke, service station operator, chose to spend seven days in jail rather than pay a $2 fine imposed when he was convicted of keeping a common gaming house by having slot machines on his premises. "I run a respectable place of business," Thorndyke said, "and I'm going to stick with the ship."

Lindbergh To Permit Grafting Rubber Heart

London, Feb. 7—The Sunday Referee said Sunday Col. Charles A. Lindbergh will undergo an operation to permit grafting of an artificial heart which may make him "almost immortal and live for hundreds of years."

"Lindbergh may be the first man to lengthen his life far beyond normal," the newspaper said. "This possibility follows his action in subjecting himself to the physical preparations necessary for grafting into his body of the artificial heart made of rubber and metal by him and Dr. Carrel [illegible] off the Brittany coast."

[illegible] Lindbergh and Dr. Alexis Carrel of the Rockefeller institute collaborated in the invention of a perfusion pump, a glass apparatus [illegible] to permit the heart to be placed inside and live on artificial blood [illegible] The pump keeps streaming through the organ. During his stay in England, Col. Lindbergh worked on the artificial heart and with Dr. Carrel exhibited it in 1936. The aviator returned to the U.S. last December [illegible] in connection with his medical experiments.)

Rubber Overshoes Keep Ice From Plane Wings

Montreal, Feb. 7—[illegible] are an important part of Trans-Canada Air Lines craft. These are rubber "overshoes" fitted on the leading edges of the main planes [illegible] which are fitted [illegible] expanding tubes. By means of air pressure supplied by a motor-driven pump the tubes are caused to pulsate and crack off any ice that may form on the wings.

Behind the propeller is a hollow "slinger ring" [illegible] which a mixture of glycerine and alcohol is fed from a pump and from which two small metal tubes are led to the root of each blade. These admit a given quantity of the mixture to spread over the blades in rotation preventing ice.

Scouts Learn Sign Language To Assist Deaf Travelers

A number of Scouts of the larger centres of Saskatchewan are taking instruction in the deaf and dumb sign language, in order that they may assist traveling children of the School for the Deaf at Saskatoon. The plan resulted from a Christmas holiday mis-adventure of two boys of the school, who got on the wrong train at Prince Albert. In consequence they did not reach their homes for Christmas.

"IT'S THE BEST-LOOKING CAR ON OUR STREET"

ROOMIER ALL-SILENT ALL-STEEL BODIES — Larger interiors — lighter, brighter colors—and Unisteel construction with Safety glass for safety

PERFECTED HYDRAULIC BRAKES — Smooth — powerful — positive . . . the safe, self-energizing brakes for modern travel . . . giving maximum protection

GENUINE KNEE ACTION — So safe—so comfortable — the world's finest ride. On Master De Luxe Models

Illustrated—Chevrolet 2-Passenger De Luxe Sedan with trunk.

"THE best-looking car on the street!" That's what all the neighbors say about our new Chevrolet. And that's what we think, too.

"Just look at the thrilling streamline of the new all-steel body. And notice how, by rounding the radiator grille and adding those horizontal hood louvres, Chevrolet has modernized the whole effect.

"Then take the interior. It's so neat and 'tailored' it makes me think of our own living room . . . fine upholstery . . . lovely appointments . . . everything in taste.

And remember, Chevrolet reinforces all this beauty with roof, walls and floor of steel . . . with all windows of safety glass! "I don't know much about mechanical details but. I drive our Chevrolet and from a woman's point of view, nothing could be easier to handle or safer. Finally, (I look after the family budget), I'm sure nothing could be easier on the pocketbook!"

You, too, will be proud to own this new Chevrolet. Come to our showrooms today—see it, drive it, and compare prices before you buy.

VALVE-IN-HEAD ENGINE — Giving the most efficient combination of power economy dependability

KINGMAN

The Social Credit Rummage Sale was postponed until February 22 on account of the cold weather.

Mrs. L. [illegible] of Drumheller visited at the homes of M. N. B. Widema and J. K. [illegible] last Friday, who returned to her home on Friday evening.

A large [illegible] attended the funeral of Mr. Peter W[illegible] held at the [illegible] Kingman [illegible] on Saturday afternoon [illegible] ferings.

Mr. N. B. W[illegible] and Mr. Hag[illegible] are gone to Kingston, Al[illegible] where they will work a couple [illegible] ntns hauling lumber.

There will be a Valentine Dance at the Kingman Hall on February 14th [illegible] the Merry Makers.

5 Years Is Penalty In Kaleland Death

Vegreville, Feb. [illegible]—Nick B[illegible], [illegible] farmer, was sentenced [illegible] five years in [illegible] the death of John P[illegible] [illegible]

Pohoreschuk was beaten to death, [illegible] to medical evidence. Defence witnesses said that he was a Communist and continually argued about it, boasted to others that he had thrown Boychuk out of his own home, and boasted that he had [illegible]

[illegible] M. J. O'Brien for the defence.

Rescue Hope Wiped Out

[illegible], Norway, Feb. 10.—[illegible] wiped out hope of [illegible] ... drifted [illegible] North Pole [illegible]

Yesterday the Russians reported they were within clear sight of the Greenland coast and plans were made [illegible] expeditions across the off-[illegible] from Norwegian and Danish posts.

The scientist's camp is in constant [illegible]

Snow Blindness Real Dread Of North

Snowblindness, the dreaded peril of the north, is not caused by the glare of the sunlight, but by the "white darkness" or dense fogs which roll over the northern plains according to Sir Hubert Wilkins, internationally famous as an explorer of the Polar regions, now leader of the party conducting an aerial search for the party of six Russian fliers who were lost while attempting a trans-Polar flight last August.

[illegible] wanted instructions from Russian government officials at Washington, D.C., as to what steps he should take with regard to repairing his plane which is at present grounded at Aklavik with a damaged [illegible]. Sir Hubert [illegible] for a Russian [illegible] the majority of his [illegible]

"[illegible] from the [illegible] effort of the eye to focus on fog, the white darkness," said Sir Hubert.

The glare of sunlight will cause eye strain and will make the eyes very sore, but the real snowblindness [illegible] occurred in the winter of 1913 [illegible] along the north coast of Alaska and lasted for eight days," [illegible]

[illegible] from ice-floes.

[illegible] and the optic nerve becomes paralyzed.

"I was stricken with a terrific headache, the mucous membranes of the eyelids solidified to form a film around the eyeball. The eyes themselves burned with an intense pain, such as one would imagine might be caused [illegible]. The whole [illegible] affected from the effects of the [illegible] the same as one suffers [illegible] attack of influenza.

"After being totally blind for eight days we stopped travelling, and after three days I recovered enough to go on.

"[illegible] the worst experience of the whole trip was the fact that when we finally arrived at our destination, after tramping that 250 miles through the cold and snow, most of the time helping the dogs to pull the sleigh, which was heavily laden with equipment, we discovered that we were just six hours too late. The whale had been killed and landed and that was the only one they caught that winter [illegible] was nothing for us to do but to turn around and walk back again.

"Since then I have discovered that snowblindness can be averted by [illegible] a piece of red or black cloth [illegible] the end of a ski-pole and focussing the eyes upon it for long periods of time as I tramp along" said Sir Hubert.

According to Sir Hubert, flying [illegible] formations will produce attacks of snowblindness more quickly than anything else. The lack of a strong [illegible] to focus the eye combined with rays of light coming from all directions bring it on quickly, he affirmed.

"When it is extremely cold, such as it was during our trip from Aklavik this winter, the water vapor in the air freezes producing a condition known as 'frozen mist'" declared Sir Hubert. "We noticed on Tuesday that our eyes were sore from peering out into the haze produced by this frozen mist. But my last real touch of snow blindness was last summer, while flying through clouds in the north."

Kitten Lowest Paid

[illegible]—The lowest paid actor [illegible] of the Playhouse Theatre is "Punch," a small black and white kitten.

Punch's salary is one shilling (25 cents) a week for a three minute appearance in "Alice through the Looking Glass."

As Punch is a "juvenile" one-third [illegible] according to [illegible] for talcum powder and table tennis balls.

Warn Drivers Of Deadly Fumes

Grim warning of the dangers of the deadly carbon monoxide was given in a [illegible] Alberta town recently when the lives of three young boys were snuffed out, without the victims having the slightest chance of recovery.

Camping in a garage, the boys wanted to hear the radio in the motor car. They started the engine, resulting in the [illegible] being charged with car[illegible], and all succumbed.

[illegible] danger of carbon monoxide has [illegible] emphasized over and over again by officials of the Alberta Motor Association. Each year this [illegible] takes its toll in this and other provinces.

[illegible] continue to grow, making [illegible] more necessary for drivers [illegible] attention to the need of having their cars in proper operating condition.

In cold weather car engines should not be kept running unless the garage doors are open and there should be a car window or more kept open so that the menace of any deadly fumes will be greatly minimized.

[illegible] designed to warn the public of the danger of carbon monoxide and this annual toll in Alberta be substantially reduced.

Reduce School Accident Toll

[illegible] further interest of the public in municipal and school authorities in the need of greater safety training for school children are being made in various parts of the country.

One phase of this campaign is to warn youngsters of the danger of running out from behind parked cars. School accident reports all too often carry the notation "ran from behind parked cars." To check this tendency on the part of school children when at play, some schools have had large warning posters distributed.

While the schools are extending the work of training youngsters to observe care when at play, parents also should do the same. It may mean the difference between life and death for some child.

When the Alberta Motor Association held its annual meeting at Calgary it was decided that a committee should look into the possibility of having safety driving courses introduced into the educational system of the province, as has been done in British Columbia. Recently there has been discussion of similar steps in Manitoba. The roads in this province will be discussed with the government by a committee from the A.M.A.

Formal Opening Takes Place In Riot of Color

To the booming of a 15-gun royal salute by guns of the 92nd Battery Canadian Artillery and in the presence of crowded galleries in which there was a brilliant assemblage of dignitaries, the sixth session of the eighth legislature of Alberta was formally opened at 3 p.m. on Thursday by his Honor Lieutenant Governor J. C. Bowen.

Seldom has there been such a desire to witness the opening of the legislature as on this occasion. Days ago all tickets for reserved space had been applied for and issued and many desirous of attending were unable to do so.

Public gallery doors were opened at 2.30 p.m. and long before that time a long line-up of expectant attendants had appeared in the legislative corridors.

The opening was a riot of color and was brilliant by reason of the variety of colors and the personnel of the assemblage.

The colors in the decorative scheme of the legislative chamber, mixed with as many colors of the women's gowns and the brilliance of the military uniforms, made a most impressive sight.

Many spectators [illegible] a seat inside the chamber [illegible] the arrival of members, [illegible] the military and His Honor with his entourage.

The Guard-of-Honor, which His Honor reviewed prior to going into the legislative chamber, was drawn from the 1st battalion the Edmonton Regiment and the Edmonton Fusiliers.

His Honor arrived, accompanied by a motor-cycle escort of the city police.

Brothers Reunited Lapse of 39 years

From printer's "devil" to publisher is the proud boast of Charles P. Sheers, editor and publisher of the [illegible] Herald-Tribune, Akeley, Minnesota, who arrived in Edmonton Wednesday to meet his brother John, Ardrossan farmer, whom he hasn't seen for 39 years.

Mr. Sheers is a veteran member of the International Typographical Union. He left with his brother for Ardrossan where he will visit with relatives for a few days before continuing his holiday tour to Los Angeles. Charlie calls this his "Golden Jubilee trip" to celebrate more than 50 years in the newspaper business.

Born in Chicago on July 23, 1870, Charlie Sheers started his career as a printer on the Sycamore True Republican, Sycamore, Ill., in 1882. "We started work pretty young in those days," he explained.

In 1886 he went to the Chicago Daily News, then to Fargo, N.D. in 1887 to join the International Typographical Union. "I was then officially launched on my career as a fully-fledged printer and could pick type with the best of them," the veteran reminisced.

The Winnipeg Free Press gave him his first work as a journeyman printer for three months in 1887. It was a different city in those days with a population of only 20,000. Boy, has it grown!" he said today.

Suffering from asthma he then started a tour up and down the country trying to find a climate which would effect a cure. From Chicago to San Francisco, Portland and Seattle he worked as a travelling printer setting type for more than 100 newspapers until he found his Mecca—Akeley, Minnesota.

"I'm not an official Chamber of Commerce delegate, but you can tell 'em from me that if they want to get rid of their asthma they should go to Minnesota. It certainly worked with me," Charlie declared, explaining that Akeley is 2000 feet above sea level and a fine place for natural treatment of asthma.

The newspaperman has made a success of things in his home town. Besides publishing his paper, he is a candidate for the Minnesota State Senate and will be back in time for the June primaries.

Saskatchewan Plans Reduce House From 55 to 43 Seats

Regina, Feb. 9—Saskatchewan government soon will introduce in the legislature a bill to redistribute provincial electoral divisions, reducing the legislature membership from 55 to 43, Attorney-General Davis said in the house Tuesday.

The announcement came after G. H. Williams leader of the C.C.F. opposition, attempted to introduce a redistribution bill. Liberal members voted solidly to deny Mr. Williams this right.

Mr. Davis said the opposition leader would be given every right to bring in his amendments to the government bill after it is placed before the house this session.

He proceeded to discuss certain phases of the bill and had said it provided for a legislature of 43 members, when Mr. Williams raised the point of order that the attorney-general was not permitted to discuss the subject matter of the bill.

Mr Speaker J. M. Parker ruled the attorney-general could not debate the bill itself.

Tofield Bonspiel Commences Tuesday

Tofield's open bonspiel will open at 9 a.m. Tuesday February 22nd and will continue throughout Wednesday and Thursday. There are two primary competitions and two secondary competitions with good prizes in each event. Mr. J. W. Morton, veteran bonspiel draw man, will be in charge of the drawing of the games.

GRAND CHALLENGE
1st Prize— 4 Leather Club Bags
2nd prize— 4 Electric Lamps
3rd prize— 4 Cheese Dishes
4th prize— 4 Brass Candlesticks

NORTHWESTERN UTILITIES
1st prize— 4 Auto Robes
2nd prize — 4 Casseroles
3rd prize — 4 Hampers of Groceries
4th prize — 4 Coffee Percolators with 4 pounds of Coffee

TERWILLEGAR
1st prize — 4 Electric Sandwich Toasters
2nd prize — 4 Bedroom Clocks
3rd Prize — 4 Salt and Peppers
4th prize — 4 double boilers with bags of breakfast cereals

PINCOTT
1st prize — 4 Sets of half-dozen Tea Spoons
2nd prize — 4 Wall Mirrors
3rd prize — 4 Four gallon cans car oil
4th prize — 4 Picnic Hams

GRAND AGGREGATE
4 Pairs Mens' Suspenders

HARD LUCK
Visiting Team — 4 Flashlights
Local Team — 4 Four Gallon cans car oil

WARNING
TAKE NOTICE THAT THE CITY OF CALGARY does not consider itself responsible for assistance to families or individuals moving to this City from outside points. The chances of employment here are very poor. In the event of the City being compelled to give assistance, such will be based on the minimum scale ordinarily paid by Rural Municipalities in Alberta.
DATED January, 1938.

BEHIND THE HOG

By A.B.C.

Tuesday night looked like old times at the rink. It was Oyster night. After watching two close games, the boys congregated in the waiting room where they partook of the oysters kindly provided by Pres. O. P. Thomas and the rinks that were on the short end of the Pres. vs. Vice-Pres. competition. Bring your own bowl and spoon they said, and each curler took one according to his capacity for oysters, they ranged from soup bowls to mixing dishes, while one well known curler brought a water pail. We noticed several ways of eating oysters—the slop slop method, swallow them whole, chewing them up, with or without biscuits. Everybody seemed right at home, as they ate with their hats on. In all some three gallons of the Sumptuous, Succulent mess disappeared. Pres. Thomas in his own supererogation manner, thanked Mrs. Ed Hardy for kindly preparing this swell dish. With great eloquence he elucidated the exploits of the vice-pres. side. In all it was a very large night. The balance of conversation was general.

0-0-0-0

Starting Tuesday Feb. 22nd, we have our Spiel. Three days of it (if you last) in all some 70 good prizes. We expect rinks from Edmonton, Viking, Holden, Chipman and about 8 of our own. Lunch served on the grounds. Come over and spend a pleasant hour with us.

0-0-0-0

Two men's rinks are going to Holden Spiel. Glen, A.B.C., Tom McBratney and Thos. Jacobs. Fred Imler, Doc Law, Stan Burke, and Rev. Allin. We won't be long.

0-0-0-0

Lamont was over last Saturday. Doc Laws rink played, or should I say opposed them. Doc pulled the hidden hanky trick but his rink seemed to pay no heed to it. Mrs. Law's rink curled a Ladies' rink from Edmonton on the next sheet and held up the Law's honor.

0-0-0-0

Two Ladies rinks hied to Viking on Monday. Mrs. Artie Beirnes' rink won two games while Mrs. Dr. Law's rink won one and lost one.

0-0-0-0

And the rink shall be filled with music,
And the cares that infest the day,
Shall fold their tents like Arabs,
And as silently steal away.

0-0-0-0

And curlers: Make it a practice at the rink to put all your worries down in the bottom of your heart, then sit on the lid and SMILE.

Evening Picture Show On Saturday Night

In order to give townspeople and those farmers who cannot get into town in the afternoon, an opportunity of seeing "Friendly Valley" and other talking picture features, Mr. M. C. Hammond has arranged to have an evening show Saturday. Other shows at 1:00 and 3:30 p.m.

The picture which is of John Deere origin is really worth seeing. The story is good, the actors are among the best, and together with the music, provides excellent entertainment for all the family.

Admission is by ticket but Mr. Hammond will be pleased to give tickets to those requesting them.

LAKESHORE

The Lakeshore school closed on Monday due to the many cases of mumps amongst the school children.

Miss Grace Mackinnon returned to her home in Mannville on Monday evening.

Miss Helen Baumgartner of Ministik is visiting at the T. A. Jones home.

Mrs. Bert Swift of Fallis is visiting at the home of her parents.

Mrs. T. R. Murray had the misfortune to slip and wrench her back.

HOLY TRINITY TOFIELD
Sunday School — — — 11:00 a.m.
Ardrossan — — — — — 3:00 p.m.
Evensong — — — — — 7.30 p.m.
Rev. A. Wallis

WANTED—Yearling Shorthorn Bull. Apply P. O. Box 30, Tofield.

LOCAL & PERSONAL

The C.W.L. is sponsoring a Bridge and Whist card party in the basement of St. Francis' church on Wed. February 23rd at 8 o'clock p.m. Lunch will be served. Admission 25c. Everybody welcome.

Miss P. Burnett spent last week end visiting in Edmonton.

On Friday evening last, Jack Innes was unfortunate enough to sprain his wrist quite badly. We are pleased to report however, that he is getting along nicely now.

Mrs. Anderson is visiting her sister, Mrs. J. Ferguson. We are glad to hear that both Mr. and Mrs. Ferguson are much better now.

Miss Helen McCauley, nurse at the Ponoka hospital spent the week end at her home here.

Miss Inglisby, who has been nursing at the Johnston Ferguson home, left for Edmonton this week.

Glenn Wood and Harry Bowick returned on Sunday last from Calgary where they attended a two week's school in welding.

Mr. H. Bethel from Edmonton is spending a few days at his home here.

Mr. W. E. Seale spent the week end in Edmonton.

Mr. P. Martin left on Wednesday for his home at Dutchess. Fred has been working at the Tofield Service Station for some time.

Mrs. Schmaltz returned home after visiting at Dalbourne.

The Y.P. Valentine party held on Monday, February 14th was a great success. There was a record attendance and the games and contests kept everyone busy. The Valentine eats went over big.

Sometimes we get people in the right church but wrong pew. Last week we had T. McBratney going to Edmonton. Tom went to Edmonton to see the Scotch curlers alright, but he went with his daughter Euphemie, Mr. McSporran, Mr. Jacobs and Mr. Hardy.

CURLING ACTIVITIES

A week ago Tuesday a rink from Holden skipped by Mrs. James and a rink from Viking skipped by Miss Barker, visited Tofield. In the early afternoon, Holden and Viking rinks played each other, Viking winning. Then tea was served by the Tofield ladies' curling club, after which local rinks played the visitors. Tofield won both games.

On Saturday night, a rink skipped by D. Stewart, played a rink skipped by Dr. Law. The visitors won the game.

The same evening a ladies' rink skipped by Miss Thrasher of Edmonton, played against a Tofield rink skipped by Mrs. Law, the local rink winning the game.

On Tuesday afternoon, 2 rinks, one skipped by Mrs. Beirnes and Mrs. E. Rogers and one by Mrs. Innes and Mrs. Law played Viking rinks at Viking. The rinks skipped by Mrs. Beirnes, Mrs. Rogers and Mrs. Innes won their games and Mrs. Law's rink lost theirs. The Viking ladies served tea.

LINDBROOK

Everyone here is "appreciating" the cold weather, I don't think!

A meeting of the Lindbrook Social Credit Study Group was held at the home of Mr. and Mrs. F. Gould last week.

Mr. Emil Goubault is at present in hospital in Edmonton having some shrapnel taken from his body which he received there whilst serving with the French Army in the Great War.

Mr. Vincent Glenn was here for a few days on a visit to his aunt and uncle, Mr. and Mrs. W. Glenn of Lindbrook. Mr. V. Glenn has been working until recently in Athabasca but now is in Edmonton.

We are glad to hear that Mrs. "Sandy" Robinson, nee Adela Gill, is on the road to recovery.

Dances, parties, church and etc., all seem to have been postponed until the cold snap is over and the roads open again, hence the lack of news items.

KETCHAMOOT

Mrs. Leo Ovelson of Miquelon district spent a few days at the home of her parents, Mr. and Mrs. J. Ingram last week.

Miss Nellie Lindsay was detained home from school the first of the week.

Mr. and Mrs. O. Bernes was able to return home Saturday after being a patient in an Edmonton hospital for several weeks. They are at present staying at the home of their son Ralph.

Miss Hazel Seats is visiting friends and relatives in Edmonton.

Mrs. Wendel Wiley entertained a few of the Social hour club at her home Thursday of last week. Mr. and Mrs. Wiley are making their home at the Freeman Berg home for the winter Mr. Berg is visiting relatives in Denmark.

Mrs. Gunder Ringen, nee Tollefson, was taken to an Edmonton hospital where she underwent an operation for appendicitis on Friday.

Mrs. Pearl Eckenbreck and family visited a few days with their brother and uncle, Joe Sutton and wife the first of the week.

A pleasant evening was spent at Mrs. Sutton's sr. home Saturday of last week when the family entertained old time friends and neighbors in honor of their daughter and sister, Pearl.

Cold weather and sickness are a poor combination for news.

Local Editor To Speak Over CFRN Friday Night

To-morrow, Friday, the editor of the Mercury, W. Worton, will speak over Radio Station CFRN from 8:00 to 8:15. This is in a series of broadcasts inaugurated by the station and known as "Your Country Editor." The series opened two weeks ago when Mr. Galbraith of the Red Deer Advocate, president of the Alberta Weekly Newspaper Association spoke. Last week Mr. Freidman of the Edmonton Bulletin spoke. Next week, February 24th, Mr. Horton of the Vegreville Observer is scheduled to speak.

U.F.W.A. NOTES

The U.F.W.A. met at the home of Mrs. A. P. Moan on Feb. 12. There were 19 members present. Numerous letters and matters of business were discussed. Mrs. Haukedahl and Mrs. Olson, who had acted as delegates to the Convention, gave very interesting and complete reports. A dainty lunch was served by Mrs. Moan. Date and place of next meeting to be decided later.

U.F.W.A. Program 1938

March: Roll Call—Uses of Common Salt. Paper: "Fear in a Child"—Mrs. Moan. Discussion.

April. Roll Call—A Habit Copied from Mother. Paper "Nutrition and Dietetics"— Mrs. Burchard. Solo — Mrs. Torrie.

May Roll Call—Current Events. Demonstration on Bee Keeping by Mrs. Stephens.

June Roll Call —Where I First Met My Husband. Paper on Mrs. Black—Mrs. Bigland.

July: Roll Call—Simple Salad Recipe. Reading: Mrs. McConnell. Paper on Cora Hind, Mrs. Seale. Piano duet— Mrs. Murray and Mrs. Anderson.

August: Roll Call—My Idea of Gossip. Paper —"Life of Will Rogers" by Mrs. Haukedahl.

September Roll Call—The Worst Scrape I Was Ever In. Paper: "Womens' Part in Canadian Progress," Mrs. Murray.

October: Roll Call—Display of Novelties. Birthday Party.

November: Roll Call—First Aid Hints. Paper: "Home Nursing" Mrs. Erickson.

WANTED—Carload lots No. 1 and 2 feed oats and barley. Also, for seed purposes No. 2 and 3 CW oats, and grass seed. Mail samples. We are also buying baled oat and barley straw, hay and green sheaves. Cash on receipt of weight certificate and bill lading. Write Murray Seeds, Murray Building, Edmonton. Phone 26664.

WANTED TO LEASE— Good farm near Tofield by responsible experienced party with full equipment. Apply Box 37, Tofield Mercury.

John Deere Machinery Gasoline, Oils & Greases

Canada Eating More Onions

Canadians are eating more onions with the result that there is a scarcity at the present time which is being met by imports from the United States. Egyptian onions are expected to arrive in Canada in about a month's time, according to the Agricultural Department of the Canadian National Railways. Canada is now importing onions from New Zealand and exports to that dominion, the onions being [illegible]

Records Reveal Cost Of Raising Pullets

(Experimental Farms Note)

In order to ascertain the cost of raising pullets to maturity, that is the age at which they lay their first eggs, a record of all feed, coal and litter used was kept during the 1937 season at the experimental station, Summerland, B.C.

Starting with 600 White Wyandotte chicks hatched on three different dates, April 6, 14, and 28, respectively, and brooded under coal brooders, 341 were sold as broilers and roasters, and a few as ready-to-lay pullets. These latter have been included for purposes of experiment at their actual weights and the prevailing live price per pound. Mortality, caused mostly by hawks and coyotes, accounted for 18 birds. The balance of 241 represents the number of pullets coming into laying from September 2 onwards. No eggs laid by these birds have been credited, as such inclusion would only create a fictitious profit or unfairly reduce the cost of rearing.

The number of chicks brooded might easily have been cared for by two brooders instead of three if hatching dates allowed this, thereby reducing the amount and cost of coal used.

As anyone knows who kept poultry in 1937 feed prices were high. Wheat for this experiment cost $51.00 per ton, home-mixed developer mash of which large quantities were consumed cost $40.00 per ton.

In order that the figures may be of some benefit to those poultry-keepers who raise their pullets from purchased day-old chicks, the cost of the original 600 chicks has been reckoned at $14.00 per hundred, the approximate price of heavy breeds in the Okanagan Valley. In calculating the cost of raising the birds, no charge has been made for labour.

Cost of Raising Pullets to Maturity

Estimated cost of 600 chicks	$ 95.20
Brooder coal, 1900 lb.	14.01
Litter, 800 lb.	4.00
Chick Feed, 784 lb.	24.43
Developer mash, 8378 lb.	167.96
Whole grain, 4000 lb.	105.00
	$410.60
Sale of broilers and roasters, 1602 lb.	303.62
Cost of raising 241 pullets	$106.98
COST PER PULLET	44.39 cents

Barley Crop Testing Results*

The quality of barley being merchandised in Western Canada is improving. This is indicated by the annual grain inspections as shown in the following table.

Percentage Of Barley Grading Into The Malting Grades

1929-30	1930-31	1931-32	1932-33	1933-34
7.75	7.47	16.06	28.67	26.98

1934-35	1935-36	1936-37	1937-38*
32.53	30.06	56.20	35.14*

Considerable improvement can still be made as indicated by the fact that in any of these years less than 1 per cent graded higher than No. 3 Extra C.W. To determine some of the causes for this condition the National Barley Committee has for the last two years sponsored a project on Crop Testing in the malting barley areas in Western Canada in an endeavor to ascertain the varieties that are delivered by the farmers to the elevators. This work was directed by Mr. A. T. Elders of the Canada Malting Co., assisted by the Northwest Grain Dealers Association, the Manitoba and Saskatchewan Wheat Pools, the United Grain Growers, the Board of Grain Commissioners, Dominion Seed Branch, the Universities, Dominion Experimental Farms and the Provincial Departments of Agriculture. Samples of barley were taken from the farmers deliveries and analysed. The samples were classified into three groups, A, B, C, on the basis of their malting value.

"A" Good malting varieties and pure as to variety.

"B" Mixed malting varieties or mixture of malting varieties.

"C" Varieties unsuitable for malting or so badly mixed as to be unsuitable for malting.

* Dates and percentage to January 31, 1938.

Some five thousand samples were analysed. Twenty-six percent were classed "A". Most of these samples were O.A.C. 21 the only six-row variety that was pure. A few two-row barleys of the Hannchen and Canadian Thorpe varieties qualified for this grade.

Fifty-two percent graded "B". These samples were largely composed of blue and white barleys of the following varieties, Mensury, Manchurian, Odessa, Silver King, Oderbrucker, and Gartons. Another interesting point was that many of the "B" samples were thought by the farmers to be O.A.C. 21.

Twenty two per cent were classed "C". These were composed of mixtures of two and six-row varieties; Mediterranean and Manchurian types of six-row and smooth-awned sorts.

Each farmer was then advised personally of the quality of the barley he was growing and in the case of the "B" group they were advised to secure when convenient seed of a pure sort. The "C" group were advised where they could secure some of this seed at once.

According to Circular No. 66 of the Board of Grain Commissioners the following varieties are graded into the malting grades: Six-row grades, O.A.C. 21, Mensury, Ottawa No. 60 [illegible]ensury, Manchurian, Peatland and Gartons. Two-row grades.—Canadian Thorpe, Duckbill, Hannchen, Gold, Charlottetown No. 80, Plumage Archer and Early Chevalier.

It is felt that much can be done to further improve the quality of Canadian barley by the use of pure seed. The crop testing project is therefore being continued again this year. Any farmer or elevator operator can send in samples and they will be analyzed and a report sent back. Samples should be post paid to the National Barley Committee, 206 Grain Exchange Building, Winnipeg.

THE WORLD OF WHEAT

By R. G. L. Strange, Director Research Department, Searle Grain Co.

"We are fortunate indeed in Canada in having a splendid Dominion Governmental system for the control of the grades and standards of our seed and commercial grains."

This is what I told myself on my return from a recent visit to several parts of the United States. Each State there I found controls its own seed standards, which vary greatly. There is no Federal control over seed [illegible] no licensing of varieties [illegible] some confusion.

[illegible] United States' Federal control of commercial grain grades is nothing like as exacting as is the Dominion control in Canada, the consequence of it all being that World buyers have not the same confidence in United States' grains as they have in Canadian stocks.

[illegible] reason for the World's confidence in Canadian grain and seed rests primarily in the high standards required by the Canada Grain Act and the Canada Seeds Act.

These Acts are administered, respectively, by the highly competent officers and officials of the Board of Grain Commissioners and of the Dominion Seed Branch. Because these officials are strictly impartial, and are not subjected to any political pressure, they have the confidence of our producers, merchants and consumers alike.

I found in the United States that our Canadian system drew warm tribute from all American agriculturalists.

Following factors have tended to raise prices: Continued drought in U.S. southwest winter wheat belt—Argentine exportable wheat and corn surpluses much lower than a year ago—Complaints of excessive moisture in France—Good demand for Australian wheat in Spain and Britain—Decline of American dollar on foreign markets—1937 barley crop in U.K. smallest on record.

[illegible] have tended to lower prices—[illegible] passage wheat stocks increase—Rumania prolongs export bounty—Australia expects wheat crop larger than official estimate—Rains and warm weather favor new Argentine corn crop—Condition of growing wheat in India generally good—Favorable weather conditions in southern Europe—Increased winter acreage in U.K.

Amazing Economy In Truck Test-Run

Crossing Continent with 4000-Pound Load Chevrolet Truck Gives More Than 17 Miles to Gallon

Ottawa, February 14— A remarkable record of economical operation and faultless performance under exacting conditions was hung up by the Chevrolet truck in which Harry Harta has just completed a test-run from this city to Mexico City.

In 3022 miles of travelling, under temperatures varying from sub-zero to tropical, the stock model truck maintained an average speed of 31.01 miles per hour during 97 hours and 21 minutes of driving time. Yet it used only 208.73 U.S. gallons of gasoline—a mileage of 14.4 miles per gallon.

Equally impressive was the oil economy report, revealing a consumption of only 2½ quarts which, coupled on a cost basis with the gasoline used, brought the financial outlay for fuel and lubrication to only $43.84. This established a total per-mile cost of $0.0145 and a per-ton-mile cost of $.00812.

Operating conditions were extremely difficult since, in addition to the tremendous contrasts in temperature there were all types of roads, from concrete to soft mud, and many severe gradients. In spite of this last fact, however, Harta reported that he had to drop back to second gear only ten times in the course of the entire trip, although he carried a payload of 4000 pounds of steel.

All figures on the run were compiled by Stanley Reed, official observer for the American Automobile Association who accompanied Harta.

HEALTH

A HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION AND LIFE INSURANCE COMPANIES IN CANADA

Diabetes

Within the body lie certain glands which pour their secretions directly into the blood stream. These secretions are particularly powerful, and any abnormal condition which results in the alteration of one or other of the internal secretions, whether this be in quantity or in quality, gives rise to serious disorder in the human body.

Situated close to the outlet of the stomach is the gland known as the pancreas. The pancreas produces an internal secretion, insulin, which allows the body to digest and use certain foods. The old idea that in diabetes, or the absence of the normal supply of insulin, the blood turns to water, comes from the fact that one of the first signs noted by the diabetic is that the amount of urine is considerably increased as is the frequency of voiding. Further, there is a thirst which seems impossible to quench, and, in spite of an increasing appetite there is loss of weight.

Many mild cases of diabetes are detected when apparently well persons present themselves for medical examination in connection with life insurance, or for a periodic medical examination. These persons are the fortunate ones, for they are given the chance of early treatment and so avoid the dangers that attend the untreated, advanced stage of diabetes.

Before the discovery of insulin, the only treatment for diabetes was diet, and mild cases are still controlled by diet alone. The more advanced cases are treated by diet and insulin. Insulin is not a cure for diabetes. It supplies the body with the substance which the normal pancreas furnishes, and it must be taken regularly, being injected under the skin. Insulin does not replace dieting; it is always used in combination with diet.

The diabetic who follows the instructions of his doctor with regard to diet and insulin may expect a long and useful life. Because he has to take care of himself, he may outlive the non-diabetic. It is not easy to adhere to a diet. This is something for all of us to remember in our contacts with diabetics: we should help them, not tempt them, in their adherence to what they have been told and what they know is best for them.

Properly used, insulin has allowed to live many who, otherwise, would have died. It has made an active life a reality for many diabetics for whom diet alone had to be so restricted as to leave them weak and incapable of working. Insulin permits the young diabetic to live; before its discovery, the younger patients had but little hope. Every case of diabetes requires medical supervision in order that his or her particular needs may receive proper attention.

Questions concerning Health, addressed to the Canadian Medical Association, 184 College Street, Toronto, will be answered personally by letter.

BORROWING EXPERIENCES

Typical of the many ways in which the Bank takes to render assistance to customers is the following experience from our records.

An experienced grocery man knew of an excellent opportunity to buy a small grocery business, which needed only experienced management to make it a profitable success. He brought his proposition to the Bank and upon satisfactory security a loan was made to provide the necessary money.

He bought the grocery business, managed it well, made it profitable, and in a relatively short time had repaid the loan.

Modern, Experienced Banking Service ... the Outcome of 120 Years' Successful Operation

What Purposes do Life Insurance Premiums Serve?

Answer.—They provide your dependants a guaranteed sum in the event of your death—or provide money for your old age.

Question.—What is done with the premiums you pay?

Answer.—The savings which you put into Life Insurance are combined with those of other policyholders and are carefully invested in the best interests of all policyholders.

Q.—What is the guarantee back of these invested funds?

A.—The security of the individual loans, in addition to the integrity of the borrowers—whether governments, corporations, or individuals.

Q.—Why are premiums called savings?

A.—Because, year after year, they build up the fund out of which payments to policyholders and beneficiaries are made.

Q.—How much of this money is paid out to policyholders and beneficiaries in Canada?

A.—Half a Million Dollars every business day.

This is the second of a series of messages sponsored by Life Insurance Companies operating in Canada. The third, to appear in two weeks' time, will discuss Life Insurance assets.

CREAM AND BUTTER—

LIVING IN AN agricultural community in which dairying plays a large part, it is refreshing to watch the advance in the price of cream and butter. As we write the price of special cream is 39c per pound butterfat. Contrast this with the low of the depression which we believe was twelve cents, and it can readily be seen that, while it has taken a considerable time to do so, a splendid come back has been made. In pre-depression days there were times when the price was very high, going to nearly, but not quite sixty cents. Due to a number of reasons there has developed a shortage of butter and the inevitable law of supply and demand has forced up the price. How desperate or wide spread the shortage is, we cannot say, but it is significant that at least a partial dropping of tariff barriers against New Zealand butter has been made.

When one takes into consideration the time and labor involved in the production of a can of cream, there is no question that the Alberta farmer earns all he gets. Unlike areas in more temperate zones, cows must be housed during many months of the year, and of course feed must be put up to take care of them while they are so housed. This is in contrast to New Zealand where cows are on pasture the greater part of the year. Consequently the amount of labor involved to produce a pound of butter here in Alberta, is greater than that required in New Zealand. So we repeat that considering the labor and time involved, the Alberta farmer earns all he receives for his butterfat.

However this does not entirely cover the subject. During the depression many lessons were learned or perhaps relearned by a new generation. Not the least important of these lessons was that when a commodity reached a certain price in its upward swing, particularly a table household commodity, housewives quickly found a substitute. Housewives in the mass are very quick to perceive that the high price of any given commodity will upset their domestic budget. And evidently, acting upon the assumption that self preservation is the first law of nature, they either cut down on the quantity used, or find a cheaper substitute for the offending article.

The above is very ably demonstrated by the problem facing the meat packing industry and retail butchers of Chicago. At a meeting of packing house representatives and retail butchers, numbering 3000, the whole subject of high prices was threshed out. It was claimed that the meat industry had to re-publicize meat. It was proven that as prices rose last year, reaching their peak in September, there was a steady falling off in volume. And now the families who discovered that Mother's Spanish omelette was as tasty—and cheaper—than hamburger, have to be won back to the meat trade. Meat prices in Chicago, so it is claimed, are now one third less than they were last September, and the packing industry feels this is the time to rewin the public to its trade. To do this it is proposed to launch "a nation wide movement undertaken simultaneously in 600 cities from coast to coast to focus public attention on the improved quality and attractive prices of all meats now being offered to the public."

It is unlikely that the situation will become nearly so drastic as regards butter, but it is wise to remember that substitutes for butter, particularly as regards cooking, are on every hand. Products using tropic and semi-tropic vegetable oils as bases, very often backed by handsome literature, can easily be adopted by numerous homes and once adopted, it might be difficult for butter to regain its place.

Erratic swings in the price structure of commodities, either up or down, more often than not work out to the ultimate disadvantage of the industry as a whole. What is really needed, certainly in the case of butter, is a reasonable price to the producer, and a price within the means of the consumer. Alberta is not a tropical country, our edible oils and fats are practically all of animal origin and come from the farms. A dairy industry, nicely filling the requirements without glut or shortage would be better all round.

LISTENING-IN—

IN ORDER TO learn more of the tastes of its public, the British Broadcasting Corporation is circulating a number of listeners, chosen at random, throughout the country. The necessity, in planning programs, of having the co-operation of listeners has always been emphasized by the B.B.C., and criticism and suggestions have been welcomed; but, if only as an aid to criticism, there is another form of co-operation that might be practiced, consisting in a methodical attitude on the part of the listener.

Only a few weeks ago a protest was made by a B.B.C. official against the habit of some households of allowing the radio to function uninterruptedly throughout its working hours. It is certainly a peculiar way of getting one's money's worth, and argues a complete failure to appreciate the radio's possibilities, except as a companionable noise becoming articulate when other distractions languish.

The radio can be properly enjoyed at the cost of so little exertion compared with the theatre, the cinema, and the concert hall, that it is odd that some should shrink from undertaking that little. Those who refuse to study and select programs in advance demand, of course, an impossible excellence that would please all the people all the time.—Christian Science Monitor.

Welfare Bureau Announces Gains in Family Rehabilitation Figures

Rehabilitation of 2,884 Alberta families during the 1936-37 period is announced by Hon. Dr. W. W. Cross, minister in charge of relief and public welfare. Now made self-supporting by participation in various provincial and federal-provincial work projects, rehabilitation of these former relief recipients has resulted in a direct saving to the province of $31,303 every month. In addition, $72,385 advanced for timber and tie projects has been entirely recovered by the province from sale of timber produced by rehabilitation workers.

It is pointed out that the sale of this timber in Alberta did not affect local lumber men in any way, but has meant the filling of orders which previously went outside the province.

"The program is being extended during the current year," said F. J. Buck, assistant relief commissioner, when asked to enlarge on Dr. Cross' announcement: "and when the figures will show a decided increase in the number of families able to fend for themselves as a result of the rehabilitation plans."

That the provincial government is making a "very determined effort" to provide gainful employment of a progressive nature is stressed by Mr. Buck. "Government wants to place these unfortunate people who now ask for relief through no fault of their own in a position where they are entirely self-supporting. With the scheme functioning more efficiently as time goes on and experience is gained, there is no doubt that by the end of the current year a tremendous change for the better will be seen."

In addition to the projects operated under the fifty-fifty agreement between provincial and federal governments, a number of others are sponsored wholly by the provincial government, while close cooperation is maintained between the relief bureau and the municipalities in order that there may be fair distribution of work among all classes who need assistance.

"The idea behind the whole scheme," stated Mr. Buck, "is to revive the ambition and initiative of discouraged settlers and to help them live without assistance from public funds."

Projects include clearing, elimination of fire hazards, breaking and drainage of land, production of bridge timber for erection in the locality, production of railroad ties, culvert lumber and telephone poles, general forestry work and corduroying.

Apart from work projects operated jointly, important projects of a similar nature are operated by the provincial government. Arrangements have been made with contractors for acceptance of small lots of ties produced by settlers, while one railway company has agreed to place small contracts with needy settlers through the relief bureau. The provincial telephone department is also accepting shipments of 50 to 100 poles from individual settlers.

"Settlers are allowed to cut timber on provincial government lands," Mr. Buck revealed. "This is purchased by the department and then turned over to the department of Public Works for use in that area. In the building of bridges, culverts and roads more gainful work is thus provided in that area."

In the past year provincial government work projects alone have placed $80,000 in the hands of workers in the timber areas, it is stated.

Many months of investigation and study preceded inauguration of the work projects. "Every member of the government is keen to see every pioneer in the land started on the road to security and self esteem. Moreover, every member of the department engaged in this work is highly enthusiastic, because it means so much to the province both now and in the future."

For transient relief families who originally came from agricultural areas to seek a living in the cities and towns and have failed to become self-supporting, special plans for rehabilitation are in operation.

The department has made it possible for these families to locate on farms where there is work to be found in the vicinity and is granting limited assistance to help in their rehabilitation.

Once established in their new locality, transients are helped to purchase small garden tools, chickens and building materials which they cannot themselves provide.

"We establish them where there is work to be found with neighboring farmers and with crews engaged in other rehabilitation work," said Mr. Buck.

Funds advanced to such families are limited to amounts considered adequate when the recipient is considered resourceful and energetic enough by his actions that he is making a [illegible] to warrant such assistance, and shows genuine effort to rehabilitate himself.

In many sections settlers are given contracts to clear land on their own homesteads. Interest free loans, repayable when the settler has become self-supporting are made on fulfillment of certain conditions of work," stated Mr. Buck. "They realize the government is making a genuine effort to help them carve their new home with a measure of security."

The work is confined largely to unorganized areas of the province, but arrangements are made with municipalities for clearing projects operating under the plan.

Participants must have lived in the province on April 1st of the current year and must actually be in need of the assistance rendered. All projects are under the supervision of a foreman who is paid on a percentage basis.

"This is a great enterprise," summed up Mr. Buck. "Government is engaged in one of the major enterprises of the age-winning back a discouraged people and helping them to become fine citizens again."

Main Supply Leather Comes from Farms

Tanning which is dependent mainly on agriculture for supplies is now one of the major industries of Canada, producing leather both for the home market and for export to other countries. In the matter of leather gloves alone, according to the latest statistics, no fewer than 7,223,676 pairs were produced in the Dominion in 1936, cowhide being used for 2,406,612 pairs, sheepskin for 1,971,872 pairs and muleskin for 932,280 pairs, with a total value of $4,824,200 for leather gloves. Altogether the total production of the leather industry in 1936 was valued at $23,294,210 and the principal kinds of leather manufactured were oak tanned sole leather, calf-skin upper leather; cattle and horsehide upper leather; patent and enamelled shoe leather, and glove and coat leather.

Among the several kinds of hides and skins used, the item "cattle hides" is of chief importance, with a total weight of 79,616,632 lb., and a value of $7,676,122. The item "calf and kip skins" comes next, with a total weight of 10,211,111 lb., and a value of $3,345,400. The value of these two items represents 90 per cent of the total value of skins and hides used. Canadian farms supply most of the cattle hides and, were it not for the spoilage of some Canadian hides through the ravages of warble flies, Canadian farmers could probably supply all the cattle hides necessary. In calf and kip skins used, imported hides represent 28 per cent, and with regard to sheepskins Canadian animals supply about half the skins required by the industry, the other half having to be imported.

The centre of the tanning industry in Canada is the province of Ontario, where the value of output in 1936 amounted to 80 per cent of the total for the Dominion. The number of plants in operation in that year was 87. Ontario had 32 and Quebec 33 tanneries in operation but many of the latter province were of small capacity although in the matter of leather gloves Quebec turned out 56 per cent of the total value for the Dominion. Alberta's plants numbered 7 in operation; Saskatchewan 6; Manitoba 4; British Columbia 3, and Nova Scotia and New Brunswick 1 each.

The first record of the tanning industry in Canada relates to two plants which were established at the instigation of the Intendant Talon (1665-1672) one at Quebec and the other at Montreal. Prior to his departure for France, Talon wrote Louis XIV as follows: "I have this year caused to be manufactured out of the wool shorn from the sheep sent by Your Majesty, several kinds of cloth; our tanneries supply one-third of the leather required here and at present I have Canadian fabrics to dress myself from head to foot."

FOR SALE—International Light Delivery truck in good condition, a I.H.C. Cultivator, a 12 inch and a 14 inch John Deere Gang Plow, and a few other snaps in second hand goods. Apply M. C. Hammond, Tofield.

RAY COATTA, PROPRIETOR

Farming & Unemployment

The suggestion is frequently made particularly during periods of depression and unemployment that a greater proportion of the population should be placed on the land. This is in direct contradiction of a positive trend in the opposite direction which has persisted for generations. It would appear that there are quite sufficient people on the land to produce food in abundance, not only for the nation but enough to provide sizeable exports.

E. S. Hopkins, Ph.D. Dominion Field Husbandman, Central Experimental Farms, Ottawa, dealt with this subject [illegible] addressing the Engineering Institute of Canada. He pointed out that in England in forty years the [illegible] 20 per cent and the [illegible] to 80 per cent. In Canada from 1881 [illegible] 1931 [illegible] per cent [illegible] farms [illegible] of the people actually living on farms [illegible] food.

It would seem from [illegible] that the [illegible] the farm [illegible] vegetables and farm crops [illegible] afterward." Dr. Hopkins remarked [illegible] from the farm but in depression the farm is expected to absorb the unemployed. No thought seems to be given to the necessity of securing sufficient revenue to meet expenses which are absolutely necessary in this modern age. It is not sufficient [illegible] food and housing on a farm; it is necessary to conduct a business which will provide additional revenue for fuel, taxes, [illegible] and many other [illegible].

"Furthermore no thought seems to be given to the effect of such extra production on decreasing the prices of products and making conditions, which are already burdensome, even more severe for the other farmers on the land. There is also a question of securing suitable virgin land which may be used for profitable farming. To engage in farming on a scale that offers any hope of a reasonable standard of living for the farm family, after the free land or homestead [illegible] of agriculture, requires a considerable amount of capital.

Farming as a way of living is a [illegible] poor conception of agriculture [illegible] based on a primitive self-sufficient [illegible] of farming which derives no [illegible] from modern agriculture and engineering."

Dr. Hopkins outlined the early history of agriculture, showing that in primitive times the work was largely [illegible] and was entirely of a manual character. In progressive [illegible] modern [illegible] machines have [illegible] slaves and [illegible] a release from the [illegible]. In 1931 [illegible] farm machinery in Canada was $650 million or $848 per farm, which means that approximately double this sum was actually spent in the purchase price of the machinery. In 1931 the number of tractors in Canada amounted to 103,100. Of this number 81,65? were reported from the three prairie [illegible] 22 tons and more [illegible] 49,871 [illegible] to 2,431,[illegible] [illegible] farming methods [illegible] primitive machines [illegible] Furthermore [illegible] varieties [illegible] fertilizers and [illegible] insects and fungus diseases [illegible] knowledge is necessary [illegible] properly and [illegible] conducted. It is not only necessary that the farmer should have considerable [illegible] information on the proper methods of growing crops and handling livestock.

An interesting demonstration of the marked contrast between [illegible] farm equipment as compared with present methods was demonstrated at the 1931 meeting of the American Society of Agricultural Engineers at Ames, Iowa. The delegates to this meeting were shown a demonstration in which a large field of wheat was being harvested by [illegible] two men, one driving a tractor and the other [illegible]. In contrast to this modern method of harvesting there was located in another portion of the same field the old primitive method, but arranged with a sufficient number of men to harvest an area equal to that handled per day with the tractor and combine. In order to accomplish this task twelve men were working side by side cutting the wheat with cradles. Following the cradlers were twelve men who raked and bound the wheat into sheaves. After the binders came 48 men with flails on their shoulders who would be required to thresh the grain which the cradlers were cutting. It was necessary, therefore to have 72 men with the old method of cradling and threshing the grain with the flail to equal the work of the two men operating the tractor and combine . . . .

"While at first glance it might seem that farming is not a very competitive business, inasmuch as the production of neighboring farmers has little immediate effect on a farmer's revenue, nevertheless, considered in its broad national and international character, farming is very competitive. Only the most efficient farmer can hope to produce sufficiently economically to enable a reasonable revenue to be derived from the farm. Unless such a revenue is obtained, the standard of living on the farm will fall much too low for Canadian acceptance."—Wheat Pool Budget.

Pedigree Pup Saves Time By Air Travel

An important passenger in an Imperial Airways plane from London to Brussels the other day was a pedigree dog. His delicate constitution was spared the wear and tear of a Channel crossing by boat and he saved nine hours. Another fragile shipment according to reports received in the office of the Trans-Canada Air Lines in Montreal was a batch of hatching eggs sent from England to Australia. By sea they would have taken a [illegible] and anything might have happened [illegible] the way. The plane delivered [illegible] days.

[illegible] urgently in Singapore [illegible] from London [illegible] of 30 by rail and steamer.

Local Singer Pleases Radio Audience

Harry Tucker, son of Mr. and Mrs. A. Tucker of Lindbrook, pleased a radio audience last week when he sang over station CFRN Edmonton. Harry sang three numbers, "My Little Buckaroo," "Gold Mine in the Sky" and "Spring Time in the Rockies."

Rational Hail Insurance

Last year the Alberta Hail Insurance board did not function, due to lack of needed financial credit. As a consequence thousands of Alberta farms went through the season with no protection against hail. That condition should not be allowed to continue for another year. There are enough risks facing the farmers without an additional one being imposed.

In this connection a suggestion as to hail insurance plan, advanced by H. P. Wright, Airdrie farmer, last week, is worthy of careful consideration. Mr. Wright believes that the hail loss ratio in Alberta is so high that it is impossible for mutual or cooperative hail insurance associations to operate on a reasonable basis. He suggests that the provincial government should make a contribution to [illegible] and that a new [illegible] should be introduced to keep down huge payments for hail losses.

His plan provides for the treatment of hail losses on a crop cost basis. He would have loss payments restricted to the cost of production, also any salvage value taken into account and applied against the claim. If a farmer were completely hailed out under this plan, and his cost of production was ten dollars an acre, he would be paid that amount for each acre hailed. If he were hailed fifty per cent the value of the balance of the crop would be deducted before any payment was made, and the amount paid would bring the total up to the production cost.

By this method of operation no farmer would make any profit on hail insurance but he would be prevented from experiencing a calamitous year. At least he would get back his cost of cropping. The plan is calculated to provide a measure of security with no "profiteering" on hail insurance, which would result in lower costs and a more general use of insurance.

It will not be long before another crop season is here again and it would be well to have some sort of a hail insurance plan prepared to be launched before the summer when the danger of hail is acute. The Wright plan seems to be deserving of serious consideration.—The Calgary Herald

Pioneer Railway Builder Celebrates 90th Birthday

Vancouver, B.C. Feb. 14—Canada's grand old man of railroading celebrated his 90th birthday here recently in the person of Thomas H. White, the last of the great railway builders. He retired in 1922 as Chief Engineer of Construction for the Canadian National Railways.

Still hale and hearty and as mentally alert as ever, he varied his routine not one iota although telegrams of congratulation poured in on him from all over the country. "I stopped having birthdays long ago," he chuckled to his many callers.

The crowning achievement of a railway lifetime of more than half a century was his construction of what is today the Canadian National main line through the Rockies. In 1907 he started his surveys through the Yellowhead Pass and what is now Jasper National Park and achieved an average four-tenths grade not duplicated by any other transcontinental railway. It flattened out the mountains for operating purposes and made huge economies possible in the movement of traffic.

WANT EXAMINATION OF WHEAT GRADES SPREAD

Pointing out that "this year there have been wide variations in prices between different grades of wheat, which have been the cause of dissatisfaction to farmers," the U.F.A. Convention requested the Executive to take the matter up with the Wheat Pool and the United Grain Growers, and if their study of the matter warrant it "to place its considered opinion before the Agricultural Committee of the House of Commons with a view either to bringing about any changes in the Grain Act that may be required or a further examination of the question."

The resolution set forth that "the statement has been made" that "the restrictions contained in the Canada Grain Act on mixing have made such spreads wider than they otherwise would have been," and that the Act was expected to come before Parliament this year for revision.

71,700,000 Cans!

Stack a thousand one-pound cans together and they make quite a pile but the salmon put up in British Columbia's canneries in 1937 would make a pile more than 71,000 times as big. The year's pack, in other words, would fill approximately 71,710,000 one-pound cans. Or, expressed in terms of the trade, the pack was the equivalent of about 1,494,000 cases, holding forty-eight pound cans each. That's a good deal of salmon, and it represents a good deal of work given to fishermen, cannery employees, can makers, case makers and other people who do tasks connected directly or indirectly with Canada's big Pacific salmon fishery. The 1937 salmon pack in British Columbia where practically all of the Dominion's production of canned salmon takes place, was not so large as the output in 1936—several hundred thousand cases smaller, as a matter of fact—but even at that it topped the average for the five-year period, 1932-36, by something like 25,000 cases. More than a third of it consisted of Pink salmon, nearly 450,000 cases held Chums and 321,500 cases were Sockeyes, the most valuable of the five species of Pacific salmon. About 122,500 cases of Cohoes (including Blue-blacks) were canned and 15,500 cases of Springs. Most of the catch of Springs goes into the fresh fish trade. Salmon cannery output also included a few hundred cases of canned Steelhead trout. Steelheads are never put up in large quantity.

TRADITION

Science advances . . . time progresses . . . engineering skill dictates a streamlined age . . . changes are taking place in our old traditions and methods.

But there remains one process, that because of its TRADITION, becomes increasingly popular . . . more valuable to our well being than ever before.

Each year adds to its charm, yes and quality . . . a quality that time and science cannot take away, and that process? The "traditional formula" used by the Brewing Industry of Alberta in the manufacturing of ALBERTA BEERS.

Vol. XVIII., No. 2 Thursday, February 24, 1938 $2.00 Per Year. To U.S.A. $2.50

BARDO

Marie Heiberg has been quite a sick little girl for a week or more. We are glad to report that she is now improving.

Mr. and Mrs. Ingvald Ness had a rather disagreeable experience last week while out driving in an enclosed cutter. While Ingvald was out taking the mail at the mail box the horses became frightened and upset the cutter, pulling it over Ingvald and raced down the road with Mrs. Ness and Mervin in the upset cutter. A loose line pulled the horses off the road and they stopped in the deep snow after running a quarter of a mile. Fortunately Mrs. Ness and little boy were not injured beyond a severe shaking up.

Rev. Wessel of Edmonton held English services at the church on Feb 13th and will conduct services in Norwegian on Sunday February 27.

Lauritz Larson of Camrose has been holding services here during the last week.

The Bardo juniors and Midget hockey teams played in Tofield last week, the juniors losing 4-1 and the midgets losing 5-2 to Tofield.

Mrs. Selma Olsenberg returned from the hospital last Friday and is staying with her parents, Mr. and Mrs. W. Simonson.

P. B. Anderson had the misfortune to lose 50 chickens when ashes started smouldering in the straw and the smoke suffocated the chickens, the chicken house did not burn.

B. Bjornson and A. Moen attended the ski tournament in Edmonton on Saturday.

Lloyd Hamilton and Irene Horte of Kingman spent Sunday at the I. Ness home.

Mrs. O. K. Heiberg entertained the Bardo Ladies' Aid last month.

Miss Gladys Ness is a patient in an Edmonton hospital. We hope for a speedy recovery.

Officers elected for the Bardo Church congregation are: Pres, B. Anderson, Sec. M. Finseth, Treas. M. Hagen Trustees, H. Jensen, I. Moen and I. Ness, Deacon, W. Simonson, Janitor, Art Moen.

A fire was narrowly averted at the Jevning home when flames were discovered under the roof of the house. The shingles around the stove pipe had caught fire and in a short time the whole roof would have been on fire.

The road from Round Hill to Tofield through here is now open for cars. Other roads in the district have also been opened up.

Bonspiel Great Success

DESPITE MODERATE WEATHER LOCAL SPIEL MUCH ENJOYED

Tofield's annual bonspiel, while running into soft weather, was a complete success. There were sixteen rinks, seven visiting rinks and nine local. There were four events, two primary events and two secondary events. All sixteen rinks played each other in both primary events, the winners staying in the primary event and the losers going to the secondary events. The primary events were Grand Challenge and Northwestern Utilities, the secondary events being Terwilleger and Pincott.

The Grand Challenge: 1st Chapman; 2nd Hillier, Viking; 3rd Cowell; 4th Imler.

At time of writing McBratney and A.B.C. are to play the finals in the Terwilleger event.

At time of writing McBratney and Olson have to play the finals in the Northwestern Utilities event.

Pincott event: 1st Thunnel, Viking; 2nd Law; (decided by toss); 3rd Hillier; 4th Anderson.

Mr. John Morton handled the draws.

Following are the prizes for the different events.

GRAND CHALLENGE
1st Prize— 4 Leather Club Bags
2nd Prize— 4 Electric Lamps
3rd Prize— 4 Cheese Dishes
4th Prize— 4 Brass Candlesticks

NORTHWESTERN UTILITIES
1st Prize— 4 Auto Robes
2nd Prize — 4 Casseroles
3rd Prize 4 Hampers of Groceries
4th Prize — 4 Coffee Percolators with 4 pounds of Coffee

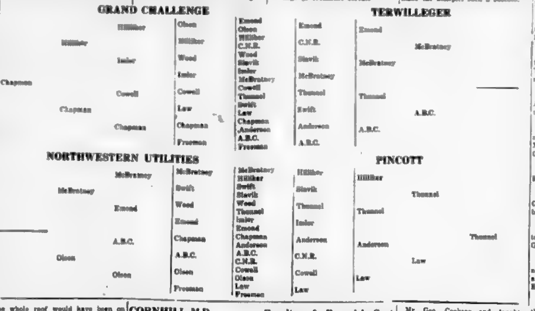
TERWILLEGAR
1st Prize — 4 Electric Sandwich Toasters
2nd Prize — 4 Bedroom Clocks
3rd Prize — 4 Salt and Peppers
4th Prize — 4 Double boilers with bags of breakfast cereals

PINCOTT
1st Prize — 4 Sets of half-dozen Tea Spoons
2nd Prize — 4 Wall Mirrors
3rd Prize — 4 four Gallon cans car oil
4th Prize — 4 Picnic Hams

GRAND AGGREGATE
4 Pairs Mens' Suspenders

HARD LUCK
Visiting Team — 4 Flashlights
Local Team — 4 Four Gallon cans car oil

The bonspiel committee would like to thank all those who helped to make the bonspiel such a success.



CORNHILL M.D. ANNUAL MEETING

Annual meeting of Corn Hill Municipality, Feb. 19th, 1938.

Elected chairman—A. Harrison

Elected Secretary—C. M. Finseth

Moved by W. Abernethy that we have minutes of council meetings for 1937. Motion carried. This could not be given.

Moved by Geo. Abernethy and seconded by G. Schacker that minutes of council meetings be printed in the Mercury and paid for.

Moved by Geo. Abernethy and seconded by Wm. Simonson jr., that chairman, a committee one from each division to go through minutes of council meetings for 1937. Motion carried. The following were appointed Div. 1, I. Ness; Div. 2, F. Johnson, Div. 3, R. Swabey; Div. 4, J. Brown jr.; Div. 5, A. F. Schultz; Div. 6, Geo. Abernethy.

Moved by Geo. Abernethy and seconded by J. Brown jr., a vote of censor to the auditors for not summarizing and specifying the moneys received by secretary the same as that of the councillors. Motion carried.

Moved by J. Morrow, a vote of thanks to Mr. Letourneau and Mr. McSporran for the way they handled lawsuit brought against municipality.

Moved by Wm. Abernethy and seconded by G. Shocker that the present council be asked to resign for the reason of raising mill rate and purchasing of large machinery. Motion carried.

Moved by E. Goerletz and seconded by T. R. Murray that motion passed regarding resignation of councillors be re-considered. Motion lost.

Moved by Geo. Abernethy and seconded by G. Shocker that council pay members of committee going through minutes of council meetings for their services. Motion carried.

Many questions asked and much discussion. For councillors the following were nominated. Div. 1, J. A. Anderson, Kingman and J. Bones, Kingman. Div. 6, G. O. Walker. Mr. Walker went in by acclamation. Div 1 will vote on Saturday, Feb. 26th at Farmington School. Meeting adjourned.

C. M. FINSETH,
Secretary.

On Thursday evening last at the Institute Rooms the Anglican W.A. held a very enjoyable card party, with nine tables playing. We are unaware of the prize winners.

Results of Bonspiel Seat Draw

The bright Alberta sun shone on the Jobbs' on Thursday, or perhaps it is a lucky star. Anyway in the bonspiel seat prize draw, out of some hundreds of tickets, Mrs. Jobb won third prize and Mr. Jobb 4th prize, an unusual occurrence.

The prize winners were: 1st, Mr. Harrold, Viking (26 piece silverware set); 2 Mrs. Graham, Tofield, (electric table lamp); 3rd, Mrs. Jobb, (Coleman Lamp); 4th Mr. Jobb (electric iron); 5th Mr. Clutterham, (Baby Ben Alarm clock)

Theatre Filled Three Times On Saturday

The John Deere Day at Tofield consisting of the presentation of four pictures, one a feature and three educational as applied to latest agricultural implements in general and John Deere in particular, was a success plus. The Variety Theatre was filled to the doors three times, at 1:00, 3:30 and again at 8:00. In all nearly a thousand persons must have seen these pictures, which probably constitutes some kind of a record for Tofield. The pictures were well worth a visit. Perhaps the most interesting was the picture of a new machine by which in dry areas pockets were made in the earth, thus conserving moisture.

Historic Cup On Exhibition

A cup of great historic interest was on exhibition at the curling rink during the bonspiel. Of excellent craftsmanship in silver it was the first cup to be awarded for curling in Alberta. It was won by a rink skipped by Matthew McCauley, father of A. J. H. McCauley, in 1888-1889-1890, three years in succession, thereby becoming the property of the winner. The games were played on the Saskatchewan river and iron "rocks" were used.

Successful Bridge

On Wednesday evening last the C.W.L. sponsored a successful whist and bridge drive in St. Francis' hall. Honors were won by: Bridge— Ladies 1st, Mrs. Morton; Gent's 1st, Mr. H. McGinitie; Ladies consolation Alice Moen; Gent's consolation, Mr. J. Yakubuski.

Whist—Ladies 1st, Nancy Ewanovich; Gent's 1st ————; Ladies' consolation, Mrs. Marcichiw; Gent's consolation, Mr. Kruel.

Mr. Geo. Cookson and daughter Helen visited the city Friday last. Helen returned on Friday evening and Mr. Cookson spent the week end with his son Jack.

LOCAL & PERSONAL

On Friday evening last the A T A held a very enjoyable party at the home of Mr. and Mrs. McDonnell. Due to the cold weather a number of the teachers from surrounding districts were unable to attend. Bridge was played and a very enjoyable evening was spent by those present.

Miss Lois Thompson and Winnie Worton spent the week end visiting at the Thompson home there.

Week end visitors to Edmonton included Miss Jessie Munro, Messrs M. Bethel and W. K. Soale.

Miss Jean Martin and Gordon Watt spent the week end visiting Muriel Malcolm.

Mr. Tom McBratney from Edmonton spent the week end at his home here.

Mr. Blake Clutterham and three friends from Edmonton motored to Tofield on Sunday afternoon, visiting at the Clutterham home here.

Miss Muriel Malcolm, Wes Taylor, Arthur Behrnes and Bill Worton motored to Edmonton on Sunday last.

Miss Esther Wick of Edmonton and Miss Lillian Wick of Viking and Mr. Robbins is visiting at the Harold Green home this week.

Mrs. M. McConnel is visiting Mrs Bertha Soale for a few days.

Two rinks skipped by Dr. Law and Glen Wood took part in the Holden bonspiel last Thursday.

Born: To Mr. and Mrs. Geo. Carter on Monday, February 14th, a son, George Vernon.

Born: To Dr. and Mrs. F. S. Breneman of Dhamtri, India, on February 17th, a son, Franklin Stauffer. By cable.

As we go to press word is to hand that Mr. Johnston Ferguson has been taken to an Edmonton hospital. Mr. Ferguson was taken ill some time ago, but recent reports were that he was progressing favorably.

Annual Meeting Of Ratepayers of M. D. of Beaver Lake

The Annual meeting of ratepayers of M.D. Beaver Lake, No. 486, was held in Ryley, Alberta, Saturday, February 19th.

Mr. J. S. Kubin of Vegreville was appointed chairman.

Minutes of the last Annual Meeting were read and adopted.

The Chairman briefly outlined the purpose of the meeting as being the consideration of the Financial Statement and any other matters [illegible]. [illegible] read the Financial Statement [illegible] a number of questions [illegible] other matters. A most thorough investigation of each relief application [illegible] relief [illegible] whatever possible. Rural school tax rates for 1937 were considered [illegible]

In replying to several questions, the Reeve and other members of council stated there are no single [illegible] aware that [illegible] 1937 school tax rates [illegible] high and it had been the intention of Council to make equitable adjustments when striking 1938 rates. It was pointed out however, that this may not be possible under the new school division scheme.

The Financial Statement was adopted.

The following resolution was submitted to the meeting and after wide discussion was [illegible]:

WHEREAS our Provincial government has established the larger [illegible] district [illegible] of rural ratepayers.

AND WHEREAS we are certain the new set-up [illegible] mean increased taxation and loss of local autonomy [illegible] of the Minister of Education and Departmental Officials.

AND WHEREAS the Department's increased costs, loss of local autonomy and centralized control will be reflected in better and more progressive education.

AND WHEREAS, we believe this larger division is not in the best interests of progressive rural education, nor within the financial means of the ratepayers of this Municipal [illegible] have suffered from repeated crop failures and depression [illegible] for agricultural products, over [illegible].

AND WHEREAS, we believe this larger division for rural schools [illegible] by our Provincial Government toward the establishment of the corresponding larger Municipal Districts and the usurpation of all local autonomy by Departmental Officials.

AND WHEREAS our Government [illegible] as its policy that the will of the people shall prevail.

THEREFORE BE IT RESOLVED:

THAT we the ratepayers of Beaver Lake Municipal District No. 486 [illegible] Provincial Government [illegible] of the Division [illegible] pending a plebiscite of all ratepayers within the Holden School Division No. 17, the Lamont School Division No. 18 and the Vegreville School Division No. 19. The [illegible] to prevail.

FURTHER be it resolved that no further action be taken by our Government to establish the enlarged Municipal Areas unless authorized by the electors within the proposed area involved through medium of a plebiscite vote.

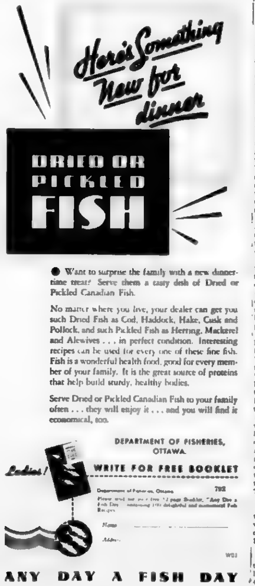
The secretary was instructed to forward copies of the resolution to the Minister of Education and to Dr. J. J. McPherson, M.L.A. and to have the minutes of this meeting published in the local papers.

The merits of a "Production Tax" as against taxation as now constituted were discussed but the meeting considered further information necessary in order to make an intelligent [illegible].

The Returning Officer reported that candidates for Division two and five have been elected by acclamation, Mr. H. B. H[illegible] for Division 2 and Mr. J. S. Kubin for Division 5.

Adjournment.

J. W. McMULLEN,
Secretary.



Here's Something New for dinner

DRIED OR PICKLED FISH

● Want to surprise the family with a new dinner-time treat? Serve them a tasty dish of Dried or Pickled Canadian Fish.

No matter where you live, your dealer can get you such Dried Fish as Cod, Haddock, Hake, Cusk and Pollock, and such Pickled Fish as Herring, Mackerel and Alewives . . . in perfect condition. Interesting recipes can be used for every one of these fine fish. Fish is a wonderful health food, good for every member of your family. It is the great source of proteins that help build sturdy, healthy bodies.

Serve Dried or Pickled Canadian Fish to your family often . . . they will enjoy it . . . and you will find it economical, too.

ANY DAY A FISH DAY

THE WORLD OF WHEAT

By H. G. L. Strange, Director Research Department, Searle Grain Co.

"There is not a single country where the entire population enjoys a standard of nutrition adequate for the maintenance of health."

This is the conclusion just arrived at by the Special Nutrition Committee of the League of Nations. Sir John Orr, probably the World's greatest expert on nutrition, last year came to the same conclusion. "Millions are underfed!" he said.

Farmers are eager to supply the extra food needed by city people, in return for which city people are eager to supply the additional goods and commodities which farming people so badly need. Why are not these simple exchanges taking place? Some say it is because the Capitalistic System, the Economic System, the methods of Distribution and Marketing, of Transportation and of Banking, have broken down, but this cannot be, for all these concerns and businesses are most eager to bring about the needed exchanges.

In my humble opinion it is actually Statesmanship the World over that has broken down. Those in charge of our affairs, by means of high tariffs, quotas and other restrictions are curtailing the exchange of farm products for city goods, feeling apparently, that the less we all buy and sell, somehow the more we shall all have. What a sad and pathetic fallacy! If it were not so tragic it would be just silly.

Following factors have tended to raise price: U.S. Government intends releasing gold to broaden credit basis — Moisture situation unfavorable in Tunis—Canada imports U.S. wheat—Germany buys [illegible] tons of Argentine barley. Many sections of Argentina very dry and conditions for corn crop unfavorable. Japan's refusal to disclose [illegible] program will probably start armament building race.

Following factors have tended to lower price: Rains [illegible] U.S. winter wheat belt—Beneficial showers in Algeria. All Indian crops doing well—Japan's rice supply increased—Spring ploughing commences in Russia—Favorable weather in Italy allays fears of a wheat shortage—Yugo Slavia winter crops in good condition—Increased exports of soy beans from Manchuria.

"Canada 1938"

"Canada 1937-38" which is possibly the biggest and which is generally admitted to be the most enterprising Canadian radio programme heard Friday evenings, celebrated its first anniversary last week. "Canada 1937" sponsored by the Imperial Tobacco Company Limited, broadcast for the first time on Sunday, February 7th, 1937. Except in the dog days of summer it has been heard weekly since.

Victor George, producer of the programme, is responsible for many direct innovations in Canadian and American radio. "Canada 1937" for instance, was the first commercial program on the North American continent to use transatlantic hook-ups. This was before other networks began to make a feature of the complex and difficult practice of hooking up with Europe and Asia for news commentaries on commercial programmes.

The historic conversation between Montreal, London and Geneva, it is maintained was actually the first time trans-oceanic three-way conversation was used.

"Canada 1937-38" was also the first programme in this country to make use of transatlantic facilities in order to bring opinions and impressions of Canadians abroad to Canadians at home. Interviews were carried on between Montreal and Berlin, Rome, Cairo, and many other European capitals.

The two most important centres of human interest for Canadians are the Dominion in which they live and New York, the city they visit for entertainment on a large scale.

"Canada 1938" covers both. Walter Bowles, the Roving Reporter, visits a Canadian city, town or village every Friday to review that district's contribution to Canada's national life and interview builders of Canada. This week he speaks from Lethbridge, Alberta. Lionel Shapiro is Canadian special correspondent for "Canada 1938" in New York. He brings news and gossip from Radio City as a feature on each weekly programme. And then, of course there is the orchestra and chorus, the singing of Russ Titus and other soloists.

At Port Said, on his present trip to South Africa, Lord Baden Powell was greeted by a Scout Peace of Welcome of 300, including Egyptian, French, Greek and British boys.

There are 1,055,551 Boy Scouts in the British Empire according to the last census. This is an increase of 41,615 over the figures for 1936.

HEALTH

A HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION AND LIFE INSURANCE COMPANIES IN CANADA

Preventing Pneumonia

Each year, pneumonia exacts a heavy toll from those who are in the prime of life, at the age when they are the greatest asset to their families and to their country. Any practical measure for overcoming this tremendous annual loss of life, with all such loss implies, is worthy of consideration by the individual citizen and by the community as a whole.

With the coming of colder weather, after the heat of the summer, which is sometimes prolonged into the autumn, we feel more energetic. We just snap into our work, enjoy brisk walks, and, altogether, feel a glow of health. But with the coming of colder weather, too many of us desert the out-of-doors and shut ourselves into homes and work-shops that are overheated, and we live in closer contact with other people most of our working hours.

Pneumonia is caused by germs, and pneumonia belongs to that group of diseases which are known as communicable. By this we mean that the germs which cause the disease are passed, or communicated from one person to another.

There is reason to believe that the general fitness of the body has a definite relation to the occurrence of pneumonia. It appears that fatigue, chilling, worry, lack of rest, dissipation and all such occurrences, or neglect of the body, resulting in what we might describe as a rundown state favour the germs of pneumonia and give them a better chance to do their deadly work.

It is important to understand and appreciate the relationship between the common cold and pneumonia. The respiratory tract is continuous from the nose down to the smallest branches of the bronchial tubes in the lungs. A cold is an infection of the upper part of the respiratory tract, and neglect of the common cold is often followed by an infection of the lower part of the respiratory tract, which is pneumonia.

Preventing pneumonia means keeping fit. Dress properly, and enjoy some form of outdoor life the year round. Secure sufficient rest and fresh air; do not become overfatigued, and, by dressing according to the temperature and the weather avoid exposure to cold and wet. Use some green vegetables and fresh fruits every day during the winter; your body need them. Shun coughers and sneezers. Wash your hands before eating, and keep your hands away from your face. Take care of a cold if you develop one. Keep away from sick people unless you are caring for them, and then take the precautions that are necessary in dealing with a communicable disease.

Questions concerning Health, addressed to the Canadian Medical Association, 184 College Street, Toronto, will be answered personally by letter.

Great Empire In North Area Pictured Here

Building of a mighty empire of gold, radium, oil, and agricultural wealth in the 500,000 square mile territory north of Edmonton was visioned by Dr. Christopher Riley, Edmonton assayist, who addressed members of the Gyro club at a luncheon meeting in the Macdonald Tuesday.

In tracing development of mining in the north, the speaker indicated sinking of the Eldorado mine, commencing in 1932, was the first important move. Goldfields, site of the present thriving town, was discovered in 1934 and a rich vein was uncovered on the east shore of Yellowknife Bay. The following year, important gold discoveries were made on the west side of the bay. Then Gordon lake sprang into prominence in 1936.

These discoveries with subsequent development, culminating in spectacular finds in the Yellowknife valley, 35 miles north of the bay, "have attracted attention of the mining fraternity all over North America," Dr. Riley stated.

Major activity during the coming summer probably would be concentrated in the Yellowknife area, with Gordon lake continuing rapid expansion and Goldfields thriving as a gold mining town, he predicted.

Extension of the Peace River branch of the Northern Alberta Railways north to the Fort Vermilion area would tap a potentially productive agricultural area that would be of importance in provisioning the northland while further extension of steel to Lake Athabasca would link with water transport, he suggested.

Then . . . And Now!

NELLIE McCLUNG AND THE FAMILY HERALD AND WEEKLY STAR

In her recent autobiography "Clearing in the West," Nellie McClung, pioneer girl of the covered wagon days, now a director of the Canadian Broadcasting Corporation, makes frequent and affectionate reference to the "old" Family Herald and Weekly Star—the paper that has since grown to be Canada's National Farm Magazine.

The Family Herald must have exercised a great influence on the pioneer girl who was destined to become a well-loved writer, for she writes:

"The Family Herald from Montreal brought the world to our door": "We read in the Family Herald that there were riots in the streets of Montreal" (this was the execution of Louis Riel). "Always there was the Family Herald with its great wealth of reading . . . ."

These are but a few of the references to the Family Herald made in "Clearing in the West."

Nellie McClung has written of the value of the Family Herald to the of the pioneer days. The value of the Family Herald to the modern farmer and his family has perhaps been best expressed by farmer William Burgess who says: "My wife and I always reckon the farmer who takes his local paper for the LOCAL news and the FAMILY HERALD for FARM news, stories and home features, gets the very best value his dollars will buy."

Dog Takes Over Litter Pigs As Own

BLUEFIELD, W. Va., Feb. 22 — "Pigs is pigs" to Farmer J. M. Riley —but pigs is pups to his dog "Shep."

The dog was despondent because her recent litter had been given away. Then Farmer Riley's hog died and left four offspring. Shep immediately took over the task of nursing the pigs. They're thriving.

Yellowknife Is Regarded As Richest Mining Field

REGINA, Feb. 22—Many mining men believe that possibly the richest mining area in all Canada lies in the Yellowknife country, Hon. T. C. Davis attorney general, stated Monday as he emphasized the necessity of Saskatchewan having a first class link with the northern districts.

He made the statement while discussing construction of a rock dam at Prince Albert, to provide an adequate landing field for seaplanes within a few minutes of rail communication. Mr. Davis said steps should be taken to see that as much northern traffic was routed through Saskatchewan as possible. Formerly all traffic was diverted through Edmonton but Goldfields' development had changed the picture and Saskatchewan was very much in the limelight now.

Building of the dam at Prince Albert was part of that policy. Saskatchewan, he believed, was the logical way for traffic to proceed north and he visualized increasing aerial development in the north this year.

Tofield Radio Address

EDITOR'S NOTE. In response to many requests we are publishing the address given over radio station C.F.R.N. by the editor on Friday evening last. We are gratified that so many people heard it and that it apparently came over with such extreme clarity.

Ladies and Gentlemen:—

As I listened two weeks ago to the splendid address of Mr. Galbraith of the Red Deer Advocate and last week to the wonderful verbal creation of Mr. Friedman of the Edmonton Bulletin, the thought came, how can I hope to follow such speakers and do justice to the occasion. Pondering thus, and despairing of ever reaching the inspirational excellence of last week's address, I decided to present to you as best I can a word picture of Tofield and the Tofield district. The Mercury which followed the demise of two previous Tofield newspapers, has been published under the same management for nearly twenty years. I have been told that it is a good little paper, I have also been told that the newspaper is no good. However, while I feel very grateful for compliments and even for criticism, I must confess that with the inevitable economic demand ever present, I am not unduly buoyed up by the one or cast down by the other. For essentially, week by week, a newspaper, must speak for itself.

Twenty or more years ago I read a short story in the Saturday Evening Post. It described the doings of a small mining town newspaperman. To him, his town was the grandest Eldorado ever discovered and for a time all went well. But like many other mining ventures this one began to fail, but so intensely loyal was this editor to his town, he continued to publish long after mining plants had been closed, people had moved away, and grass grew on the sidewalks which had resounded to the tramp of miners' feet. Finally he and the postmaster were the only ones left. But the day came when even the slow unwinding of red tape closed the post office. But still the editor carried on, foolishly with futile effort putting his papers in the post office boxes himself. Papers containing imaginary news of people long departed. My memory fails to record what finally happened to the poor fellow, but the point of the story is clear. Country editors everywhere live in the best town, in the best district, among the best people on the continent. No matter how they differ in other respects, they agree on this one thing.

The Town of Tofield received its name from Dr. Tofield, an early settler. And it is pleasing to recall that we still have with us Mrs. Tofield, who in spite of her advanced years, has a keen sense of humour and ready wit, qualities which helped her in many a stern nursing case in pioneer days. There are also a number of older settlers with us, Jack, George and Tom Cookson, Mr. Ross, Mr. McCauley, son of Matthew McCauley, first mayor of the Town of Edmonton, later to be the City of Edmonton, the Ingrams, Woods, Francis', Sears, John Morton and others.

Some years ago while enroute to Toronto, and while passing one of the many small villages adjacent thereto, the negro porter turned from looking out of the window and said, "Boy, they must pay a man a lot of money to live in a place like that." Not being a resident of Toronto or New York or even Edmonton, I was not capable of making a reply, but really it is not as bad as that. Have you seen our curling rink? Yes? No? Many curling visitors have I know, for even though the building is one of the best of its kind located in small towns in Canada and it is an ideal rink for dyed-in-the-wool curlers. It really is seen at its best during our mixed [illegible]. Then in this building largely erected due to the energy of Mr. W. J. Chapman there is some action. Four sheets of ice, two draws a night, sixty-four curlers, practically all drawn from a town of one hundred homes. Let me read an extract from an article regarding this event published a year or so ago.

Quote:

An observer will see desperate effort combined with chagrin and disappointment, joy and chagrin, hope and despair. He or she will see carefree lightheartedness lined up with or against stern, even morose endeavor. The observer has an opportunity of studying human nature in all its moods and varying characteristics. Short and tall, stout and thin men and women curl and sweep, all with a style peculiar to themselves. You really would not think sweeping a rock down the ice could be done in such a variety of ways. Take for instance the effort of the charming little lady who literally jumps up and down as she moves forward, her motion for all the world appearing as if she was governed by springs concealed in the rafters somewhere. Then there is the good natured gent who sweeps just like a barber dusting off a patron's face after a haircut, quick-like strokes artistically administered. Then there is the lady who nonchalantly sweeps six or eight feet in front of the rock, but the rock gets there and all is well.

They tell you that when throwing a rock you should have what is termed "the perfect stance." But at our mixed spiel the observer would have a real job finding it. It's probably there—somewhere but there are so many stances that finding the Perfect one is a bewildering task. Perhaps the enthusiastic young lady who throws her rock with a diving motion has it, or the gent who takes careful aim like an old time naval gunner, throws, and unlike an old time naval gunner, misses, has it; or perhaps the lady who standing almost erect, lifts her rock clear off the ice and sends it away smoothly, reminding one of the good housewife throwing the cat out of the kitchen door, has it; or perhaps the gent who after sending his rock away runs down the ice and midway, falls on one knee as if in supplication to Allah or the goddess of fortune, has it. The perfect stance still has to be found and labelled. End of quote.

During the winter the Mercury runs a more or less humourous column "Behind the Hog" prepared by Mr. A. B. Clutterham. Even among non-curlers this column is read with much interest.

Our hotel is one of the best small town hotels in the west, and Mrs. Malcolm, the hostess will be pleased to welcome anyone should occasion demand a visit.

Tofield is essentially an agricultural community, but the coal mining industry has for nearly thirty years contributed to the prosperity of the town. During the peak of production The Tofield Coal Company, under the managership of Mr. C. Gallinger has shipped out as many as 18 cars daily for considerable periods of time. Conditions of late years have considerably reduced this but there is still much coal shipped. As well as being manager of the Tofield Coal Company, Mr. Gallinger is also a purebred Shorthorn enthusiast, having been host to the Provincial Shorthorn Association at their annual field day on several occasions. He also has imported pure bred animals from Scotland and animals bred on his farm at Tofield were among the prize winners at the Royal Livestock Show held at Toronto this past year.

Quite a number of the farmers of the Tofield district are of the Mennonite faith. Industrious, thrifty, good farmers and good husbandmen, they are an asset to any community. They are unique inasmuch as they serve cream puffs among other things as an afternoon field lunch at threshing time and serve cooked apples with the liberality of vegetables at dinner, which is really a very fine way of being a little different. This perhaps accounts for the rotund appearance and cheerful expression of many of them. The ladies of the Mennonite homes are no mean cooks.

Quite a number of our farmers are of Norwegian extraction opening up the Bardo settlement many years ago and underwent considerable pioneering hardship in so doing. Today, some of the finest homes in the country are in this district and the Bardo Male Choir have a much more than local reputation.

As a grain growing centre Tofield bears honors with the best. At the International Grain Exhibition held at Regina a few years ago, Mr. Ed Kallal won high awards for spring wheat. There are several families of Kallals, all of whom as juniors or seniors, are connected with agricultural show endeavor. Right now Mr. Chas. Kallal has a carload of choice Herefords enroute to Birkenhead, England. In the poultry field we have Mrs. Cookson, famous for her turkeys and a pen of her Leghorns were the winners of the egg laying contest conducted by the Dominion Dept. of Agriculture, held at Lethbridge a year or so ago.

No country newspaper is complete without at least some rural correspondents, and while I am printer enough to appreciate the modern front page make-up, nothing pleases me more than to see spread right across from one side to the other of my paper head names of districts surrounding Tofield. Ketchamoot, Bardo, Lindbrook, Lakeshore, Amisk Creek, Kingman. Some of our rural writers have been with us since the paper started, others more recently, but to all I am extremely grateful.

The thanks of the country editors are due Station CFRN for initiating this fifteen minute broadcast, to which I would like to add my personal thanks and appreciation.

Thank you.

Logical Growth Hog Grading Policies

Speaking recently at the State Agricultural College at Ames, Iowa, L. W. Pearsall, of the Marketing Service Dominion Department of Agriculture gave a comprehensive outline of the production and marketing of hogs in Canada. The hog grading policies of the Dominion, he explained, have been largely responsible for a remarkable improvement in the type and quality of Canadian hogs now marketed as compared with those in 1923 when hog grading was first established in Canada.

In 1923 the Prov. of Alberta had only 2.4 per cent Selects of top grade hogs. The percentage for 1937 was 25.8. The Province of Saskatchewan had 4.8 per cent Selects in 1923, and 15.7 in 1937. The Province of Ontario had 21.1 per cent in 1923 and 32.0 per cent in 1937. The Province of Quebec had 10.9 per cent in 1923 and 21.3 in 1937.

These figures indicated the improvement that had been secured in the main hog producing areas in Canada, extending from the Province of Alberta in the West to the Province of Quebec in the East. The improvement was manifest in the practical elimination of non-bacon type breeds. It would be a conservative estimate to say that to-day approximately 90 per cent of commercial hogs in Canada was of bacon type. As it was relatively simple to distinguish quality as between bacon type and non-bacon type hogs, the hogs could readily be separated under a system of live grading.

As quality and type improved, however, the majority of hogs coming to the market were of bacon type and it had become more and more difficult to distinguish quality by appraisal of the live hog. In maintaining uniform grade standards, it had been necessary to check the live grading with carcass grading after slaughter. The results from such checks indicated clearly and significantly the limitations to which quality could be determined by appraisal of the live animal, and thus exposed the fundamental weaknesses of the system of live grading as anything more than a step toward a more intelligent basis for quality payment. It occurred frequently that the graders' decisions were questioned and it was significant again that on such occasions the interested parties agreed to a carcass grading. In all cases the carcass standards were accepted as the final grading. The logical answer to live grading problems was to substitute grading of carcasses for live hog grading. The carcass (also known as rail) grading of over 1,000,000 hogs during 1937 had effectively demonstrated that beyond doubt the application of carcass grading was practicable as well as necessary. The fact that during December 1937, almost one-third of all hogs marketed were carcass graded under a voluntary system was possibly the best indication of the producers' attitude toward such a grading system.

How Canada Hears "The Bad News"

Few people realize when they wake up [illegible] winter's morning and read "the bad news" that the thermometer is due to take another drop that behind the weather forecast in their daily paper there are approximately [illegible] reports carried over the Canadian National Telegraphs each day to make up the few words which tells whether the nation will [illegible] wave or sweat in a hot spell.

[illegible] to the Weather Man, the Canadian National Telegraphs play a vital part in the business of [illegible] conditions. Each morning at [illegible] o'clock, from Toronto, the telegraphs snap into action and some 250 points in Canada and the United States hear the good, or bad, news. Not a second is wasted in tabulating the reports. As each arrives from some other point it is tabulated and [illegible] pre-addressed blanks [illegible] other meteorological stations.

[illegible] of the day, approximately [illegible] reports are handled and it is from these that the Canadian, United States and Mexican meteorological bureaus make their complete forecasts, which again are sent forward by telegraph to the nation.

Athabasca Mayor Named By Draw

ATHABASKA, Feb. 22 — Lady Luck Monday night put Fred Mills into Athabasca's mayoralty chair for the next two years.

Former Mayor Dr. G. W. Meyer had appealed against a returning officer's decision which ruled out a ballot marked with red pencil. Judge [illegible] allowed the ballot and it squared the ballot count at 51 each for Dr. Meyer and Mr. Mills.

[illegible] the names of candidates were written on paper [illegible] in a hat and a stranger called [illegible] was Mr. Mills' name which [illegible] the draw.

Mr. Mills, [illegible] at an Athabasca council meeting, participated in approval of a five mill reduction in the town's tax rate to 80 mills.

Every Fifth Worker Has Job In Textiles

Figures compiled by the Dominion Bureau of Statistics show that among all Canadian industries the textile manufacturing industry stands second in number of employees and in salaries and wages paid. More than 21 per cent of all [illegible] [illegible] production.

Trans-Canada Air Test Range Beams

Vancouver, B.C., Feb. 21 — We are [illegible] to determine the behaviour of the radio range under all meteorological circumstances," W. A. Straith [illegible] Trans-Canada Air Lines, told [illegible] here in describing the progress of training flights now being conducted across the Canadian Rockies.

[illegible] electrical discharges of Aurora Borealis [illegible] western Canada have [illegible] effect on the Canadian radio range [illegible] aircraft along the Federal airway. He told of flying a Trans-Canada ship between Regina and Winnipeg recently when the whole north sky was brilliant with Northern Lights.

"The radio range signals [illegible] through perfectly even when other forms of transmission were affected" he said.

A Canadian pilot with long experience flying commercial transports, the speaker declared the Canadian radio range was second to none on the continent.

Skates Speed Telegrams On Ottawa's Icy Streets

Ottawa, Ont., Feb. 21 — When a [illegible] the city streets [illegible] Canadian National Telegraph messengers. It was [illegible] their messages on skates.

King Farouk Still A Scout

It was interesting to Boy Scouts throughout the world that the first public appearance of King Farouk of Egypt, a "brother Scout" and his bride Queen Farida was at a [illegible] with a review of Scouts, Guides and athletes. King Farouk was an active Boy Scout throughout his boyhood, and is now Egypt's Chief Scout.

Toronto Wives Threatening To Boycott Butter

TORONTO, Feb. 22—About 400 [illegible] under the leadership of Mrs. Bertha Lamb, president of Toronto Housewives Association pledged [illegible] but any more butter [illegible] born wishing this organization every success," Mrs. Lamb said.

Woman's Cough Saves Family

CARDSTON, Alta., Feb. 22 — [illegible] the dense smoke [illegible] room, Roy L[illegible] [illegible] of their home shortly before midnight Friday.

[illegible] men were helpless to halt [illegible]. Damage was estimated at [illegible].

700 Are Guests At Cats Party

SENECA FALLS, N.Y., Feb. 21 — Tommy Clark, Dr. W. Clark's alley cat, began the 24th year of life Sunday. Tommy was hailed on his 23rd birthday by 700 guests Saturday night but went to sleep in the midst of the [illegible].

Youth Ready Donate Blood For Ill Sister

NEW YORK, Feb. [illegible] — [illegible] New York Saturday under parole but doctors did not call upon him for immediate transfusion.

The sister, Mrs. Joseph H[illegible] was [illegible] her blood supply sufficient for the present. She has had four transfusions [illegible] Jan. 26.

The tall, slim Canadian explained he was working as a hotel porter at Napanee, Ont., when he received word that his 18-year-old sister was ill

WHY CHEVROLET HAS THE BEST ENGINE for a LOW-PRICED CAR

MODERN MODE STYLING

PERFECTED HYDRAULIC BRAKES

GENUINE KNEE-ACTION

ROOMIER ALL-SILENT ALL-STEEL BODIES

VALVE-IN-HEAD ENGINE

FISHER NO-DRAFT VENTILATION

NEW TIPTOE-MATIC CLUTCH

BECAUSE the Valve-in-Head type engine is the most efficient known, it's the kind you find in record-breaking racing cars, speed boats, airplanes . . . and in the new Chevrolet!

Valve-in-Head efficiency means that more power is developed from gasoline. Or you can put it this way . . . Chevrolet gives owners up to 27 miles per gallon of gas without sacrificing the full 85 H.P. performance needed for acceleration, hill-climbing and smooth cruising speed.

Add to this the fact that Chevrolet's exclusive Valve-in-Head Engine cuts down oil consumption to a new low minimum — reduces carbon formation — is famous for dependability . . . And there you have the reasons why a Valve-in-Head Engine is the very best kind for a car that emphasizes low running and upkeep costs.

Come to our showrooms today. Take the wheel and experience the thrill of Valve-in-Head power! Prove for yourself its matchless economy!

CHEVROLET

RAY COATTA, PROPRIETOR

KETCHAMOOT

Mr. Alix Kleinschroth is busy sawing up the neighbors wood.

Mrs. Gunder Ringen was able to return home Sunday from an Edmonton hospital after a recent operation.

Master Harold Barnes is still confined to bed with lung trouble. It is thought he will have to be taken to the hospital for treatment.

Miss Irene Oliver of Woodlawn spent the week end with her grandmother Mrs. Peter Lee.

Mr. and Mrs. A. F. Schultz were passengers on the excursion train to Edmonton Friday of last week.

Mr. and Mrs. Chas. Whillans entertained the Social Credit Study group at their home Friday evening of last week.

Mr. and Mrs. Oscar Barnes were able to return to their own home one day last week. Miss Kathleen Ingram is staying with them for the present.

Mrs. Adolph Weder of Miquelon district visited a few days the first of the week with home folks, the Kleinschroth family.

Mrs. J. Eckebrech and two children returned to their home in Oklahoma, U.S.A., Monday evening after several weeks visit with Mrs. Eckenbre his mother, Mrs. F. Sutton and other relatives and friends.

Mr. and Mrs. Julius Lerbekmo motored to Edmonton Tuesday. They will be accompanied home by Mrs. Harry Welch and little daughter who has been in the hospital since shortly after Christmas.

Mrs. G. W. Sears, Miss Ethel Coombes, Messrs. J. H. Ingram, Henry McGinitie, Albert and Stanley Sears attended the C.C.F. card party in Tofield Friday evening.

The regular monthly meeting of the Ladies' Aid will be held next Wednesday, March 2nd, at the home of Mrs. Henry McGinitie. A cordial invitation is extended to all.

LAKESHORE

Mr. and Mrs. James Gimmel and family of Leslieville have been visiting at the J. H. Johnson home for a few days.

Mr. and Mrs. R. H. Phillips, Mrs. O. Eaton and R. C. Phillips attended the funeral of John Phillips which was held in Ponoka on Friday last.

Mrs. McConnel is spending a few days with Mrs. Bertha Seale.

The Lakeshore Social Credit Group held a meeting at the T. A. Jones home on Tuesday evening.

KINGMAN

Mr. Jacob Beness of Bawlf spent the week end at the home of Mr. Andrew Johnson.

Mr. Helge Regher has been ill for several days but is around again now.

There has been quite a lot of sickness around town, Dr. Law having to make several trips here. Quite a number of the school children are ill with the flu.

Mr. Jack Heron was sawing wood in town last Saturday for Mr. Albin Anderson, Mrs. P. Simonson and Mr. S. Simonson.

Mr. David Stutzman and Mr. Brushart and Mr. and Mrs. Tom Gibson and children returned home from a trip to Ontario where they visited for two months.

Ole R. Gstead got a carload fo coal and is busy supplying the people of Kingman with coal.

About twenty residents from Kingman visited Edmonton last Friday.

Mr. Ed. Loukser has gone to Edmonton for a week to recuperate after having the flu.

Mr. Albin Anderson is in charge of the store this week.

McKENZIE

Mrs. Englesham and Jean visited with Mrs. Roberge on Monday.

Mrs. Bailey visited with Mrs. Eric Anderson last Thursday.

Mrs. Eric Anderson was home again for about two weeks but was taken back to the Royal Alex hospital at Edmonton on Friday for treatments. We all hope that she will come back much better. Her father from Grand Prairie visited her, returning on Friday.

Mrs. Bethel and Hubert Miss Johnson, Mr. and Mrs. Jacobson and Mavis were supper guests at Harold Weatherill's home on Sunday evening.

Born To Mr. and Mrs. Schramm a daughter on February 22nd.

The Social Credit Group met at the T. Jones home on Tuesday evening. There was a good turn out and an interesting report was given by Mr. R. Murray from a social credit meeting held in Edmonton recently.

The Club met at the home of Mrs. H. Weatherill on Wednesday afternoon.

Katie Doerlass is working for Mrs. Bertha Seale.

Carrie Kuchenorie is assisting with the work at the Secord home.

We are sorry to hear that Mr. Johnston Ferguson had to be taken to the hospital.

Arrived For Banquet

Girl Five, Saves Chum From Death

CADOMIN, Feb. 21—Lynne Sturla, five-year-old daughter of Mr. and Mrs. Alwyn Sturla, formerly of Edmonton, is Cadomin's heroine for having saved a playmate, Douglas Purvis, also five, from drowning in the McLeod river here.

The two children had been playing on the ice near an open hole, and Douglas, going too near the edge, fell into the water. Lynne at once went to his rescue, stretching herself upon the ice and catching hold of her chum's clothing, of which she kept hold until help arrived in response to her cries. Mrs. Sturla was first on the scene and lifted the child out of the water.

Douglas is the son of Mr. and Mrs. D. Purvis, former residents of the Camrose district. Mr. Purvis is now waterworks superintendent here.

Boy 15, Is Killed In Gun Accident

THORHILD, Feb. 22.— Robert McGregor, 15, son of G. K. McGregor, farmer was shot and killed here Monday night by a pump gun allegedly held in the hands of his 13-year-old chum, Joseph Rosenberger, jr. The mishap occurred in a blacksmith shop owned by Donald McGregor, uncle of the victim, when the boys found the gun and the Rosenberger boy accidentally pulled the trigger. The victim was shot in the head. No inquest was to be held.

HOCKEY

Tofield met Viking in a league encounter at Tofield on Monday and emerged from a blistering encounter with a 7-1 victory. As a hockey game it was nothing sensational, both teams have given better demonstrations of the ice game here before. There were, of course flashes of good hockey but these were marred by a Donnybrook atmosphere (without the Irish.)

The game opened fairly fast and after a few minutes of play, Tofield opened the scoring when Glover sifted through for a goal. This was followed by another by Worton and still another by Glover. End to end rushes featured part of this period, at other times the play was very ragged for minutes on end. Tofield seemed to have suffered by their three weeks lay-off and Viking apparently could not get going right. The period ended 3-0 for Tofield.

Viking opened the scoring in the second period when after a rush and a good save they caught Bowick out of his goal. Tofield came right back however and added another by Glover and followed this up with one by Machtmes, making the score read 4-1. Play was getting rough and fast and referee Evans was kept busy keeping the game in order.

The third period was the fastest of the three and tempers were on edge. Whyte made it 5-1 for Tofield, Glover sifted through for another while Smith wound up the scoring by making it read 7-1.

Bob Evans referee.

The Tofield H. S. Hockey team played the Bardo High School in a fast game of hockey. Tofield came out on the long end of a 4-1 score. Tofield scorers were John M with three goals and Art Smith with one. Leonard Stauffer made Bardo's goal. The Midget team also played Bardo Midgets Friday night, winning by the score of 3-1. Jack Whyte refereed both games.

Squibs for Skips in the Spiel

An over-anxious brooding, doth beget
A host of fears and fantasies deluding:
Then Skippers, lest the torments be intruding
Just bide a wee and dinna fret.

0-0-0-0

From the rocks that are deceiving,
From the foolishness and grieving,
From all envying and hating,
Skips and thirds alienating.

0-0-0-0

Ere the game your life defile,
Go behind the glass and rest awhile.
If you set down at set of Sun,
And count the ends that you have won
And counting find, one glance shout kind,
Then you count the day well spent.

But if through all the livelong day,
You've won no ends, by you or may,
If through it all, you've nothing done
that you can trace,
Then count that day as worse than waste.

0-0-0-0

As I have said B4 there is no luck in curling. The rinks that get the most rocks closest to the button wins the game.

LINDBROOK

A dance was given at the school here Friday evening, 25th of February by the branch of the Junior Red Cross here. The "Lindbrook Hot Shots" were the orchestra engaged. Quite a large crowd assembled and all had a good time. The ladies of the district donated the cakes. Admission was by ticket, gents 35c, ladies 10c. Despite this it seems it wasn't what is known as a financial success so perhaps we'd better have another one before spring, as the Red Cross is certainly in need of all the help it can get these days of war and rumors of war.

There has been no school this week owing to the absence of the teacher, Miss V. Phipps, who is away, her father, Mr. W. T. Phipps, of Strome, Alta., being dangerously ill in Daysland hospital. We hear that he is still very ill but barring complications out of danger.

We began to see the "good earth" again after gazing at nothing but snow for months, and it certainly is going fast now. Still we know it was not mild, what with bonspiels and 2 openings of parliament.

A Whist drive was given Monday evening February 28th, at the home of Mr. and Mrs. A. C. Scott by the ladies of the L.C.C. to their friends and men folk. Court whist was the order and was quite a pleasant change from the ordinary style played. Eight tables were in play and at the finish the winners were: Ladies' 1st Mrs. J. Bailey and the consolation, "Miss Fran is Kortsmen." Gent's 1st Mr. Robinson, Consolation Mr. Chas. Marden. After the game an exceptionally dainty and plenteous lunch was served by the ladies and enjoyed by all. Everyone present wish to extend their thanks to the ladies of the club for a very pleasant evening.

School reopened Monday after being closed for the week.

Bingo Party

On Friday evening, under the auspices of the Tofield Senior Hockey Club, a bingo party will be held in the curling rink. There will be plenty of prizes and lots of fun for all. Come and spend a pleasant evening and help the hockey boys.

BARDO

BURT—JOHANSON

Agnes Jeanette, eldest daughter of Mr. and Mrs. Otto Johanson of Bardo was united in marriage to David Burt of Edmonton. The marriage took place in Edmonton on February 23, 1938. They will reside in Edmonton. Congratulations.

Mr. and Mrs. Otto Johanson entertained at a dinner on Sunday in honor of Mr. and Mrs. Robert Burt. Those present were Rev. Wessel of Edmonton, Mr. and Mrs. I. Moen and family, Mr. and Mrs. Falheid, Mrs. Marthe Hagen, Martin Hagen and Mrs. John Westby.

Miss Irene Rude entertained in honor of her mothers', Mrs. C. Rude, birthday on February 23rd. After a social hour a delicious lunch was served, Mrs. Nora Anderson and Mrs. Alice Finseth assisting. Those present were Mesdames Eggen, Brechan, Hirberg, Jenson, Skugness, Steen, Hagen and Rorem.

Mrs. Albert Haukedahl has been ill but is improving now.

Mr. and Mrs. John Westby are moving from the Hagen place to the A. Finseth farm near Ryley.

Mr. and Mrs. Reuben Eide moved from the John Ness farm to the Eide home.

Miss Mabel Aasmoes has returned from Edmonton and will assist her sister Mrs. Westby for a while.

Mr. and Mrs. Monrad Finseth entertained the young people last Friday evening.

Bardo 3 and Round Hill 2 was the result of the hockey game played at Round Hill last Wednesday night. Bardo lineup—Goal, Art Moen; Defence, A. Steen, E. Steen; Forwards, G. Olsen, L. Stauffer, L. Foshaug, I. Foshaug, P. Anderson and B. Steen.

Catherine Johanson has returned from Grande Prairie where she has been for five months.

Mrs. Alma Foshaug entertained the Bardo Ladies' Aid last Thursday.

Edna Steen returned home last week after a two months' stay in the city.

FOR SALE: Seven head of Red Poll cows, four years old. Some coming fresh shortly. Apply E. McClymont, Tofield Phone 1910

KETCHAMOOT

Miss Maude Wildman was down from Edmonton Sunday and spent the day with her grandmother, Mrs. Henderson and aunt, Mrs. W. A. Mitchell.

Mr. and Mrs. J. H. Ingram were passengers to Edmonton Friday of last week.

Mrs. Bruha of Shonts spent a few days with her daughter, Mrs. H. McGinitie last week.

Mrs. M. Davison and daughter Edith went to Calgary one day last week. Mrs. Davison returned home Saturday and Miss Edith remained to take a few weeks business course.

Torvel Nomeland and Harld Schultz motored to Edmonton Sunday. They were accompanied by Mr. and Mrs. Ralph Barnes who took their three-year-old son Harold to the hospital.

Messrs. James Rutigan and nephew William Ingram are plastering Mr. and Mrs. Stanley George's new house at Cooking Lake.

A farewell surprise party was held at the Lawson home Saturday night in honor of Mr. and Mrs. Geo. Lawson who are taking up their residence in Tofield shortly. Owing to the roads and sickness in the neighborhood, not a large crowd was present, but a pleasant evening was spent by those present. We regret to see Mr. and Mrs. Lawson leaving our district after residing 23 years here, but our best wishes go with them to their new home, may they have many happy years there. Guests were: Mr. and Mrs. Herman Lawson and family, Mr. and Mrs. Roy Lee and family, Mr. and Mrs. C. A. Ingram, Mr. and Mrs. I. McGinitie and family, Messrs. Charles Whillans, Lorne Lee, Mrs. G. W. Sears, Mrs. Elsie Carlisle, Misses Nellie Lindsay, Eileen Stirrit, Marguerite and Joyce Whillans.

Mrs. Henry McGinitie and her mother, Mrs. Bruha, entertained at a miscellaneous shower at the home of Mrs. McGinitie Thursday afternoon of last week in honor of Miss Janet Brown, whose marriage takes place shortly to Mr. Martin Lawson. The room was tastefully decorated in pink and white. A large crowd was present and several from the Lindbrook district. Little Miss Merna and Noreen Carlisle presented the gifts to the bride in a decorated baby carriage. Miss Marie Lawson assisted in opening the many parcels.

Those present were: Mrs. V. Appleby, Mrs. Harrison, Mrs. Carlisle, Mrs. Emily Carlisle, Mrs. Elsie Carlisle, Mrs. C. A. Ingram, Mrs. J. H. Ingram, Mrs. K. Bruha, Mrs. M. Glenn, Mrs. John Lee, Mrs. Ralph Barnes, Mrs. A. Smith, Mrs. H. Kleinschroth, Mrs. A. Kleinschroth, Mrs. I. Gill, Mrs. A. Weder, Mrs. Stine, Mrs. Joe Brown, Mrs. Stanley Brown, Mrs. John Brown, Mrs. Maurice McGinitie, Mrs. A. Lee, Mrs. Schultz, Mrs. Foyd, Mrs. C. Coombes, Mrs. Geo. Lawson, Mrs. Henderson, Mrs. W. A. Mitchell, Mrs. Theo Genoski, Mrs. Albert Sutton, Mrs. Gray sr., Mrs. Tod Gray, Mrs. Wm. Ingram, Mrs. Wendell Wiley, Mrs. Leo Ovelson, Mrs. H. McGinitie, Mrs. G. W. Sears, Misses Janet Brown, Ethel Brown, Nellie Lindsay, Marie and Evelyn Lawson, Ethel Coombes, Margaret Mitchell, Kathleen Ingram, Edna Gray, Irene Oliver, Lillie Morden, Eileen Stirrit.

John A. Anderson Elected Councillor For Division One

In the election held on Saturday, February 26th, for the office of councillor, representing division one Cornhill Municipal District, John A. Anderson was elected. Polling took place at the Farmington school. The returning officer was A. C. Dodds; deputy returning officer C. L. Simonson. The results were:

John A. Anderson 83
Jacob Beness 19

King Cheered As He Enters Boxing Arena

LONDON, March 2— The King last night attended a public boxing match, going to Albert Hall with his brother, the Duke of Gloucester, to witness bouts of youthful amateurs from the London suburbs, staged by the Federation of London Boys' Clubs as an annual event.

While making their way to ringside seats the royal brothers received a tremendous ovation from the crowd, which burst spontaneously into "God Save the King."

SEWING WANTED: Prices reasonable. Sewing, Mending, Darning. —Apply to Mrs. Janet, Tofield.

THE CRITIC

BY RAYMOND CRAWFORD IN THE CANADIAN NATIONAL MAGAZINE

He is always with us, no observant person can fail to note the amount of criticism which is encountered daily. Criticism general and particular good, bad and indifferent. Criticism is universal, and necessarily so, because everyone has opinions of men and movements. The word "criticism" means judgement, and all of us are called upon to pass judgement continually on a host of things—not necessarily adverse judgement, though unfortunately, criticism has come to mean this—which is a sad reflection on the generosity of society in general. Criticism is offered with such an air of finality and dogmatism that one naturally inquires what are the qualifications necessary for this difficult task, because certain conditions are essential before one can be a fair or intelligent judge.

In the first place he who would judge his fellow, or society, must have an honest and adequate standard. This is one of the most difficult things in the world because so much depends upon the judge himself, on his ability, his experience, his temperament, his nature, whether he is generous or the reverse. When I pronounce on the mind or character of another what I see is partly the man and very largely myself. I am very apt to attribute to another my own motives, to see in him my own disposition or prejudice, or magnanimity as the case may be; in fact I cannot get away from myself in my view of another. Hence, the first qualification for judging is an unbiassed mind from which all egoism has disappeared.

The second requisite is a competent knowledge of the person, or matter, to be judged. I must ask myself, do I know all the facts concerning the case and have I estimated all the conditions which would account for the facts which I do know? For example, a man is brought up in a court of justice, the bare and ugly facts are apparent but behind the facts is the man, perhaps better and perhaps worse than the facts reveal; for in the nature of things only a small part of the man is disclosed by his deeds, so that even justice, so-called must be a very imperfect thing. Only an expert and an impartial one is fitted for the duty.

The judge on the bench is an expert in law and he must rid himself of all prejudice, weigh carefully the facts and, with the aid of principles and precedents give his decision. How many of us could thus qualify? How many can lay aside self-interest or predilection and judge a man or a measure on his or its merits?

Lacking these qualifications in the judge criticisms may easily be shallow, thoughtless and even cruel. We have the strange spectacle of the literary critic who could not write a book in a hundred years. We have criticism of laws and measures and policies by those who could not sustain their contentions for 5 minutes before a competent antagonist, and there are those who are unable to detach themselves long enough from their own particular interest to take a reasonable view of anything. One of the commonest of criticisms is that of men in public positions. The smallest mind seems frequently to be able to direct the biggest enterprises; of course this critic has never run any enterprise of his own; but that to him is a negligible consideration. He has a voice with which he brays or a pen with which he spills limitless ink. We have often heard vast movements settled and things momentous disposed of round the stove in the rural grocery store—things economic, political, international, everything in heaven or on earth. Weighty utterances come from armchairs with all the positiveness of boundless sagacity. It is an awe of unrestrained and ill considered talk.

One unfortunate aspect of this unfortunate practice is that much of the criticism is negative—which of course is easy. One may have a hundred admirable qualities but ungenerous human nature sees the one inevitable fault, or one may have made some notable contribution to the well-being of society but let any little defect appear and the sharpshooter becomes busy.

The conclusion of these observations is: Before we make others—their character or achievements— the subject of our strictures, let us take a good look at ourselves, and upon ourselves pass stern judgement.

FOR SALE—A used McCormick-Deering Tractor, ready for work. Apply M. C. Hammond, Tofield.

KINGMAN

Mr. Jim Fletcher returned home last Friday from Galveston, Texas.

The regular meeting of the Baptist Missionary Circle will meet with Mrs. Martin Berg on March 8th at 2 o'clock.

The Rummage Sale which was held in the Kingman Hall was quite well attended considering the roads and sickness. The proceeds of the sale amounted to $12.20.

The election which was held on last Saturday at Farmington school resulted in a win for Mr. Anderson. Mr. Anderson received 83 votes and Mr. Jacob Beness of Bawlf 19 votes.

Mr. Pete Erickson and family have rented a farm from Mr. Bjergum and moved this week.

Mrs. Lowery and son Martin of Bawlf have moved back on their farm just vacated by Pete Erickson and family.

Mr. Alex Asp and Bernice and Mr. Grahn were Edmonton visitors last Friday.

Tofield visitors last Friday were Mr. Vance and Mrs. Reger and son Allen.

Mr. Andrew Johnson and Mr. Albin Anderson made a trip to Ryley last Thursday.

The Rocky Mountain Rangers will hold a dance in the Kingman Hall on March 7th.

We extend our sympathy to the Hovelson family.

Mr. and Mrs. Ragstadt and Sonia visited at the Regness home on Sunday afternoon.

St. Patrick's Dance To Be Held In Tofield

On the 17th of March, the Irishmens day, a dance will be held in the Variety theatre. The Swing Sisters from Edmonton have been engaged to supply the music. This orchestra has a good reputation and is sure to please. A good time is assured. Everybody come and celebrate St. Patrick's Day. The proceeds are in aid of the senior hockey club.

LOCAL & PERSONAL

Mr. and Mrs. Foreman returned this week after visiting in the east for some time.

••••••••

Miss Gwen Firth spent the week end at her home here.

••••••••

Mr. J. J. Hannan visited Tofield on Saturday. Bud has been at Goldfields for some time and due to an injury received to his hand he came out for a short time.

••••••••

Don Bearnes who is attending school in Edmonton spent the week end at home.

••••••••

Mrs. Smith of Edmonton is visiting Mrs. Malcolm.

••••••••

The Misses Ella Taylor and Margaret White nurses in Edmonton visited their homes on Sunday.

••••••••

Norman Gasser spent the week end at his home here.

••••••••

Mrs. W. E. Seale is spending a few days at her home here.

••••••••

Mr. Geo. Brace left on Saturday evening for Summerside, P.E.I., where he will visit with his parents.

••••••••

Mr. and Mrs. M. McHeffey spent a few days visiting at the F. McHeffey home last week.

••••••••

Mr. W. Worton left on Tuesday evening for a few week's trip to the coast.

••••••••

The next regular meeting of the U.F.W.A. will be held at the home of Mrs. Geo. Cookson on Thursday Mar 10th. All old and prospective members are requested to attend.

Do Pussy Willows Mean Spring?

If so, Spring must be here for on Saturday last, Mr. V. Bates from Hastings Lake brought in some pussy willows all out. The weather the past few week's has certainly had every indication of Spring. Sun shining brightly with a good deal of warmth and water running down the streets. It is colder now but can still be classed as "good winter weather."

Here's A Good Start For Real Fish Stories

We've listened to the annual run of fish stories with quiet patience but a recent one just about polished off the scene [illegible]. Anyway, [illegible] ward, head of the Fish and Game Department of the Canadian National Railways, vouches for the story.

It seems that a New Brunswick guide with a party was out in the woods and they came across a bear with its head all smeared over with [illegible] with the head stuck in [illegible] that Bruin [illegible] Bruin [illegible]

Presently they saw Bruin go to a nearby stream and crouch on the bank close to the surface of the water. In the stream were several fish which, seeing a few [illegible] buzzing over the water, jumped to catch the flies. The bear shot out a lightning paw and scooped in the fish. H'mm.

3-Year Tot Saved By Red Sweater

AIRDRIE, Alta., March 1.—A red sweater worn by three-year-old Wayne [illegible] probably saved his life when terror-stricken, he was caught on a bridge as a passenger train approached. Mrs. Richard Wallace of Airdrie, 25 miles north of Calgary, rescued the boy.

Crouched on the inside railing of the bridge, afraid to move across the open ties, Wayne watched the train [illegible] for the [illegible] crossing as Mrs. Wallace caught a glimpse of the bright red [illegible] the track she [illegible] and just [illegible] her way to safety as the train roared across the bridge.

Mrs. Fisher Suggests

FOR BREAKFAST

Canadian Creamed Fish On Toast

Take a cup or a cup and a half of any Canadian cooked or canned fish, flaked; season the fish with salt and pepper and a dash of lemon juice. Make a white sauce by blending two tablespoons of butter with two tablespoons of flour, adding a cup of milk and cooking the mixture until it is thick and smooth, stirring constantly. Then combine the sauce and the fish to heat the combined mixture and serve on slices of buttered toast. If desired, a tablespoon of minced parsley and one hard-cooked egg in slices may be added to the sauce before it is combined with the fish.

Canadian Fish and Shellfish are especially good foods because they are so easily digested and are rich in vitamins and health-giving mineral substances.

FOR LUNCHEON

Canadian Fish Cutlets

Flake two cups of any desired kind of Canadian fish or shellfish and add salt and pepper to suit the taste and two tablespoons of onion juice, two teaspoons of lemon juice and, if desired, two teaspoons of Worcestershire sauce. Add to the fish and seasonings two cups of thick white sauce which has been thoroughly chilled. Form the mixture into cutlets and roll in finely sifted bread crumbs. (It is well to chill the cutlets again after they have been shaped.) Bake the cutlets in a greased pan in a moderate oven or fry them in deep fat, having the fat sufficiently hot to brown an inch cube of bread in [illegible]. The white sauce may be made by melting a quarter of a cup of butter, or using a quarter of a cup of cooking oil, blending in a half a cup of flour, adding two cups of warm milk, and cooking the mixture until it is thick and smooth, stirring constantly. A tomato sauce goes well with the cutlets.

Canadian Fish Foods, rich in nutritive value and in vitamins, are very easily digested because of the [illegible] of their flesh.

FOR DINNER

Canadian Fish Loaf

Take two cups of Canadian fish—"left-overs" if desired—or a pound tin of canned fish, flake the fish and add to it two cups of fine, soft bread crumbs, two beaten eggs, three-quarters of a cup of milk, salt and pepper to suit the taste, a tablespoon of onion juice. After mixing the ingredients well, place them in a greased pan, dot with butter, and bake in a moderate oven (350 degrees F) for three-quarters of an hour or until the loaf is firm and browned.

Any kind of Canadian fish may be used in making this loaf. If canned fish is used, the oil from the tin should be poured in with the other ingredients and the bones crushed and left with the fish. The bones of fish contain calcium and the oil contains vitamins. Creamed peas or tomato sauce may be served with fish loaf as well as baked potatoes.

Canadian Fish Foods come from pure, cold waters and they are caught and marketed by the fishing industry in accordance with the most approved methods. There's no food more healthful or more nourishing.

C.N.R. Offers Special Coast Travel Bargain

Winnipeg, Feb. 28.—An attractive rail travel bargain to the Pacific Coast is announced by R. Creelman, passenger traffic manager, Canadian National Railways. These special low fares will be available from all stations in Ontario—Port Arthur, Armstrong and west—Manitoba, Saskatchewan and Alberta to Blue River, McBride and points west to Vancouver and Victoria, during the period March 18th to 26th. Tickets will be good for thirty days return and there will be a choice of accommodation—in air conditioned coaches, tourist and standard sleeping cars.

Similar low fares will be on sale from Pacific Coast points to the Prairies from March 19th to 27th, with a 30-day return limit. On the westbound excursion, stopovers will be allowed at Edmonton, Calgary and points west while on the excursion from the Coast to the Prairies, travelers may break their journey at Jasper, Calgary and Edmonton only.

In planning this excursion, the railway felt that it would have a particular appeal at this season of the year to the residents of the Prairies to get away for a few weeks to the earlier spring at the Coast cities. Each year, this excursion is growing in popularity and Mr. Creelman states that preparations are being made to handle a record number of passengers this spring.

Not until they are flat on their backs do some folks learn to keep looking up.—Drum Major.

THE WORLD OF WHEAT

By R. G. L. Strange, Director Research Department, Searle Grain Co.

"Beginning August 1st next no Garnet will be allowed in No. 3 or No. 4 Northern." Parliament is now considering this proposed change.

This news will please farmers in the southerly Marquis areas, but it is causing much concern to those in the north who so far have depended upon Garnet for a living.

"Shall I use another variety, or shall I stay with Garnet?"—many ask.

Garnet growers, it seems to me, will now have to accept additional risks whatever they may decide to do. If they substitute another but later variety for Garnet the price might be better but if an early frost occurs then that variety might produce only lower grades and a low yield. If farmers, on the other hand, stay with Garnet, while they would have a better chance of avoiding frost, and so of producing a high grade and a high yield, yet the price for Garnet might be lower. "How much lower?" "Nobody knows"—is the answer, but at this moment No. 1 Garnet is selling at about No. 3 Northern price, and 3 Northern at Liverpool is commanding a high premium over all other foreign wheats.

One piece of advice, however, I can give—If you stay with Garnet be sure to purchase a few bushels of pure certified seed, so that eventually you will produce a crop of pure Garnet, grade No. 1.

St. Paul once said "Prove all things. Hold fast to that which is good."

Following factors have tended to raise price: Overseas purchases increase—President Roosevelt favors higher commodity prices—Frosts experienced in sections of France—Wheat acreage in Italy less than last year—Argentine Government reports 10 percent of seeded corn acreage a total loss—U.S.A. will set up "Ever Normal Granary"—Wintry weather and heavy snows reported in Jugo-Slavia.

Following factors have tended to lower price:—Indian wheat prospects continue good—Heavy rains reported Italy after a useful sunny spell—Bulgarian wheat, barley and rye acreage greater than last year—Imports of bread wheat into France prohibited—Chinese and Japanese rice crops larger than the good crops of 1937.

Attendance For Alberta Schools Shows Increase

Reporting an increase in school attendance throughout the province during 1937, the thirty-second annual report of the provincial education department, tabled in the legislature by Premier William Aberhart in his capacity as minister of education reveals a reduction in educational costs through operation of the larger school units.

"While it was not the purpose of the new organization to show that educational service could be carried on at a lower cost, it happens that in every division the actual expenditures have been less than during the last year of operation under the district system," said G. Fred McNally, deputy minister of education.

During the fall of 1936, the number of school divisions organized was 11, comprising 744 rural school districts. All began operations early in 1937, said Mr. McNally, and one year's experience with the new organization was now available for consideration.

The report of the chief inspector of schools, E. L. Fuller, reviewed the larger school units and discussed objections. Trustees, secretary-treasurers and others personally affected had resisted the new administrative set-up and objections had been raised in districts whose mill rates formerly were low.

"Where the divisions are functioning, most of the people have come to a position of acquiescence, realizing that the divisional board has the interests of the children and ratepayers at heart.

"Teachers under the new system have more freedom to embark on improved educational policies without fear of misinformed local interference; their responsibility to a trained and experienced divisional office, authority has made possible district improvements in former poorly managed schools and has increased the possibilities in schools where intelligent trustees formerly held sway," said Mr. Fuller.

"Educational standards have been raised and increased services given," he added. "Realizing this, the public in general has become more and more enthusiastic about the possibilities of the new type of administration."

Recently a man crossed Broadway in New York, by walking a rope stretched from the top of one skyscraper to another—the reward.—Washington Post.

HEALTH

A HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION AND LIFE INSURANCE COMPANIES IN CANADA

Pneumothorax

When tuberculosis is diagnosed, what is the patient to do? The answer to this question is REST. This is what the doctor will tell him to do, because everyone will agree that in the treatment of tuberculosis, the most important point is rest, physical and mental.

In tuberculosis, the lung is diseased, and through rest the activity of the lung is diminished and so the healing forces are given a better chance to arrest the disease process, halt the progress of the disease and bring about a cure.

At birth, air first enters the lungs when breathing begins. This air, which is at atmospheric pressure, causes the lung to expand, filling the chest cavity. Owing to their elasticity the lungs tend to contract against the atmospheric pressure and this creates a slight negative pressure or suction in the chest cavity outside of the lung itself.

Between the lung and the chest wall there is the pleura, a smooth covering of two layers, the inner one of which covers the lung, and the other, the inner side of the chest wall. In the act of breathing, these two coverings glide the one over the other.

Within recent years, artificial pneumothorax has been used to place a diseased lung at complete rest, in order to increase the chance of healing. This is accomplished by introducing air into the pleural cavity, the space between the two coverings or layers of pleura. The introduction of air into the pleural cavity reduces the negative pressure that is normal in that cavity and so equalizes the pressure that is exerted on the lungs from within and without. The result is that the lung collapses and is at rest.

Not all patients require pneumothorax, nor are all cases suitable for such treatment. For those cases which are selected after proper examinations and studies, there is no doubt that this form of treatment has revolutionized the outlook. The treatment must be maintained by injections of air for months and possibly years. This does not mean that any less care is to be given as regards the other points of treatment. It does mean, however, that much can be done for cases that were considered hopeless; it speeds up recovery in many cases, lessens the chance of spread to the other lung, reduces sputum and so minimizes the chance of spreading the disease and, altogether, represents a great advance in the treatment of a disease which is still one of the most common and persistent enemies of mankind.

Questions concerning Health, addressed to the Canadian Medical Association, 184 College Street, Toronto, will be answered personally by letter.

Rail Rates Reduced For Winter Fairs

Winnipeg, Feb. 28.—Low rail rates of single fare for the round trip to the Class "A" winter fairs is announced by Osborne Scott, general passenger agent, Canadian National Railways.

The Manitoba Winter Fair, Brandon, March 14th to 18th, tickets will be on sale from stations in Manitoba and in Saskatchewan, Saskatoon, Gravelbourg and east, from March 12th to 17th and on March 18th for trains arriving not later than 2:00 p.m., and will be good to return up to March 21st.

The Regina Winter Fair will be held from March 22nd to 26th and tickets will be on sale from all stations in Saskatchewan and in Manitoba, Brandon, Harte and west, from March 21st to 24th and on March 25 for trains arriving not later than 2:00 p.m. with a return limit of March 29th.

For Saskatoon Winter Fair, March 24th to 26th, tickets will be on sale from all stations in Saskatchewan from March 23rd to 25th, and on March 26th for trains arriving not later than 2:00 p.m., and will be good to return until March 29.

The Alberta Spring Stock Show will be held in Calgary from March 28th to April 2nd. Tickets will be on sale from all stations in Alberta from March 27th to April 1st, and on April 2nd for trains arriving not later than 2:00 p.m. and will be good to return up to April 4th.

For the Edmonton Spring Stock Show, April 4th to 7th, Tickets will be on sale from all stations in Alberta from April 2nd to 6th, and on April 7th for trains arriving not later than 2:00 p.m. and will carry a return limit of April 9th.

Discover $1,140 In Buried Gold

Bloomsburg, Pa., Feb. 28.—The job of deepening the cellar under an old house was completed Sunday—with the aid of a pile of buried gold—but it was a task too well done, the contractor decided.

Fellow laborers swung their picks with a will when John Johnson turned up a $20 gold piece. By the time the treasure hunt ended the cellar was two feet deeper than the owner wanted.

Elmer R. Beers prosperous electrical contractor who purchased the house last year, claimed the monies. He divided $200 between Johnson and two other laborers, then kept the rest.

BORROWING EXPERIENCES
Typical of the many ways in which the Bank is able to render assistance to customers is the following report:

"Do you remember that money you lent me to buy a truck to work my old gravel pit? Well that was my start in life and I will never be able to thank the Bank of Montreal and yourself for that lift."

It was an old customer of the Bank of Montreal speaking to one of our branch managers. The customer, who had found a market for his gravel and through the Bank found the means of reaching that market, is now the owner of an important truck transporting business. We are glad to have been of assistance and that he remembers.

Protest License On Car Radios

Reports from Ottawa to the effect that a special radio license of $2.50 might be imposed upon car owners operating such attachments have drawn strong protests from the Canadian Automobile Association.

One report claimed that the new dominion budget would make provision for this double form of taxation in regard to radio owners.

Secretary W. G. Robertson, of the C. A. A. at once lodged a strong protest with Hon. C. D. Howe, minister of transport at Ottawa, in case such an additional levy on car owners is attempted.

The C.A.A. secretary pointed out that not only would this mean double taxation, many owners of car radios now having licenses for machines in their homes, but it also would have the effect of slowing up motor car sales and prove a hard blow for the U.S. motor tourist business that various Canadian provinces and the dominion government itself are endeavoring to build up through large expenditures on extensive publicity.

As the Alberta Motor Association is affiliated with the C.A.A. the action of the national body has aroused widespread support here.

In his reply, Mr. Howe stated that the representations from the C.A.A. would be taken under consideration.

Part of Dead Man's Eye Is Transferred To Priest

SAN FRANCISCO, March 1.—Transfer of a part of an eye of a dead man in what was described by the surgeon as the first operation of its kind in America has given partial restoration of sight to Rev. Father Antonio Santandreu.

The surgeon, who for professional reasons prefers to remain anonymous said he believed the priest's sight soon would be improved. He is now able to distinguish light, movement and a trace of color after an extended period of blindness.

For the operation, the entire right eye of the dead man was removed a few hours after death. It was refrigerated and later the surgeon removed a disc one-sixth of an inch in diameter from the dead eye. Then a disc of the same size was taken from the priest's eye. The next and final step of the operation was the fitting of the new disc into the patient's eye.

The priest, 84 years of age, is pastor of Our Lady of Guadalupe church.

To make intersections safe we may yet return to Will Rogers' original plan: Have all Monday traffic move east and west; and north and south on Tuesdays.—Detroit News.

CANADA'S CHARTERED BANKS VALUE YOUR GOODWILL

* *

WHETHER you deal with a bank or whether you don't, some time soon—say the very next time you are passing the bank's door—why not drop in and get acquainted? You're sure of a welcome, because the bank manager wants to know you. So find out for yourself what kind of fellow he is. And before you leave, take a good look at his staff.

The head offices are manned and managed by just that sort of man! Every general manager in Canada started in the banking business as a junior in some small branch, and rose from the ranks.

This is your introduction to a series of chats in the course of which you will be surprised at how little of mystery and how much of service there is in the business of banking in Canada.

Canada's chartered banks want your goodwill.

It is only by goodwill that banks make a living—and bankers are your fellow-citizens, the same sort of people as you are.

Of course bankers have heard all the old, threadbare jokes about the banker's glass eye, his delight in foreclosing worthy souls who ask for loans—even that grand old chestnut about lending the umbrella when the sun is shining and taking it back when it rains.

So if you think you have a new joke, drop in and spring it on your local bank manager—he'll appreciate it. And if it turns out he's heard it before, he'll still have his sense of humour handy enough to get a chuckle, should you chance to tell him that the banks are being held responsible for the latest storms, or for the loss of the hockey game, or for his own neglect to summon prosperity from just around the corner.

Which should prove to you that your banker is, after all, a very human person. He likes people. All bankers like people. And they want people to like them.

Banks want to be helpful. They realize that they succeed only as the people of the community succeed. Enlightened self-interest? Well yes — but not altogether.

Your local manager will tell you that banks are not stiff-necked; that they do not enjoy refusing loans.

They'd be foolish if they did, for goodwill is the whole core and pith and substance of successful banking.

Use your bank! Get to know the manager. If you know him already, he'd like to know you better.

Talk things over with him. Consult him. He'll be glad to advise you on anything within the scope of his banking knowledge and authority.

He is a part of his community. More than that, he is a good citizen, because he is anxious to be helpful to his fellow-citizens in every practicable way.

You have all sorts of interests in common. Because of the town taxes you both pay, you are really business partners in the community.

Then why shouldn't you know each other, understand each other, better?

He knows that his success as a bank manager depends first upon making himself useful to people, and then upon his ability to get along with them. His whole future is wrapped up largely in those two things—and well he knows it!

A bank is in business to sell banking service where such service is needed, and where it will do the community most good. So the banker of popular jest, the cold-eyed being who can only say "No", is a man of fiction only.

As we've said before, banks want and need your goodwill. No bank can get along without it. Telling the facts is probably the best method of winning it.

Intelligent people like plain talk. So in the talks to follow we shall be frank in giving you the facts about banks, bank ownership, bank operations, cash, currency, loans and interest. We would like you to read them all.

THE CHARTERED BANKS OF CANADA

Your local branch bank manager will be glad to talk banking with you. He will be glad to answer your questions, from the standpoint of his own experience. The next article in this series will appear in this newspaper. Watch for it.

The Future Of Wheat

The power is not given to people to pry beyond the veil of the future. No one knows what is ahead, but it is always interesting to guess what may happen, based on the available information and the known limitation of the human mind.

Sir William Crookes, one of the greatest of British scientists, delivered an address in September, 1898, to the British Association for the Advancement of Science, meeting in Bristol, England. His theme was the probability of a shortage of wheat confronting the fast-increasing-population of bread eaters. The conclusion he reached was that by 1928 the world would be approaching a state of starvation.

Actually when 1928 rolled around the world harvested its greatest wheat crop in history and accumulated a surplus which contributed to the upset of the economy of the nations for eight years. Then a few years later the world accumulated a carry-over of more than 1,100 million bushels. It took a series of crop calamities in North America and Argentina to keep the surplus supply down so that decent prices were obtainable.

Of course, Sir William Crookes, great scientist that he was, could not foresee the mechanization of agriculture which released millions of acres from producing feed for draft animals to the production of wheat. Neither could he have calculated on the discovery of a method of economically manufacturing artificial fertilizer from the atmosphere (developed during the war) which has substantially increased wheat production, particularly in Europe. Then great strides have been made in the science of plant breeding and early ripening varieties of wheat have been developed which have widely extended the area in which wheat can be grown. Great progress has also been made in producing wheat varieties resistant to rust, disease and drouth. All this has added greatly to the production of wheat and led, happily to the non-fulfillment of Sir William Crookes' prophecy, an extract from which is as follows:

"I have, in this review, not wished to be gloomy and not wished to consider myself infallible. If at the end of another generation of wasteful culture my forecast is invalidated by the Unforseen, I cheerfully ask my friends and critics to stone me as a false prophet."

Sir William was a much-travelled man and had carefully examined the wheat exporting countries. He had looked over Canada and the prairie country and noted that in twenty years the wheat acreage had increased by only 500,000 acres. In 1897 the wheat crop of Canada was 55 million bushels. That year the wheat harvest of the world totalled 1,921 million bushels.

As far as the United States is concerned, Sir William said:

"It is almost certain that within a generation (by 1928) the existing population of the United States will consume all the wheat grown within its borders and will be driven to import a share of the wheat of the world."

At that time Argentina's wheat acreage totalled 6 million. Of this country Sir William said:

"It will take years to bring back the surplus lands into cultivation and the population is even now insufficient to supply labor at seed time and harvest."

One feature of the whole situation which should not be forgotten by present day people is the enormous increase in the world's population during the nineteenth century. Between 1250 and 1820 Europe increased her population from 100 million to 200 million. In the eighty years following 1820 the recorded increase was actually from 200 million to 400 million. In the nineteenth century the world's population was suddenly doubled, the increase in that one hundred years being almost as great as the increase from the beginning of mankind up to the commencement of the nineteenth century.

With the advent of the twentieth century and particularly in recent years there has been a downward turn in population. If this persists the population of most European countries will be substantially smaller within a couple of generations. This trend is noticeable even in newer countries like the United States and Canada.

All this goes to show the futility of the human mind endeavouring to project itself into the future. Right now it might well be said that the potential production of the world's wheat fields is far too great for the demand and this will probably be true if Europe persists in policies of self-containment if no success is attained in breaking trade barriers, if plant breeding is developed further and farming becomes more mechanized and if the trend of population continues downward.

COMMUNICATION

Mr. Editor:

I am enclosing clipping taken from the Free Press Prairie Farmer of February 16th, which explains itself. It is not pleasant to waken in the night and think of these poor people and wonder what will become of them. And they are not the only ones in the province. My one small shred of comfort is that my vote was not cast for the present government. In my more than three score years on this mundane sphere, I have seen the rise and fall of numerous political parties. But I never saw one that promised as much and did as little, (except feather their own nests) as the present Alberta Government. One wonders what the end will be.

Yours for a sane Alberta Government.

EFFIE PLANTS

NO LONGER DELUDED

To the Editor,— Enclosed is a notice from the department of municipal affairs in Edmonton, Alta., notifying about 800 farmers of the Peace River district that their farms will be sold by auction, March 3. There is a howl of indignation all over this district. People have opened their eyes at last! All the adherents of Social Credit in this part of the unfortunate province are through with the rotten government!

Time and time again we have been warned by the Free Press Prairie Farmer that one day we would be disillusioned, but we were blinded by those sweet promises of a dividend of $25 a month! Prosperity for all! Silk stockings for all the girls in this province! Lace curtains at all the windows! After nearly three years what have we got? Poverty, misery, anxiety. We are starving and Don Quixote is still fighting with the wind mill!

The departments are all administered by young boys like Lucien Maynard and his associates, who have no experience at all. First the father of the famous prosperity certificate, now he is the minister of municipal affairs. That's why 800 farmers will be sold out next March.

Our rotten government has collected $24,000,000 through taxes of all kinds this year! They must be satisfied. We know that the first thing we must do is to pay our taxes, but it is impossible at present. Most of us are on relief. We had no crop for the last three years. Prior to this, we sold wheat at 19 cents a bushel! If we had had good crops this year we would be glad to pay our taxes in full if possible. We hope they will listen to reason and postpone the awful sale of our farms. Former members of the Ballater SOCIAL CREDIT group.

ERNEST POTVIN,
Ballater, Alta.

$1,000,000 Vote For Main Roads

The Alberta budget for the 1938-39 fiscal year which was brought down in the legislature last week revealed a vote of $1,000,000 in round figures for construction of main highways in this province.

This amount is practically the same as what was appropriated for this purpose in 1937.

While there was expectation in some quarters that the vote would be increased this year on account of the 400-mile projected surfacing program there is some satisfaction that it is not below last year's appropriation.

Total expenditures of the public works department are put at $2,288,000 which is an increase of $51,790 over the 1937 vote. Thus it will be seen that this department in which road expenditures form the main item is hewing close to the 1937 budget line.

While the province is providing $1,000,000 for main highways, it must not be forgotten that this will be augmented by the dominion to some extent.

"With what the province is voting and assistance to some extent assured from Ottawa, we should make some material headway this year in hard surfacing of our main highways. That should receive full attention in view of its growing importance and vital bearing upon the success of our efforts to attract tourist traffic," said an official of the Alberta Motor Association.

Grasshoppers Get Jump On South Golfers

CALGARY, March 1.—Springlike weather has brought golfers and grasshoppers out in Calgary. Week-end golfers at the Municipal club found a colony of 'hoppers doing "warming up" exercises on southern slopes of the course. "Grasshoppers in February. What will it be like in August?" exclaimed one surprised golfer.

Victory Is Scored For Garnet Wheat

Lloydminster, Feb 28.— Garnet wheat won out in a debate at the last dinner meeting of the Lloydminster board of trade over the advisability of growing that variety in this district. A resolution introduced at a previous meeting of the board by F. Ind, to the effect that Garnet is an inferior wheat and that its mixing with any grade above No. 3 should be declared illegal, was defeated.

In support of Garnet, J. Milner of Blackfoot said it represents an effort to find a wheat that will overcome frost danger, and he claimed that it is not a drawback in milling processes, reports of European millers having been highly favorable.

A resolution was passed "that the growers of Garnet wheat in the Lloydminster area wish to go on record as supporting any action, such as that now proposed in a bill before parliament to improve the conditions for marketing Garnet wheat."

There was a record attendance of rural members of the board.

Mystery Whistler Haunts Winnipeg

Winnipeg, Feb. 28—Winnipeg police Saturday decided to maintain sharp watch at hockey games and other public meetings just in case the man with the whistle makes his appearance.

At a junior hockey game in the Amphitheatre rink Thursday night play was disrupted by the blowing of a referee's whistle in the gallery. Friday the whistle blower topped his performance by disrupting Manitoba legislature proceedings. Guards tossed him out of the buildings.

After the whistle sounded, Errick F. Willis, Manitoba Conservative leader, asked "Does the government want time out?" Premier Bracken said it did not. And then the whistle sounded again.

According to the guards the whistler said: "They (the government) have taken away my liquor permit, I want it back."

Indian Warns of White Man

Caughnawaga, Que., Feb. 28 — The white man's ways lead only to strife and trouble, chief Checy Garlow, Restigouche, Que., warned a solemn pow-wow of Indians from all over eastern Canada on this reservation 10 miles west of Montreal Sunday.

"If you are ever asked to assume Canadian citizenship, refuse it," said the chief, "for the white man has made a mess of this country. If you become Canadian citizens you must shoulder the white man's debt.

"Before the white men came to this country there was not a dollar of debt. The white man's civilization has ruined the country, burying it deep under a mound of public debts. If you become citizens you will have to pay those debts, bear the burden for instance, of the government railway."

The Indians plan a national organization, its object the return of "rights" lost by the red men with the spread of white civilization.

Pinch-Hitter Races 37 Blocks To Sing

NEW YORK, Feb. 28—Brooklyn-born Frederick Jagel, the "pinch hit" ace of opera, rumbled a deep-chested chuckle Sunday and talked about music on the run. "Maybe" he laughed, "it's a new kind of swing."

At any rate, Jagel Saturday swung out of an easy chair at his home swung into a taxicab and exactly 37 blocks and 19 minutes later in full costume strode onto the stage of the Metropolitan opera to substitute for the stricken Giovanni Martinelli, singing the leading role in "Aida."

Martinelli collapsed from an attack of acute indigestion near the end of the first act. Doctors diagnosed his illness as resulting from too much crab meat. The 84-year-old Italian tenor was better Sunday, but still too weak to appear in his scheduled performance Sunday night.

While the audience sat in stunned silence out front, the famous Italian tenor kept his feet until the curtain touched the floor. Then he dropped into the arms of waiting stage-hands who arried him to his dressing-room.

Jagel's opera-saving feat was an old story to him. Twice before, at last-minute notice, he has "pinch hit" for an ailing Martinelli.

In 1934 he took over the noted tenor's role when Martinelli became ill before the performance of Meyerbeer's opera, "L'Africana." Last November, Martinelli became ill a few hours before he was to appear in the opera "Norma" in Chicago.

Saturday Jagel "warmed up" his voice by tossing off a few rippling scales on the taxi dash downtown and was in smooth control when he strode out on the curtain rise.

Entry Of March In Lamb Variety

March made a lamb-like entrance Tuesday after a month featured by wide temperature variation, near-record warm levels, average sunshine and vanishing snow.

Official forecast of the dominion meteorological bureau indicated colder weather Wednesday. Temperature at 2.00 p.m. Tuesday was 30 above after a reading of 35 above at 11:00 a.m.

The mild entry meant, according to tradition, that after a comparatively "fleecy" entrance, the month of March would roar out like a lion.

Mean temperature in February was nearly three above, compared with the record high, 42 in 1931, and the lowest 16 below, in 1936. Maximum reading, 58 above, came within one degree of the all time high established in February, 1922, and was considerably warmer than the low peak, 43 in 1919.

Showing a 90-degree variation, the month's temperatures dipped as low as 32 below, compared with 51 below in 1936 and the warmest minimum, six above in 1931.

Thinks North Fur Almost Depleted

Convinced that "fur is gone from the north," John Carlson, Stoney Rapids, has abandoned his trap lines, flown to Edmonton in a Canadian Airways aeroplane and will now try prospecting on Vancouver Island, he told a reporter.

Veteran of 20 years in search of a fur fortune in the north, the visitor indicated "the north is not what it was."

"Perhaps I'll be going back. But the way I feel now, I'm through." Even though civilization has reached once-remote areas, strange things still happen, however, he related.

He was referring to Dick Brussee, a neighboring trapper in northern Saskatchewan, who, until last fall, trapped from Boyd lake.

"It was last October when Brussee shouldered axe and gun and set out hunting. He has never been seen or heard of to this day," the northerner related.

One theory was that the unfortunate hunter had plunged to his death through thin ice of a backwoods lake.

Prosperity Certificate Has Quick Sale In House

OTTAWA, March 1—Thomas Reid Liberal member for New Westminster sold a dollar Alberta prosperity certificate for 50 cents in the House of Commons last night. The buyer was Robert Fair, Social Credit member for Battle River.

The deal took place while Hon. Charles Dunning, finance minister, was speaking about old age pensions. He said he was unable to do all the things he would like to do as minister of finance because he had to pay pensions and other bills in real money and not in the kind of money Social Credit members talked about.

"I have some of it here," said Mr. Reid. "I'll sell it to anybody for 50 cents."

"I'll give you 50 cents," said Mr. Fair.

Mr. Reid promptly called a page who took the certificate to Mr. Fair and brought back a 50-cent piece which Mr. Reid tested with his teeth.

Province To Build Winter Road For Northern Freight

The provincial government intends to complete a winter road from Grimshaw to the [illegible] of the North West Territories [illegible] connect Edmonton and district with the northern mining areas, Hon. W. A. Fallow, minister of public works, stated in the legislature on Tuesday in reply to a question by [illegible] Barnes, S.C. Edmonton.

The minister [illegible] was prepared to [illegible] as an agreement [illegible] completed with the Dominion [illegible] for construction [illegible] North West Territories road to [illegible].

Replying [illegible] as to whether there was any [illegible] set aside in the present [illegible] complete the road, the [illegible] that funds available [illegible] ends of the [illegible] that purpose under [illegible].

[illegible] the minister said [illegible] interests [illegible] to the [illegible]. He further [illegible] "I have discussed [illegible] they are [illegible] going further with [illegible] federal government agreement [illegible] provision so far as the North West Territories is concerned."

In reply to a [illegible] the [illegible] in regard to the matter, the minister said that "we will continue negotiations with the federal government."

Notice Of Preparation Of Assessment Roll

TOWN OF TOFIELD
Assessment Roll 1938

NOTICE is hereby given that the assessment roll of the Town of Tofield for the year 1938 has been prepared and is now open for inspection at the office of the secretary-treasurer from ten o'clock in the forenoon until four o'clock in the afternoon on any day which is not a public holiday, except Saturday and on that day [illegible] in the forenoon until [illegible] in the afternoon, and [illegible] who desires to object [illegible] of his name or that [illegible] upon the said [illegible] the assessment of any [illegible] value [illegible] with-in [illegible] days after the date of this [illegible] a complaint in writing with the secretary-treasurer.

Dated this 28th day of February, 1938.

J. W. CHAPMAN
Secretary-Treasurer.

Fox Terrier Saved Trapped 10 Days

DUBUQUE, Iowa, March 2 — "Spotty's rescued! He's alive! He's well!" were the cheerful words flashed through the streets of nearby Farley Tuesday night.

Everybody was happy, especially "Spotty," a five-year-old black-and white fox terrier, whose droopy eyes looked up from a comfortable blanket near the stove in Emmet Simon's farm home.

"Spotty" was rescued Tuesday gaunt and tired, from a dark, damp crevice 25 feet below the surface. He had spent 252½ hours in quarters which provided him barely room enough to walk about.

A party headed by his master had for 10 days blasted and dug through solid limestone to free the entombed pet whose barkings, becoming fainter each day, had spurred them on.

"Spotty" was trapped a week ago last Friday afternoon by a falling rock which blocked the passageway between him after he had chased a fox into a hole at the base of a bluff on the farm where Simon lives.

B. C. In Peril Nippon Shells, Thinks Padre

WINDSOR, Ont., March 2—Canada and the U.S. should form a domestic defence league to guard North America against the envy of European and Asiatic nations, Archdeacon F. G. Scott of the Anglican diocese of Quebec said in an address here Monday night.

The famed wartime chaplain of the Canadian corps named specifically Germany and Japan as countries whose "envious glances" were cast upon Canada.

The U.S., he said, had reason to suspect Japanese fishing vessels have guns in their holds capable of firing from 25 to 30 miles. What chance, he asked, would Vancouver and Victoria and other B.C. coastal cities have against such armaments when Canada had but "four dear little destroyers."

Recently Germany had sought to buy Anticosti Island, key position to the Great Lakes, but its engineers returned home to report the island was not for sale.

"I do not want to say anything that [illegible] hatred, yet not long ago a [illegible] was published in Germany by a man called Douglas which said a good place for German colonization was in Canada," the Quebec cleric continued.

The B. C. coast, Archdeacon Scott said, is in very grave danger at the present time because of the Japanese menace." It contained large settlements of Japanese who "work for lower wages than the white man and operate right up into the Alaskan waters."

"The U.S. is aware of their hold on fishing and other industries. Many villages far inland in B.C. are entirely Japanese.

"Suppose war should be declared by Japan against England which has been hinted by some high officers [illegible] possible Japanese ships now carrying salmon beyond the 10-mile limit have guns underneath their decks like the mystery ships of war days.

"Suppose England's ships are tied up, which is quite possible. It is a terrible thing to think of that the large Japanese ships would only be opposed by our four dear little destroyers and that the Japanese ships might be able to shell from a range of 25 or 30 miles.

Don't Doff Undies, Advice By Doctor

If you've been wearing heavy "undies" all winter, don't take them off now just because the weather feels like spring. That's the warning given Edmontonians Wednesday by Dr. G. M. Little, city medical health officer.

"Nothing is more likely to cause late-winter colds than changing to summer-weight undergarments at the first taste of mild weather." Edmonton's health director told newspapermen. "Of course, many people wear light 'undies' all winter, and naturally they'll be feeling more comfortable just now; but the others will be wise to look and act skeptically at a too early 'spring'. It's still winter time and if you forget that fact your health may suffer."

Tumbles Into Well; Child Is Drowned

PEACE RIVER, March 1— Five-year-old son of William Davidiuck of Reno, 25 miles east of here, pried a board from the flooring above a well while playing in the yard of his home Friday, fell into the well, and was drowned. He was not missed for several hours, and on search then being made for him his body was found in the well. Police decided no inquest was necessary.

Annoyed Thief Spurns Coppers

Entering by picking the front-door lock, a thief found only coppers in a cash register of T. Kennedy's butcher store at 11439 Jasper ave. early Sunday. The coppers were tossed on the floor by the disappointed prowler. The register had been opened with a meat cleaver. The safe was undamaged and nothing was taken, Mr. Kennedy said.

Const. Harry Nelson made the discovery as he was making his rounds at 4.15 a.m. Sunday.

Infant Scalded Lying In Crib

TURNER VALLEY, March 1. — Scalded by hot water as he lay in his crib, 20-months-old Kenneth, son of Mr. and Mrs. K. Van Der Wark, was in hospital here Monday night.

The mother was working around a steam bath over the crib when she accidentally upset a kettle of water which scalded the baby from the back of his neck to his waist. His condition was reported fairly good.

The Van Der Wark home is at Little Chicago, Turner Valley oil town 30 miles southwest of Calgary.

FOR SALE: 100 egg incubator; Dining room suite; enamel kitchen range in good shape; Shot guns; 22 Repeating Rifle; Buffet; Bed and spring; Dresser; hand power Vacuum cleaner. —Apply to J. E. Stimson, Tofield.

Judge Feels Parker Has Good Reason

BELLINGHAM, Wash., March 2 — Clyde Anable won his overtime case in police court Tuesday afternoon. Charged with overtime parking, Magistrate John P. McGlinn asked in the routine way:

"Have you anything to say in your own defence?"

"My wife was having a baby," Anable explained.

"Were you ever tagged before for overtime parking?"

"Yes," said Anable, "about three years ago."

"What delayed you that time?"

"My wife was having a baby."

"Good afternoon," Judge McGlinn said. "See you again in about three years."

Women Given Montreal Vote For First Time

MONTREAL, March 1.— Montreal's city council decided Monday to extend the [illegible] franchise to women [illegible] footing with men. The bill requires provincial government approval.

Meet Mr. Smith, 3,000 Of Them, and All Freds

NEW YORK, March 2—"Luck of [illegible] President Fred [illegible] president Fred Smith."

It was Fred Smith talking, doing [illegible] and [illegible] Benevolent and Protective and Completely Universal Order of Fred Smiths of America.

There are [illegible] gan [illegible] said [illegible] in [illegible] telephone [illegible] all the time. By 1940 we may be able to swing the election. Think of it . . ."

[illegible] 100 Mr. and Mrs. Fred Smiths [illegible] here last night, while others banqueted in Chicago, Detroit, Dallas and Kansas City.

Fred Smith of Chapaqua, N.Y. who founded the order in 1936 when he wearied of telling telephone callers that he was not Fred (Meat Market) Smith, Fred (Undertaker) Smith or Fred (Tailor) Smith, was elected provost.

Cancer Sufferer Receives Benefit

VANCOUVER, March 1— One of two "human test-tube" cancer sufferers was described as "greatly improved" Tuesday—but the other, second to receive a transfusion of 700 cubic centimetres of radium-treated blood, showed "no change."

The Vancouver physician who [illegible] after consent of the two patients to the "last chance" treatment, said the first who was treated 17 days ago was taken for an automobile ride and walked about for some time Sunday afternoon.

Grainmen Protest On Overage Bill

Claiming that the new legislation conflicts with regulations under the Canada Grain act, a delegation of representatives of elevator companies lodged protests with Hon. D. B. Mullen, minister of agriculture, Wednesday over the provincial act which enables the government to take over all [illegible] known as "overages" in Alberta elevators at the end of the shipping season.

The delegation included J. E. Brownlee, K.C., Lew Hutchinson and R. D. Purdy, representing the Alberta wheat pool; R. S. Law, president, for the United Grain Growers, Limited and S. Roenish, representing the North West Grain Dealers.

Mr. Mullen told the delegation that representations would be taken under consideration.

Under the terms of the bill, the government is empowered to take over all "overages" this being what is left in the elevator after the original amount received from farmers has been weighed and shipped out to terminal elevators and after allowing for shrinkage and wastage.

The government proposes, said the minister in introducing the bill in the house to use the proceeds from any "overages" in establishing a trust fund for the benefit of agriculture in this province.

Members of the delegation claimed that many sections of the act conflict with the deductions allowed for shrinkage in country elevators, under the board of grain commissioners regulations. Also, it was stated that Alberta elevators have not had "overages" for some years.

Say East Jobless Sent To Calgary

CALGARY, March 2—Influx of unemployed men from eastern Canada had civic and provincial authorities here worried Wednesday.

Two men are in police custody, held on vagrancy charges. 15 were given breakfast at the provincial relief kitchen here and many others were reported seeking civic aid.

Most of the men, according to Cec Lewis, who interviewed them at the relief kitchen said they were from Port Arthur. They claimed 150 men were given transportation and $1.50 in cash for spending money by the city of Port Arthur.

"They had been feeding us," one of the men said, "and the main objective was to get us out of the city." He said they were given the right to select their own destination when the transportation was granted. Most of the men selected Calgary and Vancouver.

"So far as I am concerned it is a matter for the provincial government," said Mayor Davison, when informed of the jobless influx. "The city has all it can do to look after its own unemployed."

The Alberta government will not assume responsibility for the men, [illegible] W. Eady, provincial relief supervisor stated.

"We are willing to look after our Alberta unemployed, but any men who come into the city from eastern Canada in this manner are on a fool's errand," he added.

Mr. Eady said an immediate investigation would be made by his department in an effort to stop the influx of the jobless to Calgary.

Felled By Auto; Must Pay Driver

IPSWICH, England, March 2—Woman pedestrian injured in a road accident was ordered in court here to pay one hundred pounds damages to the motorist whose car knocked her down. The motorist tried to avoid her but could not, and the car struck a grass bank. He received a bad sprain bruises and shock.

High School Student's Union Hold Successful Bonspiel

The first bonspiel held by the Tofield Student's Union was concluded on Monday with the rink skipped by Jim McAllister winning the main event. The McAllister rink defeated that skipped by Art Smith by the score of 13-3 and was easily the best rink in the bonspiel, sweeping aside all opposition by good margins. The bonspiel was very successful despite the fact that few players had curled before. Undoubtedly all those who took part had an enjoyable time. The Student's Union wishes to express their gratitude to those who willingly loaned their rocks and brooms. The personnel of the leading rinks was: Jim McAllister, skip, Betty McCartney 3rd, Hugh McAllister 2nd, Joyce Innis lead.

Art Smith skip, Gladys Weatherill 3rd, Marvin Beale 2nd, Muriel Rogers lead.

Swing Sisters To Play In Tofield

On Thursday next, the 17th of March, the Swing Sisters from Edmonton [illegible] play for a dance to be held in the Variety Theatre, Tofield. This orchestra plays every Wednesday evening in the Palace Garden in Edmonton and is recognized as an excellent dance orchestra. For those who are looking for a good time, the place to find it is the Variety Theatre on the 17th of March, so let's see you all there!

Bonspiel Completed Thursday Last

Due to adverse weather conditions it was necessary to hold two games of the Men's bonspiel over until the ice tightened up. These were the finals in the Terwillegar and Northwestern Utilities events, and were both played on Thursday evening of last week. The first game was played between Olson of Holden and McBratney of Tofield resulted in a win for Olson. The second was between A.B.C. and McBratney, A.B.C. taking the big end of the score. Both games were good to watch and the gallery got quite a thrill out of the McBratney A.B.C. game, it being necessary to play thirteen ends before the winner was decided.

LOCAL & PERSONAL

Mr. and Mrs. Geo. Hume, Mr. and Mrs. Barney Marshall and Blake Clutterham of Edmonton spent the week end visiting at the Clutterham home here.

* * *

Mrs. Patterson, Mrs. Lovell and Miss Pat Burnett are attending the Rebekah Lodge convention held in Edmonton this week.

* * *

Miss Aileen Allan, who has been in Westlock for a few weeks returned home last week.

* * *

Mrs. D. K. Allen, Mrs. Firth and Mrs. Stinson are attending the Womens' Missionary convention held in Edmonton this week.

* * *

Mrs. McCauley and Mrs. Jobb left on the flier Saturday evening for the east. Mrs. McCauley is going to spend some time with Bill in Toronto and Mrs. Jobb will visit friends and relatives in Green Gables.

* * *

Miss Esther Wick is spending some time with her sister Mrs. Harold Green.

* * *

On March 4th, a surprise party was held for Louise Stevenson at the home of Mrs. Barden. A lovely gift was presented to Louise by the group. A delicious lunch was served by the hostess. Everyone had an enjoyable time.

Play Basketball In City

The local Basketball Team journeyed to Edmonton to play one of the city teams and came back with the long end of a 33-24 score. The game had been arranged by Darrel Ball, formerly a Tofield boy.

The personnel of the teams were: Edmonton— Shell, Broderick, Esch, Ball, McGrath, Amerongen, O'Brien, W. Omerongen.

Lakeshore—R. Walker, M. Walker, Ashley, Campbell, Abernethy, Dunn, Phillips, Nahrubeski.

HOCKEY

CAMROSE 8 TOFIELD 10

On Sunday afternoon the Camrose Commercials motored to Tofield and played the senior hockey team. The game was fast and while Tofield had the play during the first two periods, Camrose put on a spurt in the third, running in the greater number of their goals in this period. The final score read 10-8 in favor of Tofield.

Line-up: Camrose— Gardner, goal; Pardee, Herman, Dimitri, defence; Gau, Worton, Johnson, Patrick, Johnson, Butcher, Forwards.

Tofield: Bowick, goal; Glover, Everitt, defence; Worton, Swinton, Smith, Machtmes, Sears, Whyte, Forwards.

Referee—Bob Evans.

HOLDEN 3—TOFIELD 5

In the first game of the semi-finals of the Gas Line league, Tofield emerged with a victory against Holden to the tune of 5-3. The first period opened up fast and about half way through Sears scored on a pass from Worton. Worton then scored on a solo effort. Holden came into the picture when Stuart scored during a scrimmage around the Tofield net. This ended the scoring in the first period, the score being Tofield 2 Holden 1. The second period was inclined to be a little rough, both teams trying to get the advantage. Jack Whyte scored the only goal of this period on a pass from Worton. The period ending 3-1 for Tofield. Holden put on the pressure during the third period, scoring 2 goals, both being scored by Logan. Tofield retaliated when Jack Whyte came through with 2 goals for Tofield. The final score reading 5-3 in favor of Tofield.

Line-up: Holden—McLennan, goal; A. Black, A. Logan, defence; James Forum, Nick Grycon, Mike Grycon, B. Edworthy, Ed. Stewart, Forsyth, E. Good, Forwards.

Tofield: Bowick, goal; Glover, Everitt, defence; Worton, Swinton, Machtmes, Sears, Whyte, Forwards.

Referee—Bob Evans.

KETCHAMOOT

WEDDING

Miss Janet Brown, second daughter of Mr. and Mrs. Joe Brown, and Mr. Martin Lawson, son of Mr. and Mrs. Geo. Lawson, were quietly married in Edmonton Friday, March 4. Rev. A. Stewart who formerly resided at Tofield, and former minister of both the bride and groom, officiated. The newlyweds arrived home Tuesday and will reside on the Geo. Lawson farm. Their host of friends join in wishing them a long, happy married life.

The Social Hour Club are holding their meeting at the home of Mrs. John Lee Thursday of this week.

Mrs. Emily Carlisle and two children and little Noreen Carlisle spent the week end at the Carlisle home in Tofield.

Mrs. M. Davison and Mr. Wm. Stairs were Friday evening guests of the Sears family.

Mrs. Wm. Ingram spent several days at the J. H. Ingram home, her husband being away plastering.

Mrs. H. McGinitie entertained the Ladies' Aid at her home Wednesday of last week. The April meeting will be held at the home of Mrs. J. Appleby.

Miss Marie Lawson is assisting with the house work at the Leslie McGinitie home. Mrs. McGinitie has been ill for some time with pneumonia but is now well on the road to recovery.

Mrs. Elsie Carlisle and Lorne Lee spent the week end visiting in Edmonton.

Mrs. C. Coombes was called to Sideview, near Ashmont on Wednesday of last week owing to the serious illness of her mother who is 83 years old.

Mr. and Mrs. S. Nomeland, and Torval, Mr. and Mrs. Percy Sutton and family, Mr. and Mrs. Julius Lerbekmo, were Sunday guests of Mr. and Mrs. Simpson.

WE REQUIRE one man of neat appearance and fair education for Tofield and district to distribute samples and take orders for Wear Ever Brushes. Man with car preferred. Restricted territory. Earnings will average $30.00 to $60.00 weekly. Apply to Wear Ever Brush Company, 11426-95 St., Edmonton Alta.

BEHIND THE HOG

By A.B.C.

Further to last week's Bonspiel winners. After our early spring, we again resumed play on Thursday, March 3rd, and incidentally if you are contemplating a trip this year, we know where you might borrow a few club bags. See Bill Chapman, Lem Abbott, Rev. Wallis or Tom Jacobs, and then again if you like toasted sandwiches in any form, come around and see me sometimes. The games Thursday night were closely contested. McBratney vs Olson, was very close, up and down. Tom had the edge on the 1st 6 ends when the Olsons went to town with a 4 ender. The game was not decided till the last Stane was flung in the 12 end, Olson winning by one point. Tom McBratney then took on Yours Truly, this was another close battle, being tied several times. The A.B.C.'s were two up coming home and lying two shot rocks in the 4 foot. Tom clicked for a real Manhan Bonspiel shot removing the shot rocks and replacing with two of his own to tie up the game. Tom was pretty well tied up when he came to throw his last stone and was just inches away from making the shot again losing by a one point margin. Both Skips received wonderful support from their rinks, but both Tom and myself were very spotty. A large and very complaisant gallery witnessed both games, 3 rows behind the glass and both board walks filled from end to end. During the rush one curler said, "Oh, pardon me for stepping on your feet." "Not at all," the other replied, "that was what they were made for."

0-0-0-0

So smile and don't forget to smile,
And smile and smile again,
'Twill loosen up the cords o' care
And ease the weight of sin.
'Twill help you on the longest road,
And cheer you mile by mile,
And so, whatever is your lot,
Just smile and smile and smile.
There is no room for sadness
When we see a cheery smile,
It always has the same good look,
It's never out of style.
It nerves us on to try again,
When failure makes us blue,
The dimples of encouragement
Are good for me and you.
It pays a higher interest
For it is merely lent—
It's worth a million dollars
And doesn't cost a cent.

0-0-0-0

The High School took over the rink during the week end. Thirteen mixed rinks in a knockout Spiel. "Gowanlock" McAllister and his Merry Boys and Girls took Curly "Manahan" Smith and his willing helpers in the final game by a cricket score. It was the best curling I have ever witnessed in a High School Spiel, but then again this was the first High School Spiel I ever witnessed.

LAKESHORE

Mrs. J. H. Johnston returned on Tuesday evening from Lesliville where she was visiting her daughter, Mrs. James Gimmel.

Mrs. M. C. Wood and Mrs. L. H. Graham were visitors to the city on Friday last, Mrs. Graham remaining over the week end.

R. C. Phillips spent the week end in Edmonton.

Mr. and Mrs. J. H. Johnston spent Tuesday evening at the R. C. Phillips home.

Mrs William Wolf, Lorne Nelson, Fred Nelson and Mr. Reynolds of Roundhill visited Miss Elsie Nelson on Sunday last.

"When the judge ruled Smith had to pay alimony, how did he feel about it?"

"Chagrined."

"And how did his wife feel about it?"

"She grinned."

Mr. John Chapman Passes Away Suddenly

Mr. John Chapman passed away at his home on the morning of Tuesday March 8th. He had been in indifferent health for over three years, but the end came quickly and somewhat unexpectedly. Funeral services were held on Thursday at Howard and McBride's chapel, Edmonton, at 3:30 o-clock in the afternoon. The service was conducted by Rev. D. K. Allen of Tofield, assisted by Rev. Wallis of Tofield. A masonic ceremony participated in by members of his own lodge, Palestine Lodge No. 46, A.F. & A.M. Tofield, and by members of the fraternity in Edmonton, was also held. The masonic ceremony was in charge of R.W. Bro. A. E. Ottewell of Acacia lodge, Edmonton. Interment took place in the Edmonton cemetary. He leaves to mourn his loss, a loving wife, two sons, William of Tofield and George of Edmonton, and five grandchildren, Reginal, Robert, Norris, Joyce and Joan.

The deceased was born at Dunstable, Bedfordshire, England on July 16th, 1868, the son of William Chapman and Elizabeth Norris Chapman. Until coming to Canada he lived and worked in various parts of the old country, operating a store during his last three years in England.

The late Mr. Chapman came to Tofield direct from England. He and members of his family arrived here on April 5th, 1912, and except for a few months residence in Edmonton, had lived continuously in the town. His first occupation was at the Dobell Coal Co., where he was foreman for some short time. He later operated a bakery and store on main street. Selling this business at the time natural gas was first piped to Tofield from Viking he secured equipment and went into business as a gas fitter, a trade in which he had served his apprenticeship during his teen years in England. He served on the town council for a continuous period of about fourteen years commencing with the year 1922. Of his public services he will probably be remembered most by his work in past years for the local curling club, particularly his activity as chairman of the committee which was instrumental in building the present curling rink. In religion, he was brought up in the Wesleyan Methodist Church but in later years, following church union in Canada, he adhered to the United Church. In addition to membership in the masonic order, he was a past patron of Ionic Chapter of the O.E.S. at Tofield.

Currently "the burning question," farmers in the northern portions of the wheat growing area of Alberta are concerning themselves with the [illegible] of whether to continue grow[illegible]

[illegible] future market at a discount of [illegible] [illegible] Peace River dis[illegible] [illegible] Red B[illegible] [illegible]

My [illegible] much of the [illegible] Wheat P[illegible]

Urge Reduction Motor Licenses

When is Alberta going to adopt the policy followed in other parts of the country and reduce car licenses? That is the question which motor[is]ts are asking, and the[y] demand[illegible]

[illegible] March 31 next [illegible] instead of January 1 was a [illegible] $1.15 [illegible]

[illegible] car license fees is fully [illegible] something which that [illegible] has been urging for years.

It appears that there is all the [illegible] satisfaction for this reduction when it is seen that the 1938 [illegible] provide for a gain of some [illegible] from the fuel oil or gasoline tax. This gain also can be attributed to a large extent to the change in the motor license year.

HEALTH

A HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION AND LIFE INSURANCE COMPANIES IN CANADA

The Human Has Great Power Of Adjustment

[illegible] body possesses remarkable [str]ength and yet is extremely [illegible] deprived of air for but a few [min]utes, the whole body perishes. [illegible] of its blood supply for [illegible] minutes, the more [illegible] brain cells are permanently damaged.

The true strength of the body lies [in its capacity to] adjust itself to [ch]anging conditions. A simple example is seen in the fairly constant [temp]erature maintained by the body [despit]e wide variations in the temperature of the surrounding atmosphere.

[illegible] striking example [illegible] has capacity to [illegible] human mind [illegible] ability to adjust the [illegible] and emotional life. Successful adjustment means health; failure [illegible] means loss of health and, [illegible] upon disease.

[illegible] must adjust [to te]mperature and other external changes. It is no less true, even if less apparent, that we must [illegible] an adjustment of [our] emotions and intelligence to those with whom we live and work and [illegible] authority, which really [illegible] society or [th]e world in which we live.

[illegible] must adjust, not only to [illegible] environment [illegible] changing condition[s] [whic]h occur within the body. The [body w]ould be destroyed by its own [illegible] heat and the residue [of th]e by-products of muscular activitie[s] [i]f [it] did not possess this capacity [illegible] adjusting [illegible]

[illegible] [intell]ectual and [illegible] a satisfactory [illegible] within and without. This [illegible] saying that [illegible] with our[selves] [illegible] with other people. [illegible] and [illegible] a satisfactory [illegible] without. This [m]ight be expressed by saying that we are able to live with ourselves as well as with other people.

There are many things which contribute to this desirable end. We are not all born with the same capabilities. We have to learn what are our [limitations] and to accept the superiority of others without feeling [illegible] [illegible]

[illegible] humiliation of a child through any means is destructive as it undermine[s] [illegible] and leads to either [defi]ance or withdrawal. The child needs [un]derstanding and direction so that he may learn to adjust, and so secure health and happiness for himself.

Questions concerning Health, addressed to the Canadian Medical Association, 184 College Street, Toronto, will be answered [illegible] letter.

An Island A Day On Lady Liners

Bermuda which has become [illegible] destination for liners of the Canadian National Steamship [illegible] between Canada and the British West Indies [illegible] 365 islands, one for every day in the year.

A Land of Opportunity

A [illegible] boy in an American [illegible] refused to sew, thinking it beneath the dignity of a 10 year old [illegible]

"Sa[illegible] Washington [illegible]" said the principal, taking it for granted [illegible] "and do [illegible] [illegible] yourself better than George Washington?"

"I don't know [illegible] will tell," said the [illegible] only [illegible] patch.

"Of Course There Was a Famine"

In the crop years 1930-31 Russia exported close to 115 million bushels of wheat. This had a tremendous effect in demoralizing the world market. At the time it was reported that Russian people were being deprived of food in order that sufficient wheat could be sold abroad to gain needed credits for industrializing the country. [The] statement was denied by U.S.S.R. officials at the time and for years subsequent thereto.

In his book, "Inside Europe" John Gunther, European correspondent of a Chicago newspaper tells the story of the famine which followed the campaign to collectivize Russian farms and the exportation of the wheat. Anyone who has read Mr. Gunther's book will realize that he is not biased against Soviet Russia or a friend of capitalism. He says:

Millions Died

Of course there was a famine. None can deny this any longer. It occurred in the spring of 1933, in the great grain producing areas of the U.S.S.R., the North Caucasus, the Ukraine . . . The chief point about the famine is not, it might be said, that several million people died. The point is that the Soviet Government was engaged in a tremendous epochal struggle to socialize the land for the eventual good of the peasants, the peasants, however, resisted and— [illegible] suffered. To balk the Government they refused to harvest the grain. Therefore they did not have enough to eat. And died.

The inside story of the famine is briefly this: The Five-Year Plan included collectivization of the peasantry. Russia, overwhelmingly an agrarian country, contained in 1927 about 25 million peasant holdings. Stalin's plan was to unite them into [illegible] collective farms. The peasants would turn over implements and livestock to a farm manager, and work in comparatively large rather than very small holdings, assisted by tractors furnished by the State. This was the idea. On it the future of socialism in the U.S.S.R. depended.

Slaughtered Stock

[What] happened was that the peasants, bitterly indignant, staged [illegible] resistance to the immense [illegible] process of collectivization. First they slaughtered their livestock rather than turn it over to the collectives. It was an extraordinary and [illegible] event, though not so tragic as the human starvation later. There was no organization among the peasants, no communication, yet in hundreds of miles, a simultaneous destruction of animals began. Rather than turn over their precious pigs, sheep and cattle, to the collective authorities, the peasants murdered them.

"The cost was terrible Stalin, four years later, admitted it. The agrarian economy of the Soviet Union suffered a blow from which it cannot fully recover until [illegible] it will take till then to replenish the slaughtered stock. For, once the killing began, it progressed till about fifty per cent of the animals in the Soviet Union were killed. Official figures admit that the number of horses in the country diminished from 33,500,000 in 1928 to 19,600,000 in 1932, the number of cattle from 70,500,000 to 40,700,000, sheep and goats from 146,700,000 to 52,100,000; pigs from 25,000,000 to 11,600,000.

The Next Stage

"The peasants, stunned by this catastrophe, sank into temporary stupor [illegible]. Even so in 1932, the peasants, stiffening into a final [illegible] protest, rebelled again. As if by underground agreement, another psychic epidemic spread through the rich fields of the Caucasus and Ukraine. The farmers, those still outside the collectives, were paid miserable prices; either they could buy no manufactured goods at all, or goods only of indifferent quality. They hit on a plan. They had sown the crop, which was abundant, but they decided not to harvest all of it. They harvested exactly what they calculated they would themselves need during the winter, and left the rest to rot. What was the use of slaving to produce a handsome crop if the State simply seized it all?

"This was, of course, mutiny. It was not only defiance of Stalin; it was a threat to starve him into submission. The Soviet Government needed grain to distribute to the industrial regions, the great cities; it needed grain for export to pay for the machinery it had to import for the Five-Year Plan.

A Major Crisis

Even the farmers already in the collectives let their grain rot. There were few Communist overseers, few trained men and loyal farm managers. Word got to Moscow that the harvest, which should have been handsome, was largely lost. Stalin saw that this was a major crisis. If the peasants were permitted to get away with this the revolution was beaten. He had to act. And did.

"Government grain collectors descended on the farms, still with weed[s] and seized the small share of the crop that the peasants had saved for their own use. One by one, they visited every holding, and took every bit of grain due to the Government in taxes. If a man's normal crop was, say, sixty bushels the tax might be twenty bushels. So when the Government took twenty, the farmer and his family had only five, instead of twenty-five to live on the whole winter and spring.

Penalty for Rebellion

"Russian economy is still extremely primitive. The question of grain, of bread, is a matter of life and death. When there was no grain left the people began [illegible]. The Government might have [illegible] some grain [illegible] the cities [illegible] that was a planned hungry year everywhere—to feed the peasants. But the Government did not do so. Stalin decided that the peasants must pay the penalty for their rebellion. They had refused blindly, stupidly, [illegible] then starved. And they starved. [illegible]

"The famine [illegible] the back of peasant [illegible] the U.S.S.R. Since the famine [illegible] [illegible] proceeded [illegible] but [illegible] land [illegible] organized into about two hundred and fifty thousand farms. The peasants tried to revolt. The revolt might have brought the Soviet Union down, but it collapsed on the iron will of Stalin. The peasants killed their animals, they then killed themselves."—Wheat Pool Budget.

Can You Beat This Mr. Robert Ripley

Edmonton, Alta.—March 7—Who says there is no Santa Claus! Believe it or Not, Mr Ripley, here's one for your files. Let F. J. Harper, steward on Canadian National Railways dining car, operating between Vancouver and Edmonton tell the story.

"We were high-tailing along through the mountains and Chef H. V. Anderson of the car was cleaning up the kitchen. Just as we flashed past mile post 119, east of Blue River he leaned out to empty the garbage can, and a gust of wind blew his glasses off.

"When we got to Albreda we wired back to have the section crew keep their eyes open for the glasses, as Anderson had paid out plenty for his [illegible] and we [illegible] to use a waffle [illegible] to [illegible] the eggs without them. It seemed like a hopeless chance but when we got to Edson, [illegible] was waiting "Found glasses hanging on a Christmas tree." And that's the unbelievable part of it. The glasses had been blown off Anderson's nose and whirled into a little jackpine alongside the track. There they hung, for all the world as if old St. Nicholas had decorated the tree with a new pair of glasses and they weren't even cracked.

Factors In The Wheat Situation

In fact any potentialities in the wheat situation itself for the coming year are apt to be over-shadowed by other outside influences. Much will depend upon the course of the business recession in the United States, and the extent to which other countries become affected. A possible upturn in the industrial output in the United States in the second quarter of 1938 could be expected to make for a stronger wheat market, and general international political unsettlement is also contributing uncertainty to the wheat situation. There is still a probability that the re-arming countries will add a program of food reserves to their defence plans and such a policy could provide a temporary fillip for wheat prices. When these outside factors are weighed along with the elements within the wheat situation itself sufficient grounds hardly appear for taking the view that wheat prices in 1938-39 are headed for considerably lower levels than those prevailing at the present time.—Agricultural Branch, Dominion Bureau of Statistics.

Legal Advice

A well-known attorney was always lecturing his office boy, whether he needed it or not. One day he chanced to hear the following conversation between the boy and the one employed next door.

"How much does your chief pay you?" asked the latter.

"I get $1500 a year. Five dollars a week in cash and the rest in legal advice!"—The Improvement Era.

Here's a real buy!
THAT MEANS A BIG SAVING IN MONEY FOR YOU

THE WORLD OF WHEAT

By H. G. L. Strange, Director Research Department, Searle Grain Co.

The United States' Government has decided to release 100 million dollars' worth of gold every three months from the vaults where it has been "sterilized" so as to permit the yellow metal to expand the credit base of the United States."

This is important news indeed, for it means that the vast hoard of gold which has been accumulating in the United States since 1933 will, at last, be permitted to make its weight felt in raising commodity prices.

As compared with 1913-14, the currencies of the United States, Canada and Great Britain have been inflated by 60 per cent and since 1932 the World's production of gold has been about 40 per cent greater each year than previously.

These factors, separately and together, tend greatly to increase the price of all commodities, for gold and money are the yardsticks which measure price. It means therefore, that as soon as the existing Governmental restraints on the full use of gold and credit are removed, then all prices, and so the cost of living and production, will tend to rise by 60 per cent or more as compared with pre-War prices.

Commodity prices so far have only risen by 25 per cent and cost of living by 36 percent, but World wheat at Liverpool and Chicago wheat prices are still merely at pre-War levels.

Following factors have tended to raise [prices]: Russia buys Australian wheat. 1938 World winter wheat acreage [illegible] less than a year ago. Argentine Government states 10 per cent of seeded corn acreage is total loss—South African Government authorized importation of wheat and flour—Mexico authorizes importation of corn free of all duty.

Following factors have tended to lower price: Further beneficial rains received in U.S. Winter Wheat Belt—Mexican wheat production greater than last year—Bulgarian and Belgian wheat, rye and barley all greater than last year. Exports of new wheat from India will commence April 1st. Wheat prospects in Greece, the Balkans and Hungary mostly favourable.

Sun Spots And "Miracle" Wheat

Throughout the years it has been noted that from time to time unscrupulous salesmen descend upon farmers, and offer them, with much mystery "miraculous" and "wonderful" new varieties of seed that will give amazing yields to the acre. Yields from 100 to 200 bushels to the acre are promised. Many farmers are induced to buy this material at $5.00 a bushel with the suggestion that if they multiply it they can sell it in turn to others at from $2.00 to $3.00 a bushel.

Sometimes these salesmen change to barley or oats. Last year, for instance, the old discredited variety, Golden Ball barley, was a favourite. This year it is the turn for oats and farmers are being offered what is being described as a veritable "gift from God" i.e. "Don de Dieu" oats, which will yield according to promoters, as high as 200 bushels to the acre. Tests made by the Dominion Experimental Farms, however, reveal that the yield of this unlicensed variety is decidedly less than Victory, Banner or any other standard Canadian oats, and the quality, moreover, is poorer. "Don De Dieu" oats are being offered at $5.00 a bushel, or three pounds for a dollar.

In 1915 it will be remembered "Mummy" wheat, said to be taken from King Tut's tomb, was offered. In 1924 "Miracle" or the "Mortgage Lifter" wheat was pressed upon farmers. In 1913 "Jerusalem" wheat was, with much secrecy, tendered as a royal road to fortune.

In [previous] decades the names of these "wonderful" wheats have been "Eldorado", "Three Thousand Year Wheat", "Many-Headed" and "Wonder." All these wheats however, being nothing more or less than "Alaska" a Poulard wheat, a low yielding variety which is nothing actually but chicken feed. Farmers are deceived because the individual heads are large and contain a lot of kernels. The trouble is, however, that there are comparatively few heads to the acre.

In 1927 a "remarkable" side oats was offered in Western Canada that was guaranteed, with its alleged enormous yield, to pay off the mortgage on the farm within two or three years. Tests showed, however, that it was only an inferior low-yielding variety.

Is It Sun Spots?

If the reader will examine the dates given it will be seen that these "great bargains" are offered about once in every eleven years. Why should this be? Astronomers and physicists tell us that the sun-spots increase in size and activity every eleven years and many persons think that the more intense rays have an effect upon the human mind and emotions. Whether it is that the enlarged sun spots, therefore, every eleven years make salesmen unscrupulous, or farmers credulous, we do not know?

Happily our Canadian farmers do not have to be exploited if they do not wish to be, for they have many safeguards to protect them, not enjoyed by farmers of other countries. It is illegal, for instance to sell, buy or have in one's possession for sale any seed that is not of a licensed variety. Any Agricultural Governmental official, therefore, can quickly inform a farmer whether a new variety of grain is of any value or not, for all known varieties for most parts of the world that possess any possible merit, are constantly under test by the Universities and Dominion Experimental Farms. Every variety that by test has been found to be of real value to the farmers of Western Canada also is actually being multiplied into excellent Registered and Certified seed, all under Government inspection, by members of the Canadian Seed Growers' Association, and is available to Canadian farmers at moderate prices.

Organizations such as the Dominion and Provincial Departments of Agriculture, the Companies associated with the "Crop Testing Plan" and others have at all times accurate and up-to-the-minute information on varieties that are good and on those that are not good. By making a few simple enquiries therefore, Canadian farmers can save themselves from losses that would come from the purchasing of discredited and useless varieties.— (Searle Grain Company Ltd.)

What Grading Of Eggs Has Done In Canada

Canadians, on the average, each eat about 22 dozen eggs per year. This consumption is among the highest of the countries of the world. One reason for this undoubtedly is that Canadian eggs are carefully graded according to Dominion Government regulations and the merchandising of eggs is controlled and supervised from producer to consumer.

The eggs available in the retail stores of Canada to-day are a distinctly different product from those which were commonly offered for sale fifteen to twenty years ago. Improved production methods, better handling and quicker marketing all have been instrumental in bringing about this improvement. Of greatest significance, however, has been a system of egg grading which for fifteen years has required that the purchase and sale of all eggs in Canada be conducted on a basis of quality grades.

All eggs sold in Canadian retail stores are required to be graded and identified with the grade name. There are three main quality grades—Grade A, Grade B, Grade C. Grade A eggs are sold in three weights. Grade A Large, Grade A Medium, Grade A Pullet. The quality is the same in all three weights.

Apart from the unexcelled food value and wide usefulness of eggs in cooking as indicated by the hundreds of ways of using eggs as food, there are two sound reasons why the Dominion Department of Agriculture is so concerned about the grading of eggs. First, it is felt that the Dominion Government has a responsibility in seeing that the public obtains good food in the interest of the health of the people, second, it insists that eggs shall be marked according to quality in order that the producer will be paid on the basis of quality and the consumer assured of the quality he desires.

Make Demand For Gravelled Roads

A record influx of tourists this year is anticipated by Canadian travel agencies.

Thousands of inquiries have been received already by the Canadian Travel Bureau, which is doing extensive advertising in the United States and elsewhere. An unprecedented response has been secured, demonstrating the value of such advertising when there are such exceptional scenic attractions to display.

This influx is a movement that Alberta will participate in, depending to the extent that it can assure the visitors comfortable and safe highways for motor tourists.

The importance of all-weather highways is realized by various rural sections, where there is a growing interest in the possibilities of new tourist business.

Already delegations are being organized to present to Hon. W. A. Fallow, Minister of Public Works their demands for gravelled roads. These people realize that they need such highways to connect with the main routes of travel and thus increase the business of their own communities.

When Alberta has a net-work of hard surfaced and all-weather highways, it will challenge the supremacy held by other provinces in attracting the tourist trade. This is a need emphasized by officials of the Alberta Motor Association.

With an early start this spring on first-course hard-surfacing, with a view to completing the main route north of the international boundary as speedily as possible, Alberta will make a strong bid for new tourist records this year.

A Type

****

V[illegible]ville is the type of fellow that goes into a drug store for a nickel drink, and expects with it two glasses of water, the use of a table and chair for an hour, the opportunity of listening to the radio, the right to read a thirty-five cent magazine, the privilege of three ten-minute conversations over the telephone and then complains because the place is not air conditioned.

Timely Recipes

By Betty Barclay

Sunkist Pastry

Sift together 3 cups sifted flour and 1 teaspoon salt. Cut in 1 cup shortening. Add 1 slightly beaten egg, combined with 4 tablespoons lemon juice. Add ice water gradually—just enough to bind dough together. Roll pastry out thin and line pie plates. Bake in hot oven (475 degrees F) for 15 minutes. (Makes three 8-inch single pie shells. Keep unbaked dough in refrigerator until needed.)

****

Magic Lemon Meringue Pie

(Makes 1 pie)

1 1/3 (1 can) sweetened condensed (not evaporated) milk
½ cup lemon juice
Grated rind of 1 lemon
2 egg yolks, beaten

Stir together thoroughly. (Filling will thicken as though cooked.) Pour into crumb crust pie shell made as follows:

Unbaked Crumb Crust

Roll enough lemon or vanilla wafers to make ½ cup crumbs. Arrange a row of wafers to stand around edge of 9-inch pie plate. Mix rolled crumbs with 2 tablespoons melted butter. Cover bottom of plate and fill in spaces between wafers and crumb mixture. Pour in filling and top with a meringue made of

2 egg whites
[illegible] sugar
[illegible] teaspoon baking powder
1 teaspoon grated peel (orange or lemon)

Beat egg whites until frothy and add sugar, baking powder and rind. Continue beating until stiff. Cover pie. Put in moderate oven (325 degrees F.) for 15 minutes to brown.

****

Lemon Souffle Pie

1-3 cup lemon juice
1 teaspoon grated lemon peel
[illegible] tablespoons hot water
[illegible] teaspoon salt
[illegible] sugar
[illegible] yolks very well beaten

[illegible] in double boiler until thickened about 15 minutes. Fold in [illegible] egg whites, beaten stiff with [illegible] cup sugar.

Fill 10-inch baked pie shell and brown in moderate oven (about ½ hour).

****

Scalloped Sweet Potatoes and Apples

2 cups boiled sweet potatoes cut in [illegible] inch slices
½ cup sugar
1½ cups thinly sliced sour apples
[illegible] butter
[S]alt

Put [o]ne-half the potatoes in buttered baking dish, cover with one-half the apples, sprinkle with one-half the salt. Repeat. Bake in a moderate oven one hour.

****

Baked Stuffed Fish

1 [illegible] fish
2 [illegible] bread crumbs
[illegible] chopped Brazil nuts
1 teaspoon salt
Pepper
[illegible] melted butter
[illegible] lemon juice
[illegible]

[illegible] fish. Mix crumbs, Brazil nuts and seasonings, add [illegible] melted butter and lemon juice. Mix well and stuff fish [illegible] edges together and [illegible] ovenproof platter [illegible] place around the fish, sprinkle with salt and pepper and arrange [illegible] in each half [illegible] fish and [illegible] hot oven, 450 degrees F. [illegible] 35 minutes until fish [is] tender. Remove from oven and garnish with [illegible] and parsley.

Literary Friends

****

The first time I read an excellent book [illegible] me just as if I had gained a new friend. When I read over the [book] I have perused before, it resembles the meeting with an old one.—Oliver Goldsmith.

Golfers Ready for Victoria Meet

While the rest of Canada is shivering, Victoria, B.C., will be the scene of one of the Dominion's most important — and certainly its [illegible] golf tournament of the year.

Ten years ago Victoria produced its first winter golf meet to prove that Canada too could have winter golf. The idea caught on amazingly, with the result that the tournament has grown steadily. Entries have increased, more trophies are being given, and a record turn-out is expected for this year.

Already more than 20 entries have been received for the tournament which commences March 7, from as far as Seattle including Lee Steil who won both handicap and scratch events last year and from Winnipeg, Regina, Saskatoon, Edmonton, Calgary and Vancouver. A few Eastern Canadian golfers are also expected for this annual Empress Hotel fixture on the famous Royal Colwood course.

The main event is a handicap competition for both men and women for the Sir [illegible] Beatty trophy. Other prizes include the Victoria Chamber of Commerce open trophy, [illegible] on a scratch basis, men [illegible] inter-club team, [illegible] trophy [illegible] match, Rotary Club [illegible] women's best [illegible] and special medal awards.

All in all it adds up to five days of golf and fun with the Empress Hotel and Royal Colwood clubhouse en fete to receive golfing visitors.

McKENZIE

A shower was held for Mrs. Frank Baumgartner, nee Ruth Jones, at her parents home. There were 24 ladies present. She received many lovely and useful gifts and a delicious lunch was served by the club members and also Mrs. Mel Woods and Mrs. Redway. Mrs. Woods and Mrs. Redway attended to the entertainment. A good time was reported by all.

Mr. Secord, Mr. Trent, Gordon Ferguson and others made a trip to Edmonton Friday to attend the Blackfoot meeting.

City visitors this week are: The Walker's, Tommy Jones' and Joan Englesham.

Marie Jacobson is recovering from her attack of measles and is feeling fine now. Mrs. Jacobson has been sick with the flu this past week.

Mrs. E. Anderson is home again from the hospital. She stood the trip very well.

Mrs. Tommy Jones and Mrs. Englesham visited at the Anderson home Monday night.

Irma Anderson was home from [illegible] a week with a bad cold.

We are glad to know that Mr. Booth is up and around again after his illness.

Mrs. Harold Weatherill visited with her parents west of town last week.

[illegible] Myers of Edmonton spent a few days with her grandmother, Mrs. Moss.

Mrs. Robe[illegible] spent Friday afternoon with Mrs. Jacobson.

Small Fortune Pops Out Second Hand Mattress

CALGARY, March 9.— E. J. Prescott, Great War pensioner, bought a mattress at an auction sale and found wealth—$300 worth in mining shares.

As he unloaded the mattress at his modest bungalow home an envelope containing the shares dropped to the ground.

"I was going to give them to my little girl to play with, then I saw they were stocks of some kind," he said last night.

He immediately notified police and the owner was found, Mrs. C. E. Kilner, of Calgary. The stocks were returned to her two hours before she boarded a train en route to England.

"I won't have time to see Mr. Prescott but please thank him for me," said Mrs. Kilner. She took his address and said she would write to him when she arrived in England.

"Sure I could have used the money they would have brought," said Prescott, "but I never stole anything in my life and I'm getting too old to start now."

Who Owns the Assets of Life Insurance Companies?

Answer. —These assets are jointly owned by more than 3,500,000 policyholders—men and women who constitute one-third of Canada's population.

Question.—What is the average share of each policyholder in these assets?

Answer. —About $571. This shows that Life Insurance assets are made up of the savings of millions of thrifty men and women.

Q.—What is the nature of Life Insurance funds?

A.—They are trust funds held by the Life Insurance companies to pay policy claims as they fall due.

Q.—How are these funds invested?

A.—In loans to governments and municipalities—for building homes and schools—for improving farms—for constructing good roads and transportation systems—for developing industries and public utilities.

Q.—To what extent does Alberta share in such investments?

A.—More than Ninety Million Dollars of Life Insurance funds are invested in this Province.

This is the third of a series of messages, sponsored by Life Insurance Companies operating in Canada. The fourth, to appear in two weeks' time, will discuss Life Insurance investments.

Prize Hunting Dog Trapped: Chews off Foot

MEDICINE HAT, Alta, March 9 —An English setter, a prized hunting dog, trapped in a wire rabbit snare, chewed off his own foot—wolf fashion—to escape and return to his home here.

Missing for two days, the dog hobbled home Tuesday morning. There was a wire around his neck so tight it had to be cut off, and a trail of blood led to his master's doorway. Unable to ease his suffering, the dog was destroyed last night.

Grey Owl Has Plan For Design Canadian Flag

OTTAWA, March 9 — Grey Owl, Indian naturalist here on a speaking tour said last night he thought Canada should have a flag of her own.

"I think that two beavers on the left and nine maple leafs on the right representing the nine provinces is a fitting design for the Dominion's flag," he said.

Quarry Blasting Stopped So Kids May Play Again

MONTREAL, March 9—Police patrolled a stone quarry in suburban Rosemount Tuesday to prevent contractors from continuing blasting operations that have terrorized the neighborhood for weeks. Relieved householders let the children out to play and repaired holes in the roof caused by falling stones.

A six-pound stone plunked through the roof of James Black's home the other day and dropped to the floor beside the baby's crib, empty at the time. A piece of rock weighing several pounds fell within inches of a child playing in a yard.

Actions have been launched in recorders court against J. H. Charron and J. A. Charron, the contractors, city officials said.

Corpse Admits Funeral Rites Not Completed

WINNIPEG, March 9— Francois Joseph Deniset was not only surprised but slightly bewildered when he saw his own death notice in the paper. And the city editor was not only surprised but slightly bewildered when he heard over the telephone "I want you to take that out of the paper about my death."

The editor explained a person, claiming to be Deniset's son, telephoned the information regarding the death and gave a sketch of Deniset's career. Funeral arrangements have not been completed, said the informant, and that was the only thing with which Deniset could agree.

Fishermen Fight Battle With 25-Foot Monster

BOSTON, March 9—A battle for life between the entire crew of the fishing trawler Boston and a sea monster Tuesday was described by the crew with the arrival of the vessel at the fish pier.

Captain Nicholas Cole and his 19 fishermen were divided in opinion as to whether the monster was a whale or a shark. All agreed however, they battled for several minutes to subdue and kill the 25-foot "catch" with axes, knives, clubs and other weapons.

Captain Cole said the nets picked up the fighting whale, or shark, while dragging for ground fish off Cape Cod last Sunday.

The weight of the captive, Captain Cole said, made it necessary to rig a tackle from the masthead. Once on deck and free of the net, he added, the monster lashed out in all directions, wrecking many of the deck fittings. Only after the entire crew, with the handiest weapons at hand, attacked the prisoner, was it killed. The carcass was tossed overboard.

Cough Syrup Subsistence For Five Days In Ice Jam

PORT BURWELL, Ont., March 9 —Cough medicine was the only "food" that Cecil Martin and his father William had for five days while their tug was lost in the ice jams miles offshore in Lake Erie.

The younger Martin back with his wife and seven-weeks-old baby Tuesday said they had no food and very little fuel aboard the tug.

"It was lucky my father had a cold because we had a bottle of pine-flavored cough medicine for him, and that was all we had.

"We used to take a sip each, several times a day."

Cecil explained his father's cold was much better.

Caution

Advice of an old farmer to his sons: "Boys, don't you ever speculate, or wait for something to turn up. You might just as well go and sit down on a stone in the middle of the meadow, with a pail 'twixt your knees, and wait for a cow to back up to you to be milked."—Wit and Humor.

Savory Macaroni

½ package macaroni
3 quarts water
1 teaspoon salt
½ pound cheese
1 cup chopped Brazil nuts
2 cups canned tomatoes
salt, pepper

Cook macaroni in boiling salted water until tender. Drain, blanch in cold water and arrange in greased baking dish in alternate layers with cheese and Brazil nuts. Season tomatoes to taste with salt and pepper and pour over macaroni. Bake in moderate oven (375 degrees F.) about fifteen minutes until cheese is melted.

Safety in Numbers

Hubby was leaving on a business trip, and had decided to take three umbrellas with him.

"Why three umbrellas, my dear?" asked his wife.

"Well, he replied, "one to leave on the tram, the other to be left in the train, and the third in case it rains."—Montreal Star.

Black Boots of best elk and retan leathers priced at .... $3.75 and $3.95

High boots of khaki or brown elkola leathers, 9 inch tops... $3.95; 12 inch tops... $4.65

H. E. ROGERS

Which Variety Shall I Use?

Many farmers are asking themselves this question.

It isn't easy to decide.

One piece of advice, however, may be given.

By all means use a few bushels of high quality Certified or Registered seed of whichever variety is decided upon. This will certainly increase any farmer's income.

See the nearest SEARLE or HOME Agent for good seed at a reasonable price.

SEARLE GRAIN COMPANY, LIMITED

LOOK AT THESE VALUES!

Vol. XVIII No. 4 Thursday, March 17, 1938 $2.00 Per Year. To U.S.A. $2.50

Town Council Appoint New Committees For 1938

At a meeting of the town council held Monday March 7th, the following standing committees for the year were appointed: Finance— Councillors Brace and Taylor; Property, Rink and Cemetery— Councillors Taylor and Brace; Health and Relief—Councillors Law and Hammond; Fire and Light— Councillors Hammond and Law; By-Laws and Police—Councillors Lovell and Bellamy; Public Works—Councillors Bellamy and Lovell.

The first named is chairman of that committee. H. W. Lovell was appointed Deputy Mayor for the next ensuing three months. Estimates of receipts and expenditures for the current year were prepared and the secretary directed to submit them in proper form to the Board of Public Utility Commissioners for approval. All councillors were present excepting Councillor Brace, who was in the east at the time. Mayor Swift presided.

CARD OF THANKS

Mrs. J. Chapman, William (Bill) and George wish to thank their many friends for the acts of kindness and expressions of sympathy and condolence extended to them during their recent bereavement; also for the beautiful floral tributes received. They especially wish to thank Rev. D. K. Allan, Rev. A. Wallis, Mr. A. E. Ottewell, and the members of local Masonic Lodge and of the Order of the Eastern Star.

LINDBROOK

The "general synopsis" of the weather here is freezing hard at night and thawing during the day. The forecasts being of two opinions one class of "experts" predict more snow and cold, whilst the others predict "mud galore." Most of us hope for the latter.

Some lambs have made their appearance in the flocks around here, but its too early yet for the main column to arrive.

The sympathy of the people of Lindbrook is extended to Mrs. Chapman sr., and sons Bill and George on the death of husband and father. Mr. J. Chapman was well known and respected by all that knew him and Tofield will miss this old timer.

Mrs. A. Jenson is at present in a hospital in Edmonton, after undergoing an operation, as far as we know she is doing well and will possibly be home again within the next two weeks.

Best wishes for long life, health, wealth and happiness to Miss Janet Brown on the occasion of her marriage is the wish of friends in Lindbrook.

Many happy returns of the day to our good old Irish gentleman, Mr. Otto Lindgren, late of Sweden, who chose St. Patrick's day to make his debut into this vale of tears.

Many happy returns of the 10th of March to Mr. James Hooper also of Lindbrook.

Also on the 25th to our school teacher, Miss Yvonne Phipps of Strome, Alta.

The attendance at the sale of Mr. Hbt. Rogers was quite a large one and taking it all in all it was a good sale.

LOCAL & PERSONAL

Mr. Ed Kallal sr., returned this week from a trip to the states where he visited relatives and friends.

Miss Lois Thompson spent the week end at her home in Leduc.

Mrs. Lovell, Mrs. Patterson and Pat Burnett returned last Friday from Edmonton after spending several days there attending the Rebekah lodge convention.

Mrs. Ellis from Edmonton, spent the week end visiting Mrs. Malcolm.

Mr. and Mrs. Geo. McLaughlin of Wetaskiwin are Tofield visitors today.

Miss L. Ross visited the city on Tuesday last.

Mr. and Mrs. N. Scott spent the week end visiting in Edmonton.

Miss Jessie Munro visited friends in Edmonton for a few days this week.

Mr. and Mrs. S. Yakabuski spent the week end visiting at Mrs. B. Soule's home.

Mr. A. Beirnes left on Saturday for Trail where he expects to be working.

Mr Harold Schultz spent the week end visiting in Edmonton.

Eric Edwards and a couple from Ryley left this week for Trail, B.C.

Messrs. Walter Schultz and Ed Kallal jr. spent a couple of days in Edmonton.

Miss Victoria Hobson of Edmonton is visiting with Jessie Munro for a few days. Friends will remember Victoria when she resided in Tofield.

Miss Lois Wilson, elocutionist, and assisting artists, will give a program in the United Church on Tuesday, March 22nd.

All members of the Tofield Curling Club are requested to attend a Special Meeting in the Curling rink Monday at 8 p.m. This meeting is called regarding the cistern, so please be there.

Perry Bore and Nan Nixon and B. Hobson from Edmonton spent the week end in Tofield visiting friends.

The Tofield Young People's Society are holding their final meeting on Monday, March 21st, in the form of a banquet. All members are cordially invited to attend.

Rev. Dr. Geo. A. McDonald, Knox Church, Edmonton, is to deliver his popular lecture "Under Arctic Skies" on Monday, March 28th. This will be a great treat for Tofield and district.

The Rev. D. K. Allan is attending the Alberta Conference Home Mission Committee meetings in Edmonton this week.

Major R. W. Hale, District Supt. of Postal Service, inspected the Tofield Post Office this week. Major Hale and A. B. Clutterham served Overseas in the same Company with the 49th Battalion.

THOS. G. DARK, licensed Optometrist will be at the Hotel, Tofield, on Monday morning, April 4th, from 10 a.m. to 12 noon.

Rev. and Mrs. Wallis, Mrs. J. W. Robinson and Mrs. H. Barden are attending the Anglican church convention in Edmonton this week.

Mr. and Mrs. Lawson from the Ketchamoot district have taken up residence in town.

Miss Marjory Stewart spent the week end in Edmonton visiting with her parents.

Norman Glover returned from Edmonton last week end after taking a course in barbering. He is now working in his barber shop here.

KETCHAMOOT

Miss Nellie Lindsay spent the week end visiting in Edmonton.

The Coombes family received a phone call on Friday of last week stating the death of Mrs. Coombes' mother, Mrs. Graves, living near Ashmont.

Mrs. Austin McBeth of Calgary came one day last week to visit her father, Mr. Frank Hull, and sister, Mrs. O. Barnes.

Mrs. H. McGinitie entertained the Social Hour Club at her home Thursday of last week.

Mr Harold Schultz returned home Sunday after spending a few days visiting his sister, Mrs. Stanley Jack and brother Alvin in Edmonton.

Mr. and Mrs. Geo. Lawson moved to their home in Tofield last week.

Mr. and Mrs. G. W. Sears, son Stanley and Mrs. W. A. Mitchell motored to Edmonton Thursday of last week, returning home the same day.

Mr. C. Coombes, son Harold, Mr. and Mrs. Ralph Barnes were city visitors Friday of last week. Master Harold Barnes will be able to return home this week from the hospital.

Mr. A. F. Schultz attended the funeral of the late Mr. Chapman in Edmonton on Thursday.

Mr. and Mrs. J. H. Ingram, Mrs. Leo Ovelson, Harold Coombes and the Sears brothers were Sunday guests of Mr. and Mrs. Wendall Wiley.

One hundred or more friends and neighbors turned out to the shivaree on Mr. and Mrs. Martin Lawson at their home Wednesday evening of last week. A most enjoyable time was spent.

Ingram school hockey team and the Ketchamoot team played a game on the ice on the John Lee farm. The score was 5-5.

The Nomeland family are making preparations to move to their own home this month, known as he Clinton Hull farm. Messrs. Jim Ratigan and Wm. Ingram are doing the plastering work.

Mr. and Mrs. Maurice McGinitie are entertaining the Social Credit group at their home Friday night of this week.

Miss Kathleen Ingram is assisting her sister, Mrs. T. D. Ferguson of Lakeshore, with her house work.

Mrs. Leo Ovelson of Miquelon district is visiting at the home of her parents, Mr. and Mrs. J. H. Ingram.

Mr. and Mrs. Adolph Weder of Miquelon are spending a few days visiting Mrs. Weder's folks, the Kleinschroth families.

HOCKEY

The Tofield senior hockey team met Holden at Holden in the final game of the semi-finals. Holden won the game 4-3, but Tofield won the series by the total number of goals scored in the two games. Irma and Tofield are to meet in the finals of the Gas Line League, but due to ice conditions it has been impossible to complete the league.

On Saturday evening last, the Tofield boys played an exhibition game at Camrose. Camrose won the game with the score of 7-6. Two overtime periods were necessary before the winner was decided.

On Monday, March 14, the Holden High School played the Tofield High School team. The Holden boys had most of the play in the first two periods, when Tofield put on a spurt and ran in five goals. . The final score read 6-3 in favor of Tofield.

The scorers for Tofield were: Harris McClymont 1, Jack Innes 1, Arnold Swift 2, Charlie Worton 2.

Line-up— Tofield: Allan Harrison, Jim McAllister, Allan Swinton, Jack Innes, Harris McClymont, Art Smith, John Moore, Arnold Swift, Leonard Worton, Charlie Worton.

Referee—Bill Worton

Plowing Starts In South Alberta

LETHBRIDGE, March 16— Spring is here. Plowing started Tuesday at Magrath, 20 miles south of Lethbridge, one farmer turning over a field of timothy sod. Snow has practically all disappeared and fields are drying rapidly.

Bill McCauley On Screen Member of Lapp's Orchestra

Tofielders who were fortunate enough to be in Edmonton last week and attended the Capitol Theatre, received quite a thrill when they saw Bill McCauley on the screen. Bill is a member of Horace Lapp's orchestra of Toronto which was showing in "Music From the Stars," part of the Capitol Theatre program in Edmonton last week. Bill was born in Tofield and received his education at the public and high school here. During his years at school and later he was very interested in music and two years ago he left Tofield for Toronto and became a member of Horace Lapp's orchestra. Last summer the orchestra played at the Banff Springs Hotel at Banff and later journeyed to the coast, then back to Toronto. The best wishes of Bill's Tofield friends go with him and wish him continued success in the future.

U.F.W.A. NOTES

The Tofield U.F.W.A. met at the home of Mrs. Geo. Cookson, Thursday March 10. There were 19 members and 4 visitors present. After the customary business routine, Mrs. A. P. Moon very ably presented a paper on "Fear in a Child." This brought forth many keen comments.

Some late arrivals were confronted with the announcement that all who failed to answer Roll Call were liable to a 5 cents fine. So, rather than part with hard-earned nickels, they added a few more uses of common salt to the interesting list already given. One new member was welcomed to our ranks.

The Local has on hand a limited number of the ever popular U.F.W.A. Cook Books, priced at 75c and $1.00. These may be obtained from the secretary, Mrs. V. Moon. The April meeting will be held at the home of Mrs. A. F. Bigland.

L.C.C. NEWS

The L.C.C. meeting for the month of February was held at the home of Mrs. F. Kortzman, Mrs. W. L. Gill assisting hostess. A large crowd was present, there being seventeen members and five guests. The guests were: Mrs. G. Mackenzie, Mrs. J. Lindberg, Miss Myrtle Logan, Miss Christie Robinson and Miss Thelma Kortzman.

The roll call was answered by valentine verses.

Popping corn was the order of the day. Grown locally in the garden of W. L. Gill, this corn really pops and it goes to show we can grow almost anything we want in the Tofield District. Popcorn did not, however, lessen the ladies appetites and lunch was served in the usual manner, after which members always seem in a hurry to get home. Don't forget members, the next meeting to be held at the home of Mrs. J. Pruden, will be our annual, where your chance to be Madam or Mademoiselle will be considered.

The Whist Drive for the ladies' Men folk was held at the home of Mrs. A. Scott. An enjoyable time was had by all present. Seven tables of court whist were played and the prizes were carried home by Mrs. J. Bailey and Mr. Wm. Robinson. Consolations going to Frank Kortzman, lady, and Charles Morden. The ladies are now looking forward to the entertainment expected from the men.

CERESAN

The total annual loss to the Farmers of Canada through smut losses is estimated at $12,000,000. Have you figured what your individual loss amounts to? Your loss can be eliminated by the proper treatment of seed at a small cost. The use of Improved Ceresan will kill smut. Ceresan also lessens the loss from seedling blight. Clean and treat your grain now and avoid loss of time when seeding.

CERESAN— 1 lb. $1.00; 5 lbs. $3.90; 10 lbs. $7.50
(½ oz. treats one bushel)
WE ALSO RENT OUT A TREATING MACHINE AT $1.00 PER DAY

[illegible] of her, darling, some of her."

Water As Weight In Farm Tractor Tires

(Experimental Farm Note)

The [illegible] used use of pneumatic rubber tires for farm tractors during the past five years would indicate that this form of wheel equipment has met with reasonable success in the prairie region of Western Canada. Tests conducted at the Dominion Experimental Station, Swift Current, Sask., show that air pressures from seven to ten pounds, depending upon type of footing, and as much weight as possible on the drive wheel tires result in increased [illegible] and decreased tire wear due to reduction of drive wheel slippage.

Cast iron wheel weights, as supplied, are expensive and at least two pairs are required for minimum results. Recent tests at the above Station indicate that water and commercial calcium chloride put into the drive wheel tires will give a more satisfactory weight with less slippage and better riding quality than the cast, attached weights.

A solution of about 30 per cent commercial chloride will produce a weight of 460 pounds in a 12.75x28 inch tire and will give a 30 degree below zero protection against freezing. This is a very important consideration for any tire or during freezing weather in the spring and fall as well as to store the tractor, with water in the tires, during severe cold [illegible] protection may be secured at a cost of $ 1-2 [illegible] pounds of calcium chloride or $7.50 for each 12.75 x28 inch tire, and with 32 1-2 gallons of water, making a total of 460 pounds per tire costs less than one cast iron wheel weight of only [illegible]

This solution in the tires to the three-quarters full mark with seven pounds of air pressure has reduced the "bounce" on rough ground and increased the traction where it was most needed. Rubber companies endorse the use of calcium chloride solution in contact with the rubber tires since it has a preservative effect. As all metal parts of the valve are of [illegible] nickel no corrosion results from the use of this solution.

Because of the advantages in cost, drawbar efficiency and riding comfort the use of water and calcium chloride in tractor tires is highly recommended.

Railways Perform Vital Services

Montreal, March 14—"The common measure of railway performance is that of ton miles and passenger miles," said A. A. Gardiner, Assistant General Passenger Traffic Manager of Canadian National Railways, [illegible] of Canada in [illegible] average of [illegible] by the Canadian National [illegible] the immensity of [illegible] their normal [illegible] the railways [illegible] vital services which have been taken for granted, simply because they are of the established order of things. Public mindedness on the part of the railways there has been. It must find its corollary in railway mindedness on the part of the public."

Recommended Wheats

Herewith is given a brief description of the varieties of wheat recommended for growing in Alberta.

Marquis—Origin: Marquis is a descendant of a cross made in 1892 by officials of the Central Experimental Farm, Ottawa, Ontario, between an early ripening wheat, obtained from India under the name of Hard Red Calcutta, and Red Fife. It was isolated in 1903 by Sir Charles E. Saunders, then Dominion Cerealist, and was first sent to Western Canada for trial on branch farms in 1907. Description: Head beardless; chaff white and smooth and held more closely than in Red Fife; kernels red and hard, medium early maturity; straw stiff and of medium length; susceptible to rust (Puccinia graminis tritici). Marquis resembles Red Fife quite closely, being distinguished chiefly by shape and density of head, "spread" of tip awns, shape of glumes and length of "beak." It also requires from a week to ten days longer for Red Fife to ripen. Milling and Baking qualities: When grown under favourable conditions, Marquis mills freely into a flour of good colour which in turn produces strong elastic doughs of the best type not only for baking into "well piled" loaves but for blending with weaker wheats. For many years, this variety has been taken as the standard of quality upon which our highest grades of wheat are based. Status and Distribution. The ability of Marquis to mature several days earlier and to resist lodging better than Red Fife, coupled with its superior yielding capacity, caused it to supersede the latter variety with amazing rapidity until it occupied by 1928, probably 90-0 per cent of the area devoted to spring wheat in Western Canada. Since that date, however, it has been superseded to quite an extent in parts of Manitoba by Mindum, Ceres, and Reward, Garnet and Red Bobs. It is grown to a limited extent in Eastern Canada and in British Columbia.

Reward—Origin: Reward is the result of a cross made in 1912 at the Central Experimental Farm, Ottawa, between Marquis and the very early maturing variety Prelude. It was first released for trial by farmers in 1926. Description: Head rather "ragged" in appearance and bald except for a few short tip awns which are dark in colour toward the base; chaff white with a sparse covering of very fine hairs; kernels hard, very [illegible] and dark red when fully ripened but otherwise have a tendency toward a greenish bronze cast which not infrequently degrades the sample, straw medium long and very stiff; suffers less than Marquis from attacks of stem rust; matures five to eight days earlier than Marquis, [illegible] than Marquis but does not shatter readily, quite susceptible [illegible] Milling and baking qualities: Reward excels in the characteristics which distinguish a good wheat of the Manitoba Northern type. It is consistently higher than Marquis in weight per bushel, protein content and baking strength. Status and Distribution: Reward enjoys an enviable reputation as an early wheat and as a wheat of unusual quality and weight. Unfortunately it falls short in yielding ability except in certain more or less restricted areas such as the Park Belt across the north. Generally speaking, it is probably safe to say it has been gaining steadily in popularity especially since growers began to sow it more heavily. Since its introduction, it has been a consistent championship winner at the International Hay and Grain Show at Chicago and at other seed exhibition.

Red Bobs 222—Origin: A re-selection of Early Triumph made at the University of Alberta, Edmonton, and first distributed about 1925. Description: This variety is indistinguishable from Early Triumph. Milling and baking qualities: As a result of numerous comparisons made between this variety and Early Triumph, it would appear that there is no significant difference in quality between the two. Red Bobs 222 has been extensively tested for a number of years and has proved to be a high quality variety in the better wheat growing areas of Alberta and Saskatchewan where rust does not occur. It becomes quite starchy in the wooded areas of [illegible] Alberta and Saskatchewan and, although about equal to Marquis in baking strength when grown in these areas it is substantially below Reward. In flour yield it is slightly superior to Marquis and [illegible] in flour colour. Status and distribution: The distribution of this particular selection has been confined chiefly to Alberta, in which province it appears to be gaining in popularity, especially in the southern areas where the combine harvester [illegible] which it seems well adapted, is exclusively used.

Canus—Origin: Canus came from a cross made in 1918 at the University of Minnesota between Marquis, a spring wheat, and Kanred, a winter wheat. The selection was isolated at the University of Alberta, Edmonton, by Dr. O. S. Aamodt in 1929 because of its resistance to foot-rots and covered with smut. Description: Head strongly bearded, fusiform and mid-dense; chaff white and smooth; beaks acute, 1/8 inch-1/4 inch in length; shoulder narrow with tendency toward elevation; kernels red, hard and more or less oblong; straw strong of medium length and white in colour; kernel is held tightly by the chaff; matures about the same time as Marquis; highly resistant to covered smut and foot-rot; relatively resistant to spring frost in the seeding stage. Milling and baking qualities: Canus resembles Reliance in being higher than Marquis in weight per bushel and flour yield but slightly lower in protein content and in baking strength. The flour is less yellow than is that from Marquis. Status and distribution. Being a recent development, this variety has not as yet been widely distributed. From the results of co-operative tests conducted at various points throughout Western Canada Canus appears to be well adapted generally to the region where Marquis is grown, and where stem rust is not an important factor. It has proved a very susceptible to stem rust under field conditions. It has a high yielding capacity under a great variety of conditions. In comparison with the present commonly grown varieties, it appears to be more suitable for the drier areas of south-central and eastern Alberta.

Garnet—Origin: This variety is the result of a cross made at the Central Experimental Farm, Ottawa, in 1905, between the two Ottawa varieties [illegible] and bald except for a few short tip awns; chaff white, smooth, long and soft in texture; beak very [illegible] and sharp, about 1/8 inch length, usually longer, thinner and sharper than Marquis, straw white and of [illegible] length but not as strong as Reward; the grain, which is usually [illegible] and thinner than the latter [illegible], ripens and colours well in [illegible], very susceptible to rust but considered the most resistant to smut of any variety now commonly grown in Canada; shatters rather readily. The germ is set in the kernel at a very oblique angle. Milling and baking qualities: Garnet exhibits somewhat different milling characteristics than Marquis, requiring as it does to be tempered or conditioned differently for best results. It also mills into a flour which is more yellow in colour than Marquis. Judged by crude protein content, loaf volume and a tendency toward a shortness in the dough, it is not entitled to rank with Marquis in baking quality. The northern areas of Alberta and Saskatchewan where Garnet is most suited [illegible] are not conducive to the production of high quality wheat and under these conditions the [illegible] baking strength of Garnet [illegible] Reward is accentuated. Alberta Wheat Pool Bulletin.

HEALTH

A HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION AND LIFE INSURANCE COMPANIES IN CANADA

Posture

The upright position has many advantages but, unfortunately, there are persons who, for one reason or another, have developed such poor posture as to be handicapped in life.

To a considerable extent, good posture reflects good health, and when conditions are such as to interfere with good posture it is no exaggeration to say that such conditions are likely unhealthy.

The child who spends many hours each day at a school desk which is too low for him and which thus forces him to slouch down to use his desk is likely to have stooped shoulders.

We might say that while this situation can be dealt with by having at least two or three sizes of desks, in no case should the school child be kept sitting for long periods. Long periods of sitting lead to a weariness which is expressed in drooping shoulders.

The posture of women has improved since they have given up the garments which were used to constrict the figure. At the same time, women have relieved themselves of the burden of innumerable superfluous garments.

Poor posture is often the result of ill fitted shoes. Feet vary in size, shape and position. That is why care should be taken to fit the shoe to the foot rather than to attempt to mould the foot to the shoe.

Good posture promotes good health because it allows for the organs of the body to function in their normal position, whereas poor posture may constrict and limit action while pressing organs out of their normal place in the body.

Good posture is a personal asset in that it gives to the person a sense of well-being and comfort and a certain desirable assurance. Good posture will not solve the health problems of the world but it will help to prevent some of the ills which afflict mankind.

Healthy muscles, well-built frame, proper food and kept strong through exercise are essential to hold the body in good position. Weak muscles cause slouching shoulders and protruding abdomens, with narrow chests.

Good food, a reasonable amount of exercise and sufficient rest, together with posture of these, promote good posture and good health.

TESTED RECIPES

EGGS

Eggs can be served so tastily in the ordinary ways in which they are used, such as boiled, poached or fried, that many people may not realize the great adaptability of this food and that it can be used as the basis of a wide variety of dishes. However, with the true food value of eggs becoming better understood as a result of nutritional research, new ways of preparing eggs are of interest. Here are a few dishes in which they may be served.

French Omelet

Beat the eggs with a fork, adding one tablespoon of cream and one of water for each egg used. Into heavy frying pan put plenty of butter and let it get sizzling hot. Then pour in the eggs and lessen the heat. Immediately start shaking the pan back and forth, and roll the omelet as soon as the edge is firm and while it is still wet. The inside of the omelet cooks while is is being removed from the pan. To roll the omelet, lift one edge and roll it over. Tilt the skillet in the direction the omelet is to be rolled, and assist in the rolling with a spatula or knife. Slip the omelet from the skillet to a hot platter and garnish.

Poached Eggs Vienna

Take two fresh eggs and poach them in milk, with a pinch of salt. Toast two thin slices of bread and fry two strips of bacon crisp. Place the poached eggs on the toast with a strip of bacon on either side. Heat three-quarters of a cup of cream, hot but not boiling, and pour it over the eggs, bacon and toast. Salt and pepper to taste.

Eggs au Beurre Noir

Toast one slice of bread nice and brown, butter and place on platter or plate. Fry two eggs in butter, covering during process of cooking in frying pan until the desired medium "soft," "medium" or "hard" is attained, then remove and place on buttered toast. Place in the pan in which the eggs have been fried 1 tablespoon of thoroughly melted butter and when hot add 1 tablespoon of Worcestershire sauce, toss in pan until thoroughly mixed, pour over eggs and serve.

Red Rider Requests Rate For His Ride

Vancouver, March 14—When a red-rider wants to pay his fare, that's news!

It was pleasant news to Canadian National Railways today when they received a request to name their price for a ride stolen on a freight train to the coast from a small Saskatchewan town last spring.

Neither was the railway ungrateful. In seeking to name the lowest fare they checked back to the date mentioned and discovered there was an excursion being operated from the prairies to the coast at the time. This being much lower than the regular fare the excursion rate was quoted.

In their reply the railway expressed appreciation. The conscientious patron, who remains anonymous as far as the railroad is concerned, evidently secured work in the lumber industry on Vancouver Island after his trip.

Poultry Exports Show Much Improvement

[illegible] that the efforts of Poultry [illegible], Dominion Department of Agriculture, to have exporters of [illegible] poultry observe the advantages [illegible] and the weight [illegible] printed, is having the desired effect on the British [illegible] Animal Products [illegible] for Canada in London, England, concerning a shipment [illegible] February [illegible] "The [illegible] were uniform and [illegible] wonderfully [illegible] If the few boxes of the [illegible] that we examined are typical [illegible] Department of Agriculture [illegible]

He [illegible] however, Canadian poultry shipments for some time past have been making a good impression [illegible] with the grading [illegible] the package [illegible] increased demand for Canadian [illegible] poultry can be [illegible] the British market say officials of Dominion Poultry Services.

East Coulee Tots Killed On Highway

DRUMHELLER, March 14— East Coulee, small mining town 12 miles southeast of here, today heralded 14-year-old Olga Gawluk as a heroine but mourned the death of two tots Stefanie Gawluk, 6, and Janice Campbell, 5, victims of a traffic accident on the town's Main street.

Stefanie, daughter of Mr. and Mrs. William Gawluk and Janice, daughter of Mrs. G. Campbell, were playing beside a small pool of water on the street Saturday afternoon when a bus roared around a blind corner.

Driver Harold Rounds desperately applied his brakes as the huge car bore down on the tots before he could bring it to a stop a front wheel had passed over Stefanie's body. Janice was struck a glancing blow.

While she was being raced to aid, Stefanie died in her mother's arms in a car just before they reached the hospital at Drumheller. She was driven to the railroad bridge at Rosedale and carried across it on an improvised stretcher to a car waiting on the other side as the ferry is not operating and the ice is unsafe due to recent thaws.

Janice died Sunday afternoon in [illegible] hospital after physicians had fought 24 hours to save her. Appearing at first to be suffering from [illegible] she was taken home, but shortly after was brought to the hospital when she complained of pains in her back. [illegible] and performed an operation immediately, though at the time they held little hope for her recovery. She, too, was carried across the railroad bridge on a stretcher.

[illegible] attempt to save the children resulted in minor [illegible] at her home [illegible] shock and bruises [illegible] she was struck a glancing blow [illegible] approaching [illegible] Olga [illegible] and [illegible] R.C.M.P. headquarters at Drumheller [illegible] Coroner [illegible] the inquest was adjourned to Monday.

Each year East Coulee, 12 miles southeast of Drumheller, is cut off from this town when the spring ice becomes weak, until the ferry is able to operate.

Island Divorce Court Has Never Yet Granted Decree

OTTAWA, March 14 —Prince Edward Island, Canada's island province was said Friday by a government authority here to have the world's only divorce court that has never granted a divorce. In the court's century of history it has had before it only one application for divorce and it was dropped.

Some amusement was caused this week when the explanatory notes attached to a senate bill to widen the grounds for divorce said a court in Prince Edward Island had had the right to dissolve marriage since 1835. This explanatory note did not explain that only one petition has ever been presented to the court.

The bill to widen divorce grounds, now before the senate, will not disturb existing provincial regulation in respect to divorce except that it would lay down a central principle against marriages being dissolved before they have existed three years.

In its report concerning introduction of the divorce bill in the senate last Tuesday night, The Canadian Press said divorce courts in the Maritime provinces granted decrees absolute at the conclusion of the hearings.

This was erroneous as New Brunswick several years ago, [illegible] regulations covering divorce to provide for granting decree nisi, with absolute decrees being granted not less than 30 days later.

New Speed Limit Alberta Towns

Raising of the speed maximum from 20 to 25 miles per hour in towns and villages is provided for in a bill to amend the Motor Vehicles and Highway Traffic act which is now before the Alberta legislature. The measure is sponsored by Hon. E. C. Manning, Provincial Secretary.

When explaining the bill to the house the minister said the purpose of the change was to make it applicable to charges of reckless driving. So far as the speed limits were concerned, these were matters for regulation by municipal bylaw.

When a car was found to have been travelling at a speed of more than 25 miles per hour in towns and villages this would be regarded as prima facie evidence of reckless driving, said Mr. Manning.

Another change in the act is to provide that a motor vehicle about to cross a main highway must come to a stop not less than 10 feet from the highway, in order to ensure greater safety. The bill as originally drafted provided for 30 feet but on the suggestion of officials of the Alberta Motor Association, a change to 10 feet was made by the minister and approved by the house.

One of the objections to the 30 foot proposal was that the car would be too far back from the highway in some places for the driver to have a clear view before proceeding over the crossing.

Banff School of Fine Arts

The Summer School of the Fine Arts is again to be held in Banff, August 1st —27th. This will be the sixth consecutive session of the school. As in previous years, courses will be given in Music, Drama and Art under the guidance of distinguished instructors. Those who are interested in improving their acquaintance with the Fine Arts, as well as those who are practical workers and desire to study the technique and peculiar problems of their subject, will find that the School offers them unparalleled opportunities.

This year the intention is to make the work in Dramatics more intensive. By lessening the number of lectures that the students attend, it is hoped that they will derive a more thorough and helpful knowledge of those branches in which they specialize. All sides of theatrical activity will be presented, however, including the important matter of playwriting, which will again be under the supervision of the renowned Dr. Koch.

Apart from the interest of the courses themselves and the delight of a holiday spent in the beautiful setting of the Rocky Mountains, those who attend the Summer School will be able to obtain certificates to attest to the work which they have covered and further them, perhaps, in the pursuance of that work commercially.

Stork Plunks Pair Twins In Speeding Taxi

MONTREAL, March 14 — To a boy and a girl were born to Mrs. George Legault as she was being rushed to hospital in a taxicab Saturday. That ran the Legault family count to nine. Hospital attendants said the twins and Mrs. Legault were "doing fine."

Three North Children To Reside in Edmonton

Three motherless children, born in a prospector's cabin in the wilderness near Yellowknife in the Northwest Territories arrived in Edmonton Saturday in a Mackenzie Air Service plane piloted by Bob Randall to enter the Kiwanis' Children's Home.

Their mother died recently and as there was no one who could look after them, they have come to Edmonton to live in the home. Instructions for their care have not arrived from the north so very little is known about them, except that their father's name is Olmstead.

The oldest, Edith is seven and her two brothers are Archie, five, and Walter, 3. "They are lovely well-trained children and their mother must have taken very good care of them when she was alive because I have never seen children that were less trouble or more agreeable," said Miss Isobel McCaig, matron of the home.

"This is the first time they have been out of the north and they seem very excited about everything. They point in wonder at the large buildings at the motor cars and the street cars and seem to be interested in everything." Miss McCaig said.

Not Quads—Just Twins

QUEBEC, March 14— Mrs. Donat Fournel won't have to prepare four little dresses, four pairs of booties and four of everything else for the newest arrivals to her son's family. The children aren't quadruplets but twins.

From his tiny hospital at Ste. Anne des Monts, far down the St. Lawrence Dr. Joseph Emile Rioux reported by telephone Monday a boy and a girl were born Feb. 21 to Mrs. Laurent Fournel, wife of a 17-year-old settler from Quebec. But not quads—"No, not here. There's been a mistake somewhere."

"I was there and I'm certain there weren't more than two," he said. "Fournel will be surprised, I guess."

And Laurent Fournel must have been surprised when Mr. Fournel returned to their tiny cabin at St. Paul de Canucing 20 miles from the hospital. He had written to his mother [illegible] that quadruplets had joined his fast-growing family and "les petits" would use some clothing when they arrived at the little settlement.

Predicts Decline In Butter Price

Decline in the present high butter price level was predicted by C. F. Christenson, general manager of the Northern Alberta Dairy Pool at the organization's annual meeting recently in the Corona.

Production in all plants of the pool showed an increase of [illegible] 1937 over the previous year [illegible] of the Sedgewick plant 17.2 per cent, Thorsby 11.6 per cent and Wetaskiwin 10.3 per cent, Mr. Christenson said.

In the evening delegates and visitors were guests at a banquet in the hotel. Speakers included J. R. Sweeney, provincial dairy commissioner, and Donald Cameron, acting head of the University of Alberta extension department.

Youths Insure Cats & Dogs

BUFFALO, N.Y., March 14 — Householders here are answering knocks at back doors these days to be confronted with the query: "Want to insure your cat or dog?"

The questioner is either Joe Geary or Robert Anderson, both about 11 years old, who are president, treasurer and board of directors of the Animal Insurance company. For five cents a week Joe or Robert will insure a favorite pet against death, disability, dognapping, catnapping and wanderlust.

The death benefit is 75 cents. The boys claim business is good.

Booked Passage And Sailed In 30 Minutes

Boston, Mass. March 14 - The fastest booking and sailing in the history of the port of Boston, requiring a total of 30 minutes, was established here recently by James Kenealy, insurance broker, who at 12 minutes of 11 in the morning, received a cable that his brother John was ill in Bermuda.

He immediately learned the Canadian National Steamship "Lady Hawkins" was scheduled to sail from Commonwealth Pier, Boston, 11 minutes later. New England Passenger Agent J. D. Paul arranged to hold the ship for fifteen minutes and Kenealy taxied to the pier, secured his tickets and boarded the ship at 11:18 a.m., as the plank was being hauled in and the lines cast off.

Sues for $15,000 Over Loss Of Leg

CALGARY, March 14 — [illegible] the Supreme Court of Alberta [illegible] of Calgary [illegible] last September.

[illegible] Gaston Hebert [illegible] for $15,000 in a negligence [illegible] launched by his father, Aime Hebert, as his "next best friend." Mr. Hebert also seeks damages of $[illegible] for loss of the services of his son and $[illegible] for medical and hospital expenses.

Eskimo Pastor Will Officiate North Church

Modern new pro-cathedral opened at Aklavik Dec. 21 will be the chief Anglican centre of worship in the [illegible] diocese, Rt. Rev. A. L. Fleming, Anglican bishop of the Arctic, said here Wednesday.

The [illegible] bishop arrived Tuesday night from Vancouver en route to his headquarters at Toronto. He is leaving for the east Thursday night.

Lord Tweedsmuir, governor-general of Canada, hammered a nail in the central step of the chancel of the new church when he was in Aklavik [illegible]. The building was built chiefly by Indians.

One of the clergy who will make use of it is Rev. [illegible] Umoak, the [illegible] Eskimo clergyman in the [illegible], the bishop stated.

[illegible] north of the Arctic [illegible] cathedral [illegible] an Anglican school-hospital-church [illegible] at Aklavik. It accom[illegible] nearly four [illegible] predecessor. [illegible] The congregation consists of white residents, Indians and Eskimos.

21 Years Absent Meets His Parents

[illegible] Brault, 21, arrived in Edmonton [illegible] a family [illegible] waiting on the C.N.R. station platform, then discovered [illegible] father whom he had not seen for 20 years.

[illegible] following two decades of separation was related to The Journal by J. E. Brault, 11204 124 street, father of the youth who arrived here recently from Quebec [illegible]

It was just after the war and Lucien was barely out of rompers when Arthur Brault, his father, and Mrs. Brault visited relatives in Quebec. As Mr Brault, now a blacksmith in Tawatinaw, had considerable travelling to do, it was decided that little Lucien [illegible] with relatives [illegible] western Canada [illegible] a few months and [illegible] to bring the boy with them.

For some reason the plans were frustrated. [illegible] after a few years Lucien went to school in Quebec. His parents then living in the Edmonton district postponed [illegible]

[illegible] "acting father" [illegible] Mr Brault [illegible]

[illegible] Tawatinaw where Lucien will [illegible] eastern Canada.

Sees Good Points In Dictatorship

OTTAWA, March 16—Words alone will not defend democracy today "for there are apt examples of authoritarian states who have remedied the evils and misfortunes of the times quickly and effectively," W. A. Walsh, commons member for Mount Royal, said in an address prepared for delivery Wednesday at the conference of the Canadian federation of mayors and municipalities.

"The situation is too serious for the mere luxury of words," he said. "We must realize we are confronted desperately with alternate forms of government. Fascism, Nazism and Communism are in conflict with democracy. One of these regimes will [illegible] the most capable of meeting the present day crisis. It must [illegible] democracy."

In Canada there was a decided but [illegible] conflict between the provinces and the dominion and between the provinces themselves "to such an extent that it is difficult for the ordinary citizen to know where sovereignty rests in Canada," he said.

Quints Entertain Bishop Nelligan

Spiritual guardian of the Dionne quintuplets considers them "five very well-behaved little girls" who are "natural entertainers."

He is Rt. Rev. Leo Nelligan, Roman Catholic bishop of Pembroke, who is visiting in Edmonton this week for the first time since his installation in the eastern diocese last fall.

Former vicar general of the Edmonton archdiocese, the prelate returned here to attend the funeral of Most Rev. Henry Joseph O'Leary, former Roman Catholic archbishop of Edmonton. He is leaving for Pembroke Thursday night.

"I visited Callander last November and spent nearly an hour with the quintuplets in their hospital residence. They sang and danced for me, imitated their other brothers and sisters and generally proved they are natural entertainers.

"They also showed me they know their prayers much more thoroughly than most little boys and girls of their age," Bishop Nelligan said.

Dr. A. R. Dafoe, the Dionne family physician and one of the quintuplets' official guardians, is "a most kindly man and a gracious host," the prelate stated.

He intends to visit Callander again soon.

Joseph Haire, Edmonton 102 Years March 17th

Begorra, 'tis St. Patrick's day today and on that day one of Edmonton's oldest residents, Joseph Haire, 12201 88 st., a son of Ould Ireland, passes his 102 birthday.

And just a few blocks away, Patricia Margaret McKeown, 12211 91 st., exactly one century younger than the centarian will be two years old. Patricia's grandparents are Irish.

And both of them are finding much joy in life.

When a Journal reporter visited him this week, Mr. Haire was at the side of his home "a'gittin' a brith of air" and supervising repairs to a broken water main.

"Maybe I can't run around as smart as I used to but I'm feeling mighty fine and young," the rugged Irish pioneer confessed after a hearty handclasp.

Born and reared in the country of Armagh, south of Belfast, Joseph Haire arrived at Quebec in 1862.

Solid in his faith of the "Lord's own words" he thinks of death as a wonderful experience when he will be able to "meet my old friends and join hands with the angels."

Little Patricia, whose great grandparents reside in Belfast, doesn't know what St. Patrick means, but her curly hair, large brown eyes and friendly round face bespeak a true Irisher.

Camrose Protests Normal Closing

Camrose, March 16—Committee was named at a public meeting here Tuesday night to interview Premier Aberhart to protest the proposed closing of the Camrose Normal school for student teachers, in operation since 1912. Three hundred persons attended.

Speakers declared closing of the school would be an injustice to the town and district. Speakers included F. P. Layton, F. Pratt, school board chairman; C. A. Ronning, former M.L.A.; W. N. Chant, legislature member for Camrose; James Code, Mayor Pearson, and M. Westlake, president of the Camrose Social Credit group.

Committee named to see Mr. Aberhart: Messrs Ronning, Layton, Pratt, Pearson and Westlake.

KINGMAN

The regular meeting of the Lutheran Ladies' Aid was held in the Kingman Hall last Thursday. There was a good crowd despite the bad roads. The hostesses were Mrs. P. Vague and Mrs. P. Simonson.

Mrs. Hogan fell on the ice last Thursday but is getting along fine now. She wrenched her back and it was necessary to have medical attention.

Mrs. Alex Asp who underwent an operation in Camrose hospital recently is getting along fine now.

Mr. H[illegible] Johnson is busy building a chicken house. He intends going in the chicken business.

Mrs. [illegible] Hardin came home from [illegible] after having spent a week there.

Mrs. [illegible] Erickson returned from Sweden last Friday after spending three months visiting there.

Miss [illegible] Johnson left Friday for a holiday at the coast.

The C.C.F. Club held a business meeting on Saturday evening.

Mr. and Mrs. Oliver Thompson were Edmonton visitors on Monday.

The Carpet Ball games ended last Friday evening. The Ladies' team led by Miss Borgild Haye won the cup for the ladies and Mr. Skalrud's team won it for the men.

Miss Eileen Sterritt visited at the home of Mr. Roy Fleming last Friday.

Luther League Convention Held At Ryley

The Luther League of the Edmonton Circuit held its first convention March 11, 12th and 13th, 1938, at Ryley, Alta. The theme was "United for Service" Romans 15 5-6. At the opening session Friday evening, Rev. C. Lipting, Edmonton, spoke on the topic "Unity God's Gift." God has work for each one of us to do.

The business meeting Saturday morning opened with B. Larson, President, in the chair. A joint Bible Camp of the Camrose and Edmonton Circuits at Lake Hastings was discussed. The leagues were urged to continue their support for the International Project.

Saturday afternoon Rev. I. Saugen, Calgary spoke on "Uniform Organization." He stated that the purpose of organization is to gather individuals into a working force. The purpose of our Luther League is to build the Kingdom of God in the hearts of men.

This was followed by discussion and open forum Saturday evening the topic "Uniform Purpose" was given by Rev. Dahl Melancthon, Glendon, Alta. The purpose of our Luther League should be to glorify God. We must win and hold young people for Christ.

"Socials in the League" was the topic given by Miss Tilda Holm, Edmonton. It was clearly brought forth that as Christian Young people we must not take part in anything that will injure body, mind or soul.

Sunday morning there was public worship preceded by Holy Communion. Rev. I. Saugen spoke on the topic "United in Christ."

Due to the large crowd on Sunday the afternoon session was held in the Ryley hall. Rev. C. Lipting spoke on "The Place of Singing in Public Worship." The Lutheran Church has been known as the singing church. He urged us to rally around the wonderful old hymns. Under the direction of Prof. C. A. Ronning the "Choral Union" consisting of seventy voices rendered the following numbers: "Arise, Arise United Youth," "I Love to Tell the Story," "Wake Awake for Night is Flying," "Lord of Spirits I Surrender," Savior Thy Dying Love," "Savior While My Heart is Tender," "As Sinks Beneath the Ocean."

After the Convention offering Prof. C. A. Ronning gave a few remarks. He stated that no other instrument is as valuable as the human voice. God has given us our voices, therefore we should use them to sing praises to His name.

Sunday evening, Rev. B. Ostrem, Wetaskiwin, chose as his topic "Can Man Limit God?" Job 42.2

We are truly thankful to God for the spirit filled messages that were given during the convention. At each session there was a challenge for us to live our lives more fully in the Master's Service. May God bless us and further His Kingdom among us and make each leaguer a blessing for His names sake.

Irene Rude, Sec'y, pro-tem

UNITED CHURCH NEWS

The Y.P. Banquet winding up the activities for this season, went over big. It was held on Monday evening and thirty-eight members and invited guests partook of a splendid feast.

The tables were artistically laid and centred with a lovely bouquet of daffodils and tulips. The lady-members served a satisfying supper with ice cream as dessert. Rev. D. K. Allan, president, acted as toastmaster. Messrs. J. W. Chapman and O. P. Thomas gave after dinner speeches. There was community singing at intervals. The recreational period of the evening was greatly enjoyed. The competition [illegible] was keen and produced much merriment. The winning [illegible] reflected great credit on all who worked hard to make it the great success it was.

The season's Y.P. work has been greatly enjoyed by all the members and already plans are being made to increase its sociability and usefulness for next season.

On Tuesday evening in the United Church, one of the finest Recitals heard in Tofield was held.

The rendition of each item on the well-balanced program was well nigh perfect. The large audience showed their appreciation of the artists, by sustained applause.

Miss Lola Wilson is to be congratulated in assembling such a worthwhile program and in the masterly carrying out of the same.

It was held under the auspices of the United Church W.M.S. As a token of appreciation of her willing services, Mrs. Lovell, president of W.M.S. presented Miss Wilson with a lovely bouquet of flowers.

The following is the program:

1 Chairman's Remarks, Mr. Allan; 2 Vocal Quartette, "Lift Up Your Heads," 3 Organ Solo, Mr. McCauley, 4 Vocal Solo, Mr. Cowell, 5. Reading "The Tolling of Folus" by Lola Wilson with vocal solo interludes by Mrs. Patterson, 6 Violin Duet, "Love's Old Sweet Song" by [illegible] Dennis and Donald Edwards, 7 Vocal Solo, Mr. Cowell, 8 Saxaphone Duet "Whispering Hope," Mr. Moe [illegible] Lovell and Ave[illegible] Swift, [illegible] Vocal Miss Lola Wilson and Messrs. M[illegible] Quartette "[illegible] Where the Lilies Bloom" and A. Swift.

Bl[illegible] God Save the King.

The Board of Stewards of the United Church is to be commended in securing Dr. Geo. McDonald, Knox Church, [illegible] Dr. McDonald has [illegible] We are fortunate.

It is an illustrated description of a land we all want to know more about. And there are some very [illegible] Dr. McDonald is a great lecturer witty and well [illegible] On Monday 28th at 8 p.m. the United Church assisted by [illegible]

KETCHAMOOT

Mr. [illegible] Ingram left Friday [illegible] a few weeks visit with his uncle, Mr. Wesley Ingram in Victoria, B.C.

Mrs. [illegible] and daughter [illegible] are visiting Mrs. [illegible] parents [illegible] for a few days.

Mr. and Mrs. Stanley [illegible] the [illegible] way home [illegible] Mrs. [illegible] Friday evening.

[illegible]

Mrs. O. Barnes and Mrs. A. M. Betts [illegible] Mrs. W. A. [illegible] afternoon.

Mr. and Mrs. [illegible] family were Sunday guests of Mr. and Mrs. Martin Lawson.

Mr. and Mrs. Ralph Barnes, Mr. Barnes and Mr. M. Betts [illegible] Edmonton Monday. Master Harold Barnes was able to return home with them from the hospital.

Mr. and Mrs. [illegible] Williams were guests of the Sears family Tuesday evening.

Mrs. Emily Carlisle and [illegible] are visiting at the Carlisle home in town.

Know What To Sow Good Seed Important

In the regulations under the Seeds Act grades of seed are defined as Registered Seed, Certified Seed and Commercial seeds of Commerce. Seed to qualify for a Registered or Certified grade must be of an approved variety, true to name, and [illegible] must be well matured, sound, sweet, well cleaned and [illegible] to remove small, shrunken [illegible] kernels and [illegible]. It must possess strong vitality [illegible] the determined [illegible] by the seeds which each farmer [illegible] make.

This is the time of the year when a farmer should plan to sow enough registered or certified seeds on a [illegible] that their value on his own farm. To do this take a good piece of land, prepare it well, and clean the drill carefully before sowing. Take good care of this plot and if the crop is superior to the main crop use the seed threshed from it for seeding purposes the following spring. This is a practical way of renewing the seed supply at little extra cost.

TESTED RECIPES

SALAD

"Two vegetables every day—one of these served raw" is a recognized rule for health.

The following recipes are taken from "Salads that are Different" recently issued by the Fruit Branch, Department of Agriculture. This publication may be obtained free on application to the Publicity and Extension Branch, Department of Agriculture.—

••••••••

Quick Cabbage Salad

(Serves 6)

1 quart cabbage finely shredded
1/2 cup green pepper minced
[illegible] cup of sweet pickles diced
1 tablespoon sugar
[illegible] tablespoons of prepared mustard
1/2 teaspoon salt
[illegible] tablespoons of vinegar
[illegible] cup of cream (sour or sweet)
Black Pepper

Mix the cabbage with green pepper and pickles. Combine the sugar, salt, vinegar, cream, mustard, and pepper and pour over the cabbage. Blend well and serve at once.

••••••••

Carrot Salad

(Serves 6)

[illegible] grated carrots
[illegible] chopped nuts
[illegible] celery
[illegible] teaspoon salt
[illegible] Serve dressing separately.

••••••••

Stuffed Celery Salad

2 [illegible] Canadian cheese (grated)
[illegible] Salad Dressing
1 bunch celery
Paprika

Mix grated cheese with dressing. Separate stalks of celery, wash and chill. Fill cavity of stalks with cheese mixture and cut into one inch lengths. Make nests of lettuce leaves and heap celery in the centre. Sprinkle with paprika and serve with dressing. The celery may also be stuffed with Roquefort or cream cheese, mashed to a paste with salad dressing.

••••••••

Beet Jelly

1 cup finely chopped beets
1 cup finely chopped apple
1-4 cup finely chopped celery
1 cup prepared lemon jelly
a little onion.

HEALTH

A HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION AND LIFE INSURANCE COMPANIES IN CANADA

Chronic Irritation & Cancer

The specific cause of cancer is not known. Chronic irritation of all kinds acts as an exciting or predisposing factor in cancer. The detection and elimination of chronic irritation prevent the cancers to which the chronic irritation might give rise.

Certain diseases are peculiar to humans, others are practically limited to animals, seldom if ever attacking man. It appears that all human beings are susceptible to cancer. Cancer of the lip, tongue, or other parts of the mouth is nearly always preceded by some chronic irritation of the part, due to broken teeth, ill-fitting dentures, infected gums, or the germ syphilis.

Cancer seldom if ever, develops in a clean healthy mouth. Every year in Canada several hundreds of individuals, mostly men, die from cancer of the mouth and throat. Many of these deaths would have been prevented by the proper treatment of syphilis, and by adequate dental care to keep the teeth and gums healthy. The prompt treatment of any kind of sore which does not heal and stay healed, either on the lip or in the mouth, is essentially a preventive measure because it removes what may be a pre-cancerous condition.

Cancer of the skin may not always be prevented, but it is nearly always curable. It is the absence of pain and the apparent harmlessness that so often mislead the patient in delaying to secure treatment.

Much can be done by the patient himself through keeping his skin and mouth clean and healthy, and be securing medical care without any delay when there is any indication that such care may be needed.

Questions concerning Health, addressed to the Canadian Medical Association, 184 College Street, Toronto, will be answered personally by letter.

War And The Farmer

War and war preparations are a bad thing for agriculture. While prices of farm products go to a high figure during a war there is always an increase in the prices of things farmers are required to buy. Further, there is always over-expansion in such agricultural countries as Canada, followed by a collapse when the war ends.

The amount of money spent on war preparations and the conduct of a war handicaps agriculture. That money, if spent on food for the people [illegible] nations would provide a market capable of taking care of all the world's surplus agricultural production.

At the present time the nations of the world are spending $13 billion a year on war preparations, that is about $415 a second. If a quarter of that sum was spent to provide the people of the world with an adequate diet there would never be a glut of farm products.

The total estimated expenditure by Great Britain for war purposes in 1937-38 is $4,714,210,000. The expenditure of such a sum for such a purpose certainly means that millions of Britons must continue to be under nourished.

Germany deprives her citizens of butter, eggs, bread and meat in order that $5 billion a year may be used for warlike purposes. Other nations are spending lesser but proportionate sums for the same objective—warlike armament.

Japan has precipitated a bigger and better naval race. Britain has 15 capital warships. She is building 3 more, and the number eventually may be raised to 10. Each one costs $60 million, or 50 per cent more than the deficit on the Canadian National Railways about which such calamity cries are being made in Canada.

War is the great consumer of wealth. If that were all it wouldn't be so bad. But war also is the great destroyer of human lives.

War is the curse of agriculture.—Alberta Wheat Pool Budget.

Cruises This Summer Via Inside Passage To Beautiful Alaska

Following in the wake of the fortune-hunters, viewing the same scenes reliving their romance surrounded by the comforts and conveniences of modern cruise liners, there will be 18 sailings along the smooth Inside Passage route by Canadian National Steamships from Vancouver, B. C. to Skagway, Alaska, commencing on June 13. Writer after writer has said that the charm of a trip to Alaska cannot be put into words. In this Inside Passage cruise the lover of the pure wilderness beholds one of the most beautiful panoramas in the world.

Five of these sailings will be made by the line's luxurious flagship, the Prince Robert. Her cruises will be of 11 days duration and include a day-long sail through what are perhaps the west coast's mightiest fjords—Gardner Canal and Douglas Channel. The Prince Robert will also make a call at romantic Sitka historic seat of this territory when under Russian rule.

Eleven other sailings—all nine-day cruises—will be made by the twin ships Prince Rupert and Prince George. Like the S. S. Prince Robert they will follow the famed, smooth Inside Passage route, making calls at Indian villages, mining towns, fishing ports and busy industrial centres set down in wildly beautiful surroundings. Among ports of call will be Powell River, Ocean Falls and Prince Rupert, all in British Columbia and Ketchikan, Wrangell, Juneau and Skagway in Alaska territory.

Outstanding among the colorful sights along the Canadian National Steamships route is Taku Glacier the gigantic rampart of blue-green ice, one and a half miles wide and 200 feet high. Another feature is the two-day stay at Skagway, start of the trail of '98. Here is an opportunity to take a side trip inland and see the fabled Yukon. Rail services inland are timed to the arrival and departure of Canadian National steamers.

Future Air Route North To South, Garnett Says

LETHBRIDGE, Alta.—March 23—The main air route through southern Alberta in the future will be north and south, to Edmonton, the Yukon, Alaska and on to Asia, C. E. Garnett, president of the Association of Professional Engineers of Alberta, told that body at its annual convention here Saturday.

Mr Garnett said that, while appreciating the importance of the route from Lethbridge over the Rockies, he believed the development of the north-south route, which is expected to connect with United States air lines at Great Falls, Montana, would be of much greater importance.

J. O. G. "Pete" Sanderson, of Calgary, was elected president for the coming year with city manager J. T. Watson of Lethbridge as vice-president.

Fish cleaners at Halifax, N.S. are reported on strike over a wage grievance. Surely these fellows wouldn't want a larger scale— Milwaukee Journal.

Americanism—Voting to set the speed limit at 45 miles an hour; demanding a car that will do 90.

Premier Performs 3 Steps of "Jig"

Responding to the demands of more than 1000 persons at Social Credit headquarters Monday night celebrating the victory of Orvis Kennedy in the byelection in Edmonton, Premier Aberhart partially fulfilled a promise that if Mr Kennedy won he (the premier) would dance "both the Highland Fling and the Irish Jig."

In high good humor, the 260-pound premier suddenly performed three home made steps while the audience laughed and cheered. Some persons had told him he wouldn't look good in kilts so they wanted him to do the Irish jig he explained. "I did those few steps to learn how to do it." He added: "Maybe I'll do it all after the next election."

"This is the greatest moment of my life, seeing you people demanding your rights and getting results like this," he said as he launched into his speech. "It's going to make the people who are trying to oppress the common people realize that they can no longer do it. (Voice: "We want Powell!") I don't blame you a bit. We do too." Later he continued:

"Our aim is to free the people. If you keep declaring what you want and stick together, you'll get it."

A listener shouted "You'll be in Ottawa next." The premier replied "There's a long way to go yet."

Canadian Chickens Win British Praise

In a recent issue of the Fish Trades Gazette, published in London, England, a regular feature writer on poultry who signs himself "Other Bird" made some decidedly favourable observations on Canadian dressed poultry. He said in part: "As I have said, I think the best frozen chickens are those from Canada. This year, so far, the shipments have been too small. I am afraid a good many chickens have drifted over the border (into the U.S.A.) instead of crossing the ocean. I know there are some to come shortly, so until then we must be satisfied with what we already have.

Referring to the recent Lethbridge provincial byelection won by Dr. P. M. Campbell, Unity, the premier remarked:

"I was disappointed in Lethbridge. East Edmonton shows the way. They tell us we'll have to fight Stettler next (Charles Cockroft, S.C. member for Stettler, has threatened to resign his seat) and next in Calgary. You have set the example. All you need to do is keep along the lines you've been working on."

As the premier declared, "we're fighting for our rights," a listener drew laughter as he replied: "It's about time they came. I'm getting thin.

WE OWE YOU MONEY

Payable in CASH—ON DEMAND

* *

IF yours is one of the 4,740,000 accounts in which people have dollars on deposit in Canada's chartered banks, your bank owes you money.

That money does not belong to The People, the government, the nation, or to your neighbour. It is YOURS.

If you are a savings depositor, the bank, in addition to providing safety, pays you interest on YOUR MONEY just as a borrower pays interest to the bank, for

WHAT IS A BANK?—It is an institution organized to receive deposits and to make loans; that is the mechanical description. But it is a much more human place than that; it means much more to YOU.

Your bank is a place where you can deposit money for yourself and your family, with every assurance that you can get it back whenever you call for it in full and with interest.

The bank's books show your deposit as a sum of money it owes to you—must pay to you when you ask for it—a liability of the bank.

Your bank is, too, a place where persons worthy of credit may borrow for business or other legitimate purposes.

The borrower must be worthy. By worthy, we mean that because of his record for honesty and integrity, his business ability, and the things he owns, he may be counted on with reasonable certainty to be willing and able to repay. We MUST know that he is a "good risk", for we MUST keep YOUR deposit and those of all other depositors SAFE, against the day you call for what WE OWE YOU.

As a depositor, you are our creditor, we have to be prepared to pay you in full. Therefore we must do our utmost to collect in full as much as we loan, plus our costs of operation.

We pay interest for deposits and charge interest on loans. You will be surprised when we tell you the range of our costs, the smallness of our margin of profit.

Bank deposits are the money of certain people — not "The People". There is the substance of Canadian banking as plain as a pikestaff. You have known it for a long time, you can let others know just whose money it is they speak of, when they talk about the community's claim to bank deposits.

More than 4,700,000 people in Canada—equal to more than 42 per cent. of Canada's population —have "money in the bank" deposits lodged with Canada's chartered banks. Of these no fewer than 4,000,000 are savings-depositors receiving interest on their money.

Canada's chartered banks have paid over $[illegible] in interest on deposits in the last ten fiscal years.

Savings of the Canadian people, deposited in the chartered banks, now total nearly $1,[illegible] — the average savings deposit being $[illegible].

There are about 660,000 current accounts of individuals and corporations totalling $[illegible] in Canada's chartered banks.

It takes the equivalent of nearly three average savings accounts to make one loan of $1,000.

And it takes the net profits, over and above the costs of doing business, on scores of loans of $1,000 each for a year, to make up the loss of one single loan of $1,000.

This shows what care the banks must take in lending, if the depositors' funds are to be safeguarded, for the net profits of banks are less than one-half of one per cent. on their total assets.

Without deposits a bank could not long continue in business. YOUR MONEY remains on deposit in the bank ONLY AT YOUR WILL; and if you think the bank is lending recklessly, you will draw it out.

The bank must always keep itself in a position to pay you your deposit, in full, in cash, whenever you choose to call for it.

Canada's chartered banks realize that the establishing of your home, the happiness of your family, the education of your sons and daughters, their start in life, their progress in business, your provisions for a rainy day, your peace of mind in the twilight of life, may depend largely upon this money — money you have deposited in a bank — money YOUR BANK OWES TO YOU.

THE CHARTERED BANKS
OF CANADA

Your local branch bank manager will be glad to talk banking with you. He will be glad to answer your questions, from the standpoint of his own experience. The next article in this series will appear in this newspaper. Watch for it.

Debt Victim Has Sympathy Judge Howson

CALGARY, March 22.— Mr. Justice W. R. Howson of the supreme court of Alberta expressed himself on the problem of farm debts here today.

He said any farmer who strives to retain a farm loaded with debt which he cannot hope to pay even if he works like a slave until he is 80 years old is unjust to himself and family.

Mr Justice Howson expressed the opinion during a hearing on the case of P. Foffonoff, of Queenstown, Alta., who opposes a possession order sought by R. M. Allen.

In 1929 Foffonoff purchased 800 acres of land from Allen, the purchase price of $70,000 to be paid off in instalments. He suffered a series of crop failures and could not meet his payments.

In 1935 the debt was reduced by the board of review under the Farmers' Creditors' Arrangement act to $30,000. Today land in the district is valued at $12 an acre the court was told.

"Then our land is worth $9,600 or $10,000 and it is covered with a debt of $70,000 or $30,000," said Mr. Justice Howson.

"I would be the last one to put anybody off the land but don't you think you are doing yourself an injustice by trying to stay on in the face of a debt three times the value of the land?" he asked.

"If I get a good crop this year I will [illegible] make a payment," said Foffonoff.

"That depends upon providence," replied Mr. Justice Howson. "We may think we can control many things in this province, but we can't control providence."

The hearing was adjourned pending a conference between the interested parties in an effort to reach an agreement.

Alberta Gets $200,000 Loan From Dominion

Loan of $200,000 has been received by the province from the Dominion, for drouth area relief cases—marginal cases—not included in the existing agreement according to Hon. Solon E. Low, provincial treasurer.

The province, as security for the loan, has given the Dominion a treasury bill for this amount.

The minister stated that this was one of the major points upon which he went to Ottawa last week, at the suggestion of Hon. Charles Dunning, minister of finance.

The Ottawa gathering was successful in that this loan was obtained as well as an agreement whereby the Dominion and provincial governments jointly agree to guarantee seed and seed grain operations this year, up to a maximum of $1,000,000.

In the case of loss on guarantees the province would be the ultimate loser through the municipal and improvement districts.

The loan from the Dominion has settled outstanding differences between the governments on the immediate drouth area relief problem.

"Gee, Mom this is good!"
THAT'S WHAT THEY SAY WHEN YOU SERVE...
dried or Pickled
FISH

● ARE YOUR children fussy about food? Have they likes and dislikes?

Give them Dried or Pickled Canadian Fish, fixed up in one of the tasty dishes that can be made with this food.

You can get such Dried Fish as Cod, Haddock, Hake, Cusk and Pollock, and such Pickled Fish as Herring, Mackerel and Alewives, no matter how far you live from open water. It comes to you in perfect condition, every bit of its flavour retained for your enjoyment.

It's grand for the family's health . . . fish contains the proteins and minerals that help build sturdy bodies . . . and it's economical, too.

Serve fish more often . . . for the health and nourishment of the family.

ANY DAY A FISH DAY

Grasshopper Prospects In 1938 On The Canadian Prairies

Grasshopper outbreak conditions for 1938 upon the Canadian Prairies—Manitoba, Saskatchewan and Alberta—in general are expected to be about the same or slightly more favourable than in 1937 according to the forecast by the Entomological Branch, Dominion Department of Agriculture, following the surveys during summer and autumn of 1937. This forecast is made in spite of the fact, as shown by the published map that grasshopper eggs in significant numbers are present in an area which has increased by 12,575,380 acres, viz., from 49,660,920 acres in 1937 to 62,839,300 acres in 1938. Fortunately, however, of this increase, only 87,400 acres were in the very severely infested area, which increased from 706,680 acres in 1937 to 894,080 acres in 1938. The severely infested area decreased by 1,004,160 acres to 6,224,640 acres for the year and the moderately infested area also decreased in extent by 4,204,160 acres to 11,177,760 acres. The great increase occurred in the lightly infested category, which expanded to include 43,888,720 acres, a total of 17,686,000 acres more than in 1937. The large increase in total acreage infested for the year, from an economic point of view, is offset by the great reduction in the areas severely and moderately infested and the greatly increased proportion of the acreage but lightly infested. These facts, together with certain considerations in regard to the kinds of eggs present, their numbers and distribution all suggest a more favourable situation than last year under similar weather conditions.

Control campaigns will undoubtedly be continued in the provinces of Saskatchewan and Alberta in 1938 but it is unlikely that an organized control effort will be necessary in Manitoba.

In the surveys and mapping the degree of infestation is classified in four categories depending upon the threat to the crop arising from the numbers of eggs found present throughout the districts examined, interpreted in terms of kinds of grasshoppers present, soil conditions and other circumstances which experience has shown have to be taken into consideration. In the area classified as very severe the danger is of widespread total destruction of crops. The category severe carries with it the threat of widespread damage of great severity and complete destruction of crops in restricted districts. Both these categories require thoroughly organized control campaigns if the crops are to be protected. The moderately infested areas are liable to considerable loss of crop, particularly in the early season along the edges of fields and to maturing crops. If the weather is favourable for the grasshoppers half the crop may be destroyed in individual fields. In the lightly infested zone grasshoppers would be expected to be present in individual fields. In the lightly infested zone grasshoppers would be expected to be present in numbers somewhat above normal, here and there causing definite losses in individual fields but of little general economic importance to the areas as a whole.

FORECAST FOR ALBERTA

The forecast for Alberta in 1938 is for an outbreak of a somewhat decreased intensity but as in Saskatchewan with grasshoppers present in greater or less abundance over a much wider territory than in 1937. The outbreak in the past year was only second in seriousness and threatened destructiveness to any in the province to date. The grasshopper conditions for 1938 continue to be extremely serious and will require that the province continue its widespread and well organized control campaign to avoid ruinous losses of crop in very large districts. The most striking feature of the situation are the increase in the very severely infested district between Lethbridge and Calgary, the eastward spread of infested territory in the south, and the great northward extension of the infested area. Fortunately, a great proportion of the increase of territory involved is but lightly infested and will not require organized control. Here and there, however, as elsewhere in this category outbreaks of economic concern may occur in the so-called light and patchy zone which will require attention and in any area where grasshoppers were noticeably abundant in 1937 farmers should be on the alert in the early season.

In all, an area of some 25,290,210 acres in Alberta in one or another degree of intensity is embraced in the outbreak of the year. This is some 6,806,400 acres more than were concerned in the outbreak at the beginning of 1937. The greater proportion of the increase in area is due to the extension of the light and patchy zone which is the least seriously infested. This zone increased by 9,853,040 acres and raised the 5,978,880 acres of 1937 to 15,841920 acres for 1938. The very severely infested area also increased and by 170,240 acres from 515,840 acres in 1937 to 686,080 acres in 1938 a matter of very serious concern as without organized control the crops in this area are under threat of almost complete destruction. On the other hand, the severely infested districts decreased from 3,601,200 acres in 1937 by 399,360 acres to 3,201,840 acres in 1938. The moderately infested area also decreased, in this case by 2,727,520 acres, from 8,085,920 acres in 1937 to 5,358,400 in 1938. In general however, the threat for 1938 is less than was feared in midsummer of the past season and the control campaign in prospect in the province will, with the support of the farmers, reduce the losses below the point of serious economic significance.

WHEAT

While "man cannot live by bread alone" he can come nearer living and existing on bread alone than any other food.

If you were forced to live one year on two things, what would you choose? The first of course, would be water, as life cannot be sustained without water. You would probably deliberate some time, but after due consideration your second choice would naturally be bread. It is the best balanced ration and its ingredients constitute a very near perfect food.

The three greatest things in this world are human and animal life, and the germ of life in a kernel of wheat.

The history of wheat would fill a large volume but we will endeavor to mention a few salient facts pertaining to its history.

We have read that the first real wheat miller who lived long ago picked the kernel from the stalk and using his molars as mill stones, ground grist for a waiting customer who was suffering the pangs of hunger.

The next step from this rather unsanitary method was the mortar and pestle. As wheat production increased other methods were sought for grinding out the grist.

[illegible] inventive genius hooked up his windmill and with crude machinery and rough mill stones turned out an improved brand of grist.

We now enter the black bread times. The finer texture of flour was found in the homes of the rich, while the down-trodden peasants existed on the coarser grades which contained a great many impurities due to the primitive methods of milling.

In those days of revolution, and of bloodshed and crime, the old slogan was "Bread or blood."

We pass quickly over these tragic times and come back in the sun to the peaceful wheat fields of Britain and the miller on the Dee—and from this humble miller on the Dee, we will take a gigantic stride over to America and view our immense wheat fields and the most modern and improved mills in the world.

The word wheat can be traced back through the middle ages. The raising of the first wheat is rather hard to determine. It is believed that it once grew wild in the Euphrates and Tigris Valleys and spread from these to the rest of the world.

It is believed wheat was cultivated in China 3000 years B.C. It was also a principal crop in Ancient Egypt. Wheat is first mentioned in the Bible in Genesis, Chapter 30, Verse 14.

In 1801 the editor of the Social Economist denied that wheat would be raised in Canada or Siberia—north of the 55th parallel. This theory did not exist long, as wheat is grown as far north as Sitka, Alaska, 56 degrees north latitude. In fact, there is a flour mill located at Vermilion on the Peace River 58 degrees north latitude. The farthest "north" wheat has ever been grown is Rampart, Alaska, 200 miles from the Arctic circle. Wheat has also been raised at an altitude of 11,000 feet on the Himalayas in Asia.

No wheat was grown on this continent before the sixteenth century. The first wheat sown in the United States was by Gosnold in 1602 on the Elizabeth Islands off the Southern Coast of Massachusetts. It was cultivated in Virginia in 1611 and in California in 1769.

Wheat was introduced into Canada at the close of the eighteenth century. In 1827 Canada raised over 20 million bushels.

The Red River Valley raised its first wheat in 1829. Wheat in Argentina became a principal crop in 1882.—Alberta Wheat Pool Bulletin.

Women Better Travellers Than Men

Montreal, March 21—Women are better travellers than men, according to A. A. Gardiner, Assistant General Passenger Traffic Manager of the Canadian National Railways. They are more definite than men. While men wonder where to go women know and start marketing. Then it comes to family holidays, the decision in 75 to 80 per cent of cases is made by the woman.

"They are undoubtedly better travellers than men," said Mr. Gardiner. "They are [illegible] hard to please. They are more interested in what goes on around them, therefore they get more out of travel. They know exactly what they want and knowing the difficulty of service, they more fully appreciate what is done for them."

As a class, women school teachers are the railways' best patrons. Mr. Gardiner pointed out, with nurses a good second.

More Air-Conditioned Cars For The Canadian National

Montreal, March 21— This year the Canadian National Railways will have 315 air-conditioned sleeping and dining and parlor cars, according to announcement by W. W. Swinden, general superintendent of the department which handles them. At the end of 1937, air-conditioned cars in service totalled 195. This year, 120 will be equipped, a total of 315.

Six new sleepers and 10 new cafe sleepers are now being built for travel this summer. Employees of the department are busy informing themselves regarding the handling of the new and converted equipment.

How Are Life Insurance Funds Invested?

Answer.—In government and municipal bonds and debentures, first mortgages and other securities.

Question.—What do these investments accomplish?

Answer.—They help to finance the undertakings of our Federal and Provincial Governments—our municipalities—our industries and public utilities. They also aid in building new homes and schools—and in improving farms.

Q.—What is the total amount of Life Insurance funds invested in Canada?

A.—More than Two Billion Dollars.

Q.—What does this sum represent?

A.—It represents the accumulated savings of more than 3,500,000 Canadian men and women.

Q.—How do I benefit from these investments?

A.—Through good roads, new schools and local improvements made by your own municipalities, which, in turn, create employment.

Q.—What is the guarantee back of these invested funds?

A.—The security of the individual loans, in addition to the integrity of the borrowers—whether governments, corporations, or individuals.

Q.—Have the Life Insurance companies of Canada kept faith with their policyholders?

A.—Yes. In good times and bad, they have fulfilled every guarantee 100 cents on the dollar.

This is the fourth of a series of messages sponsored by Life Insurance Companies operating in Canada. The fifth to appear in two weeks' time will discuss Life Insurance investments in Alberta.

The highest or any tender not necessarily accepted.

Dated at Ryley, Alberta this 10th day of March, 1938.

J. W. McMULLEN,
Secretary-Treasurer.

Flood Waters Rush Over Saskatchewan Dust Bowl

REGINA, March 22. — Flood waters rushed last night over Saskatchewan's "dust bowl," where drought in the last seven years has ravaged farm [illegible] and dried up streams and lakes.

[illegible] cheering news was that water was flowing again into Lake [illegible] last summer a 30-mile [illegible] alkali bed. The lake area is south of Moose Jaw.

High water tore holes in two southern Saskatchewan dams as snow was reported as far east as Moosomin and west to the Alberta boundary. Gangs of men were at work to stop the outflow at the big hole in the Midale dam.

STANDARD

Above and beyond the standardized processing of ALBERTA BEER by skilled Brewmasters, is the standard equipment in use at all Alberta Brewing Institutions. True, they use the old formulas and the choicest of ingredients, but the methods of control are infinitely finer. Modern equipment, improved plant construction, and handling facilities contribute greatly to the high STANDARD maintained in the manufacturing of ALBERTA BEERS.

the BREWING INDUSTRY of ALBERTA
"BEERS THAT ARE BEST"

Fear Two Killed In Jasper Slide

Allan Pugh, 14, near exhaustion and excited, reached Jasper late Tuesday afternoon with a story that his brother, Reginald, 16, and Donald "Curly" Phillips, noted Jasper guide had been caught in a tremendous slide which thundered down off Mount Elysium, 8,033-foot peak 18 miles northwest of the mountain town Monday afternoon. He had escaped the slide himself he said, because he had stopped to adjust a packsack.

When he was adjusting the packsack, he told Jasper authorities, the slide came down, and when it was over he could see no sign of his partners so started back to Jasper.

Park Wardens F. Bryant, F. Wells, A. Nelles and R.C.M.P. Constable Dagg left within a few minutes to the slide scene and were expected to reach there some time Wednesday and to return to Jasper late Wednesday night.

There remained a hope that the older Pugh boy and Mr. Phillips were safe, although the younger Pugh boy could see no sign of them in a 15-minute search. There was even a chance, said Jasper residents that Reginald Pugh and Mr. Phillips were [illegible] searching for Allan Pugh thinking him dead.

The search party left here on snowshoes. There are no communication lines to the area.

Allan Pugh reached Jasper approximately 24 hours after the mishap. He had spent Monday night in the open, starting on again as soon as daylight returned. He was travelling on skis.

The boy was recovering Wednesday from the effects of his hard trip.

The boy explained that his partners were in the valley as he was fixing his packsack.

"I heard the rumble and saw the snow slide off the glacier," he said, "and I started running over the hill. When I came back I couldn't see anything of the others and I called but got no answer.

"Then I started for the camp about a mile away. I left a note there saying that I had left for town."

He said that he did not go over the slide because of its dangerous condition.

The pass through which the men were skiing at the time of the slide has an altitude of 6,000 feet. The pass is near the head of the Miette river.

Capt. E. R. Gibson, Winterburn, well-known Alpinist, returned to Edmonton Wednesday from Jasper, leaving that town apparently just a short time before Allan Pugh arrived with word of the mishap. He said here that snow conditions were particularly bad in the mountains.

There has been 20 inches of new snow in the past few days, he said.

"I was over the Cirrus valley, about 12 miles southwest of Jasper he said. "We were afraid of slides because the snow had not settled."

Capt. Gibson described Curly Phillips as "one of the finest guides in the business. He certainly knew the mountains very well."

Curly Phillips was a brother of Harry Phillips, also a Jasper guide, who was mauled by a grizzly last fall and who was under the grizzly when a member of his party killed the animal, then with difficulty hauled the big carcass off the prostrate guide.

Father of the Pugh boys is George Pugh, who drives a truck in the service of the parks department at Jasper.

Jasper residents were excited Wednesday when word of the mishap was spread. The missing guide was well-known in the mountain town. He also was known to hundreds of others, both on this continent and in Europe, as a result of guiding trips which he had made for them through the mountains.

13-Cent Rings Bring 50 Cents

NEW YORK, March 23.—George (Scotty) McKay, 47, disclosed in [illegible] his technique for selling 13-cent rings for 50 cents. He would stagger around on a corner and offer a ring for sale to passersby. The customers generally thought because he was tipsy they were getting a bargain. Scotty was sentenced to five days on a disorderly charge.

Mr. and Mrs. T. A. Jones visited at Lacombe a few days last week.

Jean Eaglesham spent Wednesday with Mrs. Baumgardner at the Jones home.

Mr. and Mrs. Eaglesham were called to Edmonton due to Jim Eaglesham being seriously ill at the Royal Alec hospital.

Visitors to Edmonton on Sunday were: Mrs. Roberge and Charles, Mr. Martin, Pat and Sousawa Deserlain, Joe and Jess Jones.

Mr. Eaglesham was a city visitor Friday.

Mr. Jacobson and Trueman took [illegible] hogs to Edmonton on Friday.

Mr. Secord and Mr. Trent attended Mr. Chapman's funeral at Edmonton a week ago last Thursday.

Mrs. Booth, Mrs. Bertha Seale and Miriam visited with Mrs. Secord on Wednesday.

Trueman Jacobson was helping Mr. Heidebrecht with his tractor Thursday.

Mrs. Roberge spent a few days in the city last week returning on Sunday. Mrs. Ed Roberge of Edmonton visited at the Roberge home on Sunday.

Mr. and Mrs. Manards of Edmonton visited with Mr. and Mrs. Verlyn Moss on Sunday.

Mr. and Mrs. Jacobson, Mavis and Trueman were dinner guests at the J. Berild home on Sunday.

Our deepest sympathy goes out to Mr. E. Anderson and children in their bereavement. We shall all miss her so much.

Mr. and Mrs. Eaglesham were guests of Mr. and Mrs. J. Johnson for dinner on Sunday.

UNITED CHURCH NEWS

The talk by the Rev. Dr. McDonald, Edmonton, on "Under Arctic Skies" was most enjoyable and brought a wealth of information on our great northern heritage unknown to many. The speaker held his audience in rapt attention from beginning to end by the easy and pleasing way he delivered his address.

The pictures were magnificent and gave a very vivid portrayal of the mineral wealth that is in the process of development.

It was unfortunate that the evening was so stormy as undoubtedly it kept many away, although there was a good attendance. Dr. McDonald will be welcomed back any time he may find it convenient to come to Tofield.

Miss Lola Wilson and Messrs. Donald and Dennis Edwards assisted ably in the programme.

Dr. and Mrs. McDonald were guests at the manse and left on Tuesday morning for home.

The Easter Communion service of the United Church will be held on Sunday evening, April 10th. It is hoped there will be a good attendance of the members on this occasion.

The Choirs, both Senior and Junior are preparing for the Easter Services on the 17th of April.

The Easter music is so joyous and the Easter message so gladsome that there is some splendid music available. Let us sing on this occasion.

Child Unharmed Beneath Engine

PETERBOROUGH, Ont., March 30—A 23-months-old baby toddled after his father Tuesday and fell on a level crossing directly in front of a locomotive. The train crew brought the engine to a screeching stop and prepared to pull out the mangled body. Instead they found the youngster, the son of Mr. and Mrs. Harry Brooks, unharmed and lying on the ties between the rails. More than half the engine had passed over him.

LOCAL & PERSONAL

Mrs. H. Kendall from Edmonton is a visitor at the Walter Kendall home this week.

****

Mrs. C. Baptist, who has been visiting in Edmonton returned home.

****

Miss Muriel Malcolm returned on Wednesday after undergoing an operation for appendicitis in the Royal Alec hospital.

Searle Grain Company Buys Standard Elevators

The Searle Grain Company, Limited has purchased all the elevators formerly operated by the Standard Elevator Company, Limited, consisting of twenty-eight elevators in the Central East and South Eastern part of Saskatchewan. The elevators are located at the following stations: Bangor, Beaverdale, Brewer, Colfax, Fitzmaurice, Goodeve, Jedburgh, Landis, Melville, Punnichy, Quinton, Riceton, Service, Waldron, Benson, Breeze, Browning, Cana, Ekzott, Eskbank, Grandora, Sterlman, Talmage, Willmar, Woodley, Semans, Wakaw, Willowbrook.

Due to the poor crops of 1937 a number of these houses are at present closed, however, of the total seventeen are open and operating at the following points: Bangor, Brewer, Fitzmaurice, Jedburgh, Melville, Quinton, Semans, Wakaw, Beaverdale, Colfax, Goodeve, Landis, Punnichy, Riceton, Service, Waldron, Willowbrook.

Body Of Slide Victim Still To Be Located

JASPER, March 30— Just one week ago today, young Allan Pugh, brave 14-year-old skier, reached Jasper with the news that brought sorrow to two homes. For over 24 hours he had been struggling through the mountainous country north of the town to bring word of the slide on the slopes of Mount Elysium that buried his older brother Reginald and Donald (Curly) Phillips, famous guide of the Rockies. Since that time, with weather conditions working against them, men have been endeavoring to bring the bodies of the slide victims out.

The first party, two park wardens, who left at once for the scene, found the ski of young Reg. Pugh sticking a few inches above the slide and uncovered his body, which was brought to town late Saturday night. Since then search for Curly Phillips has been carried on as weather permitted, but blinding snow storms, with poor visibility have hampered the work. Radio news brought Harry Phillips, a brother, from his trap line to Jasper to search for Curly Phillips' body and he has been at the scene of the disaster ever since, together with other trail men, old friends of the noted mountaineer.

This morning another party, with still more equipment, is going in, and with weather conditions more favorable, results can confidently be expected.

KINGMAN

The Gymnastic Club will hold their program in the Kingman Hall on April 2nd at 8 o'clock.

Mr. Ma Him sold his restaurant to Mr. Hugo Hovelson. Mr. Hovelson will take possession April 1st.

Mr. Alex Asp and son Herbert were Edmonton visitors on Monday.

Mr. Martin Peterson, who has been staying at the Robert Gee home all winter, went to the coast last Friday.

Mr. Helge Reger and family will move to Tofield on Saturday morning, April 2nd.

Mr. and Mrs. Eric Erickson will move in the Reger home on Saturday.

Mr. George Vague is home again after spending the winter at the coast.

Mr. Alton Anderson attended the C.C.F. convention at Edmonton last Friday and Saturday.

Mr. Tom Gibson was in town on Monday sawing wood for Mr. Hardin and Ma Him.

Mr. and Mrs. Wheems who have been visiting their daughter Mrs. Donald, have returned home to Edmonton.

Stavely Man, 70, Hopes For Fortune

STAVELY, Alta., March 30— Declared legally dead 15 years ago, Isaac James (Blackie) Walls, 70-year-old odd-jobs man of Stavely, now is seeking to share in a $150,000 estate of an older brother.

Application for an old age pension for Blackie and search for his birth certificate in New Brunswick, where he was born, reunited him with members of his family now living in Boston, Mass., and brought word of the fortune.

Walls' claim to the estate has been outlawed but he told a newspaper correspondent here, his sister and a cousin in Boston to whom Blackie's share of the fortune went, have offered him a cash settlement of $35,000.

Blackie, who has known the hardships of a farm laborer and the town's odd-jobs man doesn't plan to leave Stavely. He has no desire to farm but he does want to build "the swellest house in town."

"For 37 years the folks here have looked on me as a professional hobo," he said. "I am sticking that money in the bank. I'll build myself the swellest house in Stavely and after that I'll live in luxury and I don't mean maybe."

For years advertisement were carried in western newspapers seeking the whereabouts of Blackie. Executors of the eastern estate spent $1,000 in advertising and trying to get in personal touch with the missing member of the Walls family, he was told in a letter from his sister. One member of the family came as far west as Macleod, not far from Stavely, but he was looking for "Isaac James Walls."

Few people knew Blackie's first name.

Man Spots His Mink By Chin

VANCOUVER, March 30—City police put an assortment of mink in an identification lineup.

They asked John Williamson, Burnaby municipality mink raiser, if he could find any of his stolen animals in the line, made up of mink from the fur farm of a Vancouver resident.

He identified one by a peculiar mark on its chin. Police are continuing the investigation.

LINDBROOK

March seems to be going out like a lion and we hope it's a lion in a hurry.

We are glad to hear that Mrs. A. Jenson has returned home again from the hospital and is practically OK again.

Mr. Joe Bracegirdle left on Sunday for a holiday at the Coast.

The Kortzman sawing outfit has been busy around the district lately replenishing the people's wood piles.

Mr. Asa Rogers is staying with his daughter, Mrs. Earl Wilson, for awhile.

Mr. Turker is at present in Edmonton and Mrs. F. Evans is staying at the Turker home here on account of some of the family being ill.

L.C.C. NEWS

The March meeting was held at the home of Mrs. J. Pruden on March 30. The meeting was opened shortly after 2 p.m. by singing the theme song. The roll call was answered by Easter verses. After the minutes and financial report were accepted as read, Mrs. Bracegirdle and Mrs. Scott were appointed to visit the sick persons during April. Being the annual meeting, officers were elected as following: President, Mrs. A. Smith; Vice-president, Mrs. Evans; Sec-Treas. Mrs. Bracegirdle; Press Reporter, Mrs. Herndon.

It was moved and seconded that all officers in future will be changed annually, also any motions are to be left open until the following meeting when the decision will be made by ballot. The next meeting will be held at Mrs. McHeffey's. The roll call to be answered by notions. Visitors welcome. The meeting was closed by repeating the Lord's Prayer, after which a lovely lunch was served by our hostesses, Mrs. Lindberg and Mrs. Pruden.

LIBRARY NOTES

New books added to the W. I. Library are: Adventure by Gen. J. E. B. Seeley; Easter Island by R. J. Casey; Things Seen in Sicily by Isabel Emerson; Things Seen at the Tower of London by H. P. Woodgate; From Dolon to [illegible] by H. L. Waters; They Carried the [illegible] by Edwin Muller; The Bon Voyage Book by An Old Salt; Burgundy by Stephen Gwynn; Dude Ranch by Milton Krims; Big Business by A. S. M. Hutchinson; Farewell Victoria by T. H. White; Warning Hill by J. P. Marquand; Idolaters by Hale Collins; Switzerland by McBride; The [illegible] of Castille by E. [illegible]; Battlefield by Graham [illegible]; [illegible] ment into Exile by [illegible]; Fighting Hearts by J. F. [illegible]; Guardians of the Sage by S. Lehman; [illegible] Devil of the Range by Geo. O. Baxter; Me and Shorty by C. E. Mulford.

Enjoyable Party

On Monday evening last a number of friends gathered at the Everitt home to help Ross celebrate his 21 birthday. Bridge was the order of the evening and honors were won by: Ladies' first, Winnie Worton; Ladies' consolation, Katie McAllister; Gent's first, Allister Swinton; Gent's consolation, Bill Worton. A delicious and plentiful lunch was served, including a lovely birthday cake. On behalf of the hockey boys Les Glover presented Ross with a pen and pencil set. Ross responded, thanking the boys very much and stating that he has enjoyed playing hockey with the Tofield team a great deal. Mr. Burke expressed the thanks of the club for the support given to the hockey boys financially and otherwise. Bill Worton on behalf of those present thanked Mr. Everitt for the enjoyable time and the guests departed for their homes.

[illegible] a letter from [illegible] regarding [illegible] Garnet [illegible] Garnet and the [illegible] 2 and 3 W [illegible] Dr. McGibbon pointed out [illegible] the case if the discounts [illegible] on the [illegible]

Canada 1938

Ten thousand miles of copper wire are used to carry "Canada 1938" sponsored by the Imperial Tobacco Company, from coast to coast of the [illegible] Friday, eight-thirty to nine p.m. Another five thousand miles of wire are needed [illegible] to maintain a check on the line across which flow the sound waves generating the program. At all important points in this vast circuit there are terminals, 34 in all, at which attendants maintain strict watch. Should interference due to atmospheric conditions [illegible] failure of the circuit, the [illegible] stations which may take the broadcast hundreds of miles around the [illegible].

[illegible] of these terminals is an [illegible] the sound waves pass. This enables music and speech to be received at the same strength at any point in Canada. The [illegible] thus maintained will be appreciated when it is remembered that the average length of the "[illegible] Repeater" pick-up circuit used by "Canada 1938" is anywhere between [illegible] and 5000 miles, which is in addition to the circuit carrying the programme to the radio stations. No fewer than 50 attendants are constantly on duty in charge of [illegible] points. It is their task to see that every Canadian who listens to the programme gets clear satisfactory reception.

Next Friday, March 25, the voice of Walter B[illegible], the Roving Reporter [illegible]

[illegible] the world.

Wanted A Scout Whose Hobby Is Mice

The Boy Scout Correspondence Secretary at Dominion Headquarters [illegible] when he received this [illegible] Leader [illegible] Canadian Scout [illegible]

Express Men Find Pigeons Are Particular Customers

Montreal, Que. March 28—As racing pigeon clubs all over the country prepare for their spring marathons, Canadian National Express employees are busy brushing up on their bird lore. Homing pigeons are among the most exacting customers [illegible] and require—and get—the most scrupulous attention.

The express man has to know just how the birds are to be liberated—which door in the basket to open, so that the pigeons get out quickly and all together—and, what is quite as important—when. Pigeons will not fly through heavy rain, fog or thick smoke, and they will not fly [illegible] dark. The express man has to be up to the minute in his weather reports regarding the route of flight. He has to bear in mind the fact that pigeons fly about 30 miles an hour.

Feed is usually forwarded with the birds and it is up to the express man to see that his customers eat and drink. If the supply runs short he buys peas and corn, and he knows just what kind.

He has to be careful that his charges are not exposed to the summer sun, but he has to bring them to the light at least 15 minutes before they are released so that their eyes will have a chance to become accustomed to the change. Dogs and cats and the curious public have to be kept away from them.

And when the precious shipment have all flown home, the express man has to gather up the baskets and return them by train.

Figures With A Moral

A [illegible] from Washington [illegible] the following [illegible] Canada which took more [illegible] $[illegible] more than [illegible] was the second largest foreign [illegible] American exports.) A [illegible] sale American [illegible] from Canada were worth [illegible] per cent more [illegible]

[illegible] balance with the United States of $111,000,000 in one year [illegible] of which should give Canadians cause for thought and analysis.

These imports are equivalent to a per capita expenditure of practically a dollar a week for every man, woman and child in this country. That, of course, is theoretical because the American goods included raw materials necessary to manufacturers in Canada. However, it is interesting to speculate that if the dollar a week had been spent on Canadian [illegible] wherever possible [illegible] meant a tremendous [illegible]y industry.

A few years ago, in an advertisement released by the Dominion government, it was estimated that manufactured goods with a value of $5,400 provided work for one man presumably for one year. If that estimate is true then our imports from the United States last year represented employment for 9,000 Canadians. Of course, this is only one side of the picture. Canada obviously cannot expect to maintain trade without imports and exports, but it would be worthwhile finding out what percentage of these American imports competed, right on our own hearth, with the products of the Dominion and to what extent their sale in this country deprived our own people of employment. Without in any way damaging our friendly relations with the United States, our people would be helping themselves, in a practical way, if they became imbued with the Buy Canadian idea where price and quality are satisfactory.

HEALTH

A HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION AND LIFE INSURANCE COMPANIES IN CANADA

What To Eat To Be Healthy

Number one

Great advances have been made in the science of nutrition during the last few years, and no doubt further advances will be made in the future. However a number of fundamental principles essential for your good health have been established and are now universally recognized. In this series of articles entitled "What to Eat to be Healthy" we propose to tell you how our present knowledge can be applied in your life and the life of your family.

Follow these articles closely and you will be in possession of reliable information on what foods you should eat and the importance they play in maintaining normal health.

Many persons today, and you may be one of them, do not eat an adequate amount of all the food elements necessary for the highest possible level of health. As a consequence, malnutrition may result. But malnutrition is not a spectacular condition. For example, everyone knows that a lack of iron will result in the development of anaemia. The mildly anaemic person usually does not [illegible] carry on his every-day life, may be quite normal, and he may be not realize he is anaemic. His weight [illegible] lacks energy and vigor. A [illegible] of calcium in the diet may take years before it obviously affects your health, but eventually it will. These are only two examples but [illegible] might be given. There [illegible] to watch carefully [illegible] that diet contain all the [illegible] food elements in adequate [illegible].

What food elements are necessary for life and health? You may be surprised to know that there are no less [illegible] vitamins and [illegible]. They may be arranged into five groups of food substances, the vitamins, the minerals, the proteins, the fats and the carbohydrates. A deficiency of any of these essential [illegible].

What food elements are necessary. To get these five groups of foods and enjoy the highest possible level of health, take each day one-half to one pint of pasteurized milk (children one and one-half pints), one egg, some meat, two vegetables besides potato and [illegible] Vitamin D is also necessary in winter months.

The next article will deal with the dangers associated with deficient intake of [illegible] these [illegible] elements.

Watch this paper for the next in the series "What to Eat to be Healthy".

Questions concerning Health addressed to the Canadian Medical Association, 184 College Street, Toronto, will be answered personally by letter.

6,000 "Handicapped" Boys In Scouting

There are [illegible] Scouts [illegible] mental defectives and crippled—enrolled in the Handicapped Branch of the Boy Scout movement in Great Britain. The Scout connection and training has proved of important benefit to such boys, notably in the mental result of the [illegible] that they can share many of the activities of physically normal boys. Canada also has Scout troops and Wolf Cub packs in many of its institutions and hospitals for sick and handicapped children.

I had to fire an old employee today. I felt sorry—but sentiment has no place in your business.

What is your business, may I ask?

Oh, I manufacture all sorts of holiday and greeting cards.

THE WORLD OF WHEAT

By H. G. L. Strange, Director Research Department, Searle Grain Co.

Spring now has come, and the farmer's thoughts turn to the fields which are to provide the family living.

Implements will be repaired and cleaned, the seeder receiving particular attention. Wise farmers are this [illegible] made their arrangements for good seed, and are now considering the problem of treating against smut.

Seed treatment is as old as history. Virgil in his immortal poem on farming "The Georgics" written about 35 B.C., tells us—

Oft have I seen a sower dress his seed

With oats and black lees of olive oil.

but the modern farmer has the choice of several better methods.

[illegible] standby Formaldehyde is the cheapest, but must be made up of exactly the correct strength or else the germination of the seed may be damaged.

The new mercurial dusts—Ceresan and Leytosan—are becoming increasingly popular. While more expensive, they have several advantages over Formaldehyde.

In the first place the dust [illegible] not only stinking smut, but also to a great extent root rot bacteria, thus promoting a more generous and healthier rooting system, which in turn helps to keep down weeds; all tending, therefore, to bring about higher yields.

[illegible] when Leytosan or Ceresan is used, seed can be treated several weeks before sowing, thus making the farmer's work easier and [illegible] hurried.

[illegible] factors have tended to [illegible] decrease [illegible] South Africa [illegible] wheat. Japan [illegible] purchase wheat [illegible] hard wheat [illegible] Small quantities [illegible] passage to Europe. Prospect of decrease in Chinese [illegible] U.S. wheat [illegible] factors have tended to lower prices. Threat of European War [illegible] Bright U.S. winter wheat prospects and acreage [illegible] normal [illegible] permits [illegible] shipments — Japanese seedings near high record of 1937. Cuban pineapple crop larger than 1937.

Canadian Sardines World Travellers

[illegible] Canadian [illegible] sardines [illegible] That is big business to be done in fish which individually measure only three or four inches in length.

Of course, there were a good many sardines in the 1937 shipments. Including the weight of the light cans in which the fish were packed. The [illegible] to South Africa the biggest single shipments went to South Africa. Next buyer was Australia, but the sales to Australian importers were less than half as large as those made to South Africa [illegible] the Dominion.

Canada's sardine fishery is confined to the Atlantic Coast just as the [illegible] for example, is entirely in Pacific waters. Canning of sardines is even more localized than the catching. Every pound of them packed in one section of Southwestern New Brunswick, where the business has grown to be very important. The fish used in the canning are little herring or sardine herring. The herring runs are very large in that part of the country and the sardine herring are taken in great quantities in devices known as weirs, which project out from shore and are made of small poles or posts, netting and brushwood with a bag or trap at the outer end. Swimming along near the shore many of the sardines make the mistake of exploring these strange obstacles and when they do that they have taken their first step toward making a trip to foreign lands in easy time. Perhaps the trip may be to distant lands or perhaps to some Canadian city, town or village for there is a big domestic business, of [illegible] canned fish.

Railroad Men Speak Lingo Of Their Own

Montreal, Que. Mar. 28—Railroading has a language all its own—a language that is used every day in the yards, around the shops, on the road—wherever railroad men meet. Humorous for the most part, this picturesque jargon is as colorful and homely a manner of speech as can be found anywhere in the lexicon of North American slang, says the Canadian National Magazine, which gives a list of some terms, under the title "Railroad Slanguage."

The names are not always complimentary. For instance, the engineer is known as a "hogger" as well as an "eagle eye"; a car repairman as a "car toad"; a boilermaker is an "iron skull"; the master mechanic is a "master maniac"; and the train despatcher is a "detainer." The fireman has to put up with "diamond-pusher", "tallowpot" and "bakehead". The conductor is usually referred to as "the [illegible]"; on some trains, he is "brass buttons"; officials are called "brass collars" and "brass hats." A "car catcher" is a brakeman and "scissor bill" is what they call a student brakeman. Telegraph operators are "Hams". The despatcher is the "master mind." The yardmaster is a "dinger", a checker is a "number grabber"; "gandy dancer" means a section hand; a machinist is a "nut splitter."

The hogger's locomotive has many names. It is a battleship, (so is the landlady, sometimes), a calliope, a pig or hog, a goat, a Jack, a mill and a stack o'rust. The caboose is known as a hearse, a buggy, a hack and a [illegible] wagon. A box car is a "side door pullman". A railroad motor car [illegible]

To "beat 'er on the back" is to [illegible] "bark soup" [illegible] the fly; and [illegible] stop and [illegible]

Starts National Elevator System

[illegible] for the foundations of the terminal elevator in the new port at Buenos Aires, officially inaugurated the work of construction of the first of the port terminals to be built as part of the national system of grain elevators. This [illegible] long-heralded [illegible] these [illegible] Alberta Wheat Pool Budget.

CONFIDENT OF SUCCESS

A 22 year old Philadelphia singer, reconciled to the fact that he soon will be blind, has embarked on a determined race for an operatic career before his sight is totally gone. [illegible] David Hartley [illegible] study harder [illegible]

A former Metropolitan Opera star heard Hartley sing. He invited the six-footer to his studio and volunteered to teach him—if there was time.

Within two years, he told Hartley, you'll be self-supporting. In six [illegible] already have done the work of years.

It will be easy, said the young singer. German, French and Italian—I'm learning them all. And piano and more and more work on voice production.

Spring Is On The Way - - -

SPRING is one season when our Want Ads. offer you very valuable service . . . Each year we carry in our columns ads inserted by those who wish to dispose of Seed, Horses, Stock, Machinery or other goods . . . Each year these Ads. make more satisfied customers.

THE FARMERS' ANNUAL GAMBLE—

(Contributed)

LENGTHENING DAYS and higher temperatures awaken within our farming communities the urge to once again gamble with the favors and caprices of Dame Nature. As oft as spring returns, the people of these prairie provinces are ready to fling a new challenge to the threats of frost, wind, storm, pest or drought. Undaunted by former defeats, they are ready to forget the past and renew the fight in the glorious hope of conquest and victory.

There is something about spring that stiffens the backbone and renews determination. It is an indefinable quality of mind which rises above the conjectures of further failure. It is a gamble—a willingness to take further risks for a chance to win.

In any case there is something heroic about our prairie farmers. Of late years they have suffered sufficient discouragements to drain the very springs of optimism—to have palsied the stoutest heart—but in spite of these things, a few weeks will see them back on the land pursuing Dame Fortune with relentless determination.

This capacity to face defeat undaunted, to surmount difficulties, to try again, is a real virtue. It is one of those imponderable qualities which differentiates between the virile and the weakling—that expresses an indomitable will, in contrast to the timid and the faltering. It is a virtue and a quality, without which the prairie would never have been settled in the first place, and would now be deserted. It demonstrates the stability of purpose which very often is compensated at last in rich reward.

Nevertheless, all gambles lose their attraction unless the possibility of success remains a living factor. Because of this it may be pardonable for our farmers to seriously review the prospects for success before they again plunge into the season's work.

What are the prospects? In the early years of prairie settlement, early fall frosts took heavy toll and many a crop almost ripe unto harvest was blasted overnight, a travesty of the promise it offered the day before. Summer storms also took their toll, when hail would cut swaths through smiling fields and leave them pounded into worthless pulp. Today, however, new and more menacing threats stalk their way among the prairies—dust storms that sweep the seed from the drill rows; weeds which choke the growing grain; cutworms and grasshoppers with voracious appetites, and last but most menacing of all, drought which withers and burns and blasts the last vestige of hope for prosperous harvest. Those newer menaces are the ones to be feared in the year to come. Of the grasshopper pest there still remains real danger. Of drought, signs are more promising. Subsoil moisture is more in evidence. Last fall, good rains brought hope that the vicious cycle had broken. Plenteous winter snow will add to the reserves and it may be that this danger may give way to the happy realization of a return to normal precipitations, with which a rejuvenated earth will blossom as the rose.

Whatever may be the conditions in the growing season almost immediately before us, there seems to be a unanimity of opinion that the prairies will come back and that these hard and trying times will yield to another cycle when labors shall be rewarded by bounteous crops.—N. Battleford Optimist.

Propose Probe Gasoline Prices

An inquiry into the spread between the wholesale and retail prices of gasoline was urged in the legislature last week in a resolution introduced by Mrs. Edith Rogers, Social Credit member for Ponoka, seconded by James Hartley, S.C., Macleod. The resolution was adopted.

Endorsement of the resolution was given by Hon. E. C. Manning, Provincial Secretary.

One of the main provisions of the resolution asked the government to consider the advisability of taking over the wholesale and retail distribution of petroleum products in this province.

Discussing the resolution, Mr. Manning said that the government had been giving attention for some time to means of bringing about lower gasoline prices.

He pointed out that the province was awaiting the findings of the federal tariff commission which recently investigated conditions in the oil industry in Alberta. Also, the province was continuing to assemble data on the subject.

Both Mrs. Rogers and Mr. Hartley pointed to the need of action in view of the high retail price of gasoline compared with what the producer receives.

Some years ago the Alberta Motor Association assembled considerable material on the gasoline price situation, later submitting a brief prepared by Mr. C. H. Grant, K.C., counsel for the association, to the dominion and provincial governments. Thus, the A.M.A. having taken a prominent part in demands for lower gasoline prices is watching the outcome of the resolution passed by the legislature with special interest.

100,000 Alberta Road Maps Issued

Welcomed by motorists, 100,000 new strip maps are being issued by the Alberta Motor Association.

Just at this time, when many people are planning their summer holiday trips, the new maps undoubtedly will be scanned with close interest.

The maps will be made available at all official appointments of the A.M.A., including garages, hotels, service stations, auto camps, and elsewhere. Distributions will also be made at branch offices of the A.M.A. at Edmonton, Calgary, Lethbridge and Medicine Hat.

These maps are issued in accordance with official information obtained from the Public Works Department of this province. They show any changes in highway routes or conditions right up to the close of the 1937 construction season.

Every effort has been made to issue maps that are handy and dependable, while containing much valuable information for tourists. Mileages from point to point are shown besides other information that is designed to assist the tourist in enjoying a visit to this province.

Maps cover all sections of the province, including the Peace River district where extensive road improvements were made last year.

Cause Enough!

"Have you ever seen a company of women silent?"

"Yes, once somebody asked who was the oldest."

Duke Of Windsor Purchases Another Canadian-made Car

Oshawa, March 28—The Duke of Windsor, maintaining his choice of motor cars the same standard that he set as Prince of Wales and as King-Emperor, has taken delivery of another Canadian-made McLaughlin Buick, it was announced here today by R. S. McLaughlin, President of General Motors of Canada.

Exactly two years after, as heir apparent, he had purchased his first Dominion built Buick, the Duke this [illegible] received into his service a [illegible] built 1938 limousine from the Oshawa plant of General Motors of Canada, Limited.

Evidence of his Royal Highness's complete satisfaction with his first (1936) McLaughlin-Buick was his insistence, first, that the second car also be constructed at General Motors Canadian plant at Oshawa by Canadian workmen, and secondly, that it be as nearly as possible an exact duplicate of the first machine. The result is that, although every advance of the past two years in styling, engineering and motor refinement has been incorporated into the Duke's 1938 limousine, its special equipment and luxurious extras are modelled after those in the machine which, when the identity of its royal purchaser became known early in 1936, formed the leading topic of conversation in the automotive circles of the world.

Distinction in its every line and contour, the Duke's 1938 McLaughlin Buick has an almost bewildering array of novel equipment which puts ordinary gadgets to shame, and makes the striking vehicle literally a drawing room on wheels.

The most striking exterior feature of the Antoinette blue 90-33 limousine is a chrome built moulding which extends practically around the car in place of the conventional colour stripe used in cars of lower grade. The modern chrome influence is extended throughout the car, their being chrome mouldings on the running boards, louvres on the hood and gleaming chrome fittings generously distributed throughout the car's interior.

The Duke again has expressed a preference for elimination of the rear quarter windows which imparts the impression of extreme length, and affords added privacy to occupants of the rear compartment. An electrically operated blind over the rear window and sliding blinds on the partition and side windows add to the privacy available to passengers.

Among the many provisions for the comfort and relaxation of the passengers, perhaps the most ingenious is the array of drawers, cabinets and compartments built into the back wall of the chauffeur's compartment within easy reach of the passengers. In their black glass lined interiors are materials and utensils for the preparation of lunches and refreshments on the road, including silverware, cutlery, biscuit box, tongs and even an ice compartment, as well as a spacious canteen section.

Con[illegible] order [illegible] rear seat [illegible] a radio, with control dial on the right-hand wall. There are two [illegible] for the radio, [illegible] concealed behind the roof upholstering.

The pervading impression of luxury and commodiousness are further emphasized by such special equipment as mirrors inset in the side walls, concealed, specially cast brass reading lamps—which are only two of the total of 7 twenty-five candle-power lights in the rear compartment—chrome pipe rings for smokers, electric clocks, cigar lighters and dictaphone, arm rest ash trays, special bulge-proof door pockets, two independent hot water heaters, ventilator in both rear doors, special foot rest and two batteries with change over control.

The entire interior is finished in the same grade of tan broadcloth which proved so popular with the Duke in his previous McLaughlin Buick.

Matched veneered walnut is used generously on all garnish mouldings in front and rear.

Amazing versatility was demonstrated by General Motors artisans in the construction of the royal car. Scores of parts had to be specially designed and cast, extras had to be precision-built, and special fittings tooled, to complete a motor car which is in itself an eloquent tribute to the adaptability of the Company's craftsmen.

The repeat order from the royal customer was sent to R. S. McLaughlin, President of General Motors of Canada, by Messrs. Lendrum & Hartman, General Motors agents in London.

The Englishman sternly reprimanded a fellow countryman who had become a naturalized United States citizen.

"What have you gained by becoming naturalized?" asked the Englishman.

"Well," replied the other, "I win the American Revolution!"

Thatcher—A Good Milling Wheat

The official statement was recently made that Thatcher—the new rust-resistant variety—is a satisfactory milling wheat and is eligible to go into the top Manitoba Northern grades. The conclusion was based upon the results of large scale milling tests arranged by the Canadian Board of Grain Commissioners, and made recently in Great Britain and other countries.

Coronation, a still newer rust-resistant variety, was apparently found by the same tests to be not as desirable [illegible] was announced that Coronation [illegible] will not be permitted [illegible] grade any grade higher than [illegible] Northern, even though the license for its use in Canada should be [illegible] however, is perhaps [illegible].

All interested in the variety Thatcher will certainly breathe a sigh of relief on receipt of this good news, although at the same time authorities would have been perplexed had the results been different for the reason that Thatcher has probably been more thoroughly tested for both agronomic and milling and baking characteristics than any other new variety.

Six years of laboratory and small scale 60 bushel lot tests in Minnesota and five years laboratory tests in Canada have demonstrated that Thatcher was a wheat that would give satisfactory milling and baking results. It is, however, nice to have the [illegible] confirmed by these European large scale commercial [illegible].

Thatcher, it will be remembered, is a variety that was produced by a [illegible] effort of the Agricultural Experiment Station, University of Minnesota, in co-operation with the United States Department of Agriculture Bureau of Plant Industry. Two of the grandparents of Thatcher are Marquis—one of the others is Iumillo, an Italian Durum wheat, and the other grandparent is Kanred, a red winter wheat which in turn was a selection from Turkey red. It is no doubt the preponderance of Marquis blood that gives to Thatcher its good milling and baking characteristics.

The production of Thatcher can be considered to be the first real battle won by plant breeders and agricultural scientists in 5000 years or more, against the dread scourge black stem rust, which from the earliest of times has taken an appreciable toll of the foodstuffs of the people of the world. Those plant breeders and scientists therefore who are responsible for the production of not only Thatcher, but of Marquis, Iumillo and Kanred and in turn of the ancestors of those parent wheats, deserve well the thanks of the farmers of the northern part of the United States and of Canada, and of course of all those persons who directly and indirectly depend upon these farmers for their own welfare.

For many years the Dominion government in co-operation with the Experimental Farms, the National Research Council, and the Western Universities have made well-planned and well-rendered efforts to produce Canadian rust resistant varieties. Renown and Apex are available and other as yet unnamed varieties are in process of development.

It is highly probable that some of the varieties that are now being produced and tested by the Rust-Research Laboratory will be better than Thatcher, Renown or Apex. For the time being therefore, Thatcher, Renown and Apex may be considered to be good stop-gaps until superior varieties are developed.

The story of the spread of Thatcher in Western Canada is interesting. Several years ago Mr. Lillejord, of Arnaud, Manitoba, brought a small quantity from the University of Minnesota, and year by year quietly multiplied this until by the spring of 1936 he had a total of some 7000 bushels. A good deal of this was made available to farmers by Mr. Lillejord himself and through the medium of the Manitoba government.

Noting the value of Thatcher and the need for a rust resistant variety for our Prairie Provinces, the Searle Grain Company with the other companies of the Crop Testing Plan in the fall of 1935, sent an expert to Minnesota, to purchase some really good Thatcher that would have an authentic pedigree of trueness to variety behind it.

Six of the very best growers were chosen and from these men about 10,000 bushels of Thatcher which had been field inspected and registered under the rules and regulations of the Minnesota Crop Improvement Association, were purchased.

The seed was brought into Canada and to make absolutely certain that it would be the best obtainable, was all recleaned. The bulk of this was made available to farmers in the rust areas of Manitoba and Saskatchewan, at cost, and just over 2000 bushels were allocated to 20 of the best seed growers in Manitoba and Saskatchewan—all members of the Canadian Seed Growers Association—to multiply and to improve.

The result of this effort at improvement was approximately 30,000 bushels of very fine true-to-variety certified Thatcher seed that contained less than half of the bearded heads and other impurities present in the original importation.

The bulk of this seed, in the winter of 1936 and spring of 1937, again was made available at cost to the farmers by the Searle and other companies [illegible] Plan [illegible] seed [illegible] to seed growers for further multiplication [illegible] which resulted this winter [illegible] in just over 20,000 bushels of exceedingly fine improved certified Thatcher [illegible] or with a [illegible] about [illegible] Thatcher [illegible] ported two [illegible] from Minnesota.

Finally, the [illegible] Thatcher [illegible] which was imported by private individuals from the United States, it is found that the Searle Grain Company Ltd. and the other companies associated with the Crop Testing Plan [illegible] Canada [illegible] percent of the total [illegible] and that [illegible]

Mrs. Fisher Suggests

FOR BREAKFAST

Canadian Fish Hash

Chop from four to six slices of bacon and fry the pieces until crisp, then add the following mixture: Two cups of any Canadian cooked and flaked fish, two eggs, two slices of onion finely minced and one-half cup of [illegible] meat stock. Heat slowly, stirring meanwhile, brown and serve [illegible] chopped parsley, minced green [illegible] other like ingredients may [illegible] for a change of flavour [illegible] Fish and Shellfish are [illegible] good foods because they are [illegible]

FOR LUNCHEON

[illegible] Scallop Supreme

[illegible]

FOR DINNER

[illegible] Fish Steaks in Milk

[illegible] desired kind of [illegible] with a damp cloth [illegible] salted water. [illegible] with salt, pepper and [illegible] them in a greased baking [illegible] and cover with milk. Cook [illegible] oven 350 degrees F. until [illegible] has "set." Having sliced two [illegible] onions saute them in [illegible] until they are browned [illegible] place the slices on the fish [illegible] of bacon on each piece of fish. Return the fish to the oven [illegible] bacon is cooked. Two pounds [illegible] will serve six people. If [illegible] mushrooms may be placed [illegible] the slices of fish and baked [illegible] them.

Canadian Fish Foods are comparable [illegible] in nourishment and are [illegible] easy of digestion.

Proud of Police In Newfoundland

ST. JOHN'S, Nfld. Newfoundland's new ranger force, modelled on the lines of the R.C.M.P. has passed its second year of existence with every indication the venture will prove an outstanding success. It is the confident hope of Newfoundlanders that their rangers will build up a reputation similar to that of Canada's world-famous mounties.

The force now totals 65 men, 10 more than at the end of 1936. Already it has stirred the imaginations of the people with its reputation for [illegible] since its establishment in 1935.

Duties of the ranger, like those of the Canadian mountie, are varied and comprehensive. Sometimes he is acting as a relieving officer or as a relief [illegible], sometimes as a customs [illegible] an inspector of [illegible]. At other times he is a wreck and salvage commissioner, or a game inspector or a sawmill [illegible].

Besides these things, the rangers have their regular police duties covering [illegible] square miles of territory [illegible] taken over from the Newfoundland constabulary, duties [illegible] the hardy constables over vast stretches of country, through every [illegible] territory to [illegible] and to bring [illegible] a lonely outport settler [illegible] the ranger has become [illegible] of security and fair play. [illegible] way in which the rangers differ from their big brothers, the R.C.M.P. is in the department with which they are affiliated. The rangers, so far at least, have been under control of the department of natural resources in Newfoundland's commission government rather than under the department of justice.

Statistics show why this is so. During 1936 [illegible] per cent of the rangers' duties had to do with the department of natural resources, 35 per cent were on behalf of the department of public health and welfare while only 17 per cent of their undertakings had to do with the department of justice.

The rangers are seldom seen in St. John's. Theirs is the uniform of the densely wooded sections of the interior, of the great inland rivers, of the little fishing outports snuggled along the coastline where ordinary visitors seldom go.

High educational and physical standards have been set for those who wish to join the rangers. This year, the training syllabus which each candidate must pass has been enlarged by a course in surveying to further increase the efficiency of the new force.

[illegible] that considering the short time in which the force has been operating, the degree of efficiency attained has been very satisfactory," comments the annual report of the commission government. With the progress of time and the acquisition of practical field experience, this standard of efficiency will be increased. The versatility of the ranger force is contributing to the improvement of social conditions in the outports."

[illegible] West Territories Will Ask Representation

MONTREAL, March [illegible] — The [illegible] when the North West [illegible] must have representation [illegible] and voice [illegible] 1,000,000 [illegible] Dr. Charles Camsell, [illegible] minister of mines [illegible], told the Canadian [illegible]

[illegible] said Dr. Camsell, the [illegible] administered by a government [illegible] meeting [illegible] Ottawa. The body had [illegible] and gas [illegible] for administration [illegible] health, education, and other purposes.

Rapid growth in importance of the mining industry in the Territories is imposing more work on this council, he said. Oil had been discovered, and he estimates this year's production at around 1,000,000 gallons.

"It won't be long before we have a gold mine in the territory," he said. "Prospectors say the Yellowknife [illegible] is the hottest place on the mining calendar of Canada today and there is almost a stampede [illegible] place in there from Edmonton."

B.C. Will Control Coal, "Gas" Trade

VICTORIA, March 30— Premier Pattullo Monday night announced a one-man board would be appointed to regulate the coal and petroleum industries in B.C., and that it was his government's intention to introduce a public utilities act at the next session of the provincial legislature.

He said the B.C. government intended to appoint Dr. W. A. Carrothers chairman of the now-disbanded provincial economic council, as coal and petroleum commissioner. Dr. Carrothers had also consented, he said, to serve as commissioner under the public utilities act when it was enacted.

Mr. Pattullo said it had been suggested before the Rowell commission, when that body sat in Victoria, that wide centralization of authority in the dominion government should be put into effect. If this were done B.C. would soon be wallowing in a sea of discontent and strife, as well as economic and social disability.

Authority to set up the coal and petroleum board was provided in the Coal and Petroleum Products Control Board act passed at the legislative session last fall.

The board would have power to fix minimum and maximum prices at which coal and petroleum products might be sold within the province, and could levy fines up to $1000 for violations of its regulations.

The board would have authority to regulate coal mining, preparation of coal for market, storage of coal and its wholesale and retail distribution, distillation, refining or blending of petroleum or its products, and their sale.

Unwin Will Ask Release G. F. Powell

Joseph H. Unwin, S.C., Edson, on the floor of the legislature on Monday, gave notice that at the Tuesday sitting, he would move a resolution, requesting Premier Mackenzie King to grant immediate release from the Fort Saskatchewan jail, of George Frederick Powell.

This will be the third resolution in which Mr. Powell's release has been discussed or introduced at the current session.

A. V. Bourcier, S.C., Lac Ste. Anne, early in the session moved a resolution requesting release of both Mr. Powell and Mr. Unwin, and about two weeks later moved another motion asking when a favorable reply to the first motion could be expected.

Mr. Unwin was released on March 21 and, on taking his seat in the house the following day stated he would press for Mr. Powell's release. His motion of Tuesday is following on with his expressed intention.

Pile of Sawdust Suffocates Worker

ORILLA, Ont. March 29— Charles White, 67, was suffocated here Monday when a huge pile of sawdust fell on him. He was watchman at a lumber company here. He was trying to loosen the clogged sawdust when it suddenly fell and buried him.

FOUND—A Pocket Watch. Owner may have same by proving property and paying for this ad.

Blizzard Return Young Trans-Dominion Hikers

CALGARY, March 30—A hike to Eastern Canada was abandoned Tuesday by Bob Smith and Peter Valley.

Caught in the blizzard, the youngsters, both 11-years-old, returned to the homes of their anxious parents at 3 a.m. after spending part of the night in a dug-out on the eastern outskirts of the city. They left home Monday morning.

Police were conducting a city-wide search when the boys, tired and hungry, came home.

"We were going to walk to eastern Canada," young Bob told his parents.

It was their second disappearance from home in less than a week. Last Friday they headed north, hitch-hiking to Olds, 95 miles from Calgary, where they were picked up by police and returned home.

Gruff-Voiced Thug Attacks Blind Man, 81

WINNIPEG, March 30—Police are searching today for a gruff-voiced thug who attacked 81-year-old Edward Leguyear, blind, old-age pensioner. Mr. Leguyear felt his watch being drawn from his pocket and lashed out with his cane. A young man heard his calls for help and the robber took to his heels.

A Problem

Uncle (to young nephew)—"Yes, my lad, I can answer any question."

Nephew—"Well, if a wasp landed on a nettle, would the nettle sting the wasp or the wasp sting the nettle?"

STANDARD

Above and beyond the standardized processing of ALBERTA BEER by skilled Brewmasters, is the standard equipment in use at all Alberta Brewing Institutions. True, they use the old formulas and the choicest of ingredients, but the methods of control are infinitely finer. Modern equipment, improved plant construction, and handling facilities contribute greatly to the high STANDARD maintained in the manufacturing of ALBERTA BEERS.

Obituary

MRS. JOSEPHINE ANDERSON

Mrs. Josephine Anderson, wife of Eric Anderson, Tofield, passed away at her home Tuesday, March 29th, 1938, at the age of 40 years, 5 months and 13 days. The deceased came from Grande Prairie 17 years ago and since that time has resided in the Tofield district. Her loss will be felt by many relatives and friends. Rev. Allen officiated and interment took place in the Tofield cemetary. She leaves to mourn her loss, her husband, one daughter and two sons, Lina,12, Ray 16, Arlie 11. Her father, Mr. Flowner, one sister, Mrs Pellering and one brother Marcelle of Grande Prairie, and a brother, Arsene at Detroit, Michigan. The pallbearers were: Mr. Lagstead, J. Jacobson, M. Eaglesham, G. Bailey, H. Martin and H. A. White.

Beautiful floral tributes were received from The family; (Mrs. T. [illegible], Mrs. Eaglesham and Jennie, Mrs. [illegible] Sr., Mrs. Weatherill [illegible], Mrs. Jacobson, Mrs. Bailey, Mrs. [illegible] Seale, Katie Deserlais and Mrs. [illegible] Mr. and Mrs. Lagstead: Mr. and Mrs. V. Moss; Mr. and Mrs. H. Martins, Trustees of McKenzie S.D.; Teacher and pupils of McKenzie School.

LAKESHORE

Born: To Mr. and Mrs. T. D. Ferguson on March 29th, a son.

The Lakeshore Social Credit Group held a meeting at the O. Eaton home on April 1.

Mr. Nelson of Edmonton is spending a few days at the R. C. Phillips home.

Miss Elsie Nelson, Donald Phillips, and Henry Tiedeman were visitors to the city on Tuesday.

Mr. Graham was a visitor to the city over the week end.

A shower was held at the Bethel home one day last week in honor of Mrs. Melvin Bethel. There was a very large number present and Mrs. Bethel received many useful and beautiful presents.

PUBLIC NOTICE

THE MUNICIPAL DISTRICT OF CORNHILL No. 487, Tofield, Alta., under authority of the Provincial Department of Public Works, intend to place a ban on all heavy road traffic over municipal roads as occasion demands. As far as possible, notice will be given at times when it is found necessary to take such action.

J. O. A. LETOURNEAU,
Secretary-Treasurer.

The Anglican W. A. are holding a silver tea and sale of home cooking and aprons, and their sale of daffodills, lilies and potted plants at the Institute Rooms on April 16th.

Creameryman Dies As He Pushes Car

Veteran northern Alberta creamery operator, William Hetsler, New Sarepta, died of heart failure late Monday when he endeavored to push a stalled automobile from a snow drift, R.C.M.P. here stated Tuesday. The automobile was stalled between New Sarepta and Leduc.

Manager of the Woodland Dairy Limited branch at New Sarepta for several years, Mr. Hetsler formerly had been in charge of creameries at Ryley and Tofield.

Moisture Enough, Germination Sure

REGINA, April 6— There is sufficient subsoil moisture in all sections of Saskatchewan to guarantee germination of seed, Hon. J. G. Taggart, minister of agriculture said Tuesday.

He said by this he did not wish to be understood as meaning a crop was assured. Year ago much seed that went into the ground did not even germinate. With the exception of the extreme southwest, moisture conditions were fairly good, Mr. Taggart said.

IN MEMORY OF MRS. ERIC ANDERSON

To me, honors or fame appeal not at all,
Praise and vain flattery quickly pall,
I covet no treasure or wealth manifold,
Flowers and tokens you may gladly withhold,
If only some day one can say at the end—
She was a neighbor—she was a friend.

From neighbors and friends at McKenzie

BARDO

OBITUARY

John Christian Olson passed away at his home on Sunday, March 27th, after a lingering illness. He was 74 years old and was born in Oistad, Norway, coming to Alberta in 1903 to his homestead here. He leaves to mourn his loss, his wife, three daughters, Mrs. H. Narussen of Ryley, Mrs. M. Kelley of Beverley Hills, Calif., and Mrs. Hoflin, Kingman, Two sons Helge and Ole.

Funeral services were held in the Bardo church last Thursday, conducted by Rev. Wessel of Edmonton and Rev. Stutzman. Pallbearers were Mr. J. Ness, Mr. M. Eide, Mr. I. Annebo, Mr. Soma, Mr. Rindahl, and Mr. Tollefson. There were many floral tribute. Interment took place in the Bardo cemetary, Mr. Fohee of Ryley being in charge. The Bardo community extend their sympathy to the Olson family.

Mrs. J. Moen and Mrs. Art Moen entertained a number of neighbors and friends in honor of Mr. A. Moen's 69th birthday last week.

Mr. A. Moen and Mr. O. Johanson have gone to Vancouver. Mr. Johanson is employed in a fishing cannery there.

Mrs. Arnold Steen entertained the Bardo Ladies' Aid last Thursday. Mrs. Nita Kindley and Mrs. Leolah [illegible] served.

Mrs. Bennie Andersen entertained the young people in honor of Milton Jevning's 19th birthday last Thursday night.

The Bardo seniors played hockey at the Tofield carnival, losing to the Tofield seniors 3-2. While returning home both cars became stuck and the boys had to spend the night in the cars.

Alice Sandahl of Amisk is employed at the Art Moen home.

M. Erickson and family have moved on the J. Ness farm, moving in the blizzard last Tuesday.

J. King has moved on the Haugseth farm which he has bought, vacated by Mr. Erickson.

Clara and Art Haugen have been visiting their sister, Mrs. Ivan Foshaug. Art recently returned from the North Country.

Mrs. M. B. Ness, Betsy Ness and Mr. Scott of Edmonton spent the week end at the I. Ness home.

Edmonton visitors last week were, Mr. and Mrs. Geo. Hendrickson, Mr. and Mrs. R. Eide and I. Foshaug.

Born: To Mr. and Mrs. Pete Eggen, a daughter, on March 24th.

Mr. and Mrs. Alvin Steen spent the week end at the Walker home at Lakeshore.

Canadian Boys Hardest Fighters Letter States

MOOSE JAW, Sask., April 6— Thomas Bailey, former Moose Jaw salesman, who has been fighting for the Loyalists in the Spanish civil war for more than a year, said in a letter received here by friends that "if it were not for the Fascists' artillery and airplanes, we would drive them (the Insurgents) out of Spain in two weeks."

He claimed the Canadian lads, who specialize in trench raids and night and morning attacks, definitely established themselves as the best fighting unit in Spain when they captured 200 prisoners at Teruel. Bailey said the prisoners were poorly clad, cold and hungry.

Bailey adds he has been in Spain more than a year and hoped to be back in Moose Jaw some time this spring.

ROSS CREEK NEWS

Mr. Orville Hopf has returned to Ross Creek after spending the winter at Pembina with Mr. C. Vicery.

Miss Dorothy Iverson returned to Pembina after spending two weeks at her parents home at Ross Creek.

Miss Josephine Elinski is spending a few days in the city visiting relatives and friends.

EASTER SPECIALS in permanents—Regular $3.95 for $3.25; Reg $5.00 for $4.00, Students Reg $2.95 for $2.25. These prices are good until Easter. Vanity Beauty Shoppe, Phone 9

THE WOODLAND DAIRY will begin buying eggs on Saturday, Mar. 26th, New agent, D. N. Sheets, Located one door west of Bellamy's Butcher Shop.

ROSS CREEK

Mrs. Steve Kushka has been visiting her sister, Mrs. Elinlak of Chipman for a few days.

Mr. Gordon Milne has returned to Ross Creek after spending a week visiting friends in Lamont.

Miss Dorothy Van Buskirk returned home after assisting Mrs. Donald Van Buskirk with her housework for the last month.

A free show was held in the Ross Creek school on March 25th, sponsored by the Edmonton Dairy Pool. It was greatly enjoyed by a large crowd. After the show a dance was held. Music was supplied by Mr. Anson Smith, Earl Wiltzen, Palmer Sagmoen and Paul Hanson.

Miss J. C. Stechyn, senior teacher at Ross Creek, took all her pupils on a sight seeing tour of Edmonton last Monday. From all reports the children enjoyed themselves in spite of the snow. Accompanying them were Mr. and Mrs. A. Snider, Mrs. Floyd MacLachlan and Mrs. C. Yarowseavage. Mr. William Bilan kindly donated his truck for the trip.

Communication

Camrose Alberta
March 28, 1938

Dear Mr. Worton:—

What has happened to your editorials? Really I think these were the worthwhile part of your paper, and many, many other people like myself must miss them. I still have some of them that I have cut out for future reference, and only last week used "The War Lords Prayer" as a basis for a talk I was giving in Wetaskiwin.

Maybe you have been sick or for some other reason have been unable to continue them, if so I hope the obstacle will soon be out of the way so you can again include them, as I looked forward to your editorials more than any other article in any Alberta paper.

Yours very sincerely,
T. E. TANNER

Editor's Note: Thanks very much Mr. Tanner. The editor is now back and will be in harness for next week. However "The War Lords Prayer" was one of the very few editorials we clipped.

Punjab Scouts Teach Camel Drivers Traffic Rules

India's first big Safety First Week was recently organized and carried out by the 50,000 Boy Scouts of the Punjab. The programme included the carrying of banners and slogans, and singing to attract crowds, to whom the necessity of simple traffic rules was explained. Groups of Scouts taught hand signals to drivers of cars, while others in the country [illegible] camel and mule [illegible] on their way to the cities [illegible] and arguing the import [illegible] A diff- [illegible] Scouts [illegible] their [illegible] necessity of [illegible] and villages [illegible] was taken in good [illegible] were [illegible] and the [illegible] abuse. Un- [illegible] by gangs [illegible] went about [illegible] and [illegible] new game [illegible] are considering [illegible] the Punjab [illegible] and organizing like Safety Weeks.

Unseen Enemies

Lurking in the protection of invisibility are millions of unseen enemies waging a continuous war against mankind, says an article in the February issue of the C-I-L Oval.

It is just recently that the lack of sanitary methods for washing, eating and drinking utensils in many Ontario restaurants, taverns and lunch counters was brought to light through a survey conducted under the supervision of the Ontario Board of Health. The report of the investigators proved that unsanitary methods of washing dishes could be responsible for the spread of such [illegible] infections as pneumonia, [illegible] scarlet fever and measles. In their efforts to safeguard the public health and to find a remedy to counteract this [illegible] the authorities turned to the industrial chemist who has supplied a safe means of rectifying this vital social problem [illegible] of a dish washing powder containing a 70 to 75 percent available chlorine content which, if adopted generally throughout the country, will provide another highlight in the national picture of sanitation.

Safety For Valuables

There are many "small things of large value" which should have the protection of a safety deposit box. Following is a partial list of valuables which can be kept safe from fire, theft and carelessness, for a rental of a cent or two a day. Probably you will think of other valuables which we have omitted.

HEALTH

A HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION AND LIFE INSURANCE COMPANIES IN CANADA

What To Eat To Be Healthy

NUMBER TWO

A deficiency of any of the essential foods known as vitamins, minerals, proteins, fats and carbohydrates endangers your health. If any one of these necessary food elements is missing from your diet, it will result in a gradual or, in some cases, a rapid lowering of your level of health. Your vigor will be impaired. You will probably feel what is commonly known as "seedy" and if this deficiency is marked and continues for any length of time, you will die.

You have all heard of substances called vitamins. There are at least six of these substances all of which are essential for health and life itself. They have one thing in common, the daily amounts required are extremely small. For example, one pound of vitamin D would cover the needs of the average adult for over a billion years, yet without it we would die. Vitamin A is essential for the health of the mucous membranes of the eyes, nose, throat, sinuses, bronchial tubes, oesophagus, stomach, intestinal tract, and the genito-urinary passages. Vitamins B1 and B2 are necessary for the nerves, skin and the normal burning up of sugar and starches in the body. A lack of vitamin C affects the miles and miles of capillaries throughout the body, while vitamin D is essential for the normal formation of the bones and teeth. Without vitamin E, animals cannot reproduce themselves.

We all know that a lack of iodine causes goitre, and a lack of iron, anaemia. Copper is necessary to get the iron from the food into the red blood corpuscles, and calcium and phosphorus make up over 95 per cent of the mineral part of bones and teeth. Proteins build up the body cells and are necessary to keep them in repair. Fats and carbohydrates supply energy, which the body uses to produce muscular effort and health.

Carefully conducted investigations have shown that when your diet is just slightly lacking in any one of the 30 necessary food elements, your resistance to infections such as colds, bronchitis, etc., is definitely lowered, so that you catch these diseases easily and have greater difficulty in recovering than when your diet is adequate. This minor deficiency of any of the necessary food elements in your diet will probably not produce any one specific symptom, but still, you will not carry on at the highest possible level of good health.

So it is very important for us to know the food elements we need, how much of each one of the food elements we should have and where we can get it. Through proper nutrition we can secure increased health and happiness, greater vigor, better resistance to disease, and longer life.

The next article in this series of "What to Eat to be Healthy" will tell you what foods to eat to secure an adequate supply of Vitamins A, B1 and B2.

Questions concerning Health, addressed to the Canadian Medical Association, 184 College Street, Toronto, will be answered personally by letter.

THE WORLD OF WHEAT

By R. G. L. Strange, Director Research Department, Searle Grain Co.

Exchanging the products of the soil of one country for the fruits of the labour of people in other areas, has been practised since the earliest times.

Wheat grown five or six thousand years ago on the fertile plains of the valleys of the Nile in Egypt and the Euphrates and Tigris Rivers in ancient Babylon, was a most important product in this international exchange.

Succeeding waves of civilizations farmed these same lands. The Sumerians, the Assyrians, the Babylonians, the Chaldeans, the Hebrews, the Medes, the Persians, the Phoenicians, the Egyptians, the Ethiopians, the Greeks and the Romans, all in their turn were producers and exporters of wheat.

Then Britain, Poland, Roumania, Russia, the Argentine, the United States, and later Canada, became, each in turn, the chief World wheat exporter.

Canada two years ago shipped wheat and flour to 22 different countries, and to 61 this last year.

For 4,000 years or more it has been recognized that the exchanging of products between nations was the surest way to improve the standard of living of the people. It seems a pity now that Governments are acting contrary to the teachings of history, by placing artificial restrictions in the way of that international trade which has ever been so beneficial to mankind.

Following factors have tended to raise prices: Moisture needed in Hungary, Italy and Australia—Some rust damage reports received from India—Low temperatures interrupt field work in Algeria—Drought prevails in Morocco—Rains delay Argentine corn harvest—Hostilities interfere with Chinese wheat seedings—Austria, Germany, and Czecho-Slovakia buying Hungarian rye.

Following factors have tended to lower prices: Spring seeding under way in Europe and U.S.A.—Corn husking and wheat sowing commences in the Argentine—Beneficial rains in the winter wheat belt—General rains relieve Roumanian drought—Danubian countries still offering wheat generously—Cuban vegetable exports increase.

Report Ottawa To Bear Full Cost of Scheme, Build Main Highways

OTTAWA, April 4—Labor Minister Rogers is expected to announce in parliament Monday an extensive unemployment relief works program and tourist highways and bridges, elimination of level railway crossings, and possibly reforestation projects.

The program will be paid for entirely by the dominion and the work will be carried out entirely under federal supervision. The dominion government, it is reported, has decided to discontinue the plan of joint provincial relief works, to which Ottawa contributed about $9,000,000 last year.

Another interesting angle, it is hinted, is that the dominion is "considering" the issue of new currency by the government itself through the Bank of Canada to pay for the unemployment relief works, to avoid taxation. Were this done, it would be an "easier money" policy. The dominion would not approach the figure of permissible currency outstanding in relation to its gold holdings in accordance with the accepted 25 per cent gold coverage requirements.

While grants-in-aid for direct relief will be continued for another year to the provinces, the $19,500,000 total last year in this respect will be considerably reduced.

Construction of national and tourist highways by the federal government as relief works would be in line with one recommendation of the Purvis National Employment commission in its final report.

Cost Of Producing Wheat

What is the cost of producing wheat in Western Canada?

This question has been the subject of discussion for many years, and particularly since the low prices which prevailed during the depression.

The Dominion Experimental Farm at Brandon, Manitoba, in 1937 kept careful tab of the costs on sixty-two fields well distributed through that province and found that, with yields of wheat averaging 20½ bushels to the acre, the cost was 64c a bushel.

Of course, individual cases show a great variation. For instance, in the Russell-Roblin-Gilbert Plains area, where the average yield is only 9 bushels per acre, the cost of production was $1.23 a bushel. In the Winnipeg area conditions were the reverse. At Dugald and Petersfield the average cost was 38c per bushel.

In Alberta last year the average yield of wheat per acre was 9.4 bushels compared with an average yield in Manitoba of 16.7.

D. A. Brown, of the Dominion Experimental Farm in Brandon, in dealing with the experiment in costing wheat production made last year, says that rainfall and certain other natural phenomena exert the greatest influence upon yield which in turn exerts the chief influence upon cost. For example, records kept over a long period of years show that it cost $2.00 a bushel to grow a 5 bushel crop of wheat, whereas the cost when the yield reaches 40 bushels was reduced to the [illegible]

How are costs calculated? It is first necessary to arrive at equitable charges for the use of land and machinery, man and horse labor, seed, twine, threshing and other items which vary according to the kind of crop which is grown.

Land rental is obtained by applying the prevailing rate of interest on money invested in land to the value per acre. To this is added taxes. Machinery charges are computed by applying the current rate of interest on first mortgages against the inventory value of the machinery, to which is added annual depreciation, repairs and the cost of storage sheds.

Man labor which is charged on the [illegible] arrived at by adding [illegible] the value of board given and dividing this sum by the average [illegible] hours worked per day. Similarly horse labor is based on the cost of maintaining horses per year divided by the number of hours worked in a season. Seed, twine, threshing and other such items are charged according to the average values and costs.

In Manitoba last year the oat crop grown on stubble plowed land averaged 34 bushels per acre and was produced at a cost of 22c per bushel. The barley yield was 28 bushels and cost 38c a bushel.

These facts from Manitoba add to the substantial volume of material gathered from time to time on this subject of the cost of wheat production in Western Canada. There are so many variable factors to be taken into account that it is extremely difficult to arrive at an average figure of cost which can be accepted as accurate and fair. The main factor, of course, as mentioned above, is the yield of wheat per acre. In Alberta it has been calculated that with an average yield of 20 bushels to the acre it costs 75c a bushel to produce wheat. That means that the farmer has to get 75c net at his local shipping point in order to break even. That would mean from 90c to 95c at Fort William.—Wheat Pool Budget.

Delivers Mail Despite Storm

HIGH RIVER, April 5— For the past 16 years, Oliver Jones has carried the mail to ranchers of the Pekisko district. During the recent blizzard the mail was delivered as usual.

Through drifts and blinding snow Mr. Jones plunged over 87 miles of detours and country roads. For eight hours he was stuck in a slough. Fighting his way through the blizzard to a farmhouse he obtained help. Then on through the swirling storm until the mail had been deposited in the last box on the route—not on time—but once again making good his slogan "The mail must go through."

Hey Presto

Miracles of manufacturing are nowhere more apparent than in the use of modern plastics. Machines are now in use in Canada which receive small colored granules at one end while they turn out at the other end finished combs in all shapes and sizes.

The story of injection moulding is told in an interesting article in the February issue of C-I-L Oval. Only in its infancy now, injection moulding holds possibly the key to the next era in manufacturing. Combs are by no means the only things that these machines can turn out. Canadian manufacturers are already using similar machines to make such articles as door knobs, dashboard fixtures for automobiles, bottle caps, etc. It is reported that a machine capable of gulping six pounds of plastic at a time and fashioning it to any desired shape will be introduced shortly. Look ahead a few years and it is not impossible that, in addition to combs, there may drop from similar but larger machines sections of automobile bodies, furniture, sections of houses and aeroplanes, to say nothing of countless smaller articles ranging from saw handles to thimbles.

Give Emergency Rides On Truck

One of the much debated questions in this province is the extent to which trucks should be allowed to carry passengers, if at all.

This subject was brought up in the legislature recently when a bill to amend the Public Service Vehicles act was considered.

While the bill as originally introduced included a section that banned trucks from carrying passengers, this was amended to permit such vehicles carrying passengers "in an emergency." An "emergency" it was suggested during the debate, would include transferring of a sick person to hospital or picking up a person on a route that was not served by a regular passenger bus.

In the province dangers of trucks carrying passengers has been emphasized at different times. Several accidents have occurred in recent years when persons picked up by trucks were killed or seriously injured.

Officials of the Alberta Motor Association, interested in safety on the highways, have made representations to the provincial authorities from time to time against the speed of trucks and careless driving. This agitation, it is believed, has had good results and trucking firms have been complimented upon the results obtained from orders to their drivers to show courtesy on the highway.

Austrian Scouts Face Disbandment

Compulsory disbandment, as in the case of the Boy Scouts of Germany, Italy and Russia, is now faced by the Boy Scouts of Austria, as a result of the absorption of that country by Hitler. Dictators have no use for youth organizations whose principles include international friendship. The world Scouts census of 1937 gave Austria 10,166 Scouts and leaders.

Flying Blind

In bad weather it is often necessary for aeroplanes to "fly blind" . . . to depend on instruments rather than vision and charted landmarks.

Almost uncanny in their accuracy, such instruments are nevertheless second choice in navigation of the air.

Shoppers who trot off down town to the stores without first consulting the advertisements of those same stores are likewise "Flying Blind". And needlessly so.

The advertisements in The Mercury are put here for your guidance, for your safe landing in the ports of value.

Study them in the comfort of your home . . . map your course before you go shopping. Compare the products offered, their prices, their general advantages.

Tiding Grain Over The Weaning Stage

"Grain sown in this field would sprout and come up as quickly as in any other field but, when nicely greened over, it would seem to stand for weeks without much change; then it would thin out and produce a light crop." Thus wrote a farmer when sending samples of his soil for analysis. Tested in the laboratory, the soil sample from the area described was found to be low in organic matter, very notably deficient in available phosphoric acid, as well as in potash. In other words, it was a poor soil, lacking the available plant food needed to start and produce a normal crop.

This farmer was observant, having noted the symptoms and made a request for a diagnosis. It is a case of general debility, but not an incurable one, says B. Leslie Emslie, well known soil expert. Many, too many, farmers have had a similar experience with their grain crops, [illegible] accepting the situation as a matter of course or regarding it as a natural phenomenon. Here is the interpretation, and it's no dream: the seed grain germinated and came up "as quickly as in any other field." Seed will germinate in any soil if provided the necessary moisture and proper temperature, for the young seedling derives its initial nourishment from the store in the seed itself. Then comes the weaning stage when the supply of baby food is used up, and the tender plants must begin to forage for themselves. Unless the soil can furnish readily available nutrients, nitrogen especially at this stage, the young plants become starved and stunted, turn yellowish and resume growth only when the soil temperature reaches the point where nitrification of organic matter commences and liberates nitrogen for assimilation by the crop.

Fall wheat and other grain crops, even in normally fertile soils, may be deprived of nitrogen in early spring, having to wait for supplies until the bacterial process of nitrification gets going, unless help comes from another source, the early spring application of nitrate of soda at the rate of 100 to 125 pounds per acre. As its name implies, this fertilizer contains its nitrogen as nitrate, the form in which the element is absorbed by plants, and there's no waiting. Many a field of fall wheat that has wintered poorly has been saved by this means. Other nitrogen fertilizers, somewhat slower in action, are sulphate of ammonia and cyanamid, and the latter may be made to serve a dual purpose where wild mustard and certain other rough-leafed weeds are to be suppressed. In England the spring application of a nitrogen fertilizer to winter wheat, as a supplement to the dressing with a phosphate-potash fertilizer at seeding time, is standard practice.

While nitrogen is of primary importance in early spring, plentiful supplies of available phosphate and potash are essential to the proper crop. If with the spring-sown grain a fairly liberal application of 2-12-6 or 2-16-6 be drilled in, no additional nitrogen is likely to be needed on soils as well supplied with organic matter.

As a supplement to the initial fertilizing, nitrate of soda applied to mangels and turnips at thinning time has been found to stimulate remarkably the re-establishment and vigorous growth of the disturbed and temporarily weakened plants.

A Unique Scout Rescue

The saving from drowning of a man, a lunatic, who was attempting to commit suicide in the Canal Basin at Chichester, was the unusual rescue feat of a 17 year old English Sea Scout, Patrol Leader Everitt of the Southbourne Sea Scout Group.

Government Assistance To The West

The dominion government is coming to the aid of the drouth sections in Saskatchewan and Alberta in order that farmers therein may be supplied with seed for their farms this spring.

It is calculated that there are 81,000 needing assistance in this respect in Saskatchewan and 15,000 in Alberta.

The dominion will guarantee Saskatchewan's credit up to $11,500,000 and Alberta's credit up to $1,900,000 in order that seed requirements may be met. Manitoba will be able to finance its own seed grain relief this spring.

Last year the federal government came to Alberta's assistance to the extent of $1,600,000 and to Saskatchewan's with $6,600,000.

The Canadian Wheat Board has available enough wheat to provide for the seed requirements of the two provinces aforementioned.

Under the plan the individual farmer obtains his seed requirements through the co-operation of the banks, the local municipalities, and, at the end of the string, in the position of guarantor, is the federal government. Loans are first made by the banks to the municipalities. The provincial governments guarantee the credit of the municipalities and the dominion that of the provinces.

This year the maximum acreage for which the government will supply seed is fixed at 300 acres.—Alberta Wheat Pool Budget.

Exchange Advertising Turned Tide 30 Years Ago

Thirty years ago the California Fruit Growers Exchange tried advertising to see if that would turn the then serious "depression" in the citrus industry—so serious that some growers were digging up their trees. The crop had grown far too large for local consumption and the limited market in the immediate territory, and something had to be done about it or the industry would go bankrupt. It was considered a risky experiment.

As W. B. Geissinger, advertising manager of the Exchange, puts it, "The records indicate that our members, back there in 1908, were of two schools of thought. The first group felt that conditions in the citrus business were so bad that advertising couldn't make them much worse, and the second hoped that this new mysterious force might work a miracle somehow. There wasn't any great amount of confidence in either camp, but it was generally agreed that no great harm could result from trying it."

It is interesting to note that this Exchange crop of citrus which glutted the market and threatened to fill the ditches and stream beds of California with dumped fruit, amounted to a total of 17,636 carloads. Today, California growers in a representative crop year produce and ship over 100,000 cars of citrus, and find consumers ready and willing to buy the entire crop.—The California Citrograph.

Press Freedom Said In Danger

ST. THOMAS, Ont., April 4. —Freedom of the press is challenged today as it never was before, and with it the ideals of liberty and democracy dear to the hearts of all Britishers, Arthur R. Ford, managing editor of the London Free Press, told a church class meeting here Sunday.

He said: "We are too prone to accept as a matter of course our uncontrolled press and its free and untrammelled news service and its right of comment, without realizing that these liberties along with those of free speech, assembly, the right to worship according to our own conscience and impartial justice were handed down to us as a result of hundreds of years of struggle by our forefathers."

Gen. Kai-Shek Is Elevated To Extreme Power

HANKOW, April 4 —General Chiang Kai-Shek was elected leader of the dominant Kuomintang, or Nationalist party, Saturday, a position of great power not filled since the death of 14 years ago of Sun Yat-Sen, founder of the party and of the Chinese republic.

This action was taken by the closing meeting of an emergency session of the party congress, summoned in this provisional capital to place the political organization of China on a wartime basis.

Already commander-in-chief of armies resisting the Japanese invasion, Chiang was invested formally with sweeping political authority. In effect his position as supreme leader of the nation was ratified, and the party's committee system which heretofore has prevented any individual from wielding dictatorial powers, was abandoned.

Time Now To Fight Clothes Moths

The larvae of clothes moths and carpet beetles may give trouble all the year around, but with the coming of spring their activities increase, and, if preventive measures are not promptly taken, they are likely to do considerable damage to furs, woolens, and other fabrics of animal origin. Officers of the Dominion Entomological Branch have given this subject considerable study, and advise the following measures.

Valuable furs should be placed in cold storage, or after beating and brushing in the sunlight should be hung in moth proof bags with a liberal quantity of napthalene flakes. Winter overcoats, other garments, blankets, etc., may be protected in a similar manner, or may be wrapped in paper with napthalene and stored in trunks or boxes. When housecleaning, cupboards, attics and basements should be examined and all materials removed in which the moths and beetle larvae may breed. Places that harbour dust and lint such as floor cracks, behind baseboards, furnace air shafts and similar situations need special attention as it is frequently in these places that the insects multiply and mystify the housewife when they appear on the wing.

A vacuum cleaner is very useful in eliminating this source of infestation. Damage to piano felting may be guarded against by placing about one pound of napthalene flakes or paradichlorobenzine in cheesecloth bags inside the piano, keeping it closed when not in use. The occasional use of a vacuum cleaner on the felting further reduces the risk of damage.

When the house is to be closed for a time, it is wise to scatter napthalene flakes liberally over rugs and carpets, afterwards rolling them tightly and tying them up in stout brown paper. Upholstered furniture may also be treated with napthalene, and well and tightly covered with paper or cotton sheets to lessen the risk of injury. Pyrethrum fly sprays are useful for destroying the insects but it should be borne in mind that these sprays kill only on contact with the pests, and have no subsequent moth-proofing value. For further information write to the Publicity and Extension Branch, Department of Agriculture, Ottawa.

Battle Of The Brakes

A battle unique in Canadian automotive history is being waged in Ontario at the present time—the battle of the two-wheel brake motor car.

Based on the death of a pedestrian under the wheels of an old style motor car in Toronto early in the New Year the controversy is becoming increasingly bitter, even to the extent that some authorities have actually advocated the abolition of two-wheel brake cars from the highways of Ontario.

Brake experts have been enlisted on both sides of the debate, to testify to the comparative efficiency of four-wheel and two-wheel brakes, and a survey has revealed that thousands of these old style cars are still operating on the rural areas and small towns of the province while a few are still to be seen in the cities. Changes in the Motor Vehicles Act Section dealing with brake tests are being freely predicted. This would consist of a rigid tightening up of the present brake test regulations, and in effect would outlaw any two-wheel brake motor car in which the brakes were not at the absolute peak of efficiency.

Violent opposition to the proposed changes has come from drivers in the less settled areas, who point out that the financial loss to the owners of cars more than twelve years old would be disastrous if their cars were ruled off the road unless some method of reimbursement by the Government was adopted.

History Hunters Leave For North

Party of United States archaeologists headed by Dr. W. L. Bliss, of the University of New Mexico left Edmonton on Monday's N.A.R. train en route to Conroy Landing in northern B.C., where it will embark on a canoe trip to Fairbanks, Alaska.

Burdened with 3,000 pounds of freight necessary to maintain the expedition during its lengthy trek, the archaeologists will search for evidences of a trail believed to have been followed by primitive man in his migrations from northern Asia to America.

Traveling with Dr. Bliss are Thomas Cain, University of Washington; Joseph Maloney, Leland-Stanford university; Richard Hayes, Hillsdale college, Michigan; Douglas Osborne and Alden Hayes, University of New Mexico.

Conroy Landing is 100 miles west of Fort St. John.

Greener Pastures Fairer Prospects

The return of the robin with his cheery song heralds the beginning of a new crop year. Warm April showers have aroused plant life from its long [illegible] and the farmer who is well wearied of winter chores, eagerly welcomes the sight of green grass growing in the pasture field. Cows [illegible] milk and most classes of [illegible] can be fed more cheaply [illegible] than on any other feed, in [illegible] says E. B. Snyder, [illegible] the key to profitable [illegible] and means of [illegible] early and continuous [illegible] a definite part of a [illegible] farm policy.

Farmers have long recognized the importance of seeding the most productive strains of wheat and other crops, but have generally overlooked the fact that there may be as much individuality in the various timothy, clover or bluegrass plants in a pasture or hay field as one finds in different strains of wheat. [illegible] experts recognized this fact some time ago and have made great progress in the development of improved leafy strains of pasture grasses through selection and cross-breeding. Pastures seeded with these may well provide food for more animals during a longer season.

[illegible] that old weedy pastures can best be improved by plowing up and reseeding with simple compatible mixtures, has rapidly gained recognition. Before reseeding, however, the fertility of the soil must be restored. The minerals, especially calcium and phosphorus, have been carried off in the bones, teeth, blood and milk of the animals and these must be replaced. There is also much to be said for good manuring and thorough cultivation to improve the [illegible] condition of the soil and destroy the weeds.

Professor R. G. Stapleton, Director of the famous plant-breeding station at Aberystwyth, Wales, states that he has been driven to the conclusion that there is immense value in the urine and dung of animals acting directly on the sod of a sward. Fertilizer is first applied to increase growth and palatability of the grass to entice the animals on the area, then when the sod is impregnated with urine, droppings and minerals are plowed under, beneficial biological activity is promoted and the producing power of the soil destroyed.

On many pastures the use of the plow is not possible, in which case every effort should be made to enrich the soil and improve the existing stand. Legumes, especially the wild white clover, will establish themselves naturally if the soil is built up in phosphorus, and this is important from both the point of improved quality of herbage and improved soil fertility.

While the mineral fertilizers are best applied in the fall, followed perhaps by a supplementary application of nitrogen in the spring, farmers who neglected the fall applications need not miss the benefits of improved pasture this year, but can obtain good results by applying a complete fertilizer such as 2-12-6, 2-16-6, or 4-12-6 in spring.

Experienced stockmen know that proper grazing management is an important factor. Close grazing with occasional rest periods, and the use of the mower if necessary, produce the best results. As the Scottish shepherds say, "Grass grown in May should be eaten in May."

Missouri Woman Writes $10,000 Prize First Novel

NEW YORK, April 5—While rearing four children and doing her own housework, including the washing, Elizabeth Seifert wrote a novel; and Monday she came to New York as winner of a $10,000 prize for the best first novel of the year, and said,

"I imagine you'll write somehow, if you have it in you."

Distractions of one kind or another, one's age and situation and the kind of desk one has are, she said, of little moment. If you're going to write you will.

Miss Seifert of Moberly, Mo.—in private life Mrs. John Gasparotti, who lives in a typical American house surrounded by a big yard, and finds time to bake cookies for a six-foot son, Jack 17, Richard, 16, Paul, 14 and Ann 12—was guest of honor at a big literary luncheon.

Sinclair Lewis was there, Pearl Buck, Hendrik Willem Van Loon and some would-be writers who came to New York from little towns thinking they couldn't write there and could here, but never did—and everyone talked about her book "Young Doctor Galahad."

Fresh-faced, gray-haired, and 40, Miss Seifert was simply dressed in sports clothes.

Left $150,000 At Age of 92

TILLSONBURG, Ont., April 4.—Inheriting a $150,000 fortune when one is 92 years of age is not as exciting as it seems, William McKim, farmer at Springport, near here, said [illegible] He [illegible] to be sole [illegible] of William T. Hird [illegible] Sask., lumber yard owner, who died before Christmas without leaving a will.

[illegible] Mr. McKim [illegible] It was all in my family [illegible]

Mr. Hird's mother was Mr. McKim's younger sister.

ALBERTA'S MINES

In Ontario we are extremely proud of the record of our mines. We realize that mineral resources play an important role in the wellbeing of the province. But we are not aware of the manner in which mineralized zones [illegible] whole northern [illegible] Canada.

The [illegible] of The [illegible] how the "last [illegible] North" once [illegible] the Barren Lands is being [illegible] $1,000,000 [illegible] of supplies is being sent north [illegible] Edmonton this spring for the prospectors and miners of that huge district. In the last four years the Town of Goldfields has grown from a [illegible] tar paper shack to a [illegible] population of [illegible]

[illegible] deposits are yielding radium for commercial quantities. Gold has been discovered and [illegible] is being extracted from the bitumen sands at Fort MacMurray.

Fortunately the Mackenzie River and a net work of smaller streams and lakes afford easy access into [illegible] and [illegible] the [illegible]

[illegible] extensively used for communication and an excellent network of stations is maintained by the Royal Canadian Signals.

The development of mining and [illegible] Alberta, and [illegible] will undoubtedly serve to strengthen the community of interests between that section and the older provinces. It will be a good thing when no section of Canada is exclusively dominated by one industry. The growth of the mining industry affords an [illegible] satisfactory market for [illegible] Alberta's eggs.

CARD OF THANKS

Mr. E. J. Anderson and family [illegible] friends for [illegible] Mrs. Anderson [illegible] for the many beautiful floral tributes.

Only— Firestone TIRES ARE GUM-DIPPED for EXTRA STRENGTH

58% Longer Flexing Life

GUM-DIPPING is a patented Firestone process not used in any other tire. With it every hundred pounds of cord fabric absorbs eight pounds of rubber and, as a result, every fibre, every cord and every ply in a Firestone tire is coated and insulated with pure rubber to counteract internal heat and friction—the greatest enemy of tire life.

Due to this extra process, Firestone Gum-Dipped Cords have 58% longer flexing life. Yet you do not pay one cent more for this extra value! See the nearest Firestone Dealer today!

Firestone TIRES

Last Call For Good Seed

Seeding time is almost here. Still time, however, for any farmer to make plans to increase his income by using good seed.

See the nearest Searle or Home Agent for your copy of a money-making pamphlet, entitled, "A Seed Field on the Farm," written in English, French, German or Ukrainian.

SEARLE GRAIN COMPANY, LIMITED

House Fly Gets Sporting Chance

CHICAGO, April 6.—The lowly house fly, clubbed down by swatters these long years, finally has won a sporting chance for life.

A fly popgun, invented by J. E. Kahler of Kankakee, Ill., and displayed at the National Inventors' congress Tuesday gives Mr. Fly an extra margin of safety and sportsmen the thrills of a hunt without leaving the parlor.

The weapon holds a plunger with a rubber tip the size of a quarter. Mr. Fly lights on the wall, the hunter creeps upon him, aims and fires. Mr. Fly is all through making four-point landings on papa's bald spot, maybe.

And what's more, the tip of the plunger is so designed it won't flatten the fly and add his corpse to the wallpaper design.

Signs Numbered To Aid Waiters

LONDON, April 6— London has simplified the meeting problem. Piccadilly Circus has for years been the meeting place for millions. But that has been the trouble. Friends have got lost in the crowds. Now the authorities have erected three brightly-lighted standards bearing the numbers one, two and three and "waiters" queue up at the appointed number.

Here's Big News For Coal Stokers

PITTSBURGH, April 4 — The head of the house, weary after a season of coal stoking can look forward to another winter when he won't have to fire the furnace more than once a fortnight, the Mellon institute reported Wednesday.

Dr. E. R. Weidlein, director, told trustees of the development of anthracite heating equipment that operates "for weeks at a time" without attention.

Family of Ten Marooned, Are Saved By Plane

SIOUX LOOKOUT, Ont., April — An airplane today rescued a family of 10 from their muskeg-mired motor car where for four days they were stranded without food. They were taken to Pickle Lake, about 50 miles east of here.

Four days ago Joseph Chenier, his wife and their family left here for Pickle Lake. They were 25 miles from their destination when the car stuck in the soft muskeg road. The family huddled in the car. The had no food and after the car's gasoline supply was used, no warmth.

Word of their plight reached Pickle Lake yesterday by radio from Osnaburgh and Pilot Ken Smith of Starratt Airways made the rescue.

TRADE SUFFERING TERRIFIC BLOW IN JAPAN WAR

SHANGHAI, April 6— Business reports emphasized today the cumulative repercussions of the war upon Chinese trade as Japanese continued their push in Shantung province toward the Lunghai railway. Foreign firms' trade has slumped sharply. Japanese business in occupied areas is reported to be less than normal.

Retired Rural Boys Warship: Disillusioned

LOS ANGELES, April 4 — "I just bought this boat," a retired mid-west farmer told an officer aboard the United States battleship New Mexico.

"How's that?" queried the officer.

The farmer explained a stranger in uniform had told him the ship was for sale—for $800. The officer soon disillusioned him.

Steers Found Alive Though Beneath Snow

TABER, Alta., April 4— John Bell Taber rancher, lost three steers during the blizzard last week. In search for them, the rancher found three holes putting through a giant snow drift. After considerable digging he found the steers, still alive. The heat from their breaths had melted the snow and prevented them from smothering.

Greased Tracks To Steal Coal

TORONTO, April 5—Arthur Fawcett convicted of "greasing railroad tracks" and theft of coal, was sentenced Monday to 30 days in jail. Fawcett said he put grease on the rails to slow down the train so it would be easier to jump on and steal the coal. "You might have derailed that train and killed people," said Magistrate William Keith.

Meeting of The Municipal Disirict Of Cornhill No. 487

The second regular meeting of Municipal District of Cornhill, No. 487 was held at the Municipal Office on Monday, March 14, the reeve in the chair. All councillors were present, namely, Div. 1, J. A. Anderson; Div. 2 Chas. Helmberg; Div. 3 Gilbert McPherran; Div. 4 Wellington Glenn (reeve); Div. 5 W. C. Morden; Div. 6 Guy Walker.

The meeting was called to order by secretary at 10:00 a.m.

Report of returning officer, Mr. A. C. Dodds, was read by the secretary as follows. Result of nomination February 19, 1938, Div. 1 John Albin Anderson and Jacob Reness, Div. 6 Guy O. Walker. Result of election February 26, John Albin Anderson 83, Jacob Reness 19. John Albin Anderson elected. Guy O. Walker elected by acclamation. Secretary obtained declaration of office from Messrs. Anderson and Walker.

Councillor Glenn was elected reeve for the ensuing year and took charge of the meeting from this stage.

Councillor Walker was elected deputy reeve for the ensuing six months.

The minutes of the last regular meeting, together with accounts payable for last regular meeting were read and formally adopted.

The 1937 financial statement was presented and formally adopted.

The assistant secretary was voted the sum of $200 for services already rendered.

The secretary was re-engaged for 1938 the remuneration being set at $2000 per annum.

Messrs. McCannel Bros., chartered accountants of Edmonton were re-appointed auditors for 1938.

The secretary was appointed office assessor for 1938.

Mr. J. E. Stinson was appointed relief inspector for 1938, to act as if and when instructed so to do. Remuneration $3.00 per day and 10c per mile for use of his car.

Correspondence appearing on Agenda was read. The usual monthly statement was also placed before council. The council adjourned for lunch.

Upon re-convening Mr. Stinson presented application for various forms of relief on behalf of different people.

Mr. Bruce interviewed council re renting the N.E. 30-50-20 W4m for 1938. It was agreed to rent Mr. Bruce this property for upon payment of 1938 taxes which was made.

A delegation consisting of Messrs. Henry McGinitie, A. F. Schultz, A. J. Harrison, Chester Coombes, Ivan Mitchell, G. M. Thompson, Jim Ingram, J. C. Sutton and Samuel Stirret, presented petition to Council re their desire for certain road building commencing from the N.E. corner of section 33-50-19-W4m, south ten miles. The delegation was advised that request would be carefully considered and decision made after budget has been passed.

Mr. David Ham interviewed council re purchase of N.W. 10-50-20-W4m on rental basis. The council agreed to enter into an agreement

LOCAL & PERSONAL

Mr. Jack Smith from Edmonton spent the week end in Tofield.

Mr. and Mrs. Hesler returned from Rimbey where they have been visiting Mr. and Mr. A. Lewis for the past few weeks. Mr. and Mrs. Lewis motored over with them on Sunday last.

Miss Loret Ross left on Wednesday morning for a few week's holiday at the coast.

Miss Lois Thompson spent the week end visiting with her parents at Leduc.

Mr. and Mrs. Harmon Lewis spent the week end in Tofield.

Mr. A. Calvert from Edgerton is a new member of the local creamery staff.

Blake Clutterham and Miss Charlebous from Edmonton were guests at the Clutterham home on Sunday.

Mrs. Malcolm and Muriel, Maudie Redig, Wes Taylor, D. Sheets and Mr. Van Dyke motored to Edmonton on Sunday.

Mr. Geo. McFadzean was a Tofield visitor on Tuesday.

Miss Muriel Malcolm visited the city on Wednesday.

On Thursday evening last a Moving Talking Picture was brought to Tofield "Thunder Over the Orient." The theatre was packed twice, one show at 8 p.m. and another showing at 10 p.m. for those who were unable to get in for the first show. A silver collection was taken and the money will be used to aid the Chinese.

THE WOODLAND DAIRY will begin buying eggs on Saturday, Mar. 26th. New agent, D. N. Sheets. Located one door west of Bellamy's Butcher Shop.

United Church News

The Easter Services in the United Church will be bright with Easter music. The Sunday School is holding an open session to which the parents are cordially invited. The Junior Choir will give special anthems for the occasion. The Senior Choir will render Easter anthems and Misses Faye and Lola Wilson will sing a duet.

Services will be resumed at:
Lakeshore — — — — — 11:00 a.m.
Ketchamoot — — — — — 3:00 p.m.
Tofield — — — — — — 7:30 p.m.

AMISK CREEK

The Ladies' Aid met at Mr. and Mrs. Johnsrud's home on Thursday of last week. Nine members and many visitors were present. Quite a lot of business was attended to. A delicious lunch was served. The next meeting will be held at Mrs. C. Ward's home at Shonts.

Many of the young people from here motored to Edmonton last Sunday, where they took part in a program broadcasted from C.F.R.N. Those taking part in the broadcast were Misses Lilly and Clara Haugen and Miss Evelyn Hillerud with Mrs. I. C. Olson at the piano. Rev. Lystig conducted the program. The young people were entertained to supper at Ellen Nils Sand's home. In the evening they rendered another program in the Norwegian Lutheran Church, where many more took part. Before they started for home they all had a nice visit with Lilly and Ruby Berg. Mrs. I. C. Olson and Glen remained in Edmonton until the following day.

Mrs. L. Watt spent last week in the city and attended the nurses graduation at the Royal Alexandra hospital, at which her daughter, Doris is a graduate this year. Mrs. J. Blackburn from Lavoy cared for their mother while Mrs. Watt was away.

Mrs. Garthe from Viking has been a visitor with her sister, Mrs. R. O. Berg and Mrs. P. O. Flaaten for the past three weeks.

Mr. and Mrs. H. Sorenson and Alfred from Poe, and Mr. J. Anneho and family were dinner guests at the C. Erickson home last Sunday.

Mrs. J. Berild assisted at the P. O. Flaaten home before their Auction Sale.

Edna Moen has been ill with the mumps but we are glad to report she is now better and out of quarantine.

Arthur Haugen who has been staying with his sister up in the Peace River country since Christmas, returned home recently.

Lloyd Berg is now working at the E. A. Moen home until after the Spring work is over.

Mrs. P. Moen, Mrs. A. Patterson, Mrs. Garthe and Mrs. P. O. Flaaten were visitors at the E. A. Moen home last Sunday.

Mrs. P. O. Flaaten was a caller at the Derdach's home last Monday.

Albin Pearson from Beatly brought a truck load of grain out to Pearson's farm last week.

Mr. J. Anneho attended the funeral and was a pallbearer of the late John Olson of Bardo.

Mrs. C. Kjeling from Ryley has been a visitor at the Erickson home and other friends for the past few days.

KETCHAMOOT

Rev. Allen will hold Easter services at the school house next Sunday at 2 p.m. All are cordially invited to attend.

Mr. Jimmie Ingram returned home Sunday evening after a month's holiday visiting relatives at Victoria, B.C.

Friends of Mr. Frank Hall sr. are sorry to hear he is having quite a serious time with gangrene in his foot.

A truck load of lumber from Drayton Valley was delivered to Albert Sears on Monday. This was quite an undertaking considering the roads. A tractor had to be used several times on this end of their trip.

Mr. C. A. Ingram has had the good luck to have two sets of twin calves this spring.

The Regehr family have been moving this past week to their new home, they having purchased the Jack [illegible] farm. The Nemeland family, former residents, have moved to their own farm, better known as the Clinton Hall farm.

Mr. and Mrs. J. H. Ingram made the acquaintance of their new grandson, James Stewart, at the T. D. Ferguson home on Sunday.

Mrs. J. Appleby entertained the Ladies' Aid at her home Wednesday afternoon of last week. Visitors present were: Rev. and Mrs. Allan, Mrs. Foreman and her daughter Mrs. Chevraux, Mrs. Gill, Mrs. Smith, Mrs. Stine, Mrs. McConnell, Mrs. Davison, Mrs. Nickerson, Mrs. White. At the social hour, Mrs. Chevraux kindly sang two vocal solos, accompanied at the piano by Miss Hazel Sears. Master Keith Appleby also entertained with several violin selections. The May meeting will be held at the home of Mrs. D. K. Allen at the parsonage in town.

Mrs. Austin McBeth returned to her home in Calgary after a few weeks visit with her father, Mr. Hull, and sister, Mrs. Berner.

Messrs. William Davison and Clifford Appleby returned to their homes one day last week, after finishing their course at the agricultural college in Vermilion.

Fire Near Railroad Track

Late Thursday afternoon, while burning grass near the old elevator location, east of town, a large number of Railroad ties caught fire. The heat from the ties ignited a box car nearby which also was burnt. Fire alarm was sounded and fire engine was soon on the scene but nothing could be done.

ROSS CREEK

Mr. E. M. Sagmoen spent last week in Edmonton assisting Mr. A. J. Lappenbush with his stock at the Spring show.

Mrs. Robert Milne is visiting friends in Lamont for a few days.

Mr. and Mrs. A. Snuler and Graham and Mrs. Elmer Sagmoen were visitors to the city on Tuesday of last week.

Born: To Mr. and Mrs. A. Ford, on April 9th, a daughter.

Mrs. Ralph McColman visited Mrs. C. Sampson Wednesday afternoon.

Mrs. Elmer Sagmoen spent last week at the home of her parents, Mr. and Mrs. C. Sampson.

Mrs. Elinski and Josie have returned home after spending some time visiting relatives in the city. Mrs. Elenski has also been under the doctor's care.

Miss Evelyn Cowan is leaving for her home shortly after spending the winter at the home of Mrs. Floyd McLachan.

The Mercury Visits The British Columbia Coast

To prairie dwellers, visiting the British Columbia Coast, is something like catching the measles, or having an operation, most everybody, at some time or another, has the experience. Consequently any recitation of experiences is apt to be devoid of interest, perhaps tiresome. But we wonder—there was the Welshman who had married a Norwegian lady and was quite happy about it, having a boy, "fair and a real Norwegian," and a girl, "dark just like me, a good kid, you know, but full of life." Then there was the tug-boat captain who had worked in B.C. waters for forty years, and on shore at least, never wore an overcoat. Then there was the Drumheller miner who believed financial remuneration followed the planting of plum trees. Then there was the young ships mate who had never been scared of rough water except once when he was in a China typhoon. Then there was the gentleman who asked if Bob Logan was still alive. Then there was John, the perfect secretary, who had the right answer every time. Then, but why go on. PERHAPS we might make a story before we are through.

We hardly expected to be confronted with a surprise immediately upon boarding the local train at Tofield on Tuesday evening. Turning into the day coach we expected to find the usual mahogany walls and green plush seats of the first class day coach but instead found ourselves in a car in which brightness combined with real comfort were the predominating features. The decorative scheme immediately reminded us of the modern kitchen as illustrated in the color pages of magazines. Everything bright and clean. The walls are painted with light colors with which the mauve color of the upholstered seats blend beautifully. About those seats. Most people for years have accepted the green mohair (they really are not plush) seats as the last word in comfort. This belief is rudely shattered when one sees and rides in the new coaches. The upholstery is much finer than formerly, and they are literally form fitting. The seats and back is slightly concave and the backs can easily be adjusted to any angle. There are two separate seats instead of the usual one long one. It was the first time we had seen them and they appealed to us as a distinct improvement over the former [illegible] green plush [illegible]

We boarded the trans-continental train at Edmonton the following morning. A slight drizzle of rain and sleet had fallen during the night and a cloudy sky delayed daylight to some extent. Consequently it was in semi-darkness we boarded the train. Locating the proper car and berth, we found ourselves opposite a middle aged couple from Edmonton who were on their way to California for a holiday. They thought they could have lasted out alright in the day coach for one night, but as the lady said, they had not had a holiday for ten years and her husband was [illegible] [illegible] quite natural, in fact [illegible] the [illegible] holidays [illegible] was much longer just about explained our presence there. The morning was uneventful except perhaps for the few moments it took for the train to pass Stony Plain just west of Edmonton. At this place in the early spring, twenty eight years ago, a young couple, married in England a few short weeks previously, undertook to manage a weekly newspaper there—and as the train steamed past the town the thought came, now what have you been doing with your opportunities during the past twenty-eight years? For those fellows who eat no breakfast, dinner has a special appeal, and at noon into the dining car we went to partake of some of the Canadian National chefs' crea-

(Continued on back page)

PUBLIC NOTICE

THE MUNICIPAL DISTRICT OF CORNHILL No. 487, Tofield, Alta., under authority of the Provincial Department of Public Works, intend to place a ban on all heavy road traffic over municipal roads as occasion demands. As far as possible, notice will be given at times when it is found necessary to take such action.

J. O. A. LETOURNEAU,
Secretary-Treasurer.

Bellamy's Broadcast No. 17

Did You Hear?
That I wish one and All
A VERY HAPPY EASTER HOLIDAY
Yours truly,
Walter Bellamy - Tofield

Canada 1938

A new voice has been heard on the "Canada 1938" programme during the last three weeks. It is that of Richard Manning who has now been made a permanent member of the cast which brings to its large audience across Canada a half hour of [illegible] pictures of Canadian life and [illegible] "Canada on Broadway." [illegible] Mr Manning [illegible] considerable fame as a soprano soloist. He was a member of the choir of Christ Church, Oxford, which is one of the most famous religious institutions in England. As such he had the honour of singing before the late King George V, clad in the traditional [illegible] cassock and white ruffs. As a souvenir of this moment [illegible] Mr. Manning is the proud possessor of a written appreciation from the monarch himself.

Walter Bowles, Roving Radio Reporter, and one of the unique features [illegible] cal world.

J. B. Shapiro will again bring to his listeners the latest gossip and news from Broadway. Russ Titus, the choir and the orchestra will complete the programme with currently popular music including at least one original Canadian composition.

Two-Headed Calf At Barrhead Farm

One of J. Wright's cows on his farm near Barrhead gave birth to a double headed calf, the northern papers report.

The calf is normal in every other respect. It blinks four eyes and wiggles four ears in unison and eats with either mouth, alternately or at the same time.

BORROWING AT THE BANK
to operate more profitably

FARMING, DAIRYING, STOCK RAISING—and other lines of agricultural business often need improvements or new equipment, to stop waste and make better profits. Good managers in every line of business know where small expenditures would increase efficiency and *profits*. If they can spare the money from their working capital, they will spend it promptly for such purposes. If they have good security, but not the ready cash, they will wisely *borrow*.

Wherever, in Canada, agricultural business is carried on, there is a branch of the Bank of Montreal, acquainted with local needs and conditions, ready to consider applications for *loans* for such *constructive* purposes.

BANK OF MONTREAL
ESTABLISHED 1817
"a bank where small accounts are welcome"

Tofield Branch: A. E. ALLAN, Manager

MODERN, EXPERIENCED BANKING SERVICE . . . *the Outcome of 120 Years' Successful Operation*

Flying Blind

In bad weather it is often necessary for aeroplanes to "fly blind" . . . to depend on instruments rather than vision and charted landmarks.

Almost uncanny in their accuracy, such instruments are nevertheless second choice in navigation of the air.

Shoppers who trot off down town to the stores without first consulting the advertisements of those same stores are likewise "Flying Blind". And needlessly so.

The advertisements in The Mercury are put here for your guidance, for your safe landing in the ports of value.

Study them in the comfort of your home . . . map your course before you go shopping. Compare the products offered, their prices, their general advantages.

THE MERCURY

THE WORLD OF WHEAT

By H. G. L. Strange, Director Research Department, Searle Grain Co.

"Our fathers used to say that the Master's Eye was the best fertilizer."

Pliny the elder, that great Roman Naturalist, recorded this maxim in his classic work "Historia Naturalis" written about the year 60 A.D.; modern farmers, too, know that even today something suffers when the Master's Eye for long is absent.

While our knowledge of such primary agricultural principles has not greatly increased in 2000 years, yet modern science has discovered many [illegible] which are useful to farmers. One of these is that besides the "Master's Eye" a little artificial fertilizer can be used to good advantage on our Canadian Prairies.

"What kind, and how much shall I use? What will it cost and how will it benefit me?" are the usual pertinent and intelligent questions farmers ask.

The records of countless experiments reveal that either Ammonium Phosphate or Triple Superphosphate can be used to advantage in amounts of 20 to 60 pounds to the acre, and [illegible] upon the district and the [illegible] available, that the cost will [illegible] 50 cents to $1.10 an acre. [illegible] the benefits undeniably, in [illegible] will be about 15 per cent [illegible] yield, some six days earlier [illegible] and often one grade, even sometimes two grades, better at the elevator. A fine return, it would seem for the relatively small expenditure required.

Following factors have tended to raise prices: Drought still prevails in Italy and France— Wheat importations by Italy likely owing to crop deterioration—Rain needed in Greece—Severe drought in North Africa—Australian farmers holding back wheat account drought, and now feeding wheat to livestock—Parts of Danube Basin and Hungary complaining of drought.

Following factors have tended to lower prices: Harvesting progresses in India—Unfavourable financial markets in the U.S.A.—German rye supplies in excess of demand—Poland removes grain export restrictions—Field work progresses actively in Argentina—Holland increases importing duty on wheat, rye, oats, corn and barley—Good reserves of old wheat in Roumania—Large filbert production in Mediterranean Basin.

General Crop Review

Prospects for the 1938 grain crop in the United States and Canada are very promising—at the present time. The usual spring optimism is much greater than it has been the past few years and farmers are looking hopefully toward the coming season. A mild winter and an unusually early spring in practically every section has forced development of fall sown grain one to three weeks earlier than usual. Warm, dry weather coming after a period of snow and rain placed the soil in ideal condition for field work and early seeding. March winds are drying the surface soil and causing dust storms in several localities. Frost and cold weather may harm some of the more tender plants and could cause heavy damage to fruit trees but would also kill large numbers of insects which are now emerging from the soil. Good seed is plentiful and with the aid of government loans, the intended acreage will no doubt be sown. Some of the many abandoned farms will be reclaimed this season due to present prospects. No one knows what the future has in store for this year's crops, but at the present time prospects are favorable, not only in the United States and Canada but in most European countries.

Surface moisture is satisfactory in practically all sections of the United States and Canada. Due to the mild winter snow melted slowly with little runoff and penetrated the soil, recent rains improved the situation, putting the soil in good condition for seeding. Generous rains after seeding will be necessary to germinate the seed and protect the soil from blowing. In some Eastern States the fields are too wet for farm work, causing some delay in seeding oats and early grains. Warm days and strong winds caused some dust storms in the drouth area of the southwest and in parts of the northwest. Subsoil moisture is much better this year than for some time. The rains last summer and fall penetrated the dry subsoil and created a reserve supply over much of the grain raising areas. In the sections where subsoil is unusually dry comparatively little grain is raised, being largely located in Western Dakotas and Wyoming, with some spots in Colorado. Eastern North Dakota and Western Minnesota, comprising the Red River Valley, has several dry areas. Western Kansas has some surface moisture, but subsoil is deficient; the whole state needs more moisture soon. Taking the country as a whole, the moisture situation is the most promising we have had for several years.—Cargill Crop Bulletin, March 25.

Early Crops Are Safest

Twenty-eight years cropping experience on a considerable scale has demonstrated that in the Peace River country, early crops and early varieties are safest. While later seedings frequently make stronger plant growth than the very early ones and may produce larger yields if they have time to finish, it very often happens that fall frosts forestall maturity, sometimes curtailing yields and more often lowering grades.

Ten years systematic tests at the Dominion Experimental Sub-station, Beaverlodge, Alberta, following some casual trials of earlier years, point to the wisdom of seeding spring grain just as soon as the land is fit for work, unless in abnormally early seasons. "Wheat and peas should be put in first," says the Sub-station report, "but no hesitation need be felt about following right up with oats and barley, particularly on the acreage of those intended for seed production. Too early sowings of flax may occasionally succumb to spring frosts or to cutworms. Mid-May is quite early enough for flax— sometimes too early."

Wheat, oats and peas all gave their heavies average yields from the first of four weekly sowings.

Besides the slightly higher average yield and the appreciably better grade resulting from timely seeding, there is a decided advantage in getting the harvest off early, the threshing done and the fall cultivation accomplished, to the advantage of the next crop and the disadvantage of the weeds.

The early farmer is usually the one with his work well in hand. What he may occasionally lose in yield through seeding too soon he stands to make up in any one of several ways in the long run.—W. D. Albright Supt. Expt. Sub-Station, Beaverlodge, Alberta.

Greater Safety Alberta Roads

Greater safety on the highways is the objective of legislation passed at the session of the Alberta legislature which was prorogued last week.

New provisions contained in amendments to the Vehicles and Highway Traffic Act are of special interest to the motoring public.

One important new provision requires vehicles to come to a stop at a point not less than 10 feet from a main highway, when about to enter upon such highway. This, it is believed, will have the effect of checking the number of accidents from this cause which have occurred in this province in recent years, when the traffic volume on main highways has been on the increase.

Special attention is being drawn to another requirement, which is that when a school van has stopped to take on or discharge passengers, no motor vehicle shall pass until all van passengers are clear of the path of the vehicle.

Thus, legislation places requirements on motorists to observe safety measures.

"With the co-operation of the driving public these new regulations in the interests of safe driving should have good results," says an official of the Alberta Motor Association. "The A.M.A. is giving its active support to any move that will remove traffic hazards and contribute to driving safety."

Are Life Insurance Funds Invested in Alberta?

Answer.—Yes, to the extent of over Ninety Million Dollars.

Question.—Where are these millions invested?

Answer. —In the cities and towns, villages and country districts of the Province.

Q.—How are these millions invested?

A. — In many worth-while enterprises for the benefit of all the people of Alberta — homes — farms — schools — good roads — local improvements—industries—and transportation systems.

Q. — Then Life Insurance dollars really do "double duty"?

A.—Yes, these dollars not only give financial protection to the women, children and the aged — but they also benefit the general public through the promotion of worthy undertakings.

Q.—Why is it necessary for insurance funds to earn interest?

A. — To secure the reasonable interest return necessary under policy guarantees to meet all obligations at maturity.

Q. — What is the record of Life Insurance in Canada?

A.—Through depressions, epidemics, and wars, Life Insurance has continued to fill every guarantee to policyholders, 100 cents on the dollar.

This is the fifth of a series of messages sponsored by Life Insurance Companies operating in Canada. The sixth, to appear in two weeks' time, will discuss how women and children benefit from Life Insurance.

THE TOFIELD MERCURY
A Weekly Newspaper Published At
Tofield, Alberta
W. Worton, Publisher

TOFIELD AND DISTRICT—

IT HAS BEEN the editor's privilege during the past five weeks to visit a few different points on the British Columbia coast line. Strangely enough while we were several hundred miles from home we were rarely disassociated with Tofield and district in some form or other. Apart from premeditated calls on friends and acquaintances who had formerly lived here, quite unexpectedly we were often thrown in contact with people who had more than a mere geographical knowledge of this district. But what appealed to us most was the attitude of former residents to their former home. We do not mean to infer that those people we met had a consuming desire to return here, the vicissitudes of everyday life prevent that. But we do know by what they said and how they said it, by intonation and facial expression, that within their hearts they are carrying a love for their old home. Perhaps the same people when they were here, for various reasons, complained and grumbled—even as you and I sometimes complain and grumble. But if when here the shadows were stronger then the sun, now looking back, the sun is stronger than the shadows. People living here now can feel grateful in the thought that they are living in a district that tends to create lasting and pleasant memories.

THE NEW TAX SCHEME—

SUDDEN ACQUAINTANCE with the new suggested tax scheme of the Alberta government is apt to cause surprise. Further acquaintance with the scheme will show definite advantages over the present system of land taxation, providing the advantages are as specific as the disadvantages. Most men realize that to live in a developed community, taxes in some form or other must be paid. At the present time taxes are levied against land by municipal authorities according to assessed valuation. The amount of course, varies greatly, the intention of those responsible for the assessment being that poor land incapable of good returns should be charged less than fertile land capable of much better returns. But it sometimes happens, due to weather conditions, that good land yields actually less than poor land in actual cash returns. Hail, frost, drought, are ever present risks during the growing season. Under the present system of land taxation there is no allowance made for reverses of this kind. The phrase "as sure as death and taxes" has real meaning. Therefore it is quite possible, in fact it has happened where men due to inability to pay high taxes on good land have been forced from their farms, while others due to lower taxation on poorer land have been able to stay on theirs. Under the proposed seven per cent levy system, if we understand it right, other forms of taxation will be abolished. This is something that should be made very clear, because farmers certainly could not afford to pay both. Moreover a combination of the two would be a nuisance. The new proposed system allows for no arrears. If a farmer has produce to sell he pays his taxes as he sells it. If for any reason he has no produce to sell there are no taxes to pay. The principle has merit even though there may be some details to be made clear. Fortunately there is plenty of time for agricultural producers to thoroughly study the proposal and work out to their own satisfaction how it personally affects them.

Even if one accepts the principle of paying taxes on a percentage of production basis, there is always the rate to ponder over. Up to the present there has been no precedent as a guide, but it is only fair and reasonable to assume that the government have relative figures as to the value of farm produce produced in Alberta over a period of years. It is also only fair and reasonable to assume that the government has set the rate high enough to take care of all contingencies. The average taxes on a good quarter section in this district would run between $40 and $50. Assuming that just such a quarter section would produce $1000.00 worth of products to be sold, the return to the government would be $70.00. However, there is little to fear here because the money collected is to be placed in a special trust fund. Should this fund accumulate a surplus, this should have the effect of reducing the percentage required to be paid in future years. The whole scheme as applied to modern government at least is very new and deserves a great deal of consideration.

In principle the proposed plan is simply compulsory cooperation. Contrary to a popular quotation, it means from those who have, much will be taken, from those who have not, little is expected. We imagine a great many farmers will be up in arms against it. Seven per cent when added to all other necessary expenditures connected with production means much and the advantages of a change of system will have to be shown to be clear cut and decisive.

Annual Report, Canadian National Railways

Ottawa, Ont., March 29—Notwithstanding increases in wage rates and prices of materials, the Canadian National in 1937 handled its traffic at a lower operating ratio than in 1936, said S. J. Hungerford, Chairman and President, in the annual report of the railway system tabled in the House of Commons today by the Minister of Transport. Operating revenues were $190,256,000; operating expenses were $169,750,850.

"After payment of all operating expenses," says the report, "the net operating revenue of the railway for the year 1937 was $17,507,750 an increase of $2,471,251 over the previous year. After payment of taxes, rentals, discount and all other charges of every description, excepting only capital losses from line abandonments charged to Proprietor's Equity, the net income available for interest was $9,201,229, an increase of $1,678,317 over the previous year. After applying such net income against the interest on funded debt due to the public, and interest on Government loans, there was a deficiency of $42,345,067 as compared with $43,302,293 in 1936."

In 1937 the Government adopted the policy of collecting from the railway in cash interest on loans for capital purposes and the report states that had that change in policy not taken place the deficiency for 1937 would have been $10,661,111 instead of $42,345,067. This change was made following the passage of the Capital Revision Act 1937, and after explaining the provisions of that Act the report continues "The adjustments authorized by the Act were entirely confined to the relationship between the Government and the railway and did not deal in any way with the large funded debt of the system in the hands of the public."

Taxes paid by the railway in 1937 amounted to $6,097,212 exclusive of sales tax of approximately $4,200,000 added to the cost of materials.

"The increase of all operating expenses over those of the preceding year was $9,311,168" says the report. "Increased rates of pay accounted for $2,000,000, and increases in prices of materials accounted for $1,500,000. The programme of maintaining and of modernizing rolling stock was augmented during the year, resulting in additional charges to Maintenance of Equipment expenses of $2,500,000, the benefit of which will be reflected in subsequent years. Equipment retirement charges to operating expenses increased over the preceding year by $730,000. There was a reduction in expenses due to the elimination of the Unemployment Relief Maintenance of Way programme of $1,015,000 and flood damage and snow removal costs were $528,000 less than in 1936. The property has been efficiently maintained having regard to traffic requirements. The moderate increase in expense which resulted from the increase in traffic, apart from changes in wage rates and prices of materials, can be considered as satisfactory. It may be noted that Class 1 Roads of the United States with an increase in traffic of 2.8 per cent had an increase in expense of 6.1 per cent. The Canadian National had an increase in traffic of 4.2 per cent with an increase in expense of 5.4 per cent."

The increase in the gross operating revenues of the Canadian National amounted to $11,706,119 over the preceding year. Freight revenues increased by $8,300,897 or 5.7 per cent; passenger revenues increased $1,923,021 or 11.3 per cent; commercial telegraph revenue increased $175,082, or 10.8 per cent; express revenue increased $178,181, or 4.9 per cent; [illegible] revenue increased $[illegible] or 4.4 per cent; the operating income from hotels increased $40,970. The report states that the growth of the system's gross revenues from the [illegible] reached in 1937 [illegible].

In 1937 the report continues, as the expected improvement in revenue did not materialize, due largely to western crop conditions and also to the sharp business recession in United States territory in the latter part of the year, but the increase of 6.32 per cent compares favourably with the showing of United States Class I Railroads.

Commenting on behalf of the Board of Directors of the National System on transportation prospects in general Chairman Hungerford continues "The immediate outlook for railway revenues is obscured by several factors, principally the marked recession in business in the United States, the disturbed international situation and the cumulative effect of a series of adverse crop conditions in portions of Western Canada. None of these factors is within the control of railway management, and so long as they continue to be adverse, railway revenues must be expected to remain at relatively low levels. Fundamentally, the National System is well equipped to take immediate advantage of any improvement in world conditions which will tend to stimulate the trade upon which the prosperity of the railway depends. Pending such developments the railway is continuing to render the transportation service which is necessary for the country in the most economical manner.

"The effect of increased productivity in Canada upon the future revenues of the National System does not require to be stressed. An increase in productivity in any form of industry, including agriculture, at once reflects itself in the earnings of the system; and decreases in the volume of production affect seriously the gross revenues of the railway. The gross revenues of the Canadian National from the transportation of grain grown in Western Canada in the years 1925-1934 inclusive averaged $22,000,000 per annum, the tons of grain carried averaging 5,000,000 during that ten-year period. The comparable figures for the past three years have been as follows:

Year	Tons Carried	Revenue
1935	3,720,944	$15,609,816
1936	3,915,606	15,777,702
1937	2,234,634	9,643,572

"It will be noted that the gross revenues of the railway from the movement of Western Canada grain in 1937 were only 44 per cent of those obtained on the average during the ten-year period ending in 1934. The general prosperity of the country resulting from good crops contributes even more substantially to the earnings of the railway."

"One of the pressing problems in the transportation field is the placing of highway and inland water competition on a fair and equitable basis in relation to the railways. The Directors are gratified to observe that the Parliament and Legislatures of Canada are giving consideration to this serious problem.

"During the year the directors reviewed the field of co-operation with the Canadian Pacific Railway and enlarged the scope of their studies. The co-operative activities related to matters previously studied but largely to the study of the abandonment of functionally duplicate lines of railway and the preparation of detailed agreements in regard to those lines where an abandonment had been recommended by the joint co-operative committee and approved by the joint executive committee.

"The outstanding achievement in co-operation was the completion, after prolonged and difficult negotiations of an arrangement for the closing of the Canadian Pacific Company's hotel in Vancouver and the joint operation of the new Canadian National hotel in that city. This arrangement will become effective when the Canadian National hotel has been completed and furnished, which it is expected will be in 1939. Such arrangement it is expected will reduce capital expenditure and produce an operating return for both companies."

What To Eat To Be Healthy

NUMBER THREE

Vitamin A is essential for the health of the mucous membranes of the eyes, nose, throat, sinuses, bronchial tubes, oesophagus, stomach, intestinal tract, and the genito-urinary passages.

A lack of Vitamin A in the diet causes eye trouble and tendency to infections.

The following foods give you vitamin A: Pasteurized milk, cream and butter; coloured vegetables such as [illegible], carrots, leaf lettuce, eggs, liver and kidney.

The distribution of vitamin A is very wide and it is also very abundant. If your diet contains a pint of pasteurized milk a day, butter, and two vegetables besides potato, as well as an egg a day, you will certainly be receiving an adequate supply of vitamin A.

Vitamins B1 and B2 are necessary for the nerves, skin, and the normal burning up of sugars and starches in the body.

The lack of vitamins B1 and B2 results in [illegible]. A lack of these vitamins also results in constipation.

The following foods give you vitamins B1 and B2: Most vegetables and fruits, particularly peas, beans and lentils, whole grain cereals, egg yolk, liver and kidney.

Vitamin B1 is widely but not abundantly distributed. We must watch carefully to see that we get an adequate supply of it. This vitamin is abundant in wheat germ and yeast. Unfortunately, vitamin B1 is water-soluble. If an excessive amount of water is used in cooking, as high as 50 per cent of this vitamin may be thrown away in the cooking water.

In the next article in this series of "What to Eat to be Healthy" we will discuss vitamins C and D.

Watch this series for complete and authentic information on what to eat and where to find it.

Questions concerning Health, addressed to the Canadian Medical Association, 184 College Street, Toronto, will be answered personally by letter.

Hulless Oats For Weanling Pigs

(Experimental Farms Note)

Young pigs have high efficiency for the conversion of nourishing food into weight increase but low efficiency for the utilization of fibre. Except for this latter fact ordinary oats would be a suitable grain but the hulls dilute the food too much, and, unless very finely ground or else coarse enough to be rejected during mastication, they irritate and clog the digestive tract. It is often advised to screen oat chop for weanling pigs but this is a laborious task frequently neglected.

Unless mechanical means can be found to dehull ordinary oats, the simpler way is to grow a variety that threshes free of the hull. Years ago the late Sir (then Dr.) Chas. E. Saunders bred two such varieties, Liberty and Laurel, for the express purpose of feeding young pigs and chickens and for making oatmeal porridge. Laurel proved slightly the heavier yielder but is rather short-strawed for droughty seasons. In 12 years tests at Beaverlodge Liberty proved about 3½ days earlier than Banner and yielded nearly 85 per cent as much meal. In a briefer comparison Laurel matured practically with Banner, yielding 53 bushels per acre against 51 from Liberty.

Both varieties of hulless are prone to smut infestation and are easily injured by formaldehyde, but careful treatment with copper carbonate or mercury dust ensures a clean crop.

Hulless oats cross readily with ordinary oats. It is important to take pains to ensure purity and then it may be necessary to go back from time to time for reselected foundation stock.

Hulless oats are rather tough to thresh and summer storage in bins is sometimes a problem.

While [illegible] correspondent says he has grown Liberty [illegible] growers would be [illegible] every two or three years [illegible] the supply for special purposes [illegible] farmers [illegible]

[illegible]

FOR SALE—De Forest Crosley Radio, Battery Set, Cabinet model 7 tubes. $12.00. Apply Lou Thomp[illegible], Tofield

THE STRONG RIGHT ARM OF CANADA

* *

RECEIVING deposits or making loans, Canada's banks are dealing largely with other people's money. Parliament has placed the strictest safeguards around the handling of other people's money.

When you deposit, or when you borrow, the strong right arm of the nation itself is thrown about you, for banking is subjected, through The Bank Act, to greater Government regulation, stricter supervision and more penetrating Parliamentary scrutiny than any other business in Canada.

Banks assemble the surplus funds of millions of Canadians, mostly in small sums. Based on these deposits, and their own resources, they make credit available where needed, for agriculture, commerce, industry, lumbering, mining, fishing, transportation, markets, governments, municipalities and individuals.

These are grave responsibilities. In discharging them the banks are well supervised.

Charters of all Canadian banks expire at the end of every ten years, they can be renewed for no more than ten years and then only after the most searching parliamentary investigation of the whole business of banking. Can you name any other form of enterprise in Canada in which every company's charter expires at one time? Or which has to undergo parliamentary investigation as a condition to continuing in business?

Parliament can, of course, amend The Bank Act at any time, but every ten years that Act is thrown open for what is known as the "Decennial Revision". Bank officers are called before the Banking and Commerce Committee of the House of Commons. They are examined and cross-examined by members and every phase of banking is fully disclosed.

It is a large committee which includes many of the ablest minds in Parliament. Every province and every political party is represented on it, so that Canadians do not lack in any sense for the most penetrating examination of the business of banking.

Canadians as a people thus regulate the business of banking through their elected representatives. Into The Bank Act, by reason of the work of these committees over the years, have been built all of the safeguards prompted by experience.

In addition, Canada's chartered banks are supervised in various other ways and operate under almost continuous scrutiny. Shareholders appoint their own auditors—chartered accountants—who closely examine each bank's affairs.

Then there is an Inspector General of Banks, an officer under the Minister of Finance, whose duty it is to keep throughout the year a vigilant eye upon banking operations. He has access to all bank records.

Banks have to make statutory returns to the Minister of Finance and to the Bank of Canada, periodically. Heavy penalties are provided for neglect to make them or if they contain falsity or deceit.

Each month they must report to the Government the total of loans made to bank directors or to firms in which they are partners, and of loans which directors guarantee. The return of January 31st, 1938, shows that the total of such loans does not amount to more than 1/60th part of the total bank loans.

There is no "money monopoly" in banking. Any group of responsible people who will get $500,000 capital subscribed and half of it paid up, and who fulfil the requirements of The Bank Act, can start a bank. The requirements are devised to safeguard the people against fly-by-night promoters.

Up till 1934 chartered banks issued their own notes to the amount of their paid-up capital and might, on occasion, exceed that sum under definite and rigid legal limits.

In establishing the Bank of Canada Parliament provided that [illegible] the note circulation of the chartered banks.

[illegible] paid-up capital. Each year [illegible] Bank of Canada [illegible]

Thus it must be seen that banks have never had an unlimited power to issue notes; they have always been definitely restricted by Parliament, with heavy fines as penalties for any breach of these restrictions.

There is no mystery about the work of Canada's chartered banks; their doings are an open book to the Department of Government, through the Minister of Finance, his officers, and the Bank of Canada.

The chartered banks are controlled by specific laws, regulations and restrictions designed for your protection as depositor, note holder or borrower. Their work is to safeguard the thrifty, promote the flow of trade and commerce and to facilitate the transfer of goods and services.

THE CHARTERED BANKS OF CANADA

Your local branch bank manager will be glad to talk banking with you. He will be glad to answer your questions, from the standpoint of his own experience. The next article in this series will appear in this newspaper. Watch for it.

The Mercury Visits The British Columbia Coast

(Continued from front page)

tions and they were very good too, but this incident would probably pass without comment were it not for a natural spectacle which we would like to record. We were not in a particularly [illegible] mood and perhaps was more [illegible] harmony with the weather [illegible] which was quite gloomy. The [illegible] of the dining car are quite [illegible] and as I watched the panorama [illegible] mountains [illegible], dark and [illegible] the [illegible] heaven in the [illegible] million [illegible] The [illegible] the train, and the shad[illegible] valley were such as to [illegible] of the sun, yet be[illegible] mountain [illegible] those [illegible] We felt better after that. Later the sky cleared and as we passed Mount Robson we heard trainmen say that not often could the [illegible]

We Scrape an Acquaintance with John and find ourselves an unbidden guest in Distinguished Company

John was a [illegible] fellow. The [illegible] John was apparently a secretary and a good one too. He knew [illegible] John's boss was a pleasant gentleman who we found it very hard to place. He carried on a long conversation with another gentleman who spoke excellent Torontian English. At times he would smile and nod over in our direction. The conversation which came over in waves sometimes audible, sometimes inaudible, veered to newspaper work and radio work. Up to this point we had taken very little interest in the conversation, content [illegible] more or less [illegible] daydream the hours and the miles away. But newspaper-radio that sounded familiar, for we had published a paper for many years and had only recently made an initial address over the air. So with interest quickened and in response to those smiles and nods, we began to make appraisal. We had learned earlier in the day Mr. S. J. Hungerford, president of the Canadian National Railways, together with his party were on board and our first guess was eastern newspapermen covering presidential party. But somehow or other it didn't seem quite right. Second guess, wealthy manufacturer [illegible] did not seem to fit either. Third guess bank director looking over the country.

Now when you arrive at the stage when it is not possible to tell whether a man is a newspaper man or a bank director you are really in a muddle and the best thing to do is to give up and mind your own business, which is what we had decided to do, when again mention of newspaper work crept into the conversation. This was too much. We leaned across and said, "If you really want peace and quietness, why [illegible] country weekly field?" [illegible] across and before we [illegible] faced John and a [illegible] gave a gasp of [illegible] quickly subsided as the [illegible] conversation was apparent [illegible] casual conversation [illegible] which the gentleman [illegible] were in the newspaper [illegible] where. Upon replying we [illegible] Tofield he said "That's where the [illegible] ship coal. How is the [illegible] business?" We told him the [illegible] was still running at probably about fifty per cent of its peak [illegible] To which he replied "that [illegible] describes life today—about [illegible] cent. But still we did not know [illegible] we were speaking to and [illegible] first, politeness forbade asking the direct question. About th[illegible] gentleman discovered his watch had come loose from the swivel and endeavored to fix it. Failing to do so, with a movement of exasperation, he stuffed it in his pocket. Observing this, we said: "let me try, I am accustomed to fixing things." So he handed over a very fine watch and chain. After repeated effort with the watch on the swivel, and failing, we took the watch off the swivel, handed it back and tried again. This time we were successful. Acknowledging his thanks we were still in the dark as to whom we were privileged to do a slight service. Midnight arriving, we bid the group good night and retired.

In the morning we met John in the wash room. He did not look as efficient as the evening previous, but then, no one appears efficient when trying to shave on a moving train.

He said "Good morning, how is the newspaper business?" To which we replied "Good morning, it was O.K. when I left." Then we said to John, "What is a googol?" "A googol?" replied John "What kind of language is that?" "Just English," we replied, "or to be more correct, American, as an American invented the term. It is a [illegible] million and is used to count grains of sand on Coney Island or [illegible] else." "You have me there" [illegible] not altogether a [illegible] either. We had [illegible] reading good [illegible] we had read an ex[illegible] in the Reader's [illegible] And we knew [illegible] the Reader's Di[illegible] had not already done [illegible] John [illegible] far as the identity of [illegible] of the evening previous. The last we saw of John was walking through Vancouver station [illegible] in one hand and [illegible] other, walking out [illegible] the perfect [illegible] always prepared.

The next day the Vancouver papers [illegible] headlines announcing [illegible] between the C.N.R. [illegible] regarding the opening of the new Vancouver Hotel. And imagine our dismay, when looking at the picture of the group present when the agreement was signed, we find [illegible] of the parlor car [illegible] We still are not [illegible] but our guess is that we were [illegible] to Mr. W. S. Thompson, Chief Publicity Director, Canadian National railways.

The run through the mountains was very nice. There was much snow around Blue River but the snow gradually diminished as we drew toward the coast. Going into Vancouver in the morning, passing through Chilliwack and near coast towns was very pleasant. The sun was shining bright and a very pleasant journey came to a close.

Next Week—What, Vancouver and No Rain.

Meeting of Municipal District of Cornhill

(Continued from front page)

with Mr. Ham by which Mr. Ham would become owner of the above land when certain payments were completed.

Mr. C. M. Fiseoth handed council a copy of minutes covering ratepayers meeting held Saturday February 19th. Mr. G. Abernethy handed council a summary of the 1937 minutes of council, prepared by a committee appointed at the annual meeting.

Mr. Ar[illegible] interviewed council the unsurveyed road division affecting the N. E. 35-49-20-W4th, stating that he desired council to take steps to determine actual road division as he desired to fence all of said land not required by district this season. Mr. [illegible] agreed to pay [illegible] per acre [illegible] C.P.R. [illegible]

[illegible] wood inspectors for 1938 was tabled until next regular meeting. Councillor McSporran stated that he would suggest that some active action be taken [illegible] season of 1938.

[illegible] through M.D. Associa[illegible] three [illegible] Division [illegible] Mr. Chas. Holmberg, Hay Lakes, and nine cases of [illegible] office.

[illegible] grant of $2[illegible] Canadian Nat[illegible] Inst. [illegible] Village of Hay Lakes [illegible] 1-7-8 and 9 and also block R [illegible] Village of Hay Lakes, [illegible] taxes collected by the Village of Hay Lakes [illegible] M.D. of Cornhill.

Quite a number of items pertaining to relief and pensions were dealt with, the council making a decision in each case as circumstances warranted.

It was decided to table the report of the annual meeting, together with a summary of the 1937 minutes prepared by a committee appointed at that meeting until the next regular meeting of council.

Accounts amounting to $[illegible] be paid.

Dr. Law interviewed council and answered many questions as to his contract school inspection and health work during 1937.

It was decided to re-appoint Dr. Law as Medical Health Officer for 1938 the remuneration being $1000 per annum.

The council decided to include Mrs. Stephen's Maternity Home and Ryley shelter under hospital contract. The home is to receive 75 cents per day for hospitalization of patients resident in this district, except those entering this district by assistance given them by the provincial government, and on relief or periodically receiving relief.

The council [illegible] as provided by secretary, council set mill rate for School districts on a sliding scale for the years [illegible] as follows.

Cornhill Municipal lands in Camrose school division, No. 20, 5 to 12 mills.

Cornhill Municipal lands in Clover Bar School division, No. 13, 15 to 20 mills.

Cornhill Municipal lands in Lamont School division No. 18, 10 to 12 mills.

Cornhill Municipal lands in Holden School division No. 17, 8 to 11 mills.

Further that Messrs. Glenn and Walker be appointed as a committee to assist secretary, as if and when called upon by secretary to arrive at actual mill rate to be set from above.

It was decided to hold a Municipal Land Tax Sale during 1938 as in the past.

By motion Councillor McSporran was given three months leave of absence, he announcing that he was leaving for the north for a period of three months. Councillor McSporran outlined road work he would appreciate Council considering at time of 1938 budget being brought down. Repair present road from gravel to Deville; arrange for approaches into farms; rebuild Davenport corner. Do some work on road from McKerrol's farm entrance west to gravel. Build part of mail route road from Hastings Lake school house, south to Bert Splisted's farm. Consider Mr. Baker's proposal re completing two miles of road, south of gravel, immediately west of Lakeview resort entrance from gravel: Do some repair work on road from gravel leading to Bert Williams farm residence. Councillor McSporran also advised that he had engaged the following men in the past for road maintaining: Messrs. Boss, Leach, Donald, Roddick and Barrow; road foremen, Messrs. Grummet, Vice and Druce.

Council was advised that Mr. Geo. Cookson was complaining about road going past his place as blocking natural run of water, thereby flooding some of his fields.

Basketball

The local Basketball team made a journey to the city last Friday evening to play a game of basketball with one of the city teams at St. Joseph College and came home with the long end of a fifty to thirty-one score.

First thing we know they will be getting the swellhead. Playing their games with town and rural teams, they have been beaten by only one team in the last two years. They are hoping to get the Edmonton Exhibition Shield this summer, the team that defeated them last year will not be there this year. If any of the readers are interested in bringing the Shield to Tofield, the basketball team will appreciate their assistance. Good work boys! If you bring the shield to Tofield the Board of Trade will give you a dinner, and if the Board of Trade doesn't, the Tofield Mercury will.

HOLY TRINITY TOFIELD

GOOD FRIDAY

Service — — — 8:00 p.m.

EASTER DAY

Holy Communion (said)— 9:00 a.m.

Choral Communion — — 11:00 a.m.

Ardrossan service & Communion 3 pm

Festal Evensong Tofield— 7:30 p.m.

Special Easter hymns and anthems by the choir. All are welcome.

COMMUNICATION

Dear Editor:

THE GNAT

The Gnat has been wondering for some time why such progressive forces as the Communists, Social Creditors and the C.C.F. did not work together until we read the other day the statement of Mr. Aberhart:

"I am going to tell you frankly, I have no use or faith in Socialism, and if it came to a showdown and I was placed in a position that I had to make my choice in a constituency where I had only two choices, C.C.F. or Liberal, I certainly would vote Liberal."

Then we wonder why the Liberals and the Social Creditors do not co-operate more. Is it possible that Capitalism has just another party for the people to vote for; just another political basket to carry their political eggs in? So when the two old parties get unpopular the third may win?

What, oh what, should a poor gnat do? Buzz.

FOR SALE—SEED OATS— I have limited quantity of Victory Oats, [illegible] generation, No. 2. Seed for sale [illegible] per bushel in bulk. Germination 90 per cent. Can get same registered if you wish at 90 cents per bushel but must know in a short time. Germination is low owing to green heavy hulls. Certificate No. [illegible] Geo. G. Abernethy.

HORSES FOR SALE OR TRADE— Will sell or trade for cattle. Also [illegible] Barley for sale. Phone [illegible], Tofield Alta. F. R. Kallal.

Preparing Land For Vegetables

Now is the time to get ready for the planting of vegetables. Sandy soils are not difficult to work up, and even if rather damp can be ploughed and worked without forming lumps. Clay soils, on the other hand, are difficult to prepare unless the soil to the depth of the furrow has an even moisture content. It is better to surface-work soils likely to be lumpy, by harrowing the surface a few days before ploughing. This prevents baking of the surface soil during the period necessary for drying out to the full depth of the furrow. The land after ploughing should be worked down as soon as it is dry enough to crumble from the action of the harrow. Very often a few hours' bright sun and drying winds are sufficient. If left until it dries out too much, hard lumps difficult to work into good tilth may be formed. Should this condition result, working after a light fall of rain has moistened these lumps will aid very much in the development of a good seed bed.

It is generally planned to prepare the vegetable garden in the fall, applying the manure before ploughing. If this has not been done, harrow up the surface, apply well rotted manure and plough it into the soil; usually the depth of ploughing is six inches. Spring ploughing to this depth is advisable even though the land was fall-ploughed. Thorough preparation is very important as all vegetable crops after seeding can be cultivated only shallowly, and no surface cultivation can make up for a lack of good preparatory tillage.

The commercial fertilizer used is applied evenly broadcast, and harrowed in to a depth of four inches before seeding. If the land is a sandy loam and well drained, rolling to compact the surface soil or dragging a planker or leveller over it is practised to make the surface level. On such soils all crops are usually planted on the level soil, without running up ridges for seeding on. In the case of wet lands not well drained and of a clay nature likely to puddle the forming of ridges is usually practised.

If rows are run up it is wise to complete the seeding on these rows while the land is still fresh and moist, as the crown of the row dries out very quickly and seed planted in dried-out rows comes up very unevenly.

On poor soils manure is applied at the rate of 20 to 30 tons per acre. On previously cultivated areas 10 to 15 tons per acre is usually sufficient. Commercial fertilizers, a 5-8-8 mixture, at the rate of 900 to 1200 pounds per acre (3 to 4 ounces per square yard) is usually considered profitable. This fertilizer is worked into the surface soil before seeding or running up the rows.

Golf Club Re-organizes

After a lapse of some years the Tofield Golf Club reorganized at a well attended meeting on Wednesday, April 13. Officers for the season: A. E. Allan, president; A. B. Clutterham, Secretary-treasurer; Executive committee, Stan Burke, Art Beirnes, M. W. McDonnel. Membership committee Mrs. Hammond, Mrs. Beirnes, Mrs. Law, Mrs. Firth. The fees were set at: Single $5.00; Couples $8.00. Join and boost for golf this summer.

FOR SALE—Rubber-Tired Top Buggy in very good condition.—Apply L. H. Graham, Tofield.

FOR SALE—Good Wood or Coal range, 6 Hole and reservoir, $10.00. Apply W. J. Bailey, Tofield.

Timely Arrivals
For Easter

PRINTED GEORGETTE DRESSES—
Bolero styles in smaller sizes, featuring frilling and necklace trims. Colorful spring patterns on black, navy or brown grounds. Slips of Rayon crepe to match. Sizes 14-42 $1.95

BOLERO FROCKS IN SPRING SHADES—
Pebble crepe with matching vestee and collar of printed silk. The popularity of the bolero is established. Sizes 14-20 .... $3.95

PRINTED RAYON DRESSES—
An unusually attractive number in large range of medium and dark prints, 14-42 $2.95

GIRLS PRINTED RAYON FROCKS—
Youthful styles, light and medium, 8-14 $1.95

COATS OF NOVELTY TWEEDS—
Interesting new models just received in Misses and womens sizes $14.95; $12.95; $10.95

Heavy Business Day For Cornhill Municipal Councillors

Thursday last was a heavy business day for the Municipal District of Cornhill Council. The meeting commenced at 10 a.m. and with intervals for dinner and supper lasted well past ten oclock at night. The agenda was heavy. Much time was also taken up with receiving delegations.

Following the reading and adoption of minutes of previous meeting, Messrs. Arthur Francis, J. Francis, J. Rempel addressed council asking that work be done on road running immediately east of Tofield.

Messrs Grudhl and Dunn also interviewed council regarding the condition of the road to Deville. It was claimed that a creek crossed this road six times. Even so the road could very easily be put in shape for travel. The council promised to do what they could and would keep this road in mind when appropriations were made for this season's work.

A delegation consisting of Messrs. [illegible] waited on council and asked for an extension of the high grade [illegible] south. They felt they were not asking anything unreasonable [illegible] represented old settlers who had paid much money in the past in taxes. They would like the high grade extended six miles which would benefit settlers getting to market [illegible] in this district was as high as any and the proportion of taxes paid up as great. The residents would be pleased to help with the side roads.

Council promised to give this matter their careful consideration and expressed their appreciation of the offer of help on residents in respect to the side roads.

Mr. H. Lee interviewed council with [illegible] to fixing a mile of mail route in his district. Council promised to look into this and see what could be done.

Mr. Robinson, superintendent of Camrose and Holden divisional school districts called on council. He said he was just passing through, noticed the cars in front of the office and just called in to see if there was any information re school matters that the council might want that he could give. He spoke in a conversational strain for a short time giving council information regarding different matters. Among other things he said the divisional board was sympathetic to school fairs and any school fair fees that had been previously paid by the local boards would be paid by the divisional board. Regarding musical festivals, he did not know exactly what arrangements would be made. The Holden divisional board had authorized payment to the Vegreville festival to the extent of $2.00 per car. They have budgeted $10.00 per class room for Christmas entertainment. This includes picnics and similar things. This money is not necessarily evenly divided but in the aggregate is the maximum.

Mr. Kozak waited on council regarding relief matters. Mr. Kozak said that while he was able and willing to work if he could get it, the poor health of his wife made it impossible for him to leave home. Council promised to give the matter consideration.

Mr. Goebel of Spruce Grove was present and applied for operator's position on elevating grader. He was well recommended as a grader man and requested 80c per hour. Council thought this a little high and 70c to start with was agreed upon.

Mr. Gladue waited on council and complained that some one had gone on land he, Mr. Gladue, had leased from the municipality and had cut down and taken away six spruce trees. It was suggested that Mr. Gladue interview Mr. Chapman.

It was agreed to engage the following men for the opening of the road work season. For the power unit, Mr. Goebel at 70c per hour; Mr. Lounsbury at 60c per hour, Mr. Grue, $3.00 per day and commission for use

Tofield Student Wins New Award

Offered research scholarships by two noted American universities, Max Rogers, Tofield, University of Alberta honors chemistry student, has accepted a $400 assistant instructor's position at the California Institute of Technology, Pasadena according to Dr. J. W. Shipley, U. of A. chemistry professor.

The award is the sixth major academic prize won by the brilliant chemistry student since he graduated from high school in 1934. His record in departmental high school examinations won him a U. of A. board of governor's entrance scholarship worth $50.

The board of governors recognition was repeated in 1935 and 1936. When he graduated in honors chemistry in 1937 the Tofield scholar won a Robert Tegler $600 research scholarship. Skill in a second branch of science geology, won him the J. W. Alexander Memorial prize in 1934. Mr. Rogers' total cash earnings in scholarships in the past four years amount to $1,200.

Second post-graduate scholarship offered him this spring was a $500 fellowship invitation tendered by Columbia university.

Son of Mr. and Mrs. H. E. Rogers, Tofield, the youth is a candidate for a master of science in chemistry degree at convention services, May 12.

United Church News

The Easter Services were well attended at Lakeshore, Ketchamoot and Tofield.

The Sunday School service in the morning was greatly enjoyed. A fitting program of Reading, Recitation, and song was splendidly carried through. The Junior choir rendered bright and beautiful anthems.

In the evening the Senior choir excelled in their Easter anthems, and Miss Lois Wilson's solo was greatly appreciated.

Members of the Junior choir assisted at the Ketchamoot services by singing two duets.

There were beautiful floral contributions at all the services.

The thought and theme of Easter brought cheer and comfort to all.

On Sunday evening, 24th of April at the service in Tofield, the Junior choir will assist and render two or three anthems.

Tuesday, 26th of April, a meeting of the three congregations will be held at 7:30 p.m. Members and adherents are cordially invited.

On Wednesday evening the 27th of April, a Social gathering is to be held in the schoolroom of the Church and is under the auspices of the Ladies' Aid.

A splendid program of entertainment is being arranged.

Refreshments will be served Cafeteria style. Come and have and make

Town Council Meeting

On account of Monday last being a legal holiday the regular meeting of the town council was held on Tuesday evening, April 19th at 8 p.m. There were present Mayor W. C. Swift, and councillors Bellamy, Hammond and Bruce. A communication was received from the Board of Public Utility Commissioners approving of the estimates of receipts and expenditures for the year 1938 and of the proposed mill rates for taxes.

By-Law No. 285 being a by-law setting certain rates and taxes for year was given third and final reading. The rates are exactly the same as in 1937. Levy for the Government Social Service Tax will be two and one quarter mills. A Statement of receipts and expenditures for the month of March was read and considered and the secretary instructed to put same in the minutes of the meeting.

NOTICE OF NOMINATION OF CANDIDATE OR CANDIDATES FOR THE OFFICE OF COUNCILLOR AT SPECIAL ELECTION

Notice is hereby given that on SATURDAY, the 30th day of April, 1938, I will at the Office of the Municipal District of Cornhill, No. 487, Tofield, Alberta, from Three o'clock P.M. to Four o'clock P.M., receive nominations for the office of COUNCILLOR.

One Councillor is to be elected for Division Three, and if election is necessary, same will be held the following Saturday, viz:—May 7th, 1938.

Polling place to be at Ministik School House.

Dated at Tofield, Alberta, this 16 day of April, 1938.

A. C. DODDS,
Returning Officer.

LOCAL & PERSONAL

Mrs. Woodford and daughter from Calgary visited her mother and brothers, Mrs. Letourneau, Jack and Oliver, during Easter week.

Mrs. Jobb and Mrs. McCauley returned home this week after spending some time visiting in the east.

The local teacher are spending the Easter holidays at their respective homes.

Mr and Mrs. R. White from Wetaskiwin spent Easter visiting at the Jobb and Whyte homes here.

Miss Audrey Jobb visited at the Jobb home for Easter.

Mr. A. Machimes motored to his home at Strome over the week end.

Miss Esther Pyle visited her sister at Bawlf for the Easter holidays.

Miss Julia McClure from Edmonton is a guest at the Geo. Bruce home.

Mr. Graham Allan returned home on Good Friday after spending the past six months taking a course in forestry work near Calgary.

Visitors at the Allan home over the Easter holidays were: Mr. and Mrs. Provost and Allan from Edmonton, Miss Margaret Allan from Barrhead, Miss Elspeth Allan and Mr. Dick Ponting of Westlock.

The Misses Margaret Whyte and Ella Taylor spent Easter Sunday at their homes here.

On Monday of this week Mr. Jack Church, Mr. and Mrs. Chas. Rawsell, Mr. and Mrs. Roy Carwell were guests of Miss Muriel Malcolm.

Mr. Donald Beirnes is spending the holidays at his home here.

Miss Victoria Hobson is visiting with Jessie Munro.

Visitors at the Malcolm home on Easter Sunday were: Mrs. Ellis, Miss Cherry, Miss Doreen Hambly and Ray Ellis.

THOS G. DARK, Eyesight Specialist and Licensed Optometrist, will be at the Tofield Hotel, Friday May 6th, from 5 to 6:30 p.m.

Mr. and Mrs. W. C. Billman returned home Sunday evening after spending the winter months in Victoria and Vancouver.

Mr. and Mrs. L. Abbot spent the Easter week end visiting with Mr. and Mrs. Brady of Edberg.

LOST— A plain gold ring. Finder please leave at Mercury Office and claim reward.

Mrs. J. Majakey, Mrs. J. Wood and Miss Maggie Wood motored to Viking to visit with Mrs. H. Rollins for a few days.

Mrs. M. McConnel entertained a number of friends at a dinner party last Monday at her home. Her guests included Mrs. Jack Johnston, Mrs. M. C. Wood, Mrs. John Wood, Miss Maggie Wood, Mrs. J. Majakey, Mrs. T. Jones, Mrs. L. H. Graham, Mrs. Bill Seale, Mrs. J. Appleby, Mrs. Chevreaux and Mrs. T. Schultz. The dinner table was decorated with yellow candles and a beautiful centre piece of daffodils. A delicious turkey dinner was served to which all did ample justice. The afternoon entertainment took the form of bridge. Very suitable prizes were given out to the lucky winners. Ladies' first honors went to Mrs. Bertha Seale, while Mr. L. H. Graham received a handsome second. First prize for lady playing gent went to Mrs. M. C. Wood and Mrs. T. Schultz received second. At five o'clock Mrs. McConnell again served a very tasty lunch. Everyone reported a jolly good time.

Notice

A Social Credit Zone meeting will be held in the Variety Theatre on Wednesday evening, April 27th.

Speakers will be in attendance and everybody welcome.

Obituary

The funeral service of Mr. James Murray McHeffey of 10625 100 ave., who passed away at his residence April 14, at the age of 70 years, was held at Tofield United Church Sunday afternoon at 2:30 o'clock. Rev. Allan officiated. Interment was made in the local cemetery. Ryley lodge I.O.O.F. No. 75 conducted a graveside service. Many beautiful floral tributes were received. He leaves to mourn his loss one sister and two brothers, Mrs. R. P. Parker, Bow Island, Alberta; Arthur McHeffey and Fred McHeffey, of Tofield. Foster and McGarvey Ltd. funeral directors.

Flying Blind

In bad weather it is often necessary for aeroplanes to "fly blind" . . . to depend on instruments rather than vision and charted landmarks.

Almost uncanny in their accuracy, such instruments are nevertheless second choice in navigation of the air.

Shoppers who trot off down town to the stores without first consulting the advertisements of those same stores are likewise "Flying Blind". And needlessly so.

The advertisements in The Mercury are put [illegible] for your guidance, for your safe landing in [illegible] of value.

TAKING IT ON THE CHIN—

THERE PROBABLY never was a perfect council. Or a sporting aggregation that never tasted defeat; or an army that the enemy did not conquer at least once. The countries enjoying the most salubrious climates in the world are at times subject to the blind frenzy of tropical storm. The most pacific of waters are lashed to fury. No matter where one is located or where one goes, perfection, **as mortals understand perfection**, is a minus quantity. Sometime, somewhere, in connection with something, all mortals, to use a sporting slang phrase, have to take it on the chin. It is with thoughts something like the above that we approach problems connected with a municipality. But while we may approach municipal problems in that frame of mind, there are other things to be remembered too. A public body, no matter of what degree of importance, have a definite responsibility to the public they serve. As it passes from one piece of business to another, it should be recognized that it is not their business they are transacting, but the business of the ratepayers. That councillors are really agents of ratepayers at large. It is wise to remember this, because sometimes public bodies, with the best intentions are prone to accept a proprietory attitude toward public business. It is also wise to remember that while public bodies are under direct obligation to the ratepayers they serve, in the course of public business they are often confronted with problems that effect conflicting interests among those same ratepayers. Problems that frequently are not easy of solution, and problems in connection with which, whatever a council decides some ratepayers will believe themselves to be adversely effected. So if public bodies can recognize the problems of ratepayers as they actually exist and ratepayers can understand the problems of public bodies as one after another they continually present themselves, a much better feeling with regard to public affairs should be created.

In approaching municipal problems in a spirit of tolerance, one does not have to make any concession to what is rightfully demanded of any public body. Inefficiency, improvidence, favoritism, are [illegible] obnoxious within a spirit of tolerance as they are within a spirit of die hard opposition. A spirit of tolerance will lead to an effort to understand, which in the long run is better than a determination to condemn, or even praise. Waves of condemnation and adulation are like boisterous winds, they can be made use of according to the way the sails are set. But understanding is like the air we breathe, cut it off entirely and the spirit perish.

CANADA—

If ever we should move from the Dominion of Canada to reside in another country we would carry with us two definite pictures which to us would typify Canada. Some years ago the Stovel Company of Winnipeg published a picture which they sent out as a Christmas brochure. It depicted a farmer taking a load of wheat to town. He was walking while the team was pulling the loaded sleigh to the elevator in the country town which could be seen in the distance. The snow covered fields, the barbed wire fence, the man and team, and the distant town spelled Canada to us more forcibly than many things even more pronounced in every day life.

One other thing too, typifies Canada most strongly. We saw it last Thursday evening at Lindbrook. Following the Council meeting we rode with Mr. Letourneau to that point where Hon. F. Baker and Dr. McPherson had addressed a meeting. The meeting was over by the time we arrived and the last stages of the inevitable lunch was in progress. The people were milling around, some getting ready to depart, others chatting with neighbors. And as we looked in at the door we thought of all the thousands, perhaps tens of thousands, rural schools in the three prairie provinces and the similarity of the people who periodically gather in them for social recreation. Looking toward the front of the school we could see Dr. McPherson's grey head among a number of other heads and shoulders, and we know of no one else who could fit into the picture quite as well. For many years he and Mrs. McPherson have been attending similar if not exactly the same kind of gatherings, always taking a prominent part and always displaying that quality of making people feel at home. Last Thursday's meeting at Lindbrook was a political meeting, but we saw nothing of that. What we saw was Canada.

Traces of humor in a council meeting are not any too plentiful, but occasionally humor pops up spontaneous and genuine. A lady wrote the Cornhill Municipal District Council protesting against a personal property assessment, among which was a cash register which "had not been used for ten years." The depression must have cut deep there.

Reeve Glenn, desiring a smoke, breaks open a package of tailor mades. Courteously he hands the package to Mr. Hamilton, a mchinery man. Mr. Hamilton, with the generosity attributed to all machinery men, hands it to the next fellow, and it goes the rounds, thereby enriching Reeve Glenn's fund of good deeds done. Some time later, looking over in Mr. Glenn's direction, we see him put his hand in his pocket, bring out a package of fine cut, and proceed to "roll his own."

Spring Awakes The Prairie

By Annette Thomas, Erskine, Alberta, in "Forest and Outdoors"

The February thaw set us prairie dwellers all to dreaming. Some of us started house cleaning; some of us began spring sewing; others took advantage of the fine weather to do some neglected visiting. But now again the prairie is wrapped in winter and we sit forlornly beside our fires resenting this last (or so we hope!) intrusion of old winter into our plans. But why should we be depressed over the weather? I have found a method to completely fool old winter. I simply use my imagination and find it very satisfying to sit beside the fire, the delicious aroma of burning wood filling the room, garden catalogues and garden scrap books before me, dreaming my dreams with no back breaking work, or hail, drought or frost to mar my pleasure.

I let my imagination run riot over dream gardens and plant my borders and clumps as fancy dictates. How I revel in planting my bulbs! This old neglected place to which I have come to make my home, needs a garden lover. No devoted hands have worked here for years and the few shrubs and trees remaining are sadly neglected. But I shall remedy all that. Around the bare, clay and gravel foundation I shall plant shrubs and flowers to hide the foundation, along the flagged path a border of oriental perennial poppies then I shall have glowing, nodding colour all summer for the hardy poppy plants do not suffer during the drought in comparison with other perennials and the few I had last year bloomed right up to killing fall frosts; in a corner where caragana bushes hide the highway I shall plant a riot of delphiniums—shading from delicate sky blue to midnight purple. The tall spikes will be a glowing mass of blue fire and beckon to me as I come and go about my daily tasks. The northeast corner of the house needs a clump of golden glow to bring it to life. It grows so luxuriantly and to such a great height that it will make an effective background for my lilies. The ground here is shady, cold and heavy clay from the foundation of the house but I shall remove all that and put a rich sandy loam here (hauling it from a nearby bank the simoonlike winds have heaped in a corner of a ditch along the highway. ('Tis an ill wind that blows nobody good!) I shall add plenty of well-rotted manure and work the soil until it is fine and smooth as a floor. The lilies should do well here and produce enormous heads like great candelabra with nine or ten blossoms on each stalk. I shall plant Gypsophila paniculata to offset them or rather make a delightful combination with them. Even when the blossoms have faded the foliage will make this an interesting corner, the foliage of the golden glow, the spikey leaves of the lilies and the fine dried flower stems and leaves of the gypsophila make a picture quite their own.

Plans for the Stone Pile

A stone pile heaped in a rear corner of the yard must be covered with golden gleam nasturtium and as this is a tender plant, must be guarded against early and late frosts. A bare weedy spot in the center of the back lawn must be spaded up and given a mulch of manure and planted to an old fashioned posy bed. Here I shall let my imagination run riot and plant everything from prim zennias that always remind me of sturdy peasant girls dressed in their Sunday best, and make such gorgeous late summer bouquets for my brass bowl, to asters,—every colour and variety single and double, clarkias with narrow outside borders of candytuft, lobelia and portulaca. Of course the bed would not be complete without phlox, larkspur, marigolds, mignonette, cornflower, alysum and four o'clocks.

Along the tall wire fox guard I shall plant my sweet peas and they will make a brilliant sweet-scented screen between the house and fox yard. These I shall plant very early in the season as they are hardy. I shall dig a trench and mulch it well, add a little fertilizer and as the plants grow fill it up gradually thus giving the roots a deep setting that will hold moisture in a very dry season. These plants respond to culture readily and if you have water you may dig a very deep trench and fill in with broken crockery, stones etc. for drainage and then you may prune the plants for large flowers and water freely. But where you have to conserve moisture the first method is the better.

But there are still my bulbs to dispose of; [illegible] rich garden soil [illegible] as much moisture as possible. [illegible] iris I shall plant [illegible] flagged path I shall make leading to a pool I want sunk in the side-back yard. Here I shall plant a border of plants that will reflect themselves in the water and in the pool I shall plant the flat lily pad [illegible] will suffice for a bird bath and [illegible] I shall [illegible] and water [illegible] blue birds and [illegible] the [illegible] I have provided.

The Hunger for Beauty

There are [illegible] the [illegible] last year and the [illegible] spaded up and shrubs planted [illegible] last I am determined that I [illegible] have a garden to dream over [illegible] the years I spent on a prairie farm my hungry soul had to be [illegible] useful things like vegetables [illegible] berry plants and canes [illegible] shall plant beauty for [illegible] lilies for my soul and [illegible] of the [illegible] the [illegible] useful [illegible] keep [illegible] garden [illegible] him have all the spare water [illegible] we have at the dry season [illegible] must eat though the spirit [illegible] for beauty.

[illegible] dreaming [illegible] and [illegible] English gardens with their riot of [illegible] snapdragons and other massed beds; [illegible] espaliered trees [illegible] But we can [illegible] walls, make rock gardens [illegible] many are [illegible] is a good time to make [illegible] The loose rock that hinders cultivation in the fields will [illegible] nicer and more useful [illegible] stone wall around the garden [illegible] would break the bleak [illegible] shelter the growing plants [illegible] entirely transform a place [illegible] see the day when walled gardens [illegible] be common and rock gardens [illegible] pools and perennial beds [illegible] the joy and delight of many [illegible] When such a day arrives there will [illegible] be no more "East is East and West is West and never the twain [illegible]"

THE WORLD OF WHEAT

By H. G. L. Strange, Director Research Department, Searle Grain Co.

Heavy Business Day—

of his car.

The following rate of pay for other worker was set: Single man 35c per hour; man and team 60c per hour; man and four horses 80c per hour; maintaining with four horses 80c for finished mile; planer $1.60 a finished mile; tractor $1.20 per hour; maintainer-grader man 30c per hour.

It was announced that the old adding machine which had been in use for many years had out lived its usefulness and was [illegible] would cost $[illegible] the [illegible] machine [illegible] the office [illegible] $25.00 [illegible] for the old [illegible] After some discussion it was decided to purchase the new one.

Councillor McSporran wrote tendering his resignation as he expected to be out of the country for some months. The council accepted Mr. McSporran's resignation and instructed the secretary [illegible] Mr. McSporran [illegible] the council [illegible] of Mr. McSporran's [illegible] as councillor [illegible] in matters pertaining to the [illegible] of the municipality.

To fill the vacancy caused by Mr. McSporran's resignation, nomination day was set for Saturday April [illegible], the election, should one be necessary, to be held one week later.

A by-law for the purpose of giving Council authority to place a ban on heavy traffic on roads in the municipality when necessary was given a first and second reading.

Following [illegible] discussion [illegible] the mill rate was set at [illegible] mills.

It was agreed that each [illegible] councillor be allowed $1[illegible] for road work, $1000 to be spent with big outfit and $500 on smaller jobs.

Reeve and councillors arranged to make a pre-season survey together of road work to be done this coming season.

The traffic by-law was given a third reading.

The tentative budget for the coming year was made and allowed for the following: Administration $[illegible]; protection of person and property $500; aid and relief, health and sanitation $4500.00; public works $12000.

Lastly the matter re printing of the minutes aired at the annual meeting was brought up as unfinished business from the last meeting. W. Werton of the Mercury was present and stated that undoubtedly there was a certain amount of criticism displayed toward the council no doubt partly through misunderstanding. He commented upon the long days work the council had just about completed and said the problem was to get the ratepayers to see the problems of the district as the council with their close-up view saw them. He suggested that council follow the action of some other municipalities in the province and [illegible] the Mercury for all of its resident ratepayers at a considerably reduced rate offering 75c per year. Due to the fact that the meeting had been called a week earlier than expected he did not have all the data he would [illegible] at hand and suggested that [illegible] give the proposal [illegible] consideration and [illegible] at the next meeting. This the council agreed to do and [illegible] at about 10.30 p.m.

Municipal District Of Beaver Lake No. 486

A meeting of Council of M.D. Beaver Lake No. 486, was held at Ryley, on Monday the 11th day of April, 1938 at which all members were present.

Minutes of the [illegible] meeting [illegible] correction [illegible] Edmonton [illegible] grant of M. Peter Ogrodnick to $10.00 monthly—the published extract having mentioned the name of Mrs. S. Panchy. [illegible]

[illegible] April 2nd to April 11th was [illegible] failure to receive a sample of [illegible]

Mr. A[illegible] [illegible] Mr. [illegible] Harry Jef[illegible] [illegible]

[illegible] Bird Pension for Mrs. Nils Sellberg was recommended at [illegible] Old Age Pension of Mrs. Ella M. Stewart and Mr. Jas. A. Stewart were raised to $20.00 [illegible] Koroluk [illegible]

[illegible] E. Wikle [illegible] and Paul [illegible]

[illegible] following [illegible] was confirmed: Oscar [illegible] Ryley [illegible]

[illegible] Agricultural Relief Advances Act [illegible] will not be considered unless the [illegible] in the hands of the Secretary before May 1st.

Payrolls for the first Quarterly [illegible] amounting to $61[illegible].50 were [illegible] and sundry accounts totalling to $7300.00 were similarly dealt with.

The Department of Lands and Mines were asked for a list of all leases of lands along the Southerly and Easterly shores of Beaver Lake. The problem of weed control in that area was considered.

The next meeting will be held at 10 o'clock in the forenoon on Saturday the 14th day of May 1938.

CARD OF THANKS

[illegible] express [illegible] sincere [illegible] many friends for [illegible] of sympathy on the [illegible] Our [illegible] to the Ryley I.O.O.F. [illegible] had charge of the funeral.

The Mercury Visits the British Columbia Coast

SECOND ARTICLE

For many years we had read about Vancouver and rain and to some extent the words Vancouver and rain [illegible] one thinks of Vancouver [illegible] comes to mind. But quite likely, as in many other instances where popular belief runs riot, the actual facts are not in keeping with the belief. Some years ago we [illegible] Vancouver man, who, [illegible] travelling on the [illegible], would [illegible] and offer to bet [illegible] was not raining when the train pulled into Vancouver. It is fortunate that he was not on the [illegible] otherwise we might [illegible] money. Anyway, it [illegible] great day for [illegible] pulled into Vancouver [illegible] was shining brightly [illegible] fast with the exception [illegible] drizzles of short duration we saw no rain in Vancouver [illegible] which time we [illegible] the island [illegible] new [illegible] great [illegible] population [illegible] reported to be 315,000, and it is growing fast. A very large number of prairie people have gone there to live and it is difficult to meet people who have no knowledge of prairie life. To the British Columbian the [illegible] from the R[illegible] the prairies [illegible] Alberta, Saskatchewan [illegible] one. It [illegible] for [illegible] tongues [illegible] Perhaps the [illegible] the prairies [illegible] interest [illegible] Stanley Park, the [illegible] China town [illegible] fish market [illegible] Japanese [illegible] the visitor [illegible] the new [illegible] and new Vancouver [illegible] country [illegible] head [illegible] building [illegible] stepped [illegible] place of [illegible]

Snow White and the Seven Dwarfs

The city was [illegible] of Snow White and [illegible] which ran at the Capital for three weeks. It is a technicolor cartoon production by Walt Disney and is reported to have taken three years and 700 artists to produce. It is also expected to earn seventeen million dollars. The Capital theatre is a good one. After you buy your ticket you pass up a luxuriously carpeted incline and the decorative [illegible] such that with every [illegible] step you experience a rising feeling of importance. At the top [illegible] She [illegible] street [illegible] There stands Queen Charlotte [illegible] was [illegible] was [illegible] was [illegible] and appeal [illegible] that they were mere animated drawings. On the contrary, one felt more like attributing life and soul to them. Doc, Grumpy, Happy, Sneezy, Bashful, Sleepy and Dopey [illegible] talk [illegible] with Snow White [illegible] complete [illegible] character.

Some criticism has been [illegible] for children [illegible] In this connection it is interesting to read what Walt Disney himself has to say about it.

Announcing recently, that he did not intend to make any deletions from the cartoon, he said: "We [illegible] made pictures for children. That we do is a popular [illegible] We [illegible] if we did. It is true that we firmly believe in keeping the contents of our pictures above reproach, but what we really strive for in our production is to appeal to the child qualities which linger in every adult."

During the show [illegible] when told to wash before [illegible] people say: "I knew there was a catch to it," which [illegible] felt like [illegible] long walk [illegible] much [illegible] surprise [illegible] steps and [illegible] street but a different street from [illegible] we had entered.

Chinamen and More Chinamen

On Sunday we contacted Mr. H. Kendall, formerly of Tofield. We spent two days with him. This Sunday was bright and sunny and after walking around the principle streets for two or three hours, together we more or less aimlessly turned into the Chinese quarter. It seemed as if every Chinaman in Chinatown was out on the sidewalks enjoying the bright sunshine. For several blocks we passed cluster after cluster of them, conversing animatedly. We thought about the war in China, but who knows what they were saying, we certainly don't. It was the largest number of Chinese we had ever seen together at one time.

In the morning with Mr. Kendall we went over to North Vancouver which is reached by ferry. Taking a street car, we went to the end of the line and then on to Capilano swinging bridge. This bridge, which crosses a deep ravine with swiftly running water, is quite high, and was not constructed for people with weak hearts. It is a cable bridge and as soon as one steps on it, it commences to sway. When one is in the middle and someone steps on the end the shaking is very perceptible. One begins to think of those things left undone at home.

[illegible] we encountered an [illegible] though by no means un[illegible] A children's baseball [illegible] in progress, the ages [illegible] years down. There were Canadian, Chinese, Japanese, Hindu, North American Indians and so it seemed two or three other nationalities we could not classify. It was the most cosmopolitan baseball game you would expect to find anywhere.

On Monday, again with Mr. Kendall, we went to the museum, to the [illegible] hall and Stanley Park. As we were eating dinner in a restaurant Arthur Smith came in and passed [illegible] noticing us. We walked up [illegible] behind and said: "To[illegible] Holden [illegible] hearing out." He [illegible] and started [illegible]

Social Credit Meeting Has Good Turn Out

The Social Credit Zone meeting held on Wednesday night was well attended, both town and country folk being in evidence.

Mr. T. R. Murray occupied the chair and suitably introduced the speakers. At the time the meeting opened the speakers were Dr. McPherson, the sitting member and Mr. James, M.L.A. who was pinch hitting for Mr. McLachlan, M.L.A. However, Mr. McLachlan arrived in plenty of time to give his address and the audience were regaled with three addresses.

Dr. McPherson dealt chiefly with the debt problem saying in part that the legislature had tried to reduce taxation by a fair act but this had been disallowed by the courts. The legislature however, were watching the debt situation closely. He said the most important thing to protect is the home of the individual. This is more important than a contract to pay any particular sum of money. So the Home Security Bill was passed. To claim protection under this act a person must be owner of the land, but protection was only allowed up to a quarter section. This act was also extended to include town and city dwellers, and the act now reads that if anyone wishes to foreclose on a town or city home, they must first put up $2000. This amount gives the home owner a chance to get settled again. The government has been accused of repealing the debt adjustment act. This is not the case. But they do not wish to foster in anyone's mind, that if they are able to pay debts, they should not do so. Under the present act both debtor and creditor can appeal to the board. The debtor will probably be asked to give one fourth of his production to the board and they administer this. If the debtor is not willing to do this the board does not have to do anything for him. It is not the object of the Bill to have men sidestep debt. If they can pay whole or in part, they should do so. The Act is for those debt ridden people whose debts are unsurmountable. —Applause.

Mr. James, M.L.A. said he did not intend to speak to-night having merely come as a spectator. He had an interest in the district, as many years ago he homesteaded near here. This was long before the railroad came in. Mr. James went on to give a fiery address along Social Credit lines. He claimed the inability to pay dividends was due to the dominion government, the courts, the banks and the reluctance of all the people to assemble under one political banner. He claimed the sinister band of finance was behind the Premier of Canada, the Dominion Government, the Courts, and was the factor that was keeping the people over burdened with debt. They, the Provincial government, had done all they could up to the present time. They had fought tooth and nail.

Mr. McLachlan said in part, he had started the day with the preparation of a speech on taxation to be delivered here tonight. His time had been taken up by callers both in the morning and afternoon, with the result that he was not as well prepared as he expected to be. The speaker dealt with the tax work of the present provincial government fairly exhaustively, working down to what the people were most interested in, the Agricultural Land Relief Act, or as it is popularly known, "the seven per cent production tax act." He said there has been a growing discontent re basis of taxation on land values. The government had this in mind and have had the matter forced upon them due to conditions in the drought areas. They came to the conclusion that they must change the tax structure from a land basis to a production basis. This is a replacement tax and in the aggregate it should not be necessary to get any more money than previously. At present the amount raised by municipalities is around nine million dollars. The tax is on bulk production only and does not effect small stuff like eggs delivered in small lots to village stores. In the aggregate not more than $9,000,000 will have to be paid and this amount is being paid now. The rate would be adjustable year by year. In a good year there might be a surplus which would take care of a poor year. If the rate was set too low, a poor year would endanger social services. They are now at a minimum. The crop insurance feature is incorporated in this bill. When crops are lost, the people should have some protection. The first thing is to test it before the courts. Even if passed by the country it will not be put into force at once. It will be discussed at meetings etc., viewed from every angle and finally the legislature will meet and from information they have at hand regarding it, they hope to be able to pass an act that will appeal to the public. This is the most democratic way be known of regarding the governing of a province.—Applause.

During the evening Mr. Mat Eaglesham sang a cowboy song accompanied by himself on the guitar.

LOCAL & PERSONAL

Mr. Louis Gleau returned from Pawnee, Oklahoma recently. Louis spent a nice winter away from the frost and snow. His visit however, was saddened by the passing of his sister at an advanced age.

FOR SALE—Ruby Rhubarb Roots. 5 cents each. Phone 909, Tofield.

The W.M.S. will hold their Easter Thankoffering meeting in the United Church on Friday, April 29. An interesting program has been arranged and a social half hour will follow. All ladies are invited to attend.

The Ketchamoot Youth Training Club held their second meeting at the home of Margaret Mitchell on Thursday, April 21. It was decided to hold their meetings on the last Wednesday of each month. The next meeting will take up wool craft and rug making.

Miss Isabel Robinson spent the Easter holidays at home with her parents and also visited friends in Edmonton for a few days. While there she also had the pleasure of attending the Junior W. A. Rally.

Rev. and Mrs. Wallis, Mrs. Robinson and Edith and Juniors of the W. A. motored to Edmonton on Tuesday, 19th and attended the Annual Rally in All Saints Pro-Cathedral and Parish Hall. They were successful in winning the Banner again this year, tying with Vermilion. The leader and Juniors offered the Banner to Vermilion Juniors, since Tofield had the pleasure of hanging it in the church last year. Memory certificates were won by the Juniors, also sewing and study-book prizes. One Junior had the honor of winning the Bishop's prize (a beautiful prayer and hymn book) for receiving the highest marks in the Diocese for the written examination on the Study Book, "Talks on New Ways in the King's Service."

Rev. Wallis has accepted a call to take charge of a church at Camrose. With Mrs. Wallis he will leave for that point the middle of May. While here Rev. Wallis has been very popular and it is with regret his own church people and very many others will see him go.

THOS G. DARK, Eyesight Specialist and Licensed Otometrist, will be at the Tofield Hotel, Friday May 6th, from 5 to 6:30 p.m.

Miss Audrey Jobb returned to her school at Drumheller Friday after spending the Easter holidays at her home here.

School re-opened on Monday last, the teachers returning from their respective homes after the holidays.

A large number of Tofielders visited Edmonton on Friday last, many attending the picture "Snow White and the Seven Dwarfs."

Miss Muriel Malcolm was an Edmonton visitor on Wednesday.

Mr. Geo. McFadzean of Edmonton was in Tofield on Wednesday of this week.

UNITED CHURCH NEWS

At the meeting called for Tuesday evening, 27th, the large and representative gathering of members and adherents of the United Church "Tofield Charge," unanimously and cordially invited the Rev. D. K. Allan to continue his pastorate in their midst.

It was an enthusiastic gathering and all pledged themselves to loyally support the work of the Church in Tofield and district.

Kindly references were made to the respect and esteem in which the Rev. and Mrs. Allan are held, not only in the Church, but also in the whole community.

KETCHAMOOT

Born: To Mr. and Mrs. Herman Lawson, Thursday, April 21, a son. Congratulations.

The monthly meeting of the Ladies' Aid will be held next Wednesday, May 4th, at the home of Mrs. Rev. Allan, the manse, in Tofield. All are cordially invited to attend.

Mr. and Mrs. A. F. Schultz were passengers to Edmonton Friday of last week.

Mrs. C. A. Ingram, Mrs. Elsie Carlisle and Miss Nora Kennedy spent Thursday afternoon of last week with Mrs. John Lee, it being Mrs. Lee's birthday.

Messrs. Earl Owen of Vilna and Percy Owen of Holden were dinner guests of their aunt, Mrs. G. W. Sears, Thursday.

School re-opened Monday after a ten day holiday. Miss Lindsay spent the holiday at her parental home at Innisfree.

Mr. and Mrs. Roy Lee and family, Miss Eileen Sterritt and brother Easton were Sunday guests of the Herman Lawson family.

Mr. Jack Yonnie of Edmonton is the guest of his uncle, Mr. W. A. Mitchell.

The girls of the neighborhood held a meeting at the W. A. Mitchell home Wednesday afternoon of last week to continue their work taken up at Ryley last winter. Miss Margaret Mitchell is president and Miss Edith Davison, secretary. They will meet once a month and will be known as the Youth Training club.

Miss Hazel Sears and brothers Stanley and Charley, and Harold Schultz were guests of the Davison family Sunday.

Mrs. Elsie Carlisle and Lorne Lee were guests of Mr. and Mrs. Adolph Weder of Miquelon Sunday.

McKENZIE

Mr. and Mrs. J. H. Malcolm and family of Silver Lake and Mr. and Mrs. M. Bailey and family visited at the Glen Bailey home on Sunday.

Trueman Jacobson and Miss Carrie called at the Baily home Sunday.

Mr. E. Anderson made a business trip to the city on Tuesday.

Mr. Roberge spent Monday and Tuesday in the city.

Mr. Wuetherick of Edmonton is staying at the Roberge home for a few days.

Mr. Martin made a business trip to Edmonton Monday.

Mr. and Mrs. Jack Johnston visited Edmonton to see the picture "Snow White and the Seven Dwarfs" one day last week.

Several from McKenzie were at the F. Tiedeman home on Saturday evening to help celebrate Mrs. Tiedeman's birthday.

We are glad to hear that Pauline Walker is getting along so well. She came home on Sunday.

Mr. and Mrs. T. A. Jones and Mrs. Eaglesham visited the city on Saturday.

Mrs. Dale spent Monday in the city.

Vivian Myers spent the Easter holidays with her grandmother, Mrs. Moss.

Congratulations to Mr. and Mrs. Secord on the purchase of a new car.

Mr. and Mrs. Glen Bailey and family were supper guests at the Macfborski home Monday evening.

Mr. and Mrs. Roberge visited with Mr. and Mrs. Woods on Sunday.

The Social Credit Group met at the Eaglesham home on Tuesday evening. There was a good turn out. The next meeting is to be held at the Jack Johnston home.

Mrs. Booth spent Easter with her daughter, Mildred, Mrs. McIntyre.

Allen Eaglesham has been assisting Mr. Warawa with his work for a while.

Aha!

"What is foremost among the discouraging incidents to which a man in business must accustom himself?"

"Seeing his stenographer yawn while he is writing one of his snappy salesmanship letters."

KINGMAN

Miss Inga Johnson is home again after spending a month at the coast.

Miss Connie Erickson is ill with the mumps and wasn't able to go back to Edmonton to attend school.

Miss Alvina Simonson and Miss Alice Simonson returned to Edmonton Friday after spending the Easter holidays at home.

Miss Vivian Horte came home for Easter from Edmonton. She is taking a course in hair dressing there.

Mr. and Mrs. Fenwick are back from Sterco and will spend the summer on the farm.

Quite a few from around Kingman spent last Friday in Edmonton.

Mr. Norman Wideman has accepted the job of driving the B and A truck and will move his family to Camrose in the near future.

Mrs. J. K. Dettwiler who has not been well since she had the flu is much better now.

Mrs. Sarah Wideman and daughter Ella May, called on Mrs. J. K. Dettwiler last Friday afternoon.

Rev. Hoverstein had services at the Lutheran church last Sunday afternoon.

Mr. Brunom is home again after spending the winter at Seattle.

The farmers are busy once again in the fields and a few are working in their gardens.

Mr. Jacob Bones is here from Bawlf, helping his son Polmey put in the crop.

U.F.W.A. NOTES

A good attendance was present at the April meeting of the U.F.W.A. held at the home of Mrs. J. W. Francis.

The programme consisted of a paper prepared and presented by Mrs. R. Burchard. This was full of valuable and practical information and was most interesting.

A Health Bulletin, prepared by our provincial convener, Mrs. M. Bailey, of Fairview, dealt with what was being done in public hospitals and institutions of Alberta, both as to preventative measures and as to curing of the sick.

A delightful bulletin of Horticulture prepared by Mrs. V. Galloway, Fort Saskatchewan, was read by Mrs. McConnell.

A special treat was enjoyed when Mrs. T. R. Murray sang a charming solo, "Just be Glad" followed by an encore "Mighty Lak a Rose."

The May meeting, being a demonstration on "The Care and handling of Bees" will be held at the home of the president, Mrs. I. C. Olson, on the second Thursday, and all farm women are cordially invited to attend.

BARDO

Despite the stormy weather, a large crowd turned out to the Amateur Program and Basket Social last Friday night, sponsored by the Ball Club. O. Arkley with guitar and harmonica duet took first prize and Clara and Lilly Haugen, singing, taking second prize. Albin Anderson acted as Major Bowes and S. Olsenburg auctioned the baskets. The proceeds were $25.00. The Ball club wants to thank everyone for the splendid support they received. The following players are expected to line-up with the ball club this season—L. Foshaug, G. Olson, M. Foshaug, I. Foshaug, P. Anderson, B. Steen, A. Steen, E. Steen and L. Stauffer.

Mrs. O. Heiberg entertained a number of ladies on her birthday last week. A delicious lunch was enjoyed by all present.

Mrs. M. B. Ness and the Misses Esther, Alice, Muriel and Sylvia of Edmonton spent the Easter week at their home here. They returned to Edmonton on Sunday with Esther and Alice remaining on the farm.

Mr. and Mrs. S. Olsenberg and daughter spent the Easter holidays at the formers home in Killam.

Edmonton visitors last week were: Mr. and Mrs. B. Anderson, Mr. and Mrs. Alvin Steen, Mrs. J. Ness, Mrs. M. Erickson, Mrs. Petra Stauffer and Merlin Foshaug.

The snow storm stopped field work for a few days. Very little wheat has been sowed, W. Simonsen sowing the first wheat in this district.

Mr. S. Olsenberg is driving a V8 Coupe.

Mr. Ezra Yoder has purchased a chevrolet car.

Rev. Hoverstein conducted services in the church last Sunday. Mr. Hoverstein returned lately from the States where he spent the winter.

Ed Bannerman returned last week and is working at the Ness farm.

Clarence Rude had the misfortune to lose two colts this spring.

Mr. and Mrs. O. Fisten of Edmonton visited with the A. Haukedahl family on Easter Sunday.

United Church News

The Social evening held under the auspices of the United Church Ladies' Aid on Wednesday, was a fine success. There was a good attendance and the program was varied and most interesting. Everybody threw themselves into the fun and frolic. The Ladies made a little money but the sociability enjoyed was worth the effort.

Bellamy's Broadcast No. 19

Did You Hear?

That no opposition is the worst opposition you can possibly have.

Lard for this week, per pound 15c

THE WORLD OF WHEAT

By R. C. L. Strange, Director Research Department, Searle Grain Co.

[illegible] communication with First General Registered wheat [illegible] said a farmer to me recently. "Can you give me a few hints on sowing and taking care of a seed field?"

[illegible] scrape [illegible] after treating [illegible] from the sacks [illegible] clean out [illegible] this dirt [illegible] feet wide [illegible] width of [illegible] for green feed after [illegible] be taken [illegible] harvesting, but [illegible] later."

[illegible] damage reported [illegible] European [illegible] Northern [illegible] a fall

Increase of Trespassers Is Problem To Railroads

Montreal, April 26—A total of [illegible] illegal train riders and other [illegible] on railroad property lost [illegible] in 1937, according to complete reports for the year just received by George A. Shea, Director of Investigation, Canadian National Railways, and Vice Chairman of the Protective Section of the Association of American Railroads. At the same time 2,6[illegible] trespassers were injured. [illegible] number of fatalities to trespassers on railroad property in 1937 [illegible] a reduction however, of 169 compared with 1936, and a decrease of [illegible] the number of trespassers injured.

[illegible] on railway property materially decreased in recent [illegible] brought about a serious [illegible] due to the fact that [illegible] studies show that approximately [illegible] per cent of the accidents to [illegible] result fatally. Because of [illegible] a concerted drive is being made by the railroads to reduce trespassing as much as possible.

[illegible] just received by the Protective Section show that approximately [illegible] illegal train riders [illegible] were removed from [illegible] prevented from getting on [illegible] ejected from railroad premises [illegible] arrested, by eighty of [illegible] railroads of this country. This was an average of [illegible] per month.

[illegible] this year, 211,561 trespassers were ejected from trains or railroad premises, an increase [illegible] compared with [illegible] 1937, and in February, this number was 211,035, or an [illegible] twelve per cent compared with February last year.

Home-Mixed Feeds For Young Chicks

(Experimental Farms Note)

[illegible] can be effected through [illegible] farm-grown [illegible] for rearing chicks. Finely ground wheat, oats, and barley, supplemented [illegible] meal and other [illegible] concentrates makes a very [illegible] and economical ration [illegible] chicks. Such a ration has [illegible] at the Experimental Farm, Brandon during the past [illegible]. The mash mixture supplied [illegible] during the [illegible]

[illegible] oats, or ground [illegible] 40 lbs.

[illegible] 40 lbs.

[illegible] 40 lbs.

[illegible] 20 lbs.

Bone Meal 2 lbs.

[illegible] 1 lb.

[illegible] 12 [illegible]

[illegible] 2½ pints

[illegible] has proved a total mortality during the [illegible] period has averaged [illegible] per cent for the past [illegible] market price [illegible] thoroughly mixed to [illegible] ground [illegible] will become [illegible] At the Experimental Farm, Brandon, water is supplied [illegible] during the first ten days and after this [illegible] After the [illegible] four to five weeks old the [illegible] reduced and the ground [illegible] are not sifted. After [illegible] out of doors for [illegible] in the sunshine, the cod liver oil is left out of the mixture.

Onions And Opinions On Their Affinities

"If a man has two loaves he will sell one and buy a [illegible] [illegible] which [illegible] has been construed as signifying gratification of aesthetic taste, whereas the more materialistic meaning is to be taken to that he was [illegible] add variety to his diet, for the [illegible] bulb was meant to season the loaf.

As yet no bulb has been discovered to replace the onion in popular favour for culinary purposes. Whether served baked, boiled, fried or stewed, its flavour is distinctive and lasting. But the real onion addict likes his raw. The season for spring onions is fast approaching, when zealous gardeners, who grow their own will watch and wait impatiently for these first fruits of their toil plucking them in their early infancy to gratify a craving for the aromatic palatable greens and spite their neighbours.

A [illegible] and his clerk, whose working positions in the office were at opposite sides of a broad desk, had a difference of opinion on onions, neither legal nor illegal. It was the custom of the clerk to indulge [illegible] of spirituous stimulant daily after lunch hour and to chew a clove to conceal the odor. One day, failing to find a clove he substituted a green spring onion. On resuming his place at the desk, facing the [illegible] he was greeted by the latter's scowling and reproachful remark: "I've stood the odor of whiskey and cloves for twenty years, but I draw the line at whiskey and onions."

[illegible] potatoes [illegible] the best [illegible] and [illegible] Muck soils are [illegible] phosphate and potash [illegible] and these [illegible] for potatoes [illegible] large [illegible]

The Role Of The Dual Purpose Shorthorn

(Experimental Farms Note)

[illegible] Dual Purpose [illegible] Experimental [illegible] Saskatchewan [illegible] purpose [illegible] and where beef production [illegible] beef breed may be more desirable.

[illegible] "Dual Purpose" Shorthorn [illegible] Dual Purpose [illegible] Canadian breeders would prefer to [illegible] "Dual Purpose" [illegible] and have first consideration given [illegible] beef type with whatever milk production could be obtained without [illegible] of affecting beef type.

[illegible] Dual Purpose Shorthorns were first introduced in 1921. A little later a few beef bred females were obtained, sired by [illegible] 161966 and [illegible] Marquis 171025 and King Edward [illegible]. A large percentage of all the mature females [illegible] have qualified in the R.O.P. tests for Shorthorns and some of the beef bred cows of a somewhat thick [illegible] type hold some of the high records in the herd.

The casual observer can see a marked improvement in type and quality of the Dual Purpose Shorthorn during the last decade. The upstanding animal is less common and there are fewer breeders who are willing to sacrifice beef type to get a high milk record. The growing tendency is to be content with a reasonable milk record and to maintain a high standard in beef type.

The Distribution of Wealth

The mal-distribution of wealth and property in Great Britain is described as "great and shocking" in a report prepared by a committee of the Liberal party in that country. More than three-quarters of the population the report states, own practically nothing. Only 2.4 per cent of the male population own estates of more than $25,000 and only 8 per cent own more than $5000 each.

The situation as outlined in Great Britain is comparable to that existing in most countries. Certainly, under the capitalistic economy, it seems impossible to obtain a fair distribution of wealth.

Supporters of the co-operative movement advocate its adoption as the most reasonable method of preventing vast accumulations of wealth in the hands of a few. The co-operative movement is peculiarly designed to offset the habits of greed in the building up of huge individual fortunes. Co-operation never made a millionaire.

It would appear, according to the records of history, that humanity at large has always been subject to the greed of a few people for great wealth and power. An examination of the mediaeval tax rolls tends to show that the rich were probably as rich then as they are today. Property does not seem to have been distributed with any degree of equality in the ages now considered romantic because they are so remote.

Sombart points out that in Augsburg in 1471, over 65 per cent of the population had no property at all. In parts of Germany 3 per cent of the population held a third of the urban wealth. In Paris, 1 per cent of the people pay 27 per cent of all taxes. In ancient Rome, 2000 people were said to have ruled the Empire.

This is the record of the ages and well informed people know the record of modern times. Sixty families are said to control the wealth of the United States, two hundred families the wealth of France and a similarly small group the wealth of Britain.

Under democracy the only reasonable way to prevent the building up of mighty fortunes in a few hands, is a far reaching development of the co-operative movement.— Wheat Pool Budget

Potato Planting Dates

(Experimental Farms Note)

At the Experimental Farm, Indian Head, Sask., a project was laid down to determine the time to plant potatoes to secure the greatest yield of marketable tubers. Plantings were made as early as the middle of April and at ten day intervals later. It was ascertained from the records that on the average it takes unsprouted potatoes a month to emerge after planting. Assuming this to be so and that danger of late spring frost is not over until the first week of June, it would seem that planting the first week of May would be most suitable.

Results bear out these conclusions. April plantings in general were lighter, more often than not the early plantings were frozen after [illegible]. Production from plantings [illegible] the middle of May was [illegible] lighter and with a higher [illegible] of culls than from those [illegible] the first half of May. Plantings made during the first week of May were the heaviest yielders in the greatest percentage of cases, those made during the second week being next. Results were secured [illegible] carried out with unsprouted [illegible] of Irish Cobbler, Early Ohio and Bliss Triumph varieties of potatoes.

New York's Broadway drama has [illegible] proportions with [illegible] the next step is to have the actors [illegible] —Richmond Times Dispatch

[illegible] following factors have tended to lower prices: Rains in Australia, [illegible] in Western Canada, [illegible] political conditions throughout Europe. Rains over large areas of Russia and Hungary. Prospects of increased wheat acreage in Argentina. Germany mixing large proportion of corn and potato flour with wheat flour.

THE ROOT OF ALL EVIL?—

A VERY INTERESTING broadcast came over the Canadian Network on Sunday last. Entitled "Whither Democracy" it really resolved itself into a case for and against Communism. One gentleman spoke from Toronto and the other from Winnipeg, and both were able exponents of their particular beliefs. But it was not so much the subject matter of the two addresses that prompted this writing but rather a quotation given by the Winnipeg man. Attributed to Lenin, the following quotation was given: "The root of all evil is the stupid respect for the will of the people." The foregoing quotation will, to those people steeped in the doctrine of democracy, cause much surprise. To them the "will of the people," based upon the principle of majority rule, is a matter bordering upon things sacred. To suggest anything else in the way of government is heresy of the first water. At least that is how it used to be. Now,—well, listen to a few acquaintances speek on government matters and note if they say something like this. "Well, I believe in democracy, but I am not so sure that a dictatorship wouldn't do just as well." We believe one would not have to go very far or listen very long to hear expressions like that. And why? Is it because Hitler has such a large following and Mussolini his legions. We doubt it. They may have focussed attention upon dictatorships but their methods have set up no great craving for a replica of them in countries still adhering to democratic principles. That murmur of discontent with present day democracy; that rather nervous letting go of the support which sustained our fathers in their political thinking; that flirting with the unknown quantity, dictatorship, should be able to be explained somehow.

The will of the people is the escence of democracy. But just as the quality of a garment is influenced by the quality of the threads from which the cloth is made, so is the spirit of democracy influenced by the quality of the warp and woof of the will of the people. Perhaps when Lenin coined the "root of all evil" phrase he was arrogant and lordly; or, on the contrary, perhaps he was a friend of the people, hoping to better their condition by what he deemed his superior thinking. But which ever way his heart and head pointed, he touched a vital spot in the whole democratic set-up. Rather ruthlessly he flung aside the curtains of democracy's sentimental attachments; its legal rights; and its moral rights, and laid bare what was probably then as now, the crying need of the hour, the lack of democratic wisdom.

It should not be very difficult for the average voter to perceive that if government measures in democratic countries really eminate from the will of the people, there is a direct connection between the quality of legislation passed and the wisdom contained in the will of the people. Furthermore, if the quality of the legislation enacted by various democratic parliaments have been such as to bring about slightly more than curious glances towards Fascism by democratic peoples, then what is the answer? The answer plainly is education. If the will of the people is to prevail, it must be an intelligent will wisely expressed. The privilege of the vote will have to embody the obligation to think and reason along political lines. And this obligation should be preceded by education that would help young people especially, to cast their ballots according to their own choice, rather than how they were persuaded by some party or person vitally interested.

But whatever the immediate fate of "the will of the people" throughout the former and present democratic countries may be, sooner or later the will of the people will again assert itself. A year or so ago we published an article relating to the enduring qualities of grass. The will of the people is something like that. Whether it is viewed in the light of an intruder crowding out planted crops, or whether it is viewed in the light of a beneficient covering for a bare hillside, makes no difference. The upheavals and descriptions of political society may mar and sear the will of the people, but they never completely obliterate it.

THE WRONG WORD

Last year the Columbia program committee invited Dr. Angell of Yale as a speaker at one of the weekly chapels. He traveled down from New Haven entirely without a text for his speech. He got off at Grand Central, and was still unprepared. He took a taxicab up to the Heights and still had no idea of what he would say. Walking up the chapel steps he quite suddenly saw a sign on the door: PUSH. That would be his topic; he would speak about the value of aggressiveness in life, of gentle force in the world.

Upon the platform he began to speak: "The text for my speech is not drawn from the Bible, or from any great philosophy; rather from a sign on the chapel door naming the chief asset that a person may have." His entire audience twisted their heads and saw inscribed on that chapel door the word: PULL.—West Point Pointer.

Feeding and Care of Chicks

(Experimental Farms Note)

Three of the essentials in rearing healthy chicks are good strong chicks, reasonably good equipment, and good feed. With the sale of chicks by grade the buyer in Canada today is protected as never before; and food and equipment can be purchased with every assurance of giving satisfaction.

Before chicks are placed in a brooder house, it should be thoroughly cleaned by washing out all the dust and dirt. The floor and the walls near the floor should be then scrubbed with hot lye water, after which the building should be given a good spraying, using a strong solution of a coal-tar disinfectant. The brooder stove should then be set up to dry out the house, the stove being regulated to maintain a temperature of 90 degrees at the outside of the hover, two inches off the floor. Place a low wire screen around the stove two feet from the outside of the hover, so that the chicks [illegible] away from the stove during the first few days. When the wire is removed, round off all corners of the brooder house so that chicks cannot crowd into them. Place on the floor a clean litter of shavings, peat moss, finely cut straw, or fine gravel (never use sand or loam). With a vessel filled with lukewarm water for each fifty chicks the house is now ready for the arrival of the brood.

It is advisable never to place more than 250 chicks under one hover, preferably 200, if the chicks must be confined till six or eight weeks old. A small handful of fine grit or gravel may be mixed with the first starter-mash, which is placed on clean boards or paper. Feed several times daily for two or three days, after which the starter may be placed in low hoppers. After the first week place the feeders and water fountains on frames three inches high covered with small-mesh wire; this prevents the chicks from coming in contact with the litter near these dishes. Scrub out the water fountains daily.

Start reducing the heat of the brooder house as soon as the chicks are ten days old, or past the baby stage, so that by the fourth week the only real warm place is under the hover; this may be accomplished by opening up more curtains, allowing more fresh air. It will be found that this will increase feed consumption, resulting in more rapid feathering and producing a healthier chick.

Up to the time a chick is two weeks old maintaining uniform heat and keeping a supply of starter and clean water before the chicks is all that is required. From then on a more bulky feed is required or the chick will develop too rapidly with weak internal organs. To meet this need sprouted oats and sometimes mangels, are fed. The oats are fed in worn-out pails fitted with wire bottoms, and hung in the pens so that the chicks have to jump to pick out the oats, as the chicks grow the pails are raised. This feed supplies three important needs of early brooding; it gives a supply of green feed, adds bulk to the ration, and keeps the chicks active. Twice during the day the feed hoppers are taken up to allow the chicks to become hungry. Scratch grain is added at the second week, the amount being gradually increased to all they will clean up late in the afternoon. This is fed in the dry-mash hoppers.

The matter of how often a brooder-house should be cleaned is debatable. Experience shows that cleaning twice each week, in preference to once, and placing all food and water dishes on wire frames, has reduced to a minimum adult mortality due to paralysis and coccidiosis. Observations indicate that adult mortality can be cut down by eight or even ten per cent, by practising more sanitation in brooding and rearing.

Help The Red Cross!

One Dollar will make you a member of the Red Cross of Alberta for one year.

Do not wait to be asked for it, send your dollar to Lt. Col. D. H. Tomlinson, Commissioner, Alberta Division, Canadian Red Cross Society, 17 Customs Building, Calgary.

Do you realize that membership in the Society means you are doing your bit for Crippled Children in this Province who cannot be helped in any other way.

Lauder On Thrift

Many jokes dealing with thrift have been written around the Scottish people. Sir Harry Lauder, once said, "Maybe you'll be wanting my definition of the difference between thrift and stinginess. Thrift is keeping your money in your pouch biding the day when you'll need it. Stinginess is putting a padlock on your pocket—and your heart—to keep from helping the other chap when he's needing it."

HEALTH

A health service of the Canadian Medical Association and Life Insurance Companies in Canada

What To Eat To Be Healthy

Minerals

[illegible] that twelve minerals are required for an adequate [illegible] from a practical standpoint we need only be concerned with a supply of three of them, because if our diet is at all a reasonable one, it will contain adequate amounts of the others. The three minerals that we must be aware of:

CALCIUM, the lack of which causes defective bones and teeth.

IRON, the lack of which causes anaemia.

IODINE, the lack of which causes goitre.

There is a constant storage and use of calcium in the bones and a person may appear in the best of health [illegible] bones may not contain as much calcium as they should. In time [illegible] deficiency will interfere with health. For example, a pregnant woman [illegible] to suffer from [illegible] because there is a heavy [illegible] drain [illegible] calcium [illegible] If she doesn't have adequate amounts in her diet [illegible] taken from her bones and teeth.

The greatest sources of calcium are milk and milk products. To get an adequate supply [illegible] each day [illegible] the growing child who [illegible] should take a pint and a half of milk. Cheese is an excellent source of calcium too.

Iron is obtained largely from vegetables and fruits. Other sources are eggs, liver and kidney.

Iodine is obtained largely [illegible] sea foods. People who live remote from the sea have to depend largely upon iodized salt as their source of this mineral food.

The following foods give you minerals:

Milk and cheese, eggs, liver and kidney, leafy vegetables such as celery, lettuce and cabbage, also fruits and iodized salt.

Remember: milk and cheese for calcium, eggs, liver, kidney, vegetables and fruits for iron; and iodized salt for iodine.

Questions concerning Health addressed to the Canadian Medical Association, 184 College Street, Toronto, will be answered personally by letter.

A woman correspondent writes: "All I have to say to my husband is 'Are you going to mow the lawn or aren't you?'" And then he either does or doesn't, of course. — Punch

Canada May Grow Sugar Beet Seed

At all the Dominion [illegible] of sugar beet seed are required annually [illegible] sugar factories in Canada. This seed is imported almost wholly from Europe. [illegible]

[illegible]

[illegible] results are important in that [illegible] that in the comparatively mild winters of Vancouver [illegible] may be successfully [illegible] in the ground and that [illegible] and consequently the [illegible] the winter has [illegible] bearing on the amount [illegible] If in the succeeding [illegible] of the experiment the results [illegible] comparable to those already [illegible] a method of producing [illegible] beet seed at sufficiently [illegible] to provide the Canadian market requirements may have [illegible] found.

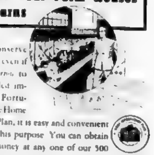
A Sermon in Bleaching

A minister was once riding in Scotland by a bleaching ground where a woman was at work watering her web of linen cloth. He asked her if she went to church, what she heard, and how much she remembered of Sunday's sermon.

She could not remember even the text.

"And what good can the preaching do you," asked he, "if you forget it all?"

"Ah, sir," replied the woman, "if you look at this web on the grass you will see that as fast as ever I put the water on it the sun dries it up, and yet, sir, it grows whiter and whiter."



Modernize Your Farm Houses —and Barns

It pays to conserve farm buildings, even if you have to borrow to make the needed improvements. Fortunately, under the Home Improvement Plan, it is easy and convenient to borrow for this purpose. You can obtain the necessary money at any one of our 500 branches, and repayments may be made on easy terms. Just drop in and tell your requirements to our nearest branch manager.

Trail Riders Plan Perfect Mountain Holiday

THE Trail Riders of the Canadian Rockies have an unusual holiday tidbit set aside for the end of July when they will make a five-day exploratory trip through the picturesque section of the Rocky Mountains northeast of Banff.

The society which was organized to open new trails through the mountains and [illegible] an unrivalled mountain [illegible] at the lowest possible cost has made many interesting trips in the past but few with more promise than this year's from July [illegible] to August 2. They will ride [illegible] and doing [illegible] in the shadow of [illegible] peaks they will find time for fishing or camera studies of the beautiful scenery or the big game which is found in such large numbers, they will enjoy campfire singsongs and a bang up Pow-wow at the end of the trip. These outings have become so popular that many Americans plan their holidays at Banff Springs Hotel or Chateau Lake Louise or one of the several attractive bungalow camps every year to coincide with the annual Trail Hike or Trail Ride.

It is a trip which will attract the novice rider as well as the experienced horseman for the horses used are sure of foot and easy to handle. Experienced guides, cowboys and cooks will be along to smooth the trip, while arrangements are well under way even now for the Trail Riders to find a comfortable camp and a warm meal waiting at the end of each day's ride. Two nights will be spent at one of the camps — the one nearest to the best fishing and most spectacular scenery.

Interest in this year's outing is keen according to J. Murray Gibbon, Windsor Station, Montreal, the secretary-treasurer who said that he expects there will be many new members in the party leaving the Banff Springs Hotel for the start of the ride on July 29. Photographs show scenes from the rides of former years and clearly indicate the joys of the mountain trails.

The Mercury Visits The British Columbia Coast

THIRD ARTICLE

If readers were privileged to look into quite a large number of British homes, forty, fifty, or more years ago, or perhaps even now, they might witness a scene like this.

"Now, Tommy, it is time for Mother's stout. Here is the jug. I've put some Demerara sugar in it." And away would go Tommy to the nearest public house to obtain Mother's drink. Stout is a [illegible] beverage made from [illegible] and burnt malt with [illegible] and other things added. There are different varieties some having [illegible] in nourishing [illegible]. Years ago and perhaps even now it was common for some [illegible] young mothers to partake of a limited quantity of stout. And [illegible] hangs a tale.

Greater Vancouver comprises a number of districts some of which are reached by street car and two at least, North and West Vancouver, by ferry. We had heard something of a new development project at West Vancouver for a day or so and decided to go and see it. What we were going to see was very hazily pictured in our mind, but a development project [illegible] and [illegible] agents. They [illegible] to be excused if we were suspicious of the [illegible] of a very obliging [illegible] we met at the [illegible] it happened like this. [illegible] the Vancouver [illegible] are very [illegible] and obliging to a stranger. Perhaps because they have so many of them they have acquired a technique in handling them. The telephone [illegible] answer with a pleasant [illegible] the intonation of which puts one at ease. And right [illegible] street railway men [illegible] show a willingness to give needed information. However this was one time we had to dig for information. Desiring to go to West Vancouver we go to a kiosk (little [illegible]) and ask if they sell tickets to West Vancouver. "No, North Vancouver" was the reply we got. That didn't help much as we knew that. A second search for a ticket wicket didn't help either, so we went back again. "Would you tell me where to buy tickets for West Vancouver?" we asked. "You'll find your instructions down there" pointing down a decline, was the reply we got. Down we went but there was still no ticket wicket or instructions. That is how we came to meet the man who thought'—

Alberta Has Everything

He was sitting, waiting for the boat and from him we learned that West Vancouver ferry has no wicket [illegible]. It is run like a street car, the "conductor" coming round with his little box and collecting tickets or money. This gentleman was very courteous and obliging and was apparently much impressed with Alberta's natural resources and stores of potential wealth. He was also very much interested in the Alberta angle of social credit. Consequently the ride over was rather a hectic one. Our eyes would be roving over the ever changing panorama of the water front. Among a number of smaller craft we saw a large ship heading out to sea and wondered where it was going. At the same time we were answering questions and explaining the best way we know how, the whys and wherefores of social credit here. Our remarks, in part at least, might have been slightly incoherent. But it is difficult for a person's mind to absorb and give out at one and the same time. However, the gentleman did not try to sell us anything, on the contrary, offered to have us conveyed to the British Pacific Property Ltd., home site. This conveyance we politely refused but carefully noted the detailed instructions how to reach there by walking. They were of considerable value, it was quite a walk, but it was well worth it.

Green Grass and Waiting Fifty Years For Profit

The opening up of a new home-site is a common enough event on the American continent, but here at West Vancouver, was something really different. A British Company, the British Pacific Properties Ltd., purchased a good sized piece of land from the Municipality of West Vancouver and proceeded to develop it. It is the roughest kind of land to be found anywhere, consisting mainly of rocks, trees and stumps. It is also quite hilly. Into this kind of territory they sent surveyors, engineers and heaven knows what. And today they have a project that in some respects at least, we believe is without parallel anywhere. In addition to purchasing the land they made arrangements with the provincial and dominion governments whereby they will build a bridge from Vancouver to West Vancouver. The end spans are now in position and it is expected the new bridge will be opened in 1939. The bridge will, of course, connect with the new home site. We wonder if we can adequately describe this homesite. The approach is a wide straight avenue, named Taylor avenue, after we believe the chief engineer. That road is the last word in the art of road building, slightly crowned, we could not find a dip of any kind. We were told the road was actually built up layer by layer. On top is a coating of fine round pebbles, about the size of peas, imbedded in the asphalt. This is the only straight road on the homesite and runs into an oval with a large flower bed in the centre. From the oval which is of generous size, runs two curved roads and from, these other roads run. A map of the homesite shows curved roads running in all directions. The roads are all finely finished, but not quite so elaborate as Taylor drive. At each intersection there is a signpost. And we never saw quite as smart looking signposts before. The post is 4 inches by 4 inches, stained mahogany color. The sign itself, polished mahogany stain, is fastened to the post with scroll iron work and the lettering is in gold. Next to these signposts is nature as God left it.

We went on up the road to find the golf course. Not to play golf, but we wanted to see the $75,000 club house erected upon it. We saw the building from a distance, an elaborate affair, but what interested us more than the building was the putting green. Type, black ink and white paper can't hope to convey to you the sheer beauty of that patch of grass. We have seen good grass before, plenty of it, in England and elsewhere. But this grass was really beautiful with a glittering sheen which played with the passing shadows.

The whole project, homesite and bridge has already cost millions of dollars and will cost millions more. It is British capital that was looking for a long term investment, as sure as things like that can be, yet with a heavy initial expenditure. They expect, so we were told, the venture to show a profit in about fifty years. Incidently, if you would like a plot of ground there you may have one for anything between $4000 and $14,000. And then you get a plot of rocks, trees and stumps. But some day in the future, West Vancouver will be replete with fine homes.

The capital, so it was explained to us, came chiefly from a prominent brewing firm in the United Kingdom.

"Now, Tommy, it is time for Mother's st—."

NEXT WEEK: A $9,000 ROOM HOTEL FOR CHICKENS.

Extract of 1937 Council Minutes

The committee decided that they would take no notice of such matters as relief, old age pensions, mothers' allowances, etc. this is one reason for the apparent paucity of business done in some of the council meetings. They also decided to abbreviate the minutes as much as practical and still leave the sense. In some cases we have not given a complete quotation.

Feb. 12, 1937—Road program was outlined and requests for graveling of road to Kingman referred to the department.

The report of the inspector of municipalities was read stating that the accounts of the Municipality were accurate and that a separate account was kept for trust funds. That there was no auditors check mark on N.S.F. cheques for 1936.

March 13, 1937—Mr. T. J. Glenn and Mr. McSporran were re-elected and Mr Glenn was chosen reeve and Mr. McSporran deputy reeve.

Decided that Dr. Law be re-engaged as health officer at a fee of $1000 per annum to include that care of indigents with major operations for same and that he be asked to inspect the schools at least once a year and examine the children as to their general health. It was mentioned in that regard that the Doctor had taken care of 29 major operations during 1936 according to his report.

Heard delegation requesting that road be built from Tofield South past the coal mine.

Received report from Lawyer McLean re the Dow claim against the municipality for $7000 enclosing his bill for $781.38.

Decided in reply to seed grain requests that there was ample seed in the district and that none would be furnished by the municipality.

Interviewed re the use of catapillar tractor for 1936.

Moved by Holmberg that: Council does not approve of paying for the publication of the minutes in the Tofield Mercury; however if the secretary and the editor desire to publish the minutes free of charge that the council have no objection. Carried.

April 2, 1937—Ask Lawyer McLean to reduce his account.

Arrange for tax sale.

Decide that each division be allowed $300.00 and that $7000 be allocated for general expenditures. That the mill rate be set at 15 mills for Municipal purposes. And that general work be done with power equipment.

Entered into lease-option with the Union Tractor Co. for a No. 60 Deisel tractor for $6,000 to be paid in installments from 1937-1940 with interest at 6 per cent on unpaid portion.

Ask the secretary furnish the department with a copy of the judgement rendered by Justice Ewing re the Dow action with the suggestion that the Municipality Districts Act be amended in such a manner that no action against any district be allowed unless the department give their approval unless Municipality is not willing to abide by the decision of the board of arbitration.

June 11, 1937—Decided to purchase new Adams 8 foot Rotary Scraper for $[illegible].

Appointed weed inspector and inspector of ground fires.

Express appreciation of Mr. McLean's reduction of his fees.

June 29, 1937—Raised the contract with the grader man to 90c per hour to avoid his leaving.

Decided to continue work with the power outfit.

This meeting was at the home of Mr. Holmberg at Hay Lakes.

August 14, 1937—Appoint tax collector with remuneration to be arranged. Discussed land sales, taxes, relief, health, etc.

October 15, 1937—Appointed delegates, secretary and deputy reeve to the municipal convention.

Donated Salvation Army $100.00.

Passed Hospital accounts. Made arrangements for repair of machinery and pay for same. Appointed returning officer. Voted to give Mr. O. Letourneau two month's leave if the department gives it's approval. Purchase trucks for oil wagon. Purchase lot for $25 and decide to build garage on same. Decide to charge all schools 10 per cent for all collections made by tax collector.

The committee were also instructed to review the contract for the elevator grader. The purchase price was $1,925 in installments due periodically until Jan. 15, 1941, notes were given for each installment.

GEO. G. ABERNETHY,
Chairman Committee.

AMISK CREEK

Rev. Hoverstein held his first service in the church after returning from the States where he spent the winter.

Mr. and Mrs. Walen are working for Ralph Olson this season.

Mr. and Mrs. E. A. Moen motored to Phillips last Saturday. Hilmar returned with them after spending the winter at the elevator there. He will be moving to Hazeldene this week.

Mrs. R. O. Berg spent a few days in the city last week. Arnold motored up last Saturday, Mrs. Berg and Lily returning with him. Lily attended university in Edmonton this past winter.

Hermie Annebo spent the Easter holidays at her home here. Agnes Annebo from Camrose spent Good Friday at her home, returning the same evening.

Mrs. E. A. Moen, Alice Berg, Mrs. U. Garthre and Mrs. P. O. Flaaten visited with Mrs. P. C. Moen on her 50th birthday, April 13th.

Mr. and Mrs. C. Erickson, son Donald, Mr. A. Erickson, Mr. and Mrs. E. O. Berg, Alice and Arnold and Mr. and Mrs. P. O. Flaaten were dinner guests at the J. Annebo home on Good Friday.

Mrs. G. Lagergren and children from Edmonton have been visiting with old friends around here for a few days last week.

Mrs. P. O. Flaaten was an overnight guest at the H. Jensen home from Friday to Saturday last week.

Miss Ruby Berg from Edmonton spent Easter Sunday and Monday at her parental home here. R. O. Berg and E. A. Moen motored up to the city with her Tuesday morning.

Mr. and Mrs. Jacobson and Mavis, Anna and Alfreda Berild, Mr. and Mrs. Berild, Alice, Lilly and Arnold Berg, and Mr. and Mrs. P. O. Flaaten were visitors at the E. A. Moen home Sunday evening.

Mrs. C. Ward and children were visitors at the E. A. Moen home Saturday evening.

A few have started in the fields, but spring work will soon be general.

Mrs. J. Berild and Mrs. P. O. Flaaten were callers at the Dordeck home last Monday.

Mrs. J. Berild and Mrs. G. Lagergren and children visited at the E. A. Moen and A. Patterson homes last Friday.

Our Visit to Mr. Oulton's Farm

By PETER WARKENTIN, Age 12, Lindbrook School

On April the twenty-ninth we went to Mr. Oulton's farm to see his geese. Little we knew of the fun we would have. We had school till eleven o'clock and then Mr. Oulton took us to his farm in the truck.

When we arrived there, we went to see a goose with her nest just beside the road. The gander was there too. He was fierce and protected the nest. We took a picture of the goose and the nest and then went to see the peacock.

He had a lovely green tail and a blue breast. He made a very queer noise when we came near. His tail was about seven feet long. There was another small one which had no long tail.

Then we went to see another pair of the Canada Geese near an old boat. This gander would jump on Mr. Oulton's back and once the gander took Mr. Oulton's hat off.

Then we went to see the Snow Geese. They were smaller than the Canada Geese and very pretty.

Next we went to see another pair of Canada Geese near a creek. The goose had her nest well hidden under a willow bush. It was made of straw, reed and feathers. The gander was fierce and would have nipped our legs if we had gone too near the nest.

We went to see the peacock once again to see if he would fan his tail but he didn't.

We next went to see a very old pair of geese near the creek. The gander came up to us and looked at us. He had some brownish grey feathers on his head because he was over sixty years old.

Then we went to the house and got some popcorn and candy. Then we climbed on the truck and went back to the school. We all enjoyed the trip a great deal.

Baked Ham

1 slice raw ham 1 inch thick
1 tablespoon flour
2 tablespoons brown sugar
1 teaspoon mixed mustard
Milk

Mix together the sugar flour and mustard. Rub well into both sides of the ham. Lay in shallow baking dish. Pour in enough milk to cover ham. Bake in a moderate oven for thirty minutes or until ham is tender and thoroughly cooked. Add more milk during he cooking if needed.

LINDBROOK

Instead of our usual May snow storm this year it turns out to be rain, which, although it puts the roads on the bog is very helpful and better than snow, as snow means more forage which is none too plentiful.

The school children and teacher paid a visit to Mr. Oulton's farm, but we append a composition by one of the pupils which tells in full of this visit for which the parents of the children and the rest of us extend our hearty thanks to Mr. Oulton for his kindness.

Mrs. Eedine of Calgary was here this week visiting old friends and relatives.

Arbor Day was to be observed last Monday by the schoolchildren by a wienie roast and hike, but the rain preventing same, the children still have that treat in store.

We regret to hear that Mr. J. Baily was on the sick list this week, and hope that by now he is O.K. again.

UNITED CHURCH NEWS

Sunday May 8th is Mother's Day. At 11 a.m. the program prepared by the Religious Education Council will be used by the Sunday School in Tofield. It honors the memory of Susannah Wesley, the mother of John and Charles Wesley. The dramatization of 3 scenes in the life of the home are well depicted. A cordial welcome is extended to parents and adults.

At 11 a.m. this same program will be carried through by the scholars of Lakeshore Sunday school. It is expected there will be a good turn out of parents and grown-ups.

At 2 p.m. the program and order of service will be used at Ketchamoot. Mother's Day appeals to everybody and a good attendance is looked for.

In the evening Mother's Songs will be sung. The choir will assist in the music and there will also be a duet at the United Church Service.

Let us all unite in honor of the name, the memory and the personality of Mother.

LOCAL & PERSONAL

Mr. and Mrs. N. Noland from Yoncalla, Ore. are visiting in Tofield. Mr. and Mrs. Noland came through with Mr. John McGinitie.

Miss Lucille Stevenson from Clive is visiting her home here.

Miss L. Ross returned Sunday evening from Vancouver where she spent a three week's holiday. While there Lovett saw many ex Tofielders and had a very enjoyable visit with them.

Mrs. Fox from Crossfield, Alta. president of Rebecca Assembly, is visiting with Mrs. Bert Lovell.

Miss Betty McCarthy is spending her holidays at her home here.

Corp. and Mrs. Baynes from Jasper were visitors in Tofield on Wednesday of this week.

Born: To Mr. and Mrs. H. Vague of Kingman, at the Gray Nursing home, on April 27th, a son.

The building on main street formerly used as a butcher shop is being renovated. Mr. Geo. McFadzean, will, we understand, shortly open up a drug store there.

Rev. Wallis received the sad news this week that his father had passed away in England.

Mr. W. Louden, who has been working in Eastern Canada for several months returned to Tofield this week.

Edmonton Journal Winner Special Pulitzer Award

NEW YORK, May 3— A special public service Pulitzer prize, in the form of a bronze plaque was awarded to The Edmonton Journal Monday "for its leadership in the defence of the freedom of the press in the province of Alberta."

Engraved certificates were awarded to other daily and weekly newspapers in Alberta which co-operated with The Journal.

John M. Imrie, vice-president and managing director of The Journal will accept the precedent-making award at the silver anniversary diner of the Columbia University-Pulitzer Graduate School of Journalism, to be held at the men's faculty club here.

Regarding the special award to Edmonton Journal, the nominating committee issued a statement saying:

"In Canada there is no constitutional guarantee of freedom of the press. Hitherto this right has been assumed but since 1935, the Social Credit government of Alberta has challenged this assumption in four different ways and still does.

"The present nomination revolves about the Alberta press act of October 1937, which would have abolished freedom of the press in that province.

Under the leadership of John M. Imrie of Edmonton Journal, the largest Alberta daily, the six dailies and 90 weeklies in the province were organized against the act. Their efforts led the provincial government to modify it, although in the amended form it still abolished press freedom as we know it.

Their campaign led to wide-spread opposition to the act and to a better popular understanding of press freedom, not only in Alberta but in all Canada.

"The lieutenant-governor of Alberta referred the act to the dominion government, whose supreme court declared unconstitutional in March 1938. The act will be reviewed again this summer by the judicial committee of the privy council in London, the highest tribunal in the British Empire."

Confectioners' Group Files $500,000 Damage Suit

NEW YORK, May 4—A $500,000 damage suit charging Shirley Temple's picture "Rebecca of Sunnybrook Farm" had libeled a candy bar was filed in supreme court Tuesday by the National Confectioners' association.

The scene objected to shows Shirley talking to her "Aunt Miranda." She was asked if she had had anything to eat.

"Oh yes I have" she replied. "Uncle Harry bought me a candy bar."

"A candy bar!" Aunt Miranda retorts, "Take the child to the kitchen and give her something decent to eat."

The confectioners claim they suffered because children view the child actress as a "model" and eschew everything not considered good for her."

Gallinger Bulls Purchased By Cross Brothers

Messrs. Cross Bros. visited the well known Shorthorn breeding establishment of Claude Gallinger at Tofield recently, and as a result they purchased two outstanding well bred young bulls.

One of these is the show animal Rothes 3rd, which stood next in his class at the last Toronto Royal, to the beautiful white bull, Sultan Landlord, which won first in the junior yearling class at the Chicago International and other leading State fairs.

The sire of Rothes 3rd is Lord Rothes, who won the grand championship at the C.N.E. Toronto and junior and reserve grand champion at the Toronto Royal in 1934. His dam is Good News, recently selected by the Hon. D. B. Mullen minister of agriculture for Alberta as the typical Shorthorn cow for classwork at the Olds School of Agriculture. Good News was junior champion at the Wisconsin State Fair as a yearling heifer when in the hands of the late Governor Al Shallenberger.

Rothes 3rd, with his good head thickness and wealth of natural flesh and closeness to the ground, should prove a wonderful asset to Cross Bros. as a herd sire.

The other bull is Danny Lad whose sire is Danny Boy Imp., who has proven himself one of the leading herd sires in America. His dam is Hercules Duchess 19th, by the great breeding and show bull, New Year's Gift. This cow is the grand dam of the beautiful heifer that stood fifth in a strong class at the recent Toronto Royal.

Danny Lad is one of the smoothest fleshed bulls that ever was raised on the Gallinger farm, and although he has never been shown should prove himself to be a real sire. —Market Examiner.

L.C.C. NEWS

The April meeting of the L. C. C. was held at the home of Mrs McHeffey on April 27th. The meeting opened by the singing of the theme song. The roll call was answered by verses and hints. Fourteen members were present and four visitors, Mrs. Lancaster, Mrs. McKenzie, Miss Logan and Miss Robinson. The minutes and financial report were read by the secretary, Mrs. Bracegirdle, both were accepted as correct. The next meeting to be held at the home of Mrs. R. Smith. The roll call to be answered by Mothers' Day verses. Visitors welcome. The meeting closed by repeating the Lord's Prayer. For entertainment the story "Miss Bringles Book" was started by Mrs. J. Brown. A delicious lunch was served by our hostess, Mrs. McHeffey.

Public Notice

Weekly Half-Holiday

Public Notice is hereby given that all shops, and places of business where goods are sold by retail in the Town of Tofield, will be required to close their respective places of business at the hour of one o'clock on each and every Wednesday commencing with Wednesday, May 18th, and continuing through the months of June, July and August. Dated at Tofield this 5th day of May, 1938.

J. W. CHAPMAN,
Secretary-Treasurer.

Red Northern Lights Are Seen At Mayo, Yukon

Residents of the Mayo silver district were afforded a beautiful and unique spectacle recently when red northern lights appeared in the skies to the south west.

The unusual phenomenon was noticed about 10 o'clock at night and, on first sight, it seemed that the vivid coloring was the reflection of a huge fire.

Meeting Of Holden School Division No. 17

Teachers of the Holden School Division No. 17, numbering about seventy [illegible] the Community Hall at Holden [illegible] April [illegible] at two o'clock in the afternoon. Mr. Wm. Dean of Viking, President of the District Association was in the chair.

Considerable discussion centered around the salary schedule which was finally accepted by the teachers. The salary schedule committee was instructed to meet the Division Board at its next meeting to try to secure a smaller discount from the schedules than the twelve per cent which had been suggested.

Mr. L. R. McLeay of Tofield presented final instructions regarding the Field Day which is to be held at Tofield on May 27.

A committee to arrange for a fall [illegible] was appointed with Mr [illegible] of Tofield as convenor. [illegible] went on record as favoring the holding of a School Festival in the Division next year. The [illegible] of a Festival Committee was left to the Executive.

[illegible] meeting was held in the basement of the United Church with Mr Dean presiding. Speakers were Mr F T Tyler of Edmonton who spoke on "Choosing a Life Work" and Mr. K Argue, also of Edmonton who spoke on The Teaching Profession. Both addresses were very inspiring.

COUNCIL MEETING

At a regular meeting of the town council held on Monday evening, May 2nd it was decided to extend the weekly half-holiday so as to take in the month of May. This in response to a petition presented to the council and signed by a majority of the merchants. It will not become effective this year until Wednesday May 18th in 1938 and in future years it will be effective for the whole month of May. A by-law was passed confirming this action. It was decided that no persons should be allowed to use the exhibition grounds for pasturing cattle or horses. The usual statement of receipts and expenditures for the previous month were read and considered. Some discussion took place regarding various phases of street work. Rates of pay for the time being were set at $1.50 per hour for tractor and man, forty cents per hour for grader man, fifty cents per hour for man and team and thirty cents per hour for casual labor. Present at the meeting were Mayor W. C. Swift, Councillors Dr. Law, H. W. Lovell, M. C. Hammond and W. Bellamy.

FOR SALE—A new fully modern house, six rooms including wood and coal shed. Write John Hewitson, Courtenay, B.C.

PASTURE FOR RENT—Plenty of water. Well fenced. Apply to Geo. Yager, RR 2 Tofield, Alberta.

FOR SALE—Ruby Rhubarb Roots. 5 cents each. Phone 909, Tofield.

He has [illegible] made several reports conducted several investigations into [illegible] following investigation of Nova Scotia mine disasters in British Columbia.

HEALTH

A HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION AND LIFE INSURANCE COMPANIES IN CANADA

What To Eat To Be Healthy

NUMBER SIX

[illegible] vitamins and minerals, the value of which we have already discussed in this series of articles on What to Eat to be Healthy, we must now consider the three important food essentials known as proteins, fats and carbohydrates.

The following foods give you proteins—

Meat, fish and poultry, milk, eggs, cheese, beans and lentils and flour.

The list above indicates that there [illegible] animal, vegetable and grain [illegible]. The most effective tissue [illegible] are the animal proteins.

The following foods give you fats—

Butter and cream, bacon and other fat meats, lard and vegetable oil, [illegible] and yolk of egg.

Fats are used chiefly to supply heat and energy. They are also essential [illegible] the [illegible] metabolism or working of the body. If some of the fatty acids contained in fats are withheld, the health of the individual will be seriously impaired. The proper amount of fat will be furnished if one consumes two ounces of fat per day. Butter is one of the best forms of fat.

The following foods give you carbohydrates—

Sugar, molasses, candy, jam, marmalade, etc., bread and pastry, macaroni and potatoes.

Our chief source of energy in foods is carbohydrates, and if we did not have this chief source of energy in the form of flours and sugars, with their wonderful keeping qualities, our modern civilization, with its huge consumption of food, could not exist. However, one must be careful, that due to their use in tasty products such as cakes, pastries, jams, candies, etc. and their easy accessibility, one does not consume an excess of these and thus crowd out the other food elements.

And now we conclude this series of articles on What to Eat to be Healthy by repeating what we said at the outset.

Every day of your life, except during illness, aim to have a pint of pasteurized milk, which includes that used in cooking, some meat, an egg, two cooked vegetables besides potatoes, and some raw fruit or vegetables. In addition, during the winter months, take a teaspoonful of cod liver oil daily, or some other source of Vitamin D.

Questions concerning Health, addressed to the Canadian Medical Association, 184 College Street, Toronto, will be answered personally by letter.

THE WORLD OF WHEAT

By R. G. L. Strange, Director Research Department, Searle Grain Co.

"Everyone seems to think that our Prairies this year have a chance of producing a good crop. If this turns out to be correct, can we sell it, and what is the price likely to be?"

I have received many letters asking these questions.

Considering the unrivalled quality of Canadian wheat, personally I have no fear about our ability to sell a good crop. What the price would be, however, neither I nor anyone else can possibly predict. It depends upon so many factors which are still in the making. For instance, how much wheat, and of what quality, will be produced by the various countries of the world? What quantities of other grains, meats, fruits and vegetables will be available? Will there be a war, or no war? Will the fear of and preparation for, wars continue? Will there be any further currency inflation? Will world-wide tariffs be reduced?"

All these things, and hundreds of others, directly affect price.

Because of the uncertainties in life, ancient philosophers have often pointed out the futility of worrying too much about the future. "Sufficient unto the day is the evil thereof."

One thing is certain, however. To produce a crop is the most important thing, for no farmer yet, even in times of the highest prices, ever made any profit, if he did not have a fair amount of grain to sell.

Following factors have tended to raise price: British Government purchases emergency wheat stocks—Russian spring sowings backward—Some frost damage in Europe—Rust reported in Texas—Further moisture needed in Australia—Rains still needed in Southern Europe—Scandinavia buys American wheat, barley, and rye—Adverse weather affects soy bean crop in Nyasaland.

Following factors have tended to lower price: Indian wheat crop of 380 million largest in many years—Argentine seeding continues actively—Prairies have sufficient moisture for germination—Dairy produce production increases in South West Africa—Large unabsorbed stocks of Dutch rye—Taiwan sugar cane acreage increases.

South Africa Looks Bright To Native Son

CALGARY, May 3.— Looking forward to "a happy life" in South Africa with the promise of steady employment, S. H. de Montille, a Calgary relief recipient for two years, started for Montreal last night.

De Montille, his wife and three children, who are Canadian-born, will sail from Montreal May 5. He was born in South Africa but has been a resident in Alberta since 1929.

"This is one time I feel very lucky to have been born in South Africa," he told friends at the Canadian Pacific Railway station. Many gifts were presented the family as the long journey started.

He is being repatriated to South Africa under a government scheme for native-born sons. The South African government advanced $800 for transportation and expenses of the family back to Durban, de Montille's birthplace. He will repay it when he has a steady job.

TESTED RECIPES

SPRINGTIME FOODS

With the approach of spring comes a yearning for lighter foods, and everyone welcomes a change from the more or less heavy meals which are served during the winter months. It is natural that such new food such as maple syrup, rhubarb and asparagus, which appears on the market as spring progresses, is heralded with delight and that other foods which suit the springtime taste are in popular demand.

The following recipes suggest a few of the many foods which seem to be rightly associated with warm, spring days, and should prove effective in whetting lagging appetites.

****

Jellied Ham Rolls

6 slices cooked ham
1 small bar white cream cheese
  or 1 cup cottage cheese
  Cream to moisten
1-2 cup horseradish
1 package lemon jelly powder
1-4 cup vinegar
2 teaspoon salt
Dash of cayenne

Make a paste of cheese, cream and horseradish. Spread generously on thin slices of ham. Roll tightly. Arrange rolls in mould. Dissolve jelly powder in boiling water to which vinegar, salt and cayenne have been added. Cool. Pour over ham rolls and chill. When thoroughly set, cut into serving shapes with one ham roll in each. Serve on crisp lettuce. If desired one-half cup seedless raisins may be added to the jelly mixture when partially set.

****

Eggs a la King

3 tablespoons butter
2 tablespoons minced onion
1-2 cup mushrooms, sliced
1 tablespoon chopped green pepper
3 tablespoons flour
1 1-2 cups milk
2 tablespoons chopped pimento
6 hard-cooked eggs
1 egg yolk
Salt and pepper

Cook onion in butter 5 minutes. Add mushrooms and green pepper and cook until mushrooms are delicately browned. Blend in flour. Add milk and cook, stirring constantly, until mixture thickens. Cook 10 minutes. Add pimento and hard-cooked eggs cut in quarters. Pour some of sauce over beaten egg yolk and stir into sauce. Cook one minute. Serve on toast. One-half cup green peas may be added in place of green pepper and pimento.

****

Cheese Sandwiches—Spanish Style

3 tablespoons chopped onion
2 tablespoons butter
1-2 cup chopped celery
2 cups canned tomatoes
1 tablespoon flour
Salt and Pepper
12 slices of bread
Cheese

Cook onion 5 minutes in 2 tablespoons butter. Add celery and tomatoes, and simmer 15 minutes. Melt 1 tablespoon butter, blend in flour, and add tomato mixture. Stir until sauce is slightly thickened. Season with salt and pepper. Toast bread. Place slices of cheese between each two slices of toast. Cover sandwiches with hot tomato sauce.

****

Pompadour Rice

1 1-2 cups cooked rice
3 tablespoons fruit sugar
Few grains salt
1 teaspoon vanilla
1 cup whipping cream
Maple syrup

Wierd Mountain Phenomenon CiCted By Jasper Guide

Jasper, Alta.— A new kind of animated cartoon was described here recently by Major Fred Brewster, famed guide and outfitter in this largest of America's national parks, located in the heart of the Canadian Rockies, who told a group of trail-riding guests at Jasper Park Lodge that travellers through the Rockies have occasionally seen their own image reproduced on a cloud, surrounded by a circle of rainbow colors.

It was the "Specter of the Brocken" phenomenon, familiar to European alpinists, and required the sun behind the observer and a bank of cloud in front, all at the same level. The image was reproduced on the cloud surface with weird effects as the giant shadow faithfully followed the motions of the spectator.

Although Major Brewster had never experienced this particular phenomenon, he told of crossing a high pass on one occasion when the sun broke the canopy of cloud and caused a giant double circle, vividly colored, to appear down the valley below. It was the rainbow and its reflection.

GROW YOUR OWN FRUIT from hardy tested varieties. Crab Apples, Plums, Sand Cherries, Raspberries, Strawberries, etc. Trees, Shrubs, Flowers etc. Write for list now or see list at Co-Op. Maurice McGinitie, Tofield. N.W. 17, 50, 19.

How To Control Garden Insects

One of the most enjoyable and satisfying hobbies within the reach of everyone is gardening. No home can be considered complete without a garden, either a flower garden, a vegetable garden or combination of both, and no garden seems to be complete without its insects.

In the control of insects, prevention offers a very definite place in the battle against them. Prevention may be adopted in several ways, but garden sanitation is of first importance. Many of the insects pass the winter under rubbish in and around the garden. All weeds and other refuse should be burned.

With plants, as with other forms of life, the weak and sickly are more susceptible to the attack of insects than the strong and vigorous. Accordingly, every effort should be made in the spring to stimulate rapid growth with a view to producing rugged plants. This can be done in a number of ways. The first and most important way is to use care in selecting the seeds by buying the best from an established dealer. Before sowing the seed, thoroughly cultivate and fertilize the soil. The seed will produce stronger plants if sown in warm soil.

For the average gardener it is not important to be able to name the different species of insects as it is necessary to know whether they are of the sucking or biting type. Some of the better known biting insects are cut worms, Colorado potato beetle, caterpillars and rose chafers. Among the sucking groups are aphids, leafhoppers, tarnished plant bugs and thrips. Biting insects are commonly controlled by dusting or spraying the infested plants with a stomach poison such as lead arsenate, calcium arsenate or Paris green. Lead arsenate is probably the most suitable since there is little fear of burning the plants with it. The sucking insects are best controlled with nicotine sulphate, but pyrethrum extracts, bellebore and oil sprays are gaining favour. One advantage of pyrethrum is that it is harmless to human beings.

Success in direct control [illegible] to a large extent on the early and thorough application of the proper remedy. Insects are much more easily killed when small than when they are fully grown. In dusting or spraying be generous with materials. One liberal application is more effective than several that are scanty. Treat both the upper and lower surfaces of the leaves, since many of the worst pests seek shelter under the leaves. Sprays and dusts should be applied on a warm day when there is little or no wind blowing. If repeated applications are necessary, they should be given at intervals of about a week or slightly less.

For further information concerning the control of garden insects the Entomology Division, Dominion Department of Agriculture will be pleased to give it.

"Quints" Save Their Birthplace

Before the Dionne Quintuplets were born in May four years ago, Callander, Ontario, was almost a deserted village, and the few residents there existed mostly "on relief." Two disastrous fires had wiped out the lumber mills that provided a livelihood to the populace, and they were never rebuilt. What had once been a prosperous industry withered and died. But then the "Quints" arrived and early in 1935 Callander awoke from its lethargy, realising it had a gold mine "at its front door."

Stores, hotels, tourist camps, garages, service stations, have sprung up everywhere. Real estate values have sky-rocketed. Best news of all to the villagers was of work a-plenty to be had. A trail leading from Callander to the Dionne home, three miles distant, had blossomed into a four-car paved highway, built and maintained by the Ontario Government. As many as 5000 cars have rolled over this road in one day, and last summer more than 750000 people visited the Dafoe Nursery.

The Canadian National, the only railway serving Callander, has even had to construct a new station to cope with increased traffic to the "Quints" birthplace. Incidentally Canadian National records around 1920 contain the name of Oliva Dionne, father of the babies, who was a section hand at different times before marrying and settling in the farm home which was to gain fame as the birthplace of the world's only living Quintuplets.

THE RED CROSS—

(Contributed)

WORKING WITH a degree of efficiency unrealized by most Albertans, the Alberta Division of the Canadian Red Cross Society closed the year 1937 with a record of services rendered of which its officials may well be proud. The record as summarized below is truly impressive:

In a general way 717 families representing 3,583 persons, were supplied with 7,513 articles of clothing and kitchen utensils, while in the drought area supplies were issued to 5,237 families, representing 26,185 persons.

To families who lost their homes and belongings by fire at Breton and Cochrane, relief was sent within 24 hours of the catastrophies.

Layettes representing 2,627 articles of clothing for new Canadians born in Alberta were sent to expectant mothers.

Many appeals from ex-soldiers and their families were investigated and relief afforded. The health by mail service operated by the division was particularly active and 90 nurses were enrolled for emergency service.

With 771 branches the Junior Red Cross branch of the Division's activities was increased by 104 over 1936, with the children most enthusiastic over the training they receive.

Perhaps the most impressive activity of the Division is the Junior Red Cross Hospital for Crippled Children, operated in Calgary. During the year there were 81 patients admitted from all parts of the province, while 53 patients made visits to the out-patients department for treatment.

Altogether the cost of the 1937 operations was close to $30,000. This had to be met by contributions from the public. The campaign for Red Cross memberships and subscriptions for 1938 begins on May 1st and ends on May 14th. The objective of the Committee is $20,000.

The Mercury commends the cause of the Red Cross to its readers and trusts that as far as possible they will rally to its support.

Grasshopper Threat

Much of Southern Alberta and a large portion of Central Alberta is threatened with the grasshopper plague this coming summer and warning [illegible] has been issued by the Federal Department of Agriculture showing the prospective degree of infestation in the different districts.

It would appear that the most threatened area is between Calgary and Lethbridge with an oval district extending between High River and Champion where a very severe outbreak may occur. A smaller area north of [illegible] is similarly threatened and indications of heavy [illegible] shown in the Milo-Arrowwood country.

Varying degrees of infestation are indicated from Tofield extending east and south through Stettler, swinging west to Olds and then south along the foothills right to the United States border. In the eastern side of the province, hopper eggs are present from twenty-five miles south of Lloydminster down to Cypress Hills. A large area from Redcliff to Brooks on the east and west and from Howie Post Office to the Bow River, north and south is indicated as free from grasshoppers.

Agricultural experts are recommending that farmers in threatened areas take the following precautions:

1. Every few days after May 10th, examine carefully all roadsides, headlands and weedy or abandoned fields and report discovery of any grasshoppers immediately to the municipal secretary.

2. Land to be summer-fallowed in 1938, should be cultivated shallowly early in the spring to bring egg pods to the surface where wind and sun may destroy them.

3. Do not sow stubble land if absolutely necessary to seed stubble, it should be ploughed deeply.

4. Plough four rod guard strips along all stubble fields. Cultivate such fields from the outside towards the centre and poison the hoppers in the centre strip.

5. Grasshoppers feed only when the temperature is between 68 degrees and 90 degrees F. in the shade, so poison bait should be spread while the sun shines.

The development of grasshopper plagues depend a great deal on the weather. A cold wet spring increases mortality among the young grasshoppers while fine weather gives them a good start in life.

The extensive damage can be done by grasshoppers is illustrated by the experience of 1934 when the loss due to grasshoppers in Western Canada was fixed at 14,000,000 bushels.—Wheat Pool Bulletin

Over-Wintered Colonies Versus Package Bees

(Experimental Farms Note)

Bees were acquired, by the Dominion Experimental Farm, Brandon, Manitoba, in June, 1889, primarily to ascertain their value as pollinators of fruit trees, to determine the possibilities of honey production in the North West Territories, and for demonstrating methods of management to farmer beekeepers, who kept bees to provide a natural sweetening agent for the table and other culinary arts.

Approximately half a century ago, evidently every effort was made to successfully keep the bees over winter. Cellar wintering of the colonies was practised with varied degrees of success, and outside wintering, in cases was introduced for those beekeepers or in those areas where bee cellars were not successful or could not be readily constructed.

The practice of killing off colonies of bees in the fall and re-stocking with package bees in the spring began when package bees became readily obtainable from the southern United States at reasonably low prices. A number of beekeepers who depended upon beekeeping in some measure for their livelihood and who had experienced large annual losses among their over-wintered colonies considered this new practice a boon to the bee keeping industry.

Experiments were begun in 1926 to actually determine the costs involved in over-wintering colonies of bees, the cost of procuring package bees and establishing the same and finally to compare the seasonal monetary returns derived from each group. Bees wintered outside, in cases, were chosen to represent the over-wintered group, primarily because it was considered that the cost of outside wintering, per colony, was considerably higher than the cost of cellar wintering.

The charges against over-wintered colonies include labour required to prepare and pack for winter, stores for fall feeding; interest on investment in packing cases; labour in the spring to unpack and manipulate; stores for spring feeding; cost of packages with untested queens; transportation; excise duty; loss of packages in transit or queens on introduction; cost of labour to establish these bees in hives; feed required in the spring and loss of queens through supersedure. The value of any increase of colonies made from over-wintered or package bee colonies was added to the value of the total honey crop produced. Thus the profit per colony could be readily derived.

Ten years experimental results show that, on the basis of 241 over-wintered and 100 package bee colonies, the average profit, per colony, was $11.94 from the over-wintered colonies as compared to $10.56 from the package bee colonies. The difference of $1.38 annually, per colony, in favour of the over-wintered colonies, should dispel the theory that it is cheaper to kill the colonies in the fall and buy package bees in the spring than to over-winter the colonies of bees in the province of Manitoba. The production averages show that the package bees only exceeded the over-wintered colonies in three years (1929-31-36) during the ten-year period. The total production from both cellar and outside-wintered colonies and package bees shows an average of 21 pounds per colony in favour of the over-wintered colonies.

Flood Tourists With Alberta Maps

Tourist centres in the United States and elsewhere are being flooded with official maps and other material dealing with Alberta.

The campaign is expected to be productive of gratifying results from the standpoint of increased tourist travel to Alberta this year.

Last year nearly 25,000 cars from the United States crossed the border into Alberta. This year an intensified campaign should increase the total to 100,000 in the opinion of officials of the Alberta Motor Association.

The campaign to attract this increased traffic will be aided by a new up-to-date official highway map of the province, just issued by the public works department for the province.

This map shows highways, district roads, railway lines, ferries, ports of entry, summer resorts and provincial parks. It will be an essential part of any tourist's travel equipment.

In addition, 100,000 blue colored strip maps of different sections of highways have been issued and distributed by the Alberta Motor Association. These are available at city branches, garages, hotels and other official appointments of the A.M.A.

Irish Believe Ghost Comes Back

DUNSRIM County Monaghan, Ireland, May 2—Ghost of a 17th century planter who evicted a poor widow and her eight children from their Dunsrim farm is haunting a drinking pool near here. That's the story residents tell.

The planter, says legend, was thrown from his horse and found after sunset with his neck broken. The ghost is said to appear after sunset near the spot where the evicted woman and her eight children were found dead in the snow.

John Francis said he saw "the tall figure of a man dressed in old-fashioned clothes," as he walked home. The figure knelt at the pool to quench his thirst. "As I watched spell-bound, said Smith, "I could see the reflection of his eyes in the clear water; they were like two large red coals."

Suddenly the figure disappeared and Smith, who had stood in a trance began to run. He said as he ran he heard the sound of spurred boots.

Patrick Connolly and Miss Ellie Reilly also claim to have seen the ghost. Legend has it the figure still haunts the district to frighten people out of their lands.

Rainfall Causes Undue Lateness Land Operations

Farmers of the west need not despair at the lateness of seeding—another halt in land operations was caused by week-end rains. Agriculturists hunting back in their records found today the later sown crops have produced better yields.

There was another important factor to cheer the idle land workers. Warm weather increases the grasshopper menace. Cold, wet weather such as experienced in Alberta during the week-end, increases the 'hopper mortality rate.

Generally seeding is from 10 to 60 per cent completed in Alberta today, the far northern district of Peace River being an exception. There it ranges from 45 to 75 per cent in practically all districts, including the millions of acres in the southeastern drought areas, moisture is the most plentiful in years.

Records show that in the big crop years of 1927 and 1928 only 10 and six per cent, respectively, of seeding has been completed during the first week in May.

In 1927 Alberta produced a wheat crop of 171,296,000 bushels and in the following year 171,000,000 bushels. Three years ago in 1935 the farmers got a late start on their land with only 8 per cent seeded on April 30 but they reaped a harvest of 102,000,000 bushels of wheat. In 1932 only 17 per cent of Alberta's more than 7,000,000 wheatland acres were sown at this date but the crop yield was 167,356,000 bushels.

A year ago 45 per cent of seeding had been completed May 1. The 1937 crop from 7,834,000 acres totalled 71,000,000 bushels of wheat.

Spring delays are not new in the life of Alberta farmers. Some of the old timers recall the year 1909 with a big snowstorm on May 24 and the land unfit for cultivation to the early days of June. But, they add, it was a good crop year with perfect growing and harvest weather.

Farmer Lets Oil Lease So Forgets Crop

CALGARY, May 3.—William Patterson, 71-year-old bachelor farmer of the Turner Valley district, isn't worried about the lateness of spring seeding. He may soon be rich, not from farm labors but from oil.

In Calgary, Patterson, who has farmed for 30 years, revealed Monday he had granted a 60-day option to eastern interests for the oil rights on his farm. The option calls for a price of $100 an acre on his 480 acres—$48,000.

The Paterson farm came into prominence as a prospective crude oil area following the completion of Royalite 29, a crude producer in the north end of Turner Valley, about 30 miles from Calgary.

Names of Provincial Unity Council To Be Announced

Agreement of six prominent Albertans to act on his provisional Unity Council, was announced by John I. McFarland, Calgary, this week.

The new Council members are: Mrs. Irene Parlby, Alix; J. Percy Page, internationally known coach of the Edmonton Grads; W. D. Spence, former Deputy Minister of Municipal Affairs and chairman of Alberta Tax Commission, Edmonton; Francis Austin, farmer, Ranfurly; J. Harold McLaughlin, farmer, Spruce Grove, and D. McKinnon, farmer, Carseland.

Names of additional men and women to bring the Council to a total of 36 will soon be announced, stated Mr. McFarland, and a meeting in early summer is scheduled.

Baby Left On Train

Humboldt, May 2—To be left stranded on the station platform while a train carried away her baby was the upsetting experience of a young mother here recently. She had visited a store in Humboldt during a stop of a Canadian National passenger train, returning to the depot just after departure time.

Station employees immediately wired ahead to Carmel, next stop west of Humbolt. The train was held long enough for the mother to catch it by automobile.

107 Years Old, Is Giddy Girl

Sapulpa, Okla May 2— Aunt Lizzie Devers celebrated her 107th birthday Sunday and called herself still "just a giddy girl."

A week ago she challenged Sapulpa high school girls to a sheet-wringing contest — but they wouldn't take me up; knew they'd get whipped.

Mrs. Devers is part Indian, had nine husbands. For her birthday she said she'd liked a monkey. And maybe another husband, but she got neither.

Freshies Cram Only To Learn Test Cancelled

TORONTO, May 2—Freshmen at the University of Toronto have been cramming for a botany examination and have just been told there will not be any this year. The decision there would be no botany exam this year was reached last January, and no one told the students.

Owl Singed Bare In Tour Power Plant

Salt Lake City, May 2.—An owl flew into the main works of the power system last night, put this city in total darkness for four minutes, and came out alive but singed bare. "He looked like he was ready for cooking," said Supt. L. B. Fuller.

To Get in On

Sam and Rastus were seated in a Jim Crow car on a southern railway en route to a plantation for the cotton picking season. They were discussing politics, with particular reference to a coming election. Rastus was a rabid partisan of the incumbent representative.

"Well," said Sam. Ah like him all right. Ah guess; but his platform ain't no good."

"Platfo'm" snorted Rastus. Platfo'm; say, don't you know dat a political platfo'm is jest like a platfo'm on one o' dese railroad cars—hit ain't meant to stan' on; hit's jes' meant to git in on"—Wall Street Journal.

HORSES FOR SALE OR TRADE—Will sell or trade for cattle. Also Newal Seed Barley for sale. Phone 41, Tofield, Alta. E. R. Kallal.

Cool Feat Of Cracking Safe Accomplished

TORONTO, May 3—Nathan Starr, meat store proprietor, told police Monday of the "cool" strategy of cracksmen who entered his store during the week end and stole $300 from a safe. The robbers lugged the 500-pound safe into the cold, but sound-proof, meat store refrigerator, then hacked off the door to get at the money.

Slowly

****

Hirman walked four miles over the hills to call on the girl of his dreams. for a long time they sat silent on a bench by the side of her log cabin; but after a while Hirman sidled closer to her.

"Mary," he began, I've got a good clearin' over thar, an' a team an' wagon, and some hawgs an' cows, an' I cal-late on buildin' a house an'—

Here he was interrupted by Mary's mother, who had awakened.

"Mary," she called in a loud voice, "is that young man thar yit?"

Back came the answer: "No, Ma, but he's gittin' thar."—Santa Fe Magazine

Three Small Boys Wonder What's Coming

CALGARY, May 3.— Three small boys, the oldest 10, wondered last night what punishment their parents had in store for them. There was no immediate decision.

The boys, held responsible for a $30,000 fire in East Calgary, Sunday night, started while they were playing with matches, were released to their parents by juvenile court authorities.

"They will be dealt with by their parents" said a court official last night.

A Door

****

The recluse was building a new home for his wife and children. Instead of building the house from the outside, he worked just the opposite way.

At length the job was complete. Four walls and a roof—nothing more. The builder surveyed his handiwork with pride.

"Well," he asked his wife, how do you like the new place?"

"Not bad" she complimented; but where's the door?"

The recluse put down his hammer.

"Why a door?" he demanded. "Goin' some place?"—Tit-Bits.

CREDIT
It belongs to you—the community does not own it.

* *

BANKS live by lending.

That is their major source of income, their principal business. They are always on the lookout for good risks. They have to avoid poor ones.

Let us give an instance. Suppose, say, a man seeking a bank loan, is known to the banker as having no business capacity to carry out the purposes for which he wants the money. He is not credit-worthy—he has accumulated nothing, has no stake.

The banker, anxious though he is to make loans, knows there is not the remotest chance that this man would succeed in his purpose and tells the would-be borrower that the bank cannot take the risk.

But this man has a friend—a man who has accumulated something and has a stake. Hearing of his neighbour's difficulty, he goes to the bank and urges that the loan be made.

"Whose money would you have me lend him?" asks the manager. "You have a deposit here. Would you lend your own money?"

"Not on your life," retorts Mr. Blank. "Lend him the bank's money."

The bank manager, as custodian of this very man's own money, then takes pains to point out that what the substantial citizen is really expecting, is that the bank should make a loan which the citizen's own common sense and caution would compel him to refuse.

Before such a man leaves the bank he usually agrees that he had expected the bank to lend where he himself would be unwilling. Banks have no magic source of credit.

Here is the core of the whole business of a bank's extending credit. Because of the bank's responsibility to its depositors it can make loans only where repayment is reasonably certain.

To obtain a loan from a bank a borrower must have credit of his own. Seldom, if ever, is his credit spendable. You cannot spend cattle, goods in process of manufacture, uncaught fish, uncut timber, or wheat in the granary.

The bank has credit too. Millions of small depositors have, in effect, lent it their money. A percentage of this money, based on bank experience of withdrawals, is kept in cash, some more in items of a cash nature, more still in assets quickly convertible into cash, and more in safe investments such as marketable government and other bonds. Based upon this, the bank can extend credit.

Because people have confidence in bank credit, and because every promise-to-pay of a chartered bank is redeemable in cash, on demand, or on a fixed date, this form of credit is spendable.

In the case of the borrower, credit is the personal possession or attribute of the individual—you yourself, if you are the borrower — in character, goods, possessions, integrity, ability and willingness to repay.

Your credit is not social, in the sense of belonging to the community. When you have credit, it is your own just as your money in a savings account is your own. The people at large have no conceivable claim upon it.

Who monetizes credit?

The answer for all practical purposes is this: The man who owns and therefore controls his credit takes the initiative. The bank does not go to him. He goes to the bank and asks it to enable him to obtain credit in spendable form in exchange for his own unspendable credit. The bank does so; and charges him a rental in the form of interest, until he repays.

What happens when he secures this credit in spendable form?

He spends it.

He pays the wages of labour, the cost of raw materials and of manufacture; the cost of seed, of feed for hogs and cattle, or the expenses of cultivating and harvesting; of buying bait or catching fish; of cutting trees or transporting goods.

The whole banking process is made possible by the concentration and cautious handling of other people's money.

Banks simply dare not risk their own solvency and so jeopardize the safety of their depositors' funds, by making loans to people who have neither character nor credit—nor by making loans even to those who have both, without taking every reasonable precaution to ensure repayment.

THE CHARTERED BANKS OF CANADA

Your local branch bank manager will be glad to talk banking with you. He will be glad to answer your questions, from the standpoint of his own experience. The next article in this series will appear in this newspaper. Watch for it.

The Mercury Visits The British Columbia Coast

FOURTH ARTICLE

The [illegible] of primer book fame, would [illegible] feel [illegible] at [illegible] the [illegible] battery egg factory. It is a long, long time since we read the story but it goes, we believe, something [illegible] red hen finds a grain of wheat [illegible] [illegible]

The [illegible]

[illegible]

[illegible] said, "No [illegible] And she did.

Any [illegible] the number of [illegible] red hens [illegible] for the matter [illegible] which we saw at the B[illegible] [illegible] Egg Corp[illegible] [illegible] chance [illegible] for they [illegible] as far as feed [illegible] [illegible] usefulness.

But let us start at the beginning. We had visited Lulu Island [illegible] brief description of which [illegible] given [illegible] when a friend said [illegible] battery [illegible] being [illegible] very interesting. Mercury readers may perhaps remember that about [illegible] years ago [illegible] published a reprinted article dealing with battery chicken houses. The article was [illegible] chosen [illegible] in a district in which the production of eggs played a [illegible] very interesting, and we imagined it would be to others. [illegible] that this system of producing eggs was in vogue on Lulu Island, we made a second trip to the island for the sole purpose of visiting the plant.

We Meet Mr Richie

Upon calling at the office of the plant we were directed to the building where we met Mr J. S. Richie [illegible] superintendent. He [illegible] very pleasant and [illegible] [illegible] and he [illegible] you would not think [illegible] much of a [illegible] [illegible] we [illegible] have Mr Richie [illegible] show us around.

There are really two buildings. One the original building of the Richie-Ryan [illegible] in which the battery method of keeping hens was started in 1935. That building compares in size to the Variety Theatre and is [illegible] The other building which was erected when the British Columbia Egg Corporation was formed is much larger. It is three storeys high and is as large or larger than the Royal [illegible] Hotel [illegible] three [illegible]

[illegible]

[illegible] Everything [illegible] the feed [illegible] arrangement which [illegible] and as the feed [illegible] We [illegible] cleaning the boards [illegible] a [illegible] and a [illegible] and dropping [illegible] a few [illegible]

[illegible] there were [illegible] [illegible] they expect to have 20,000 [illegible] The majority of the [illegible] were Leghorns but there were [illegible] a number of Rhode Island Reds and [illegible] The latter were [illegible] very suitable for cage life.

Birds Never Touch Mother Earth

Contrary to all preconceived ideas of [illegible] raising and egg production, [illegible] houses and range have been deemed essential [illegible]

[illegible] hatched in an incubator raised in a brooder and at four [illegible] are put in cages where [illegible] for 20 months. To realize [illegible] only has [illegible] In fact if by any [illegible] cage she [illegible] effort to get back [illegible] [illegible] ready for [illegible] The birds [illegible] weigh more [illegible] around five pounds [illegible] six and a half [illegible] They are also more tender [illegible] running around to [illegible] muscles. The mortality [illegible] very low. Out of one lot of 200 birds only 17 were lost. Out of about the same number raised in the ordinary way on the ground 56 were lost.

While there is real responsibility in caring for them, disease is rare compared to ground reared birds [illegible] [illegible] "whether they [illegible] not," they are powdered [illegible] with a hand pump. Extreme [illegible] taken [illegible] every bird being inspected [illegible] day. This of course, by [illegible] done quickly [illegible] backed by experience [illegible] normal.

Feed Costs Down, Egg Production Up

With the enclosure of the [illegible] in cages makes it necessary that all feed be taken to them, feed costs as compared with ground birds [illegible] per cent less, production in the way of eggs is 40 per cent more. With a fairly large battery of Rhode Island Reds [illegible] showed a [illegible] The average [illegible] that received [illegible] [illegible] to keep health [illegible] production of [illegible] [illegible] charcoal [illegible] In addition they have [illegible] This feed produces [illegible] [illegible] yolk was [illegible] They are [illegible] as eggs can be [illegible] undoubtedly the [illegible] careful thought and [illegible] attention to detail.

The Egg Receives A Dry Shave

We [illegible] had seen the [illegible] when we came [illegible] house, that [illegible] was interesting [illegible] are absolutely [illegible] raw, dirt or anything [illegible] make them otherwise. [illegible] has something to do with modern merchandising of eggs. So the eggs receive a dry shave. A machine about four feet long [illegible] approximately [illegible] with a trough in front is used. Attached to the cylinder is a large number of strips of sand paper about half an inch wide. These strips are fastened to the cylinder in such a way as to produce a bulge but the bulges are not all the same. The cylinder [illegible] motor driven revolves very rapidly, and when an egg is placed in the trough, the fairly loose sand paper comes in contact with it and [illegible] round and round and then end over end. It is rather uncanny the way the egg rolls first one way and then another. Only a few seconds [illegible] to give the [illegible] the egg [illegible] smooth as silk," yet retains the "bloom" [illegible] The testing and grading [illegible] The eggs are placed before the [illegible] light [illegible] white [illegible] For a [illegible] a little harder and a [illegible] through the egg. They [illegible] placed [illegible] an "egg cup" attached [illegible] scales. Behind the "egg cup" there [illegible] panel about 6 inches square with a button light at each corner. If the egg is a pullet's egg and light in weight, one light shows, if grade C two lights show, if grade B three lights show, and if grade A all four lights show.

At the time we were [illegible] they were shipping 17 and 18 cases of eggs a day. They have shipped as many as 26 cases a day and later expect to surpass that number.

NEXT WEEK VICTORIA IN A TEMPER

Flavorous Meat Dishes

There are tricks to a [illegible] —particularly in cooking. One woman can [illegible] fish or meat that fairly melts in the mouth. Another with [illegible] as much effort prepares a dish that is [illegible] as far as one can [illegible] A little seasoning improves many a meat dish by accentuating the flavor. Try these recipes and you will [illegible] note the "difference."

Beef Texas Style

Cut cold roast beef in thin uniform [illegible] and reheat in a sauce made as follows:

1 onion
1 tablespoon butter
2 green peppers
1 cup canned tomatoes
1 tablespoon Worcestershire sauce
3 drops tabasco
1 teaspoon sugar
salt and pepper

Slice onion and fry in butter until soft and yellow. Add finely chopped pepper and tomatoes. Simmer until thick. Add seasonings and meat. Cook until meat is hot. Serve garnished with small triangles of thin buttered toast.

Nippon's Drive Said Collapsed

SHANGHAI, May 4—Chinese sent word Wednesday the second Japanese offensive in southern Shantung province, [illegible] front of the war, was [illegible] verge of collapse.

Crushing of the first drive last [illegible] was the most disastrous defeat of a modern Japanese army.

Now, Chinese declared they are ready to [illegible] troops against [illegible] Japanese legions which [illegible] exhaustion [illegible] short of munitions.

Chinese reports from Hankow, [illegible] the government, said sensational Chinese [illegible] had [illegible] Shantung stalemate and a great offensive already had been launched to take advantage of the gains.

The new offensive was declared by the Chinese command to have [illegible] centre of the Japanese lines at Taierhchwang and [illegible] advanced 2 miles.

[illegible] of Chiang Kai-[illegible] of war was [illegible] high command [illegible] they expected an [illegible] similar to that which [illegible] of Nippon at [illegible] a month ago.

[illegible] estimated the [illegible] outnumbered Japanese army [illegible] killed in fighting [illegible] days.

Brains and Brawn Are Needed Carry Mrs. Dye

CHICAGO, May 4—Police combined brain and brawn to get Mrs. Sarah Dye to a hospital on Tuesday because of her huge bulk—an estimated 700 pounds—barred her from making the trip in a regular ambulance.

[illegible] the board of health [illegible] vehicle.

Anxiety Growing On Air Weakness

LONDON, May 4.—Anxiety deepens over the production of British aircraft. A series of questions addressed to Earl Winterton, chancellor of the Duchy of Lancaster, brought a shower of supplementaries in the [illegible] Wednesday.

They challenged the efficacy of mass production methods, management, fees paid, shadow factories and the equipment of first-line aircraft. It was alleged employees had been discharged by aircraft manufacturing firms.

On a number of points Lord Winterton asked the house to await a full statement he will make Thursday [illegible] when the opposition stages a large scale attack on the government over the whole question.

Sir Thomas Inskip, minister for the co-ordination of defence said the government was giving consideration to the storage of canned foods for use in the event of a national emergency.

PARIS, May 4—French government Wednesday ordered a new two-year plan of accelerated air-craft construction into immediate execution to strengthen the only national defence arm in which France admittedly is inferior.

Violent Wind Rips Roof From School

CLASSES IN SESSION BUT NO ONE HURT

Early Thursday afternoon from clouds that had been hanging low in the west since morning, a terrific wind came. Almost without warning, except for a darkening of the sky, huge clouds of dust commenced rolling over town. Paper, straw and a miscellaneous clutter commenced to fly through the air and roll along the ground. The full force of the wind was felt at the school. Here classes were in session and teachers and pupils, startled by the noise of the wind looked out and saw telephone poles, one by one as the wind came on, snap off. A few seconds after the wind struck the school and in less time than it takes to tell the roof was ripped off and carried about 200 feet away. It was smashed into matchwood.

The teachers were immediately under great responsibility. To order the children outside amid flying debris was dangerous. To keep them inside a tumbling building more dangerous still. In the first few seconds the children were ordered out and then when it was seen that the main structure would stand they were ordered to the basement. It was a terrifying few minutes and the teachers handled themselves well.

The roof itself is a complete wreck but the top joists are there and while the ceiling plaster is cracked and damaged it still stands.

It is difficult to estimate the damage but one thousand dollars would not be too high.

It was fortunate indeed that no one was hurt.

The school board held a special meeting Thursday night, and the following plan of action was adopted. Repair work will go forward immediately and it is expected that about a week will elapse before the school is ready for occupancy. Miss Stewart's and Miss Wingrove's rooms will be given a week's holiday. The high school will be housed in the town hall and the Institute building, and Mr. McLeay's room will be housed in the curling rink. High school and Mr McLeay's room starts school on Monday.

In addition to the damage done at the school, minor damage was done to barns and outbuildings in town and district. Telephone communication was disrupted many rural lines [illegible] ng down. For a time long distance lines were out of use also. The electric light and power service was also off for several hours, being resumed in the evening before darkness fell.

Dogs Drawing Veteran Across Canada

On Friday evening a unique conveyance drove into town. Two dogs attached to a small cart were hauling Eugene Muller an Edmontonian. Mr. Muller, a Belgian, intends to travel across Canada in this manner, having for his destination, Halifax. In Belgium much hauling is done by dog cart, and Mr. Muller hopes to popularize this method of travel in Canada. The dogs wear comfortable fitting harness and in addition to the two trained pullers, another dog is carried as an auxiliary. Mr. Muller stayed here over night with Jack McCusker, leaving in the morning to continue his journey eastward.

FOR SALE—Home made kitchen cupboard and table; couch and mattress; kitchen range; cistern pump; card table; 3 burner coal oil stove; bedsteads and spring; 3 colt halters; gasoline lamp complete; 2 single shot 22 rifles; one repeater—Apply to J. E. Stinson, Tofield.

LOCAL & PERSONAL

Miss Gwen Firth spent the week end at her home here.

••••••••

Mr and Mrs. Gordon Provost and son, and Aileen spent Sunday at the Allan home here.

••••••••

Mr and Mrs. F. Codd of Los Angeles, spent a few days visiting at the E. Wuetherick home. Mrs. Codd is Mrs. Wuetherick's sister.

••••••••

Miss Julia Lukin spent the past two weeks visiting in Viking.

••••••••

Mrs. H. Green spent a couple of days visiting relatives in Viking last week.

••••••••

Miss Kimmett of Edmonton is a guest at the Kimmett home here.

Mr Dorsey Letourneau from Calgary is spending some time with his parents here.

••••••••

Mr. and Mrs. A. Thompson and Betty of Leduc spent the week end with Lois Thompson.

••••••••

Miss Margaret McCauley, nurse at the University hospital is spending some time at her home here resting up after an illness.

••••••••

Mr. and Mrs. H. Swift and family of Fallis spent a few days visiting at the Booth home.

••••••••

Mr Graham Allan left on Wednesday evening for Jasper where he will spend the summer working at the Lodge.

••••••••

Mrs. J. Letourneau, Goldie Jacobs, Pat and Mary Burnett and Dorsey Letourneau spent Thursday in Edmonton.

••••••••

On Friday evening last, at the home of Mrs. W. Chapman, the Jolly Twelve Bridge club had a farewell party in honor of Mrs. A. Wallis, who, with Rev. Wallis, is leaving for Camrose shortly. On behalf of the club and other friends, Mrs. Wallis was presented with a lovely fern and fern stand. Honors at bridge were won by Mrs. Yakabuski and Miss J. McCrea.

ROSS CREEK

Miss Mae Shertel of Edmonton spent Sunday at her parent's home at Ross Creek.

A dance was held at Ross Creek school on Friday sponsored by the baseball boys. Music by the Rural Rangers.

Mr and Mrs J. Shertel and Mr E. Thor were city visitors on Wednesday.

Mrs. Floyd McLachlan returned to her home last week after spending two weeks visiting her mother at Bashaw.

Miss Jennie Stetshyn spent the week end visiting friends at Bon Accord.

Miss M. Thompson of Drayton Valley is assisting with the house work at the C. Berstad home.

Miss Bernice Wiltzen is helping Mrs. Hans Jacobson with her spring work.

Mr. and Mrs. Steve Kashey and family motored to Chipman Sunday.

The seeding is rather slow in the Ross Creek district owing to so much snow and rain. Sunny Alberta, eh?

Miss Grace Law spent the week-end at her parents home at Chipman.

A young lawyer started in business on his own account. He espied a visitor making towards his office and so he pretended to be holding a conversation over the telephone, ending (just as the visitor entered) with the words: "No, No! I couldn't undertake the case for less than $5000." Then, putting up the receiver he turned to the visitor and said: "What can I do for you?" "Oh, I have just called to connect up the telephone!" was the reply.

At TOFIELD on THURS. MAY 19th

KETCHAMOOT

The Mothers' Day service was postponed until next Sunday, May 15 [illegible] weather conditions.

A pleasant afternoon was spent at the Rev. Allan home Wednesday afternoon of last week when Mrs. Allan entertained the Ketchamoot Ladies Aid. A goodly number of members and visitors were present. The June meeting will be held at the home of Mrs. Henderson.

Mr John McGinitie returned home [illegible] last week after spending six months in Oregon. His sister, who accompanied him there, remained at their home in Oregon.

Mr. James McDevitt of Cadomin was visiting old time friends in our district and looking after his property, now being rented by the K[illegible] family.

[illegible] Mabel Brown and [illegible] and Archie, and Mr and Mrs. Tennant and twin children of near Bawlf visited their relatives, Mrs. E. McMullen and the Coombes family on Sunday of last week.

Mr. and Mrs. Wm Spilsted, Mr and Mrs. A. F. Schultz, Mr and Mrs. C. A. Degraw, Mrs. Searle, Miss Nora Kennedy and Albert Searle were guests of Mr and Mrs Sam Nome last Sunday of last week.

Mrs. Emily Carlisle was able to return from the hospital one day last week and is staying at the Carlisle home in town. Mrs. Lapine is keeping house for the family on the farm.

Mr. Angus Mitchell was badly [illegible] one day last week when he [illegible] his footing and fell through a door in the hay loft at the Nomeland home. He was taken to an Edmonton hospital that evening where he remained for several days, but is now recuperating at the D. H. Mitchell home in Edmonton.

School Concert Greatly Enjoyed

On Saturday evening last, the students of Grades 7 and 8 presented a very interesting and enjoyable concert in the Variety Theatre. Due to the weather conditions the crowd was not as large as it would have been, but all things considered there was a fairly good turn out. The performance of the children was a great credit to their [illegible] teachers. The following is the program:

1. Fishermen's Chorus—the Class; 2. Gypsy Chorus—the Class; 3. Piano solo, "La Danse F[illegible]," and "Mason's [illegible]" Margaret Dodds; 4. Play "Danger at the Door"—Margaret Dodds, Joyce Ionis, Shirley Swinton, Eunice Wiltzen, Ida Jacobs, Velma Stevenson, Elaine Thomas, Aaron Wiltzen, Don McAllister, Robert Tarrie, Jim Bra[illegible]; 5. "Allouette" the Class; 6. Recitation, "An Old Habitant"—Frances Hardy; 7. Recitation, "A View of Mount Blanc" Ed Barrett; 8. Reading, "A Boy [illegible] Hero" Alberta Janet; 9. Pantomime, "The Yarn of Nancy Bell"—the boys; 10. Duets, "Lullaby"—Elaine Thomas, Shirley Swinton, Alberta Janet, Kathleen Barlund, Margaret Dodds, Lella Tiedeman, Frances Hardy, Eunice Wiltzen; 11. "Bobby's Idea of Parents"—Francis Campbell; 12. Solo, "Sweet a Golden Cradle [illegible] Tree" —Elaine Thomas; 13. Tap Dance—Velma Stevenson; 14. Recitation, "An Old Habitant" George Yakabuski; 15. Recitation, "A View of Mount Blanc" —Dorothy Stauffer; 16. Solo; 17. Cowboy Tableau—the boys; 18. Boxing, Johann Granville, Francis Campbell, O. P. Thomas; 19. Blindfold Boxing—Jim Imler, Martin Longhass, O. P. Thomas.

Valuable training and assistance was given by Mrs. Stinson, Mr. M. W. McDonnell, Mr. O. P. Thomas, Mr. S. Gover, Mr. G. Allan and others. The money raised is to be used in carrying on the activities of the students in Grades VII and VIII.

WEEKLY RAIN REPORT
Supplied by Searle Grain Co. Ltd.

Week Ending May 11th, 1938

Thursday	
Friday	
Saturday	11
Sunday	
Monday	
Tuesday

Some Timely Hints For Flower Garden

Now that spring is here all dead stems should be cut off the plants leaves and broken branches raked up and the garden tidied up. Plants that were put in last autumn should be examined and any that have been heaved out of the ground by frost should be replanted or pressed firmly into the soil. If left the roots will probably dry out and die. The lawn should be well raked advises Miss I. Preston, Specialist in Ornamental Horticulture, Central Experimental Farm, Ottawa.

[illegible]

Seedlings [illegible] patches and [illegible] Peonies and other [illegible] covering [illegible] that means no flowers in summer.

Wheat And High Tariffs

A despatch from Mr. Broomhall, England, tells us that it is expected that Italy, because of the severe drought from which that country is suffering, may find it necessary to import large quantities of wheat next season. Mr. Broomhall informs us that Italy is already making arrangements to see if she can obtain Argentine wheat on a barter basis for some of her own products.

Here we see in action the evils so often criticized in these columns of the system of "Nationalism" and its handmaiden, a high tariffs, [illegible] against [illegible].

Normally, Italy [illegible] any other country that might be in the market for wheat would make purchases on [illegible] of the kind of wheats [illegible] would give her the best value [illegible] of course Canadian wheat would always have at least an equal chance with other competing [illegible]. Under the conditions prevailing today in the World, however, because Canada, the United States and many other countries make it extremely difficult for Italy to sell her own products on World markets, then Italy — for — as Mr. Broomhall reminds us, perhaps much against her will, to seek wheat mainly from those countries which in turn would be willing to accept, instead of money, simply an equivalent value of Italian made goods in exchange.

It is a sad condition for it means that as long as this restricted and hampered, almost Medieval system, of barter of trading between nations continues, that naturally the quantity of products, goods and commodities, including wheat, that is purchased and exported by the countries of the World, becomes greatly restricted. This in turn, of course, inevitably lessens production, and so increases unemployment in agriculture and in industry, all of which ends in lowering the standard of living of all the people.

Another grave consequence, which never can be emphasized too often, is that the difficulties that such countries as Germany, Italy, Japan and others experience in being able to secure easily the wheat and other foodstuffs and the raw materials they require for their people's welfare, creates feelings of discontent, of irritation and of frustration, which feelings, history tells us, have ever been the prime causes of war.—Searle Grain Company Ltd.

HEALTH

A HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION AND LIFE INSURANCE COMPANIES IN CANADA

Anaemia

Twelve years ago, liver could be bought for a few cents, and was used to feed the cat or the dog. Today, so many people are eating liver that the price has advanced until it is only the indulged cat which gets an occasional taste.

It was no longer ago than 1926 when it was observed that patients suffering from pernicious anaemia were much improved when they used a half-pound of liver each day.

Anaemia is a general term which means that the blood is deficient in quantity or quality. There are several kinds of anaemia, such as that which follows upon a haemorrhage, or the anaemia which usually develops as a part of such chronic diseases as tuberculosis, cancer, malaria and lead poisoning. Then there are the anaemias which occur because of the failure of the organs which manufacture the red blood cells. We cannot live without oxygen, and if there are not enough red blood cells, or if there is a lack of the haemoglobin which should be in these cells to carry oxygen, then the body tissues are starved of the oxygen which they need.

The red cells are manufactured by the red marrow at the ends of the long bones, ribs and vertebrae. Pernicious anaemia was, until recent times, almost always fatal. The red cells were so rapidly destroyed that the bone marrow could not meet the demand; this meant death as the blood could not carry enough oxygen to all the tissues to maintain life.

Liver contains something which brings back the blood of pernicious anaemia patients to normal and so gives them back their health. No longer is the victim of pernicious anaemia doomed to die; health and strength are his through the continued regular use of liver or liver extract.

The fame of liver spread, and many people began to eat it in the general principle that what is good for one ailment is good for others, which is, of course, absurd.

Liver is not even of value in the treatment of all anaemias. The chlorosis or "green sickness" of young girls, a form of anaemia, disappearing; with improved habits of living; other forms of anaemia respond to iron therapy. In all cases, a blood examination is required to determine what form of anaemia is present; this must be known before proper treatment can be prescribed.

Questions concerning Health, addressed to the Canadian Medical Association, 184 College Street, Toronto, will be answered personally by letter.

Hard to Please

A well-dressed woman walked into the milliner's shop and asked for the manageress.

"I see from your advertisements" she said, "that you have received two thousand hats from Paris?"

"That is so, madam," replied the manageress.

"Good!" replied the woman, as she removed her hat. "I wish to try them on."

Premier Hepburn And The West

Premier Hepburn of Ontario in evidence he presented to the Rowell Commission sitting in Toronto had certain comments to make regarding Western Canada. He said the claims of the prairie provinces for compensation "at our expense" rested on the failing fortunes of the wheat growers and mentioned that while wheat is still important it is not the life and soul of the west. He said he had every sympathy for the 99,000 farmers whose main source of revenue in wheat has declined but really did not see that it was necessary to appeal to federation on their behalf. He expressed the opinion that the west was working its way out of the crop specialization that came with early settlement and was working into a diversity designed to utilize its resources of men and materials, a diversity of the factory as well as the field.

Premier Hepburn simply did not know what he was talking about when he made those remarks. The western provinces are depending on wheat production even a little more than in the past. Recent drouth years have restricted feed grain production and there has been a decided decline in the number of livestock on western farms. Between 1936 and 1937 the number of hogs in Manitoba, Saskatchewan and Alberta have declined by over half a million and the number of cattle by 350,000.

Instead of 99,000 farmers whose main source of revenue is wheat the three provinces have at least 250,000 farmers who depend largely on wheat production for a livelihood.

For the benefit of Mr. Hepburn we quote a paragraph from a speech made by Sir Edward Beatty, president of the Canadian Pacific Railway at Toronto a couple of years ago:

"Wheat has played a greater part than any other commodity in creating the vast system of commerce on which modern civilization depends. Were international trade in wheat to vanish or even shrink considerably the entire transportation and commerce of the world would suffer a blow of great severity. In the case of Canada, it is not necessary to dwell on the importance of wheat. In the five years from 1925 to 1929 our wheat production rose to a value of $2,175 million and in the five years of depression 1930 to 1934, inclusive, we produced $760 million worth of wheat. You in Toronto should be able to correlate these figures with the fluctuations of the business in your community and deduce from them a reason for saying that no farmer in Western Canada is more interested in the yield and price of our wheat crop than are you, the business men and workers of Toronto?"

The complaint of the western wheat producers is that they are compelled by the Canadian fiscal policy to buy high-priced Canadian manufactured goods while their own principal product, wheat, must be sold amid conditions of the keenest international competition. — Alberta Wheat Pool Budget

Preacher Injured

CHATTANOOGA, Tenn., May 9.—Rev. Herbert Morgan's sermon on the evils of war ended with the minister, himself, a casualty. Holding aloft a bayonet Sunday, he compared it to the Gospel saying "The sword, just like the Gospel, is two-edged." At that he tripped on a rug and the bayonet passed through his left leg above the knee. He was admitted to a hospital.

Bank of Montreal Crop Report

GENERAL—As operations on the land come into their full swing throughout the Dominion, conditions appear more generally favourable than for several years past. Reports from every Province tell of ample moisture for the time being in most districts. Everywhere fall-sown crops and meadows have wintered well, and winter damage to fruit trees and small fruits have been negligible. In the Prairie Provinces present moisture conditions on the whole are sufficient to ensure germination and give the crops a good start. Widespread rainfall during the past few days has been beneficial particularly in southwestern Saskatchewan and parts of eastern Alberta, where subsoil moisture reserves are low. While spring operations have been retarded by snow and rains, wheat seeding has begun, and in Manitoba and in some parts of Alberta and Saskatchewan it is well under way. In Quebec spring opened up about two weeks earlier than usual, and the season continues in advance of last year, with conditions generally favourable. The maple syrup crop has been exceptionally good, both as to [illegible]. In Ontario land [illegible] weather [illegible] favourable [illegible] with [illegible]. In the Maritime Provinces [illegible] trees and shrubs as well as pasture lands have come through the winter in good condition and seeding and planting should be general in about two weeks. In British Columbia the season is [illegible] after a mild winter, and field operations are well advanced, with moisture conditions satisfactory. The bloom in orchards is heavy and the present outlook is for a heavy crop of all tree fruit. Details follow:

PRAIRIE PROVINCES

Alberta—Seeding operations, which are one to two weeks behind last year, have been further delayed by general precipitation over last weekend. Moisture conditions are generally satisfactory. In the Peace River district 75 per cent of the wheat is seeded; in other districts seeding is barely started. The acreage of all grain is expected to be about the same as a year ago. Infestation by grasshoppers is threatened in a large portion of the south and east central areas. Pasturage is good.

Saskatchewan— Wheat seeding is under way, but progress has been delayed by fairly general rains. The land is in good condition for cultivation, with sufficient surface moisture to ensure germination of seed. In some districts subsoil moisture reserves are inadequate and good rains will be required throughout the growing season. Indications are that the wheat acreage will be smaller than it was last year.

Manitoba —Good rains have fallen over the Province and, while wheat seeding has been delayed, operations are well advanced. Soil moisture conditions are satisfactory and present prospects normal. It is estimated that there will be a reduction in the Durum acreage this year.

FIGURES IN A BOOK?

What gives rise to a loan?

* *

"Credit can only be issued against real assets . . . The amount of credit must always be limited to the amount of free money . . ."

That was written by one of the greatest of Socialists—by the late Viscount Snowden of Ickornshaw, Philip Snowden, in 1935 — little more than two years ago.

Few stood so long or so resolutely in the forefront of public controversy, or aroused such fierce opposition by vigour of opinion or severity of tongue — and none passed to his rest having earned more public respect than Viscount Snowden.

His career was [illegible] sturdy British character. He took an unpopular course during the Great War, but later became one of his country's great figures, standing firmly for his convictions and for soundness in the financial structure of Great Britain.

His words [illegible] with all the force [illegible] banking in England. [illegible] Canadian banking system is a British system [illegible] to fit the needs of a developing nation [illegible] of this new world.

Credit can only be issued against real assets. That is [illegible] figures in a book. You cannot make loans regardless of deposits, collateral or repayment, then write the [illegible] and [illegible] them over and over.

If you could, we bankers in any country would need no more than a fountain pen to prevent bank failures.

During the last ten fiscal years Canada's chartered banks have [illegible] on deposits. If they could create deposits by the mere process of writing figures in a book they could have saved that [illegible].

And if banks could lend ten times the amount of their deposits, collecting interest each time, bank profits would become a national scandal, dividends would be paid in astronomical figures, people would be selling all they had to buy bank shares, and there would be a land office rush on at Ottawa for bank charters.

But what are the facts?

Bank profits last year averaged less than half of one per cent. on total assets — a lower margin than that of any other class of business, corporate or individual.

Dividends are less than [illegible] per cent on shareholders' investment; nobody is scrambling to sell all he owns to invest in bank shares, and there is no land office rush at Ottawa for bank charters — though no application has been refused in the last fifteen years.

Banks perform no miracles.

They keep cash reserves more than sufficient to meet the average daily withdrawals. They keep much more in forms readily convertible into cash, should any emergency ever arise.

By reason of their strong liquid position Canada's chartered banks have money awaiting demand — just awaiting safe loaning opportunity.

Banks cannot lend money unless people want to borrow it. They have no monopoly of the business of extending credit, for the cash reserves of many other corporations find a useful earning outlet in the same way.

Some loans directly give rise to deposits, but have you ever considered what it is that gives rise to a loan? A man's realizable assets accumulated from his own work, plus his own character, ability and willingness to repay.

All deposits are not the direct result of loans. People do not borrow money and pay interest on it to leave it on deposit at a lower rate or no rate at all.

They borrow money for use. They draw it out promptly and use it in the expectation of making a profit over and above the bank charges.

Let us remind you that deposits of any kind are always payable to the depositor, or to his order, in cash.

CANADIAN NATIONAL

EAST AND WEST

SCHOOL CHILDREN used to be told that the favorite pastime of the early Britons was fighting among themselves, but should danger threaten them from the outside, they formed a union to resist the common enemy. It would appear that in a measure at least, internal forces within Canada are doing a little fighting, if not with battle axe and spear, with words both verbal and printed.

Mr. Hepburn, the dynamic premier of "Old Ontario," would give one the impression that the Canadian West's past, present and future lay in the good will and benevolence of the people of Ontario. Fortunately a good many of Ontario folk do not agree with him.

There is no doubt that during the past fifty years, more or less, during which time the provinces of Manitoba, Saskatchewan and Alberta, developed from the undeveloped stage to the present area of cities, towns, villages and farm homes, the east gave invaluable aid toward that development. At least the west understood it to be invaluable aid at the time. The West with millions of acres of fertile land, needed capital for development and somehow or other, the east furnished the capital. Just how fast and how well the West would have developed without this capital, we do not profess to know, but we are inclined to the belief that if the West had accepted less of it there would not be so much growling among prairie folk to-day. During the period of development the East helped the West in other ways also. There were times when teachers and preachers were very scarce, and very often at considerable personal sacrifice teachers and preachers came out from the east and backed by resources of home folk, they were able to make life more pleasant for the early settlers here. And then too, within recent years, there were times of scant rainfall in various parts of the West, when like the ancient Britons, Canada united to fight the common enemy, drought. During this time from the east and from the west cars of fruit, vegetables and clothing rolled into Saskatchewan. And so perhaps in part at least, Premier Hepburn is justified in assuming that Eastern Canada has been a kind of fairy godmother to the west..

But there is another side to the picture, an important one too. It has frequently been stated that at no time in the world's history has a single agricultural territory created so much wealth in as short a time as Western Canada. During the past half century billions of dollars worth of grain has rolled out of the west, mostly east bound. And almost concurrently the money that it brought, for various things, interest on loans, machinery, textiles etc., went with it. The truth of the matter is that for many years, Western Canadians, particularly the farming class, were working and producing wealth which ultimately went to build up the East, mainly Ontario. Aided by tariffs, eastern manufacturers and eastern workers were able to attain a degree of affluence which had a direct relation the the amount of grain raised on the Western Prairies.

It should be carefully noted that Eastern Canada did not buy the grain. If they had done so the story would be different. The largest proportion of the wealth producing grain was purchased by other countries. What actually happened was that Eastern Canada, through the protection afforded by tariffs was able to sell billions of dollars worth of goods without having to buy much back in exchange. This is a nice kind of business if one can get it—and better still if one can keep it. It should be remembered that in many respects Ontario is a competitor of the West. We often speak of Ontario as the manufacturing province, but this is only partly true. In addition to manufacturing, Ontario is an agricultural region. Her agricultural resources are ample to supply her population. So while, due to tariffs, the west was almost compelled to buy Ontario's manufactured products, mostly at a high figure, Ontario did not have to buy any considerable quantity of the West's products.

There are two solutions to the problem. One, a drastic if not complete abandonment of the protectionist policy. This is not likely to happen for the simple reason that eastern members of parliament, regardless of party platforms, will vote to protect their own. The other solution is the breaking up of confederation. For reasons constitutional, political, racial and communal, very few people would like to see this happen. Yet sooner or later prairie dwellers are going to demand the maximum in goods in exchange for the wheat they raise. They have not been receiving it during the West's development period and the difference is the price they have paid for the advantages of confederation.

Always bearing in mind that Western Canada's best market for her chief product, wheat, lies overseas; and bearing in mind that in the long run all the Western farmer receives for his wheat is so much merchandise, it would seem that plain common sense dictates procuring as much merchandise for a bushel of wheat as possible. European nations are hungry for our wheat, it is the best wheat in the world, and it should not be difficult to trade, through the regular marts of finance, our wheat for manufactured goods. What is needed most is a breaking down of barriers and quotas in Europe and tariffs here. With the three, perhaps four, western provinces a political unit, this should not be hard to accomplish. There is now far too much loyalty and sentiment connected with confederation to permit even a serious discussion of a break with the east, but from a purely economic point of view, such a break would benefit the west more than the east.

THE WORLD OF WHEAT

By R. C. L. Strange, Director Research Department, Searle Grain Co.

Is there likely to be a premium for malting barley next year? What variety shall I sow to gain this premium?

Many farmers are now asking themselves these questions. No one, of course, can forecast future prices or future premiums, but good malting barley will certainly always command a higher price than feed barley.

The National Barley Committee, which represents the most skilled scientific agriculturists dealing with the barley problem, recently recommended that only O.A.C. 21 or Mensury Ottawa 60 should, for this year, be eligible for malting premiums.

This really means that a prairie farmer perhaps had better confine himself for the time being to O.A.C. 21, for the reason that a considerable quantity of high quality Registered First and Second Generation O.A.C. 21 is, in the West, easily available, at moderate prices, to those who desire to improve their barley crops.

To produce malting barley it is necessary to seed early on good clean land; barley is often grown, because it is early, on stubble, as a cleaning crop to get rid of weeds. This practice would ruin malting barley.

The growing of malting barley is really a specialty, just as is the production of high quality wheat.

Following factors have tended to raise price:—Broomhall increases estimated importers' requirements — Cold dry weather reduces European crop prospects—North African barley crop deteriorates—Rains hamper picking and movement of Argentine corn— Drought damages German, Austrian and Balkan fruit crops.

Following factors have tended to lower price :—Average U.S. private winter wheat estimates largest ever estimated on May 1st—Canadian Prairies have ample moisture for germination—Spring seeding becomes active in Russia— American new wheat sales made to Continent—Ten percent corn or rice must be used in Italian bread—Corn planting under way in the United States—Italy bids for Argentine wheat on barter basis.

Remove Left Eye Of Chicago Baby

CHICAGO, May 9.—Science decreed "operate" and two rabbis approved so the left eye of five-weeks-old Helaine Colan was removed Monday on the recommendation of an unusual medical council which shouldered her parents' task of deciding whether she should live, at least partly blind or die eventually of a cancerous growth.

The decision was announced by Attorney Samuel Hoffman, spokesman for the family, after the medical experts met in secret conference with the infant's father, Dr. Herman Colan, 30, dentist. Two rabbis were present in advisory capacities.

Dr. Morris Fishbein, editor of the Journal of the American Medical association, said similar cases of glioma have occurred "all over the United States and for many years." One hospital alone in New York had 40 such cases, he said.

He termed the assembling of specialists and rabbis "ridiculous and indecent" from a medical viewpoint.

Wants Dominion Control All Money

TORONTO, May 9.— Exclusive dominion control of the issuance of money, now largely in the hands of the banks, was proposed before the Rowell commission Monday as a basic remedy for Canada's present economic ills.

The dominion could issue sufficient currency to meet the needs of internal trade—"without the assistance of monetization of credit by the banks" and so remove any obstacles to employment of all employable persons, the League of Economic Democracy submitted.

Government works could be financed with national money free of interest, the capital to be repaid over the life of the structures. In addition to providing employment and saving the government money on capital projects, the future debt problem would be solved, it was submitted.

Provincial and municipal capital works could be financed in the same way, by money issued by the dominion, the money to be recalled as the local authority met regular instalment payments.

He Was Wrong Again

He was sampling some of his wife's mince pies.

"H'm," he said diffidently. "I don't like to mention it, my dear, but there seems something wrong with these pies."

"That shows how much you know about mince pies," wife returned. "The cookery book says they are delicious."

Turgeon Report Recommends Co-ops for Wheat Marketing

OTTAWA, May 9.—Development producers' co-operative societies for the marketing of wheat combined with continuance of the futures trading system of Winnipeg grain exchange are key recommendations in Mr. Justice Turgeon's report on grain and grain marketing, tabled in the commons Monday by Hon. W. D. Euler, minister of trade.

The report is the result of the judge's investigation as a royal commissioner extending over more than a year.

Findings in the report include the following:

A compulsory government board is not practical.

The futures trading system at Winnipeg should be continued subject to supervision of the grain exchange by a competent officer under the board of grain commissioners.

Voluntary flexible wheat pools, selling in line with world conditions and with, not against the trade, should be encouraged.

The present Canadian wheat board should be discontinued because of uncertain world factors.

Market stabilization operations conducted by John I. McFarland, general manager of Canadian Co-operative Wheat Producers Limited with a government guarantee in 1934-35, provided higher prices for producers than they otherwise would have received but aroused criticism among buyers abroad.

Stabilization was an exceptional incident in the grain trade resulting from misfortunes of the pools and the unprecedented world depression.

It was to be hoped similar conditions would not occur again but if they did it might be better to meet them by some other form of intervention.

From now on with a reasonable selling policy, Canada should receive the share of the overseas market the quality of Canadian wheat deserved.

Canada should have a representative in London, England, whose duty would be to investigate complaints arising out of grain shipments and to report direct to the board of grain commissioners.

Overseas millers merchants and importers desired a free market and futures trading at Winnipeg and as the United Kingdom was the best customer for Canadian wheat it was essential that Canadian marketing methods be acceptable to buyers in that country.

Buyers looked on the idea of a government monopoly in a producing country with more disfavor than anything else.

Under normal conditions Canada's future marketing policy, the judge believed should be to continue futures trading and encourage the building up of producers' co-operatives after the pattern of the Australian pools.

(The Australian pools are voluntary organizations in which members promise to deliver 50 per cent of their wheat to the co-operative. There is no penalty for failure to deliver 50 per cent except loss of membership. Pool organization differs slightly in different states.

(The Canadian pools prior to 1930 operated as contract pools and members were required to contract to deliver all their wheat to the co-operative marketing society. In some quarters compulsory pools to which all farmers would be compelled to deliver all their wheat have been suggested.)

So long as there was free open marketing of wheat with futures trading in Liverpool, London and other buying centres, the commissioner could not recommend compulsory marketing of all Canadian wheat by a government board. If conditions should change by reason of war or other emergency the government would take whatever course appeared advisable.

Neither in the light of domestic or world conditions would the practicability of a compulsory board stand analysis. Its technical position would be most delicate and its huge holdings would be under constant observation. It would be subject to great criticism.

Lessons to be drawn from experiences of the Canadian wheat pools and their difficulties in 1929-30 when they were compelled to call for government assistance, were that co-operative marketing was essentially sound and held possibilities for the future but that in the past "too much talk and agitation were mixed with business."

Adoption of a selling policy which would dispel ill-will abroad and give the highest satisfaction to customers was of the highest importance Mr. Justice Turgeon said. At the same time, the producer should be made to feel markets were not being retained and extended at too great a sacrifice to his interests.

As a means of ensuring consumer goodwill, the appointment of a representative in London to investigate and report on complaints was proposed. It was also suggested members of the board of grain commissioners should visit the United Kingdom and the continent every two or three years.

The report exonerated John I. McFarland and also James R. Murray, who succeeded Mr. McFarland as chairman of the wheat board in 1935 after the change of government in that year, of criticism levelled against them.

Concerning stabilization the report said Mr. McFarland had an unusually heavy burden and worked in an unprecedented period with no guide to be found in past experience. Stabilization did provide producers with better prices than would have been the case without it.

Regarding Mr. Murray's tenure as chairman of the board, the report found the board had not, as alleged, protected speculative short interests in the Winnipeg wheat market in December, 1935.

Halibut Has Gold Locket, Pretty Girl

BLACKPOOL, England, May 9.— A gold locket tumbled to a fish counter here the other day when a big halibut was being cut up. Inside the locket was found a picture of a girl in her 'teens with long flowing hair in pre-war fashion. The halibut had been caught 300 miles off the northwest coast of Scotland.

LOW PRICED New Firestone STANDARD

Here is the tire sensation of 1938, new in design, new in appearance, with a new high in quality at a remarkably new low price. This new Firestone Standard Tire has everything you want — safety, mileage and economy. See it today at your local Firestone Dealer's — you will agree that it is the greatest tire value ever offered at low prices.

How Does Life Insurance Benefit *Living* Policyholders?

Answer.—It enables policyholders to build a substantial cash reserve for future needs—and at the same time ensure protection for their families.

Question.—How does Life Insurance ensure funds for retirement?

Answer.—When the need of protection is passed, the proceeds of a policy may be used to provide a guaranteed monthly income.

Q.—What percentage of Life Insurance payments are made to living policyholders?

A.—Approximately 75 per cent.

Q.—How is the balance of these payments made?

A.—In death benefits to the beneficiaries of policyholders.

Q.—How much money does Life Insurance distribute each year to *living* policyholders in Canada?

A.—More than $100,000,000 a year.

This is the sixth of a series of messages sponsored by Life Insurance Companies operating in Canada. The seventh, to appear in two weeks' time, will show how Life Insurance savings finance mortgage loans.

The Mercury Visits The British Columbia Coast

FIFTH ARTICLE

Quite a number of my relatives follow the sea, and I can distinctly remember as a small boy, the occasional visits of an uncle at our home after particularly bad spells of stormy weather. This was before the age of motorised fishing craft, and even steam trawlers were not as numerous as now. The visits were chiefly to let my mother know he had reached port safely. Waves at sea [illegible] North Sea fisher[illegible] as the sea [illegible]. The danger came [illegible] several days of [illegible] weather Uncle Ben [illegible] and was telling my mother [illegible] a "big one" had come sweeping [illegible] everything that was of value. "I saw it coming," he said, "and jumped below."

It was with a [illegible] that the Mercury spent [illegible] in the lobby of the Windsor Hotel at Victoria. Included in the group present was the tug boat captain who never wore an overcoat, the young ship mate, the man from southern England who remembered the beauties of the English countryside, the ex-soldier who was working at Esquimalt, the rich man [illegible] and the [illegible] across the road, high up [illegible] a tall building was the [illegible] storm signal, a black canvas cone used throughout the world to warn mariners of storms and the direction from which they come.

We crossed over from Vancouver to Victoria on a Sunday and boarded the boat quite a little time before it departed. After a preliminary survey of the boat we stood at the rail looking down watching the people step from the covered pier to the boat, just a matter of a few feet. The walk of one lady seemed familiar but in a few seconds she had passed from view, and, interested in other things the incident passed from mind. A few minutes later walking along the deck we came face to face with Mrs. Martin, a resident of Tofield for a good many years. The trip over was quite pleasant, the weather being bright and sunny, though quite cool. At Victoria we were met by Mr. C. M. Coombes, who country folk as well as town folk will remember as the proprietor of the feed mill for a number of years. For the benefit of those friends and acquaintances of Mr. and Mrs. Coombes we can say that they have a cottage with garden containing fruit trees, berry bushes and strawberry beds, as well as a profusion of flowers. Even though it was early March, the daffodils, primroses and violets were in bloom. Mr. Coombes is in good health but unfortunately Mrs. Coombes is not, being afflicted with eye trouble.

Victoria Beautiful Despite Her Tantrums

Victoria was in a temper, there was no doubt about it. It rained, it blew a gale of wind, and it snowed—and Victoria should not do such things. You see, Mr. Coombes [illegible] Victoria and he repeatedly said "if you had only waited another month." It was tough on him, alright, but as a visitor, the Mercury could do nothing about it. But even in her worst tantrums, Victoria could not hide all of her charming beauty. Did you ever, after having looked upon snow [illegible] field and bare trees for several months, suddenly look upon a cherry tree in full bloom—many [illegible] trees in full bloom? And see [illegible] primroses and violets, and sense the feel of spring in the air. Real spring with raddishes, spring [illegible] and water-cress. And see the birds, robins and other kinds, hopping around picking up a whisp of [illegible] straw and flying in a [illegible] line to a place known only [illegible] If you have you will know that even if the glory of summer time was not apparent, there [illegible] need for apology, even [illegible] added force to the [illegible].

As a [illegible] Vancouver [illegible] Theatre [illegible] The audience [illegible] the English [illegible] the American type brought [illegible] the picture [illegible] with American country newspapers [illegible] burlesque manner, we were able to appreciate both brands. Later [illegible] restaurant we overheard a lady and gentleman chuckling heartily over the real but dry humor of the English professors, but not a word concerning the American brand.

A Dream Home by the Side of the Sea

The District of Oak Bay lies east of the City proper and is easily reached by street car. It is a splendid residential district and has, in a modest [illegible], its own shopping area. The houses, or at least those which we saw were nice without exactly being pretentious. The more elaborate houses are, we understand, situated in the Uplands, a district we did not visit. However there are plenty of really nice homes in Oak Bay. We walked up Newport Avenue chiefly because it had a nautical and a [illegible] sound to its name. Here there is a home behind a wonderful hedge of holly and ivy. And while we admired the high hedge about half a block in length, we summoned [illegible] courage to step through the gate to see what was on the other side. A splendid home of the "mansion" type greeted the eye with lawns and flower beds and all the landscape finery that goes with it. Retracing [illegible] steps we wandered onto the Marine Drive and there we came upon the "Dream Home by the Side of the Sea." This home really is unique. Constructed of stone, it is built on a rock that juts a very short distance into the sea. The sea actually comes up by the side of the house. There is a cement swimming pool in the yard by the side of the house and the front yard is a very pretty rock garden, with a small stone fountain to the side. As a sea side residence it is the "niftiest"—that is the word—that we have ever seen.

The Windsor hotel is a hostel of the more modest type. It has a history, being one of the earliest buildings in Victoria. It is now being operated by a proprietress and with no bar or dining room is more home like than commercial. Its lobby is small [illegible] comfortable, which comfort [illegible] all the more apparent when the wind is howling outside and the rain makes the asphalt street, in the glare of the street lights look like a river. The group previously mentioned were assembled when we entered the lobby and they spoke of many things. But running through all the narratives was the theme of boats and rough water. We enjoyed the conversation immensely, so much so that we refrained from spoiling it by talking [illegible].
